

Project Images Worksheet

To add photographs, simply click on the space for each image and select the photo to attach from your files. All photos must have a caption and photo credit. Photos should be of good quality. All application materials, including photographs, become the property of the Georgia State Historic Preservation Office and may be reproduced by GA SHPO or its partner organizations without permission; appropriate credit will be given for any such use.

- Photographs should be representative of the information given in the application and show damages as a result of Hurricane Irma
- Date stamped photographs showing the same view before and after hurricane damage is critical for review
- Each set of photos should display a different view which should be described in the caption (i.e. north facade, pre-Irma/post-Irma)
- Exterior photos should be keyed to a site plan which has the north direction marked and interior photos should be keyed to a floor plan. The site or floor plan may be included in this worksheet or attached separately if needed for sufficient clarity of detail
