RE: Comprehensive Plan Update Submittal

The Town of Brooks has completed an update of its comprehensive plan and is submitting it with this letter for review by the Atlanta Regional Commission and the Department of Community Affairs.

I certify that we have held the required public hearings and have involved the public in development of the plan in a manner appropriate to our community's dynamics and resources. Evidence of this has been included with our submittal.

I certify that appropriate staff and decision-makers have reviewed both the Regional Water Plan covering our area and the Rules for Environmental Planning Criteria (O.C.G.A. 12-2-8) and taken them into consideration in formulating our plan.

If you have any questions concerning our submittal, please contact Maurice Ungaro at mungaro@brooksga.com.

Sincerely,

Mayor Daniel Langford

INTRODUCTION

TOWN OF BROOKS

MARKET HALL

This is an exciting time for the Town of Brooks. We're a great place to be in the Atlanta region - our residents love living here, with public surveys showing excellent community ratings. Broadly speaking, a comprehensive plan is a way to guide investment, development and the allocation of services within a jurisdiction. But cities, towns and counties are complicated places, and they make decisions about the future every day, in response to new opportunities or unexpected problems. A Comprehensive Plan like The Town of Brooks' Comprehensive Plan is one tool for helping to guide these decisions, with three distinctive features:

- It is long-range, looking ahead 5, 10, or 25 years
- It is comprehensive, looking across many different facets of what a Town does
- It is deliberative, looking within to understand the needs and desires of the Town

Most of the work of shaping the Town of Brooks' future will be done by the residents and businesses. The Town of Brooks' government has a key role to play through these implementation tools:

- Regulations
- Capital spending
- Programs

The success of the goals of the Town of Brooks depends on being able to tap into the many voices of the town and weave their ideas, viewpoints, and thoughts into a common vision. Outreach and engagement were critical to reach a broad consensus of the diverse people who live and work in the town.

To meet the goal of an inclusive process meant creating multiple venues and opportunities for involvement. The planning team developed communication tools to ensure meaningful community involvement that would form the backbone of the plan.

A Steering Committee was convened to oversee the process and guide the development of the plan. Steering Committee Members were appointed by Town Manager Maurice Ungaro, and included Mayor Daniel Langford, Kay Brumbelow, Brian Davis, Shane Blalock, and Lieze Harris.

A Public Input page and survey was created to inform residents about the comprehensive plan update process and to solicit their feedback on key issues. Paper copies of the survey were available at Town Hall and local businesses. Together, 234 people participated in the survey. In addition to the site and survey, a virtual public meeting was held. These forms of participation were advertised on the Town of Brooks website and social media pages.

These inputs assisted the Steering Committee and the Planning Team in creating goals for the Town of Brooks. These goals recognize that the Town of Brooks is a forward-looking community, engaged in shaping its own future.

BROOKS TODAY

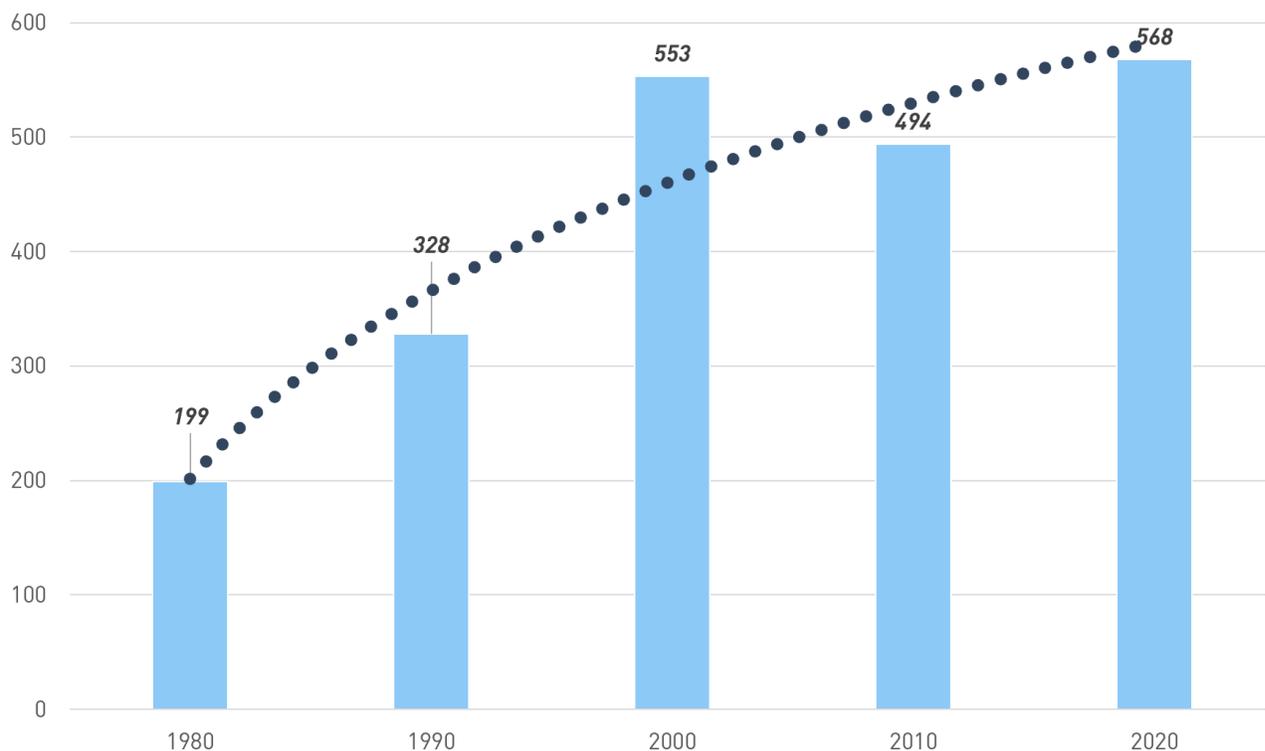

Who We Are

The Town of Brooks is one of metro Atlanta’s smallest incorporated communities. Located in Southern Fayette County, Brooks is a rural crossroad community centered on 85 Connector. Fayetteville, the county seat of Fayette County, is 13 miles to the north, and Griffin is 15 miles to the southeast.

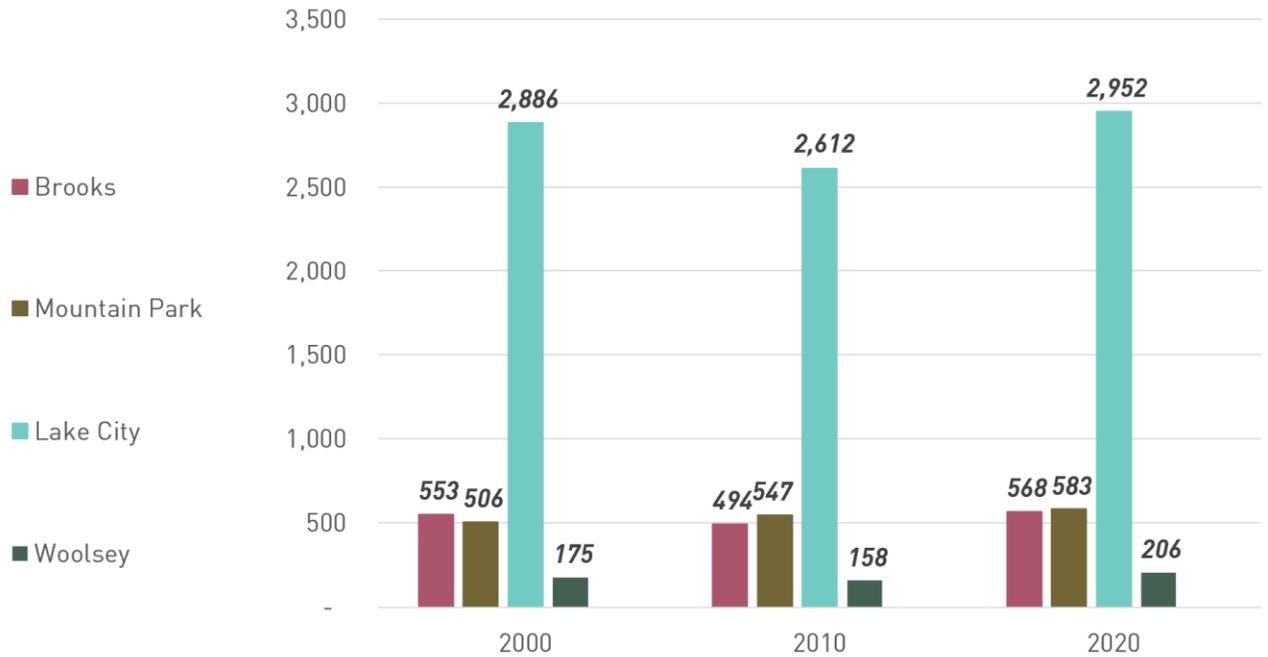

With a small population, the Town of Brooks has had a varied population over the last 15 years. Currently the US Census estimates the population of Brooks to be 568 people, which is a slight increase from its 2010 population of 494.

Racial Composition: Brooks, 2020

■ White ■ Black ■ Asian ■ Other ■ Hispanic

2020 Decennial Census has not yet released full race data, so some race categories (two or more races, American Indian/Alaska Native, Native Hawaiian/Pacific Islander) are not captured on this slide.

The proportion of non-Hispanic Brooks residents identifying as races other than White, Black, Asian, has increased significantly over the last decade, from 5 to 37.

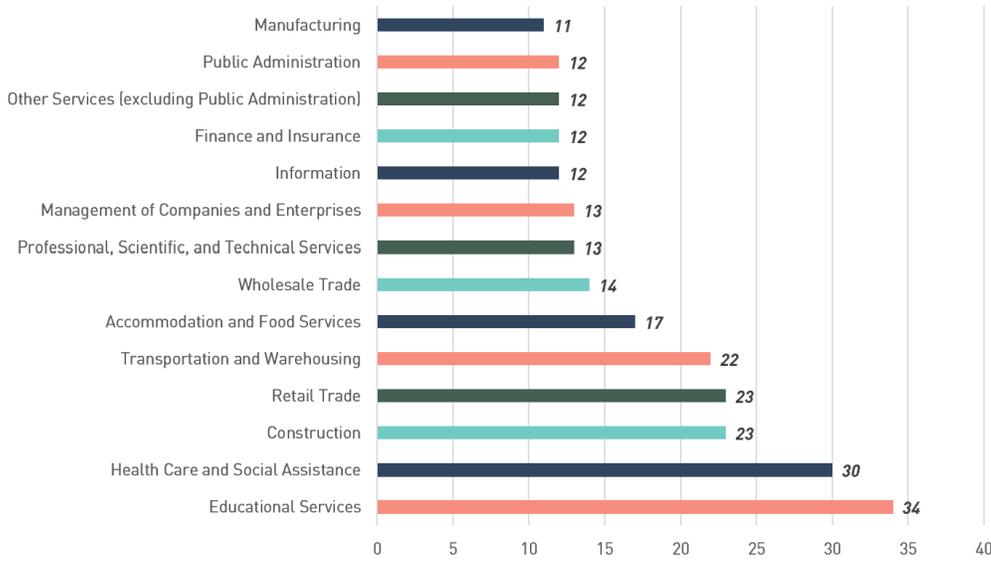

The proportion of Brooks residents identifying as Hispanic or Latinx has decreased to 2.5% from 3.8%.

The Economy of Brooks

The Town of Brooks has employees in eight different job sectors: Educational Services, Construction, Manufacturing, Public Administration, Real Estate and Rental and Leasing, Administration & Support, Waste Management and Remediation, Wholesale Trade, and Other Services (excluding Public Administration). The jobs held by Brooks residents are much more diverse than those within the town. Educational Services, is the most common industry among Brooks residents, followed by Health Care and Social Assistance.

Housing

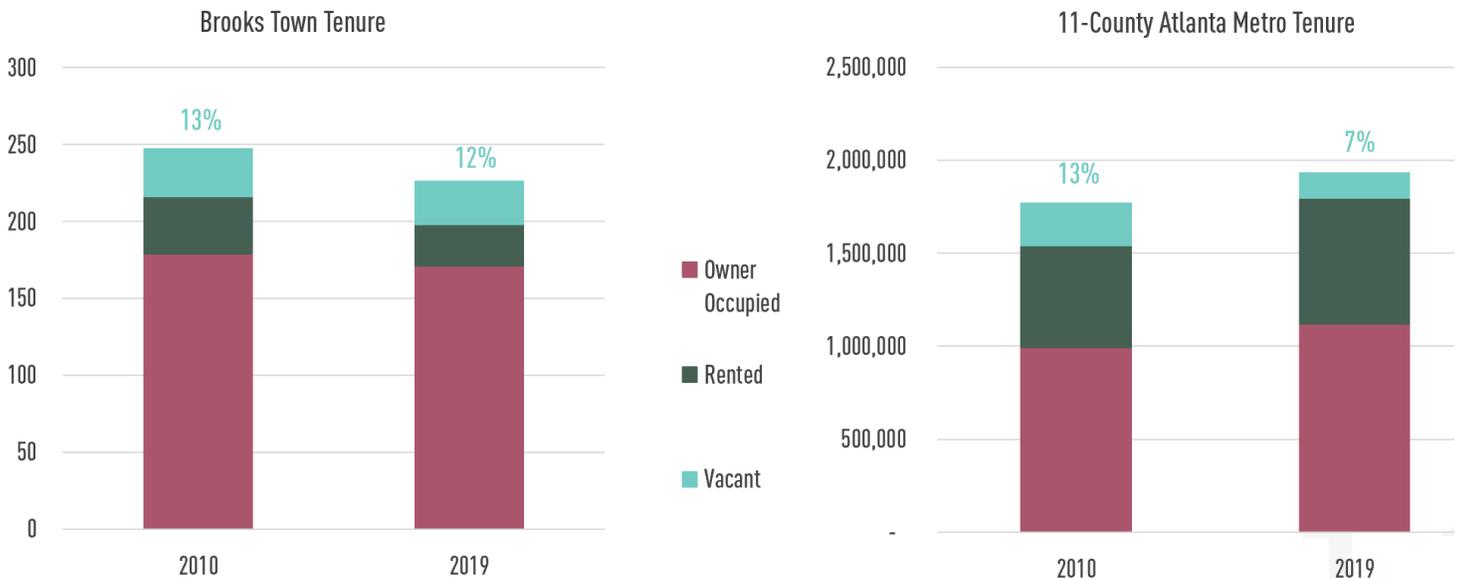

Housing within the Town of Brooks is all single-family. Currently there is about a 12% vacancy rate and about 12% of the homes are rental properties. There are approximately 226 homes in Brooks.

Transportation

The Town of Brooks is situated along the Highway 85 Connector. This road serves as the Main Street through the town. All other streets are local streets serving individual residential areas and are dedicated streets maintained by town. The 2017 Special Purpose Local Option Sales Tax vote allowed the town to expand its capital projects with some key repaving projects and intersection upgrades, however large capital projects are limited in the future.

Fayette County’s Comprehensive Transportation Plan identifies the abandoned Norfolk Southern rail line as a rail-to-trail project. Therefore, the town should actively monitor these plans, encourage citizen participation, and assist the County in executing the project.

WHAT WE HEARD

What We Heard

A Public Input page was created to provide information about the comprehensive planning process, project updates, and to host a survey. The survey contained questions about assets and challenges, what residents would like to see, transportation and housing needs, natural resources, and culturally and historically significant sites.

A paper-based version of the survey was also made available at several locations throughout the town. Altogether, the survey was completed by 234 individuals. The survey was open through February and March and was advertised on Brooks social media pages. A complete record of the responses can be found in the appendix.

On February 1st, 2022, the Town of Brooks and the Atlanta Regional Commission hosted a Virtual Public Meeting to provide information about the planning process and to hear residents' thoughts about what they would like to see over the next five years.

Biggest Challenge Facing Brooks

Bad Internet, we need 1-2 small coffee shops or restaurants downtown to bring a sense community for younger generations to gather, consider walking and or bike trails possibly on the abandon tracks. This would hopefully be safer for the bikers and allow a safe place for exercise. Yes, I support this and my property borders the tracks.

Assets, Challenges, & Goals

Needs and Opportunities

Through community feedback and data analysis, the following needs were identified within the Town of Brooks;

- How to manage growth while protecting the unique atmosphere that drew the people who call the Town of Brooks home
- With limited financial resources, opportunities for capital projects are limited
- More broadband coverage

The following opportunities were identified:

- Attract businesses downtown, such as a coffee shop and corner store
- Improve septic system capacity downtown
- Rail trail
- More events for the community to get together such as food truck days, an annual Brooks festival, a summer festival
- Use the Georgia State Road Race as a catalyst to demonstrate the benefits of cycling to the town

Community Goals

The Town of Brooks is a diverse and forward-looking community engaged in shaping its own future. The people of Brooks are working to capitalize on the qualities and values that have made it a successful community. These goals below seek to address those issues identified and provide a basis for investments and decision making.

- Create systems to assure the maintenance and enhancement of the town
 - Work with Fayette County on providing trail connections around town
 - Work with ARC to identify areas for sidewalk construction
- Improve the intrinsic value of the town through community spaces
 - Create awareness about Brooks with historic markers or plaques
 - Promote awareness of historic tax credits for opportunities for reinvestment
- Encourage any new development to align with and support the town's rural past
 - Town council or a to-be-formed zoning committee could conduct periodic reviews of the zoning ordinance
- Explore opportunities to strengthen citizen involvement in the government
 - Continue to promote the Town website and promote social media channels
 - Create committees to tackle Town issues such as historic preservation and planning and zoning committees

Future Land Use

Land Use

The Town of Brooks is characterized by a town center and surrounding agriculture and rural residential uses. The minimum lot size within the Main Street Area is one acre. In the Agricultural-Residential Area, the minimum lot size is five acres. Currently, about 1/3 of the Town's lots are smaller than five acres. At present, there is no sewer service within the town nor plans to develop a sewer system beyond the double septic tank system serving much of downtown.

The Future Development Map is broken into the following Areas:

- Main Street
- Agricultural-Residential

Main Street

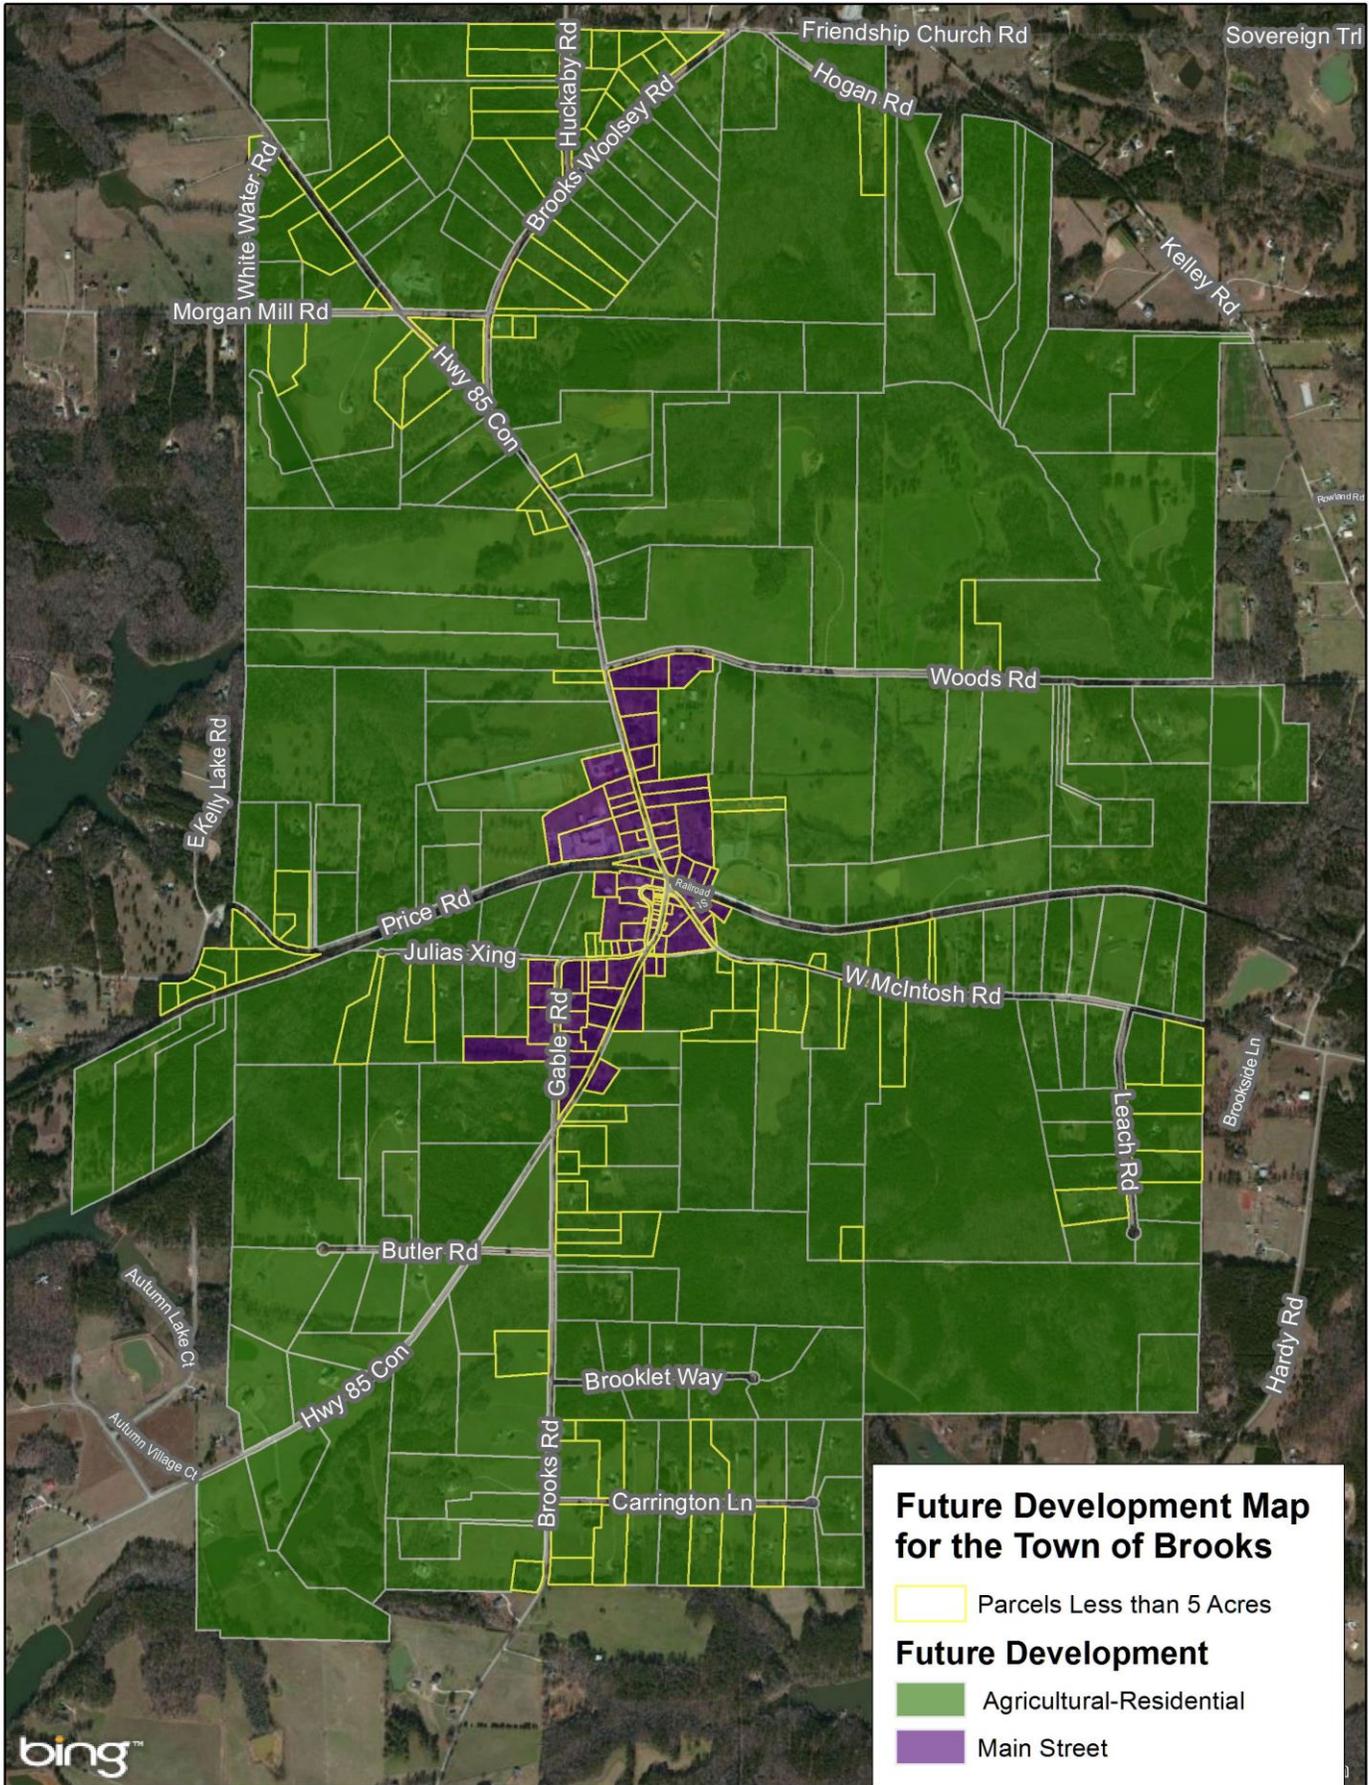

Main Street is comprised of historic properties, commercial uses, single family homes and institutional uses essential to the fabric of the community. Preservation of those historic properties that remain is important to Brooks' sense of place. Any new development or redevelopment should complement the historic nature and scale of Brooks' Main Street.

Agricultural Residential

The Agricultural-Residential area is comprised of properties on large lots, which start at five acres. Common open space and site amenities are not typical in Brooks, as residents appear to favor a less structured environment.

A historic photograph of what is now the Main Street Area

PLAN IMPLEMENTATION

Plan Implementation

A key component of the Comprehensive Plan is to identify projects that the Town of Brooks will undertake to implement the goals of the plan. The following pages list projects the town will undertake in the next five years, the report of the accomplishments since the last plan update, and longer term projects that may not yet be fully developed.

A. Broadband Access

Broadband Access

Senate Bill 402, known as the ACE Act (Achieving Connectivity Everywhere), directs local communities to address broadband availability in local comprehensive plans. The local government must make an objective determination of whether it is served by broadband service. Appropriate follow-up steps must be identified based on the community's determination of whether it is served by broadband. The following map identifies broadband service in Brooks.

Source: Georgia Broadband Center and Federal Communications Commission

As used in this section: “Broadband services” means a wired or wireless terrestrial service that consists of the capability to transmit at a rate of not less than 25 megabits per second in the downstream direction and at least 3 megabits per second in the upstream direction to end users and in combination with such service provides:

- Access to the Internet; or
- Computer processing, information storage, or protocol conversion.

And “Broadband services provider” means any provider of broadband services or a public utility or any other person or entity that builds or owns a broadband network project.

Comprehensive Plan Update Steering Committee Meeting #1

Monday, December 6, 2021, Virtual, at 6:00 PM

Meeting Summary:

The meeting began with introductions of the steering committee, Town of Brooks staff, and ARC staff. Introductions were followed by a slide deck reviewing population, housing, transportation, income, and other relevant data for the town of Brooks. The presentation of data was followed by a set of questions to the steering committee aimed to understand the strengths and challenges in the community, specific considerations for community engagement, and a review of the needs and opportunities from the last plan update to see which items still fit, whether any needed to be updated or removed, and whether any new items need to be added. Responses are below.

What are the best assets in Brooks?

- Small town, everyone knows each other
- Local businesses
- Beautiful countryside, homes on at least five acre lots
- Neighbors know each other
- Beautiful downtown
- People are fiercely proud of being from Brooks
- A stable and thriving small town

Review of Needs:

From the last update, the needs of managing parking in the downtown area has been addressed. A ten space lot has been added downtown and more street parking and spaces are in the pipeline. Accordingly, this need can be removed from the list. The remaining needs remain. More broadband coverage is to be added to the update.

Add to needs: More broadband coverage. Thinking ahead, it was mentioned that Spaulding has a broadband initiative. Brooks Council was told they need to be looking towards leaning into Spaulding's initiative to run the cabling up the road to Brooks. This is a necessary step for more folks to move in to areas without Broadband.

Review of Opportunities:

The steering committee identified several opportunities for the town, including attracting businesses downtown, such as a coffee shop and corner store, improving septic system capacity downtown to allow for new businesses, developing a rail trail, hosting more events to get the community together, such as

food truck days, an annual Brooks festival, and a summer festival, and using the Georgia State Road Race, or other opportunities, to help demonstrate the benefits of cycling to the town.

Community engagement considerations:

The steering committee noted a distinction between residents living in the town of Brooks, and those living in the Brooks zip code. While all ideas are welcome, want to ensure that the ideas of residents are understood and prioritized. A question to distinguish residents is to be added to the survey. There are several other questions the steering committee suggested be added to the survey, including, “what is missing for you in Brooks?”, a map-based question to help identify areas where traffic speeding is a concern, and a question to understand how people feel about the existing five-acre rule.

Town of Brooks

Comprehensive Plan Update Steering Committee Meeting #2

Wednesday, January 19, 2022, Virtual, at 6:00 PM

Meeting Summary:

The meeting consisted of a review of community goals, future land use and characteristics, and the draft of the Public Input site and survey to be advertised to residents as virtual engagement.

Community goals review:

1. Create systems to ensure the maintenance and enhancement of the town

- Work with Fayette County on providing trail connections around town
- Work with ARC to identify areas for sidewalk construction

The steering committee decided this goal and the potential steps to achieve it still fit.

2. Improve intrinsic value of the town through community spaces

- Identify opportunities to list Brooks on the National Register of Historic Places
- Create awareness about Brooks with historic markers or historic plaques
- Promote awareness of historic tax credits for opportunities for reinvestment

The steering committee decided the first bullet point is not actionable and should be removed from the update, but the other steps and main goal still apply.

3. Encourage any new development to align with and support the town's rural past

- Update the zoning code to ensure it matches the Town's vision

The steering committee decided the main goal still applies, but the bullet point no longer applies as the zoning code has been updated. The committee suggested the addition of a new bullet point, stating that the council or possibly a yet-to-be-formed zoning committee could conduct periodic reviews of the zoning ordinance every few years.

4. Explore opportunities to strengthen citizen involvement in the government

- "Continue" to Promote the Town website and promote social media channels
- Create committees to tackle town issues such as historic preservation, planning and zoning, or communications-committees

The steering committee asked that the word "continue" be added at the beginning of the first bullet point, as this goal is underway. Additionally, "communications" is to be removed from the second bullet, noting that what is most needed is a planning and zoning committee. A historic preservation committee could be relevant, but a communication committee is not needed at this time.

The committee recommended that a new point be added, to address capital improvement projects. Steps to address this should include addressing the stormwater system in town, the septic system, and the water system through capital projects.

Future Land Use review

The steering committee indicated that the future land use map is to remain the same.

Town of Brooks

Comprehensive Plan Update Steering Committee Meeting #3

Wednesday, February 23, 2022, Virtual, at 6:00 PM

Meeting Summary:

The third and final meeting consisted of a review of the major themes and findings from the public engagement process. This included results from the public meeting and the survey on assets, challenges, culturally and historically significant sites, Brooks' five-acre rule, natural and environmental resources, what residents would like to see, housing needs, top improvements to downtown. These results were discussed with regard to what should be prioritized in the community work program. The meeting concluded with a review of the changes to the plan's assets and challenges, and community goals.

Themes from the engagement process:

- Assets
 - Small town, safe, low commercialization
- Challenges
 - Growth, internet, speeding, need for a coffee shop downtown
- Quality of life
 - 93% high, 7% average, 0% low
- Culturally or historically significant sites
 - Downtown churches, cemeteries, ball field
 - The steering committee mentioned there could be future opportunities for maintenance of the ball parks and cemeteries
- Five acre rule
 - Supported by 97% of respondents
- Natural and environmental resources
 - Keep housing density low and acreage requirement, keep as much forest as possible for wildlife
- What folks would like to see
 - No changes, a non-chain coffee shop, the railroad converted to a multi-use path
- Housing need
 - Keep subdivisions out, create a volunteer home repair assistance program
 - The steering committee mentioned that local philanthropic and religious organizations might be able to help with this idea, to help partner volunteers with those in town who have housing repair needs.
- Top project downtown
 - Septic improvements, maintenance of downtown buildings, dog park
 - The steering committee said that while one building downtown is blighted, most are in good shape. Some residential structures near downtown need some upkeep. The committee also mentioned that there might be potential for a dog park between the existing ball fields.

In addition to the noted comments, the steering committee also mentioned that more community events such as food truck days, and more support for local businesses would benefit the community.

From the themes identified in the public engagement process, the steering committee decided the priorities should be to focus on small businesses, sewage, and encouraging foot traffic in order to support small businesses downtown. It was noted that sewage might have to be a long range goal

Builders getting greedy with building on any empty farm land Out of fayette county residents driving fast through our streets. Too many trying to change our country life

2 months ago

[⊕ 1 Agree](#)

1-Many newcomers want to change the pace of our small town country life. They want to make it more like the areas they left. We are close enough to the "amenities" they so desperately want that it would be easy for them to go to these places, but that isn't enough for them. They want to change the make up of our town and everything that makes it so special, which will bring more traffic, more crime, and more pollution.

2-We are allowing outsiders to influence our history. The big push all over the country is to give everyone else what they want/get rid of anything that makes someone else uncomfortable. I never thought I'd see our town kowtow to these types of demands, but the recent desecration of the Confederate Veterans Cemetery shows that we are allowing that world in. The sign removal is just another way to appease those who want to erase the history of our country. Furthermore, the fact that our mayor and town manager have told town residents that this sign will be replaced is a misuse of power. The lack of follow through has been disappointing at best and causes residents to realize that our town's leading players haven't been honest, but instead have been stalling, hoping we all will forget.

3-It is absurd that our town requires all members of the town council to reside within the downtown city limits, however, hires someone from a different town entirely to be our town manager. How do we expect someone residing in a different area to adequately fight for and represent the wants and needs of our town? Obviously this person will not want to maintain the quality of life we have here in Brooks, otherwise he would reside here instead. He will continue to work to change our town and make it like the one he chooses to reside in.

Traffic problems: Speeding. And, Liberty Tech could stagger drop off and pick up times by grade and utilize the 2 vehicle access points on opposite sides of the campus that Brooks Elementary successfully used to reduce the standstill traffic on 85 connector, Price Road, etc.

Pressure to over populate with homes on small lots--keep 5 acre minimums. Senoia, Fayetteville, Peachtree City and Griffin are all options for those that do not want to own at 5 acres.

Pressure to increase the business footprint -- plenty of vacant and available commercial property in Senoia, Peachtree City, Fayetteville and Griffin for those that would like to shop or open a business.

Failure to recognize that "progress" is not usually nor necessarily beneficial. If you move here, we welcome you. If you regret leaving there to move here, we encourage you to move back there instead of trying to change here to what you had there.

Traffic on the Connector. I live on the Connector and people speed through here like it's a race. I'm no fuddy duddy, but when I try to get my mail in a 25mph zone. I feel like it could be the last time I might be alive. People don't give a crap how fast they are going and could care less about anybody other than themselves. Put some speed humps in and make them slow down. I'll sit out in the front yard with a beer and watch with a smile on my face. Do something about it! That's what I pay taxes for! Yeah I know...I didn't have to go there.

Control the outcome of future crime spike by having town police. Town funds of the annual budget should be allocated properly to fix current problems instead of adding unnecessary accessories like water fountains, bike racks, benches. Not enough land in the Town of Brooks to keep the 5 acre track rule, therefore if the Town is insistent on keeping the minimum, they will need to annex in more land from unincorporated Fayette County to create more tax revenue as well.

Our current quality of life is high. Overall, we remain largely undeveloped, which is the appeal of our small town. However, those desiring to change it into a town more like Senoia, will be the ruin of this town and its attributes. Inviting in coffee shops, restaurants, bike/walking trails, dog parks, etc. will bring in all of the traffic, pollution, crime, vandalism, etc that you find in other over populated areas.

2 months ago

Two years ago it would have been rated as High! It is past time to cap the growth! And time to discard any notion of developing commercial Properties here; like restaurants or grocery stores. Unless, a small mom and pop diner is in the works- just don't!

2 months ago

Brooks does not need to change. Brooks is the country, and does not need to lose that and become like PTC, Senoia, or any other town.

3 months ago

Would be better if the sewer system could be connected so more businesses could come in and provide the much needed services the community needs and continuously asks for. We also need more growth to be able to support those businesses with enough foot traffic and sales to allow them to even be able to sustain long term. Having walking trails, biking trails, horse trails, and or areas like a dog park where neighbors can enjoy and spend time together as well, outside of their large farm lands. There is so much potential here, and a huge community here that wants and needs more businesses, but they are too afraid to speak up bc of the constant negativity from a select few on Facebook.

The fact that our town manager and mayor are working to erase the significance of this site is disheartening. Please restore the sign and give these soldiers the recognition that their sacrifice deserves. The RR tracks in downtown should have some sort of RR car on them. Taking better care of the baseball park and the football field. It was not too long ago when those parks,

City should not own so much real estate in the downtown, keeping local businesses from coming in. Putman Park is never used. The old Methodist Church should be repurposed to be used daily (perhaps a coffee shop or sandwich shop) instead of it sitting empty. The Market Hall should be used for a permanent Food Hall or coffee shop. The old Fire House has plenty of office space to move Town Hall there, to allow more mom and pop shops downtown.

Town should deny putting in sewage. This is the only reason our town hasn't been turned into Senoia.

2 months ago

Maintain the peacefull vibe in it

2 months ago

Lot sizes should remain no less than 5 acres!

It would be great, especially for the aging population to have a community garden, as many are unable to garden large gardens any longer, but enjoy doing it

Keep as much forest as possible

2 months ago

Housing density needs to remain at 5 acres, except for grandfathered land.

2 months ago

Does the Town of Brooks own property that includes a body of water, stream, etc.? Town of Brooks should support the county to preserve Starrs Mill, and work with the counties that border the Flint River to maintain bridge and wildlife areas adjacent to the river

Preserve 5 acre minimums for single family housing; no multi-family housing as this would create overpopulation and negatively impact natural and environmental resources including wildlife.

Preserve existing recreational areas.

Restrict new business development to existing main street -- use of existing space as it becomes available only. Businesses should be required to get a permit from Town of Brooks to make changes to existing spaces. And, they should be responsible for the expense of any requested upgrades (utilities, sewage, parking, fiber internet, etc.) Note: There are nearby business strips (85 connector and HWY 16; Hwy 16 and Hwy 85) that can accommodate businesses and would be convenient for the residents of Brooks.

2 months ago

Our most significant natural and environmental resources are our land (the town should keep the 5 acre minimum in place or increase this minimum), our wildlife (the county should prevent overdevelopment), and our bodies of water (the town could implement volunteer clean up days to remove the trash).

2 months ago

Keep acreage requirements

2 months ago

Please keep the acreage requirement and do not allow any new subdivisions to be built. Land, space, the rural feel, these are all the reasons why Brooks is so desirable

2 months ago

Land conservation with tax relief for large land owners to preclude forced tax sales.
Purchase of open tracks for public use.
Maintain current acreage zoning.

2 months ago

2 months ago

2 months ago

Lake Horton is a close asset to the community. Keep larger parcels of land.

2 months ago

Close down or widen Gable Rd (between West McIntosh and 85 Connector) as it's too narrow and dangerous. Cars drive too fast down the road and people walking their dogs have almost been hit. Cars constantly drive down the one way road the wrong way almost causing accidents.

What would you like to see in Brooks that doesn't currently exist here?

We have lived in Brooks way over 30 years. It is a quite town, with a real country feel. Don't change this. Leave Brooks alone and leave us to out homes with quite, privacy and country living. Stop trying to change everything to look like Peachtree City. If you want to live in the city, go for it. But this is COUNTRY. Leave us to it.

Keep Brooks the way Brooks is. All these comments from people wanting pizza, coffee -- there are plenty of those places a short drive away. Many of the other amenities I see comments on are available in PCT, Senoia so perhaps that is the place you should be. I'd also like it to be announced WHO developed this survey, and WHY.

2 months ago

Possibly a small coffee shop and/or small general store.

2 months ago

Brooks is a wonderful place to live and play -- as it is.

The new mural is awesome! (Can we please add 30205?)

Changes that could be made are common courtesy changes for example:

Bikers are welcome to enjoy our town, but should understand that they also must comply with the rules of the road.

"Road Race" runners are welcome to enjoy the fresh air and countryside as the race and or run daily, but should respect the private properties along the run -- private driveways are not parking spaces nor water stations for those supporting these run; please take your trash with you as you leave.

Recreational facilities have trash cans -- please use them.

Council should increase minimum acreage requirement to prevent builders from buying up undeveloped land and churning out overpriced houses by the hundreds

2 months ago

And I support single family dwellings only along with the five acre minimum -- no multi-family dwellings.
