RE: Comprehensive Plan Update Submittal

Colquitt County has completed an update of its comprehensive plan and is submitting it with this letter for review by the Southwest Georgia Regional Commission and the Department of Community Affairs.

I certify that we have held the required public hearings and have involved the public in development of the plan in a manner appropriate to our community's dynamics and resources. Evidence of this has been included with our submittal.

I certify that appropriate staff and decision-makers have reviewed both the Regional Water Plan covering our area and the Rules for Environmental Planning Criteria (O.C.G.A. 12-2-8) and taken them into consideration in formulating our plan.

If you have any questions concerning our submittal, please contact Denver F. Braswell, County Chairman, at 229.616.7409

Sincerely,

A handwritten signature in blue ink that reads "Denver F. Braswell".

Introduction

The comprehensive plan is a long-range (15-20 year) statement of a community's vision for development (and redevelopment). By addressing the entire physical environment of the city and the multitudes of functions, policies, and programs that comprise their day-to-day workings, the plan seeks to guide what, when, where, why, and how of future physical changes to the landscape of Colquitt County and its municipalities.

The purpose of a comprehensive plan is to provide a guide for local government officials and other community leaders for making everyday decisions that are supportive of the community's stated goals for its future. The plan should serve as the local government's guide for assessing development proposals, including rezoning applications and redevelopment plans. For residents, business owners, and members of the development community, the plan provides insight into what types of land uses and development are appropriate at various locations throughout the city. Finally, evaluating various local government functions and services, the plan is a point of reference for government staff in preparing capital improvements programs and associated budgets.

The last full Comprehensive Plan for Colquitt County and the Cities of Moultrie, Doerun, Funston, Norman Park, Ellenton, and Berlin was completed in 2018 by the Southwest Georgia Regional Commission (SWGRC). Even though the plan was updated in 2020 to include the broadband element. The five-year update is still required by the Georgia Department of Community Affairs (DCA) in 2022.

The DCA oversees and provides guidance for local comprehensive planning in Georgia. The department's Minimum Standards and Procedures for Local Comprehensive Planning, as updated on October 1, 2018, consists of the following nine distinct components of a comprehensive plan for all local governments: community goals, needs and opportunities, community work program, broadband services element, capital improvements element, economic development element, land-use element, transportation element, and a housing element. Colquitt County is a Tier I job Tax Credit community and therefore according to the DCA's rules will be required to do an economic development element. Colquitt County and all of its municipalities, except Ellenton, also have zoning ordinances and are therefore required to do a land use element as well. Although not required, a transportation element will also be provided by the Southwest Georgia Regional Commission.

Public Involvement

SWGRC's Role

The SWGRC's Planning Department facilitated the 2017 Comprehensive Plan update for Colquitt County and the Cities of Moultrie, Doerun, Funston, Norman Park, Ellenton, and Berlin. Leading community input sessions and Steering Committee meetings, the SWGRC team gathered feedback and guidance from the public and used this information to assemble the Comprehensive Plan and made recommendations that are reflective of the community's desires. The elected officials of each local government hold ultimate responsibility and authority to approve and direct the implementation of the Comprehensive Plan documents.

Public Input and Steering Committee

The 2017 update of the Colquitt County Comprehensive Plan relied heavily on public involvement.

The planning process began with initial public hearings at the county commission and city council meetings on June 9, 2021, and April 21, 2022. The plan requirements were discussed and an overview of the comprehensive planning process as well as various ways the public could participate. Also, a separate virtual meeting was conducted to review the strengths, weaknesses, opportunities, and threats (SWOT). At the two advertised public hearings meetings, eight people participated and nine people attended the second meeting. Comments include changes in city council members, county commissioners, SWOT, and additional projects to the community work program. All the comments received were incorporated into the plan update. The cities of Norman Park and Berlin could not attend the second public hearing, but both cities conducted a joint public hearing on May 10, 2022. Eight people participated in the meeting and minor changes were made and incorporate into the plan update. In addition, the final draft plan was sent to contiguous counties and cities for comments and no comments were received.

Aside from public meetings, the SWGRC planning website (www.swgrcplanning.org) and flyers were utilized to further explain the plan process and requirements and to provide an avenue for residents to be notified of meetings and send questions and concerns to the planner.

Following the initial public hearings, a series of community input sessions were held where the public was invited to help identify the strengths, weaknesses, opportunities, and threats and from that develop a list of needs and opportunities for Colquitt County and each of its municipalities. The next meeting that was held was to develop goals and policies for Colquitt County and each of its municipalities regarding a variety of topics.

The steering committee was formed from various department heads, business owners, residents, and at least one elected official, as required by the DCA's rules for comprehensive planning. The steering committee members are as follows:

- Tina Bridwell, City of Berlin, Councilmember
- Gary Milam, City of Berlin, Councilmember
- Melissa Weathers, City of Berlin, Councilmember
- William McIntosh, City of Moultrie, Mayor

- Angela Castellow, City of Moultrie, Councilmember
- Peter Dillard, City of Moultrie, City Manager
- Brab Young, Colquitt County, PC member
- Brent Chitty, Colquitt County, business owner
- Barbara Jelks, Colquitt County, retired educator
- Justin Cox, Colquitt County, Director of Compliance Office
- Chas Cannon, Colquitt County, County Administrator
- Audie Perry Sr., City of Ellenton, Mayor
- Judy Phillips, City of Ellenton, Councilmember
- Vicki Bunn, City of Ellenton, City Clerk
- George Saunders, City of Doerun, Mayor
- Kevin Branch, City of Doerun, Public Works/Utilities Director
- Ferrell Ruis, City of Funston, Mayor
- Dobson Stripling, City of Funston, Councilmember
- Bobby Ruis, City of Funston, Councilmember
- Robby Clayton, City of Funston, Councilmember
- Jerry Smith, City of Funston, Councilmember
- Bruce Norton, City of Norman Park, Mayor
- Hope Amador, City of Norman Park, City Clerk
- Chuck Snyder, City of Norman Park, Police Officer
- Stephen Godley, City of Moultrie Planning and Zoning Director

The steering committee provided valuable feedback, guidance, and recommendations about the comprehensive plan and served the integral role of guiding the plan as a document representative of the overall goals of Colquitt County and its municipalities.

Review Process

According to the DCA's new rules for comprehensive planning, effective March 1, 2014, each community must transmit the plan to the Southwest Georgia Regional Commission (SWGRC) when all components are complete. The transmittal must also include the community's certification that it has considered both the Regional Water Plan and the Rules for Environmental Planning Criteria. Once it completes its review, the SWGRC will forward the plan to the DCA for review. Once the plan has been found by the DCA to comply with the Minimum Standards and Procedures, each community must adopt the approved plan.

Broadband

The Broadband Element is a required component of the Comprehensive Plan. Colquitt County and the Cities of Berlin, Doerun, Ellenton, Funston, Moultrie, and Norman Park know that technology can make a difference in whether a community succeeds or fails. Technology changes everything. Broadband will help redesign the digital footprint and create a process that will enable communities to meet the demands of healthcare, education and provide services to the citizens. Most communities regionally and nationwide have the highest broadband coverages near the downtown area and these numbers dip as the area becomes more rural. There same can be said of our Colquitt County and its cities. There is a lack of providers willing to provide services and most communities are limited to only one provider. A very limited number of rural communities can afford broadband in the rural areas and have utilized cellular data plans to connect to the internet. A high-speed connection is not affordable for most families. Colquitt County has locations that are 13% underserved. The Cities of Berlin, Doerun, Ellenton, Funston, Moultrie, and Norman Park all have broadband services but would like to improve the quality of services. Colquitt County and the cities are taking steps to address Broadband access or the lack thereof within communities.

On November 5th, 2019, the Colquitt County Board of Commissioners unanimously passed local ordinance ORD-2019-2, the Broadband Ready Community Ordinance, which streamlines the permitting and application process for any Broadband-related projects located in Colquitt County. Colquitt County was one of the very first counties in the State of Georgia to adopt this ordinance. The Moultrie Downtown Development, which receives annual funding from the Colquitt County Board of Commissioners, is establishing a fiber ring around a nine-block area in downtown Moultrie. The fiber ring will provide free public Wi-Fi, as well as security systems and speakers. The project began in February 2020.

In November 2020, Colquitt County became a Broadband Ready community. This designation has helped put Colquitt County in a good position to expand and build upon broadband infrastructures.

Local Broadband service providers, at the urging of local government, recently expanded their digital footprint an additional five miles outside the city of Moultrie in order to reach more rural and underserved areas. The Colquitt County Board of Commissioners, in coordination with the smaller cities of Funston, Norman Park, and Ellenton, unanimously approved the establishment of new cell towers in each of these locations. Although not directly related to Broadband, the establishment of these new towers does provide greater access to technology in rural and underserved areas of the county.

Colquitt County

The statistical information presented in this element was produced using Census information for 1990 through 2015. Traditionally, data was collected using a detailed questionnaire, now the American Community Survey (ACS) is utilized to collect a smaller sample size, which impacts small area estimates. Making projections is not accurate science, and the best information has been utilized to predict future occurrences. The following predictions offer a basis for population projections. It is assumed that there will be no large-scale economic, political, legal or environmental crisis in the region that would impact Colquitt County's long-term growth. It is further assumed that Colquitt County's economic growth will not deviate significantly, and the County will have the necessary resources (water, power, land) and infrastructure to accommodate projected growth.

Strengths, Weaknesses, Opportunities, and Threats (SWOT)

Strengths

- Business-friendly
- Progressive and diverse
- Well marketed
- Location along a transportation network
- College of Osteopathic medicine
- Strong agricultural economy
- Excellent rated public safety
- Connectivity to I-75

Weaknesses

- Marketing of Spence field is lacking
- No utility infrastructure in the county
- Lack of higher-paying jobs
- Illogical boundaries with Moultrie
- Low pay to public safety officers (have become a training ground)
- Technology (Improve the Broadband)

Opportunities

- Spence field
- Grant opportunities
- Market Moultrie's Potential
- Alternative energy
- Hotel/conference center

Threats

- None identified

Needs and Opportunities

Needs

- Although Colquitt County does not own Spence Field, they are directly impacted by it. The benefits spill over into Colquitt County from Moultrie. Marketing of the facilities at Spence Field would benefit Moultrie and Colquitt County.
- Wages for public safety officers is low and Colquitt County has become a training ground for new officers that once trained leave for other jobs that pay more. Higher wages are necessary to retain qualified public safety officers.
- There is a lot of confusion with regards to what properties are in the City of Moultrie and which are in Colquitt County.
- Colquitt County lacks utilities which force most development to the outskirts of Moultrie and other jurisdictions which is not necessarily a bad thing, but the County loses out on some potential economic development projects that want to be in the City of Moultrie for a variety of reasons.

Opportunities

- Spence Field presents a lot of opportunities to both Moultrie and Colquitt County, and each should recognize this and market Spence Field to maximize its economic potential.
- Colquitt County needs to pursue grant funding for eligible projects to help finance efforts.
- Because what benefits the City of Moultrie also tends to benefit Colquitt County some joint marketing efforts should be improved and expanded.
- Moultrie and Colquitt County have some large events and some that happen throughout the year but there is no facility available to seat 300 people comfortably for seminars and meals. A hotel/conference center could be an opportunity that could greatly benefit both Moultrie and Colquitt County.

Goals and Policies

Goal: Economic Prosperity

Encourage development or expansion of businesses and industries that are suitable for the community.

Pathways: Factors to consider when determining suitability include job skills required; long-term sustainability; linkages to other economic activities in the region; impact on the resources of the area; or prospects for creating job opportunities that meet the needs of a diverse local workforce.

Policies:

- We will support programs for retention, expansion and creation of businesses that are a good fit for our community's economy in terms of job skill requirements and linkages to existing businesses.
- We want development whose design, landscaping, lighting, signage, and scale add value to our community

Goal: Resource Management

Promote the efficient use of natural resources and identify and protect environmentally sensitive areas of the community.

Pathways: This may be achieved by promoting energy efficiency and renewable energy generation; encouraging green building construction and renovation; utilizing appropriate waste management techniques; fostering water conservation and reuse; or setting environmentally sensitive areas aside as green space or conservation reserves.

Policies:

- We will preserve the rural character of our community and provide the opportunity for agricultural and forest activities to remain a vital part of the community.
- We support new land uses that contribute to protecting the environment and preserving meaningful open space.

Goal: Efficient Land Use

Maximize the use of existing infrastructure and minimize the costly conversion of undeveloped land at the periphery of the community.

Pathways: This may be achieved by encouraging development or redevelopment of sites closer to the traditional core of the community; designing new development to minimize the amount of land consumed; carefully planning expansion of public infrastructure; or maintaining open space in agricultural, forestry, or conservation uses.

Policies:

- Our community will use land efficiently to avoid the costs associated with urban sprawl.
- We are open to land planning and development concepts that may be new to our area but have been tried successfully in other places.

Goal: Local Preparedness

Identify and put in place the prerequisites for the type of future the community seeks to achieve.

Pathways: These prerequisites might include infrastructure (roads, water and sewer) to support or direct new growth; ordinances and regulations to manage growth as desired; leadership and staff capable of responding to opportunities and managing new challenges; or undertaking an all-hazards approach to disaster preparedness and response.

Policies:

- Our community will make efficient use of existing infrastructure and public facilities in order to minimize the need for costly new/expanded facilities and services.
- We will protect existing infrastructure investments (i.e., already paid for) by encouraging infill redevelopment, and compact development patterns.
- We will ensure that capital improvements needed to accommodate future development are provided concurrent with new development.

Goal: Housing Options

Promote an adequate range of safe, affordable, inclusive, and resource efficient housing in the community.

Pathways: This may be achieved by instituting programs to provide housing for residents of all socio-economic backgrounds, including senior housing; coordinating with local economic development programs to ensure availability of adequate workforce housing in the community.

Policies:

- We support appropriate residential and non-residential in-fill development and redevelopment in ways that complement surrounding areas.

- We will eliminate substandard or dilapidated housing in our community.

Goal: Transportation Options

Address the transportation needs, challenges, and opportunities of all community residents.

Policies:

- Our new and reconstructed roadways will be appropriately designed, using context sensitive design considerations, to enhance community aesthetics and to minimize environmental impacts.
- We will encourage new development that supports and ties in well with existing and planned public transit options in the community.

Goal: Educational Opportunities

Make educational and training opportunities readily available to enable all community residents to improve their job skills, adapt to technological advances, or pursue life ambitions.

Pathways: This can be achieved by expanding and improving local educational institutions or programs; providing access to other institutions in the region; or coordinating with local economic development programs to ensure an adequately trained and skilled workforce.

Policies:

- We will promote and encourage the development of advanced educational programs for all residents in Colquitt County to meet the needs of existing and future industry.

Goal: Community Health

Ensure that all community residents, regardless of age, ability, or income, have access to critical goods and services, safe and clean neighborhoods, and good work opportunities.

Pathways: This may be achieved by providing services to support the basic needs of disadvantaged residents; instituting programs to foster better health and fitness; or providing all residents the opportunity to improve their circumstances in life and to fully participate in the community.

Policies:

- We will promote and encourage the retention and expansion of quality healthcare providers in our community, and we encourage the use of our local hospital network.

Goal: Broadband Options

Make the county a broadband ready community and accessibility to a high-speed internet service to improve the economy, education, agriculture, address the needs, and improve the well-being of the community residents.

Policies:

- We will continue to adhere to the broadband certification policies to remain certified.
- We will continue to follow the adopted broadband ordinance to prevent nuisance that does not conform with the land use policies.
- We will collaborate with broadband service providers to extend a high internet service to unserved and underserved areas.
- We will amend the land-use ordinance when necessary to accommodate broadband installation.

Economic Development

The Comprehensive Economic Development Strategy (CEDS) as developed by the Southwest Georgia Regional Commission under a grant from the US Department of Commerce Economic Development Administration is hereby incorporated by reference into this Comprehensive Plan to serve as the Economic Development Element for Colquitt County and the Cities of Moultrie, Doerun, Norman Park, Ellenton, Berlin and Funston.

The Southwest Georgia Regional Commission's (SWGRC) Comprehensive Economic Development Strategy (CEDS) was designed to bring together the public and private sectors in the creation of an economic roadmap to diversify and strengthen the regional economy. The SWGRC CEDS analyzed the regional economy and serves as a guide for establishing regional goals and objectives, a regional plan of action, and the investment priorities and funding sources.

As a performance-based plan, this CEDS plays a critical role in adapting to global economic conditions by fully utilizing the region's unique advantages to maximize economic opportunity for its residents by attracting the private investment that creates jobs. The SWGRC CEDS is a regionally owned strategy that is the result of a continuing economic development planning process developed with regional public and private sector participation. This plan sets forth the goals and objectives necessary to solve the economic development problems of the Southwest Georgia region and clearly defines the measures of success.

The Southwest Georgia CEDS gives an overview of the region briefly describing geography, population, economy, labor, and workforce development and use, education, transportation access, environment, and regional resources. It reviews the state of the Regional Economy and provides a list of achievable Goals and Objectives for the region, a Plan of Action to ensure success, and Performance Measures used to evaluate the Southwest Georgia Regional Commission's successful development and implementation of the 2012-2017 CEDS. Implementation of the goals identified in this plan is significant to the economic future of the SWGRC District.

Policies, issues and opportunities, and Short-Term Work Program implementation strategies located in the current Comprehensive Plans for each of our 14-county region were used extensively to develop the CEDS Goals and Objectives, Vital Projects and Problems and Opportunities.

Included below are goals and objectives from the CEDS which are aligned with the current economic development goals of Colquitt County and the Cities of Moultrie, Doerun, Norman Park, Ellenton, Berlin and Funston.

Goal: Encourage and increase regional collaboration among cities and counties.

Objective: To increase the likelihood of large-scale economic development projects resulting in jobs and private investment.

Goal: Expand existing industries.

Objective: To increase the potential that existing industries will expand in the region.

Goal: Improve infrastructure of water, sewer roads and technology.

Objective: To increase the likelihood that businesses will be started or moved to the region.

Goal: Support technical colleges within the region.

Objective: To increase the level of education of the region's workforce.

Goal: Increase tourism in the region.

Objective: Increase the region's tax base and local government's ability to provide services and recreational opportunities.

Goal: Recruit retirees to the region.

Objective: Support communities in the region and increase the tax base by recruiting retirees.

Goal: Increase access to capital for small businesses in the region.

Objective: To increase availability and likelihood to access low-interest financing for businesses creating jobs and making private investments.

Goal: Create a diverse economy resistant to economic recession.

Objective: To promote the development of diverse employment opportunities at various skill levels.

Goal: Improve and upgrade the educational attainment levels of the labor workforce skills within the region.

Objective: Develop and support community-based efforts to address improved education levels and labor force skills. Support the continued improvement of the education system in addressing education issues and education skill improvement for the region.

Goal: Provide a well-trained workforce, professional, technical, and skilled, capable of accommodating new industry and maintaining existing industry.

Objective: Improved education attainment by reducing high school drop-out rate.

Colquitt County and its municipalities according to the CEDS...

The population of Colquitt County (including cities) is 45,898, which is a population increase of 400 from the 2010 Census. The poverty rate has grown to 20.4% from 2016-2020. The median household income is \$36,799 between 2016 -2020. Twenty-five percent (25.4%) of the population does not have a high school diploma. With its long growing season and varied types of soils, the county has traditionally been a state leader in agricultural production. Colquitt County currently has the largest farm gate in Georgia. Despite the county's agricultural strength, manufacturing has replaced farming as the largest employment sector in the county. There are six cities in Colquitt County: Berlin, Doerun, Ellenton, Funston, Moultrie and Norman Park. Berlin is a small town in Colquitt County, named after the capitol of Germany. The City of Doerun is home to the Georgia Annual May Day Festival and is sponsored by the Doerun Booster Association. Ellenton and Funston are small towns that are also in Colquitt County. Norman Park is home to the Georgia Baptist Conference Center.

Colquitt County is located within the Southwest Georgia Regional Commission area, a rural and agricultural portion of Georgia. Agribusiness and textile manufacturing remain the most significant contributors to the region's economy. Colquitt County is ranked as the 40th most populous county in the state and is the region's third most populous county, following Dougherty and Thomas Counties. Moultrie is a city of 14,638 in a county of 45,898 people covering 544.15 square miles. Colquitt County also has one of the largest concentrations of Hispanic or migrant workers in Georgia, an important asset to the local farmers. It is estimated the county has between 2,000 to 5,000 migrant workers, depending on the season. Most of these workers are available on a temporary work permit and after five years some become regular U.S. citizens. Migrant farm workers are important to the local economy and are generally undercounted during the census. It is expected that the historical growth trend of the minority population in the county will continue. In contrast, the unincorporated portion of the county has experienced a reverse trend.

The Annual Sunbelt Agricultural Expo is Colquitt County's largest attraction and adds millions of dollars to the local economy. The Expo, held annually in October, draws over 300,000 visitors and is the largest outdoor farm show in North America with field demonstrations, and more than 1,000 corporate

and private exhibitors in the annual event. This event has evolved into an incredible economic development opportunity for the City of Moultrie and Colquitt County.

The Sanderson Farms project brought in 1,500 jobs for the county. That impact has translated into \$90 million of investment from Sanderson farms, more than \$50 million investment from producers in the region, a 30 percent increase in sales tax collections over the past two years and a 7.3 percent growth in the tax digest.

Educational attainment has improved in Colquitt County. A comprehensive effort by the entire community, to include the business community, has significantly improved workforce education and readiness. Results certified by the Georgia Board of Education showed a 93% graduation Colquitt County High School (CCHS) rate for 2015, making CCHS a state leader in that category. The number of adults without elementary education has dropped, as the number of adults with some college or college degrees has grown. However, educational attainment is growing faster at the state level than in Colquitt County. The city of Moultrie is catching up to the state level of adults with college degrees somewhat faster than the county as a whole. Colquitt County is home to Southern Regional Technical College that has over 2,000 students. Brewton-Parker College has a two-year extension degree program, and there is also Abraham Baldwin Agricultural College which is located on the square in downtown Moultrie.

Supplementary Economic Statistics/Data (See Appendix)

Tapestry Segmentation Explained

Tapestry segmentation provides an accurate, detailed description of America's neighborhoods—U.S. residential areas are divided into 67 distinctive segments based on their socioeconomic and demographic composition. The top three tapestry segments in Colquitt County are: Down the Road, Middleburg and Southern Satellites.

Transportation

An integrated transportation system should contribute to a high quality of life for residents and a desirable climate for business. Many transportation issues in Colquitt County are related to the increase in vehicular volumes and congestion. While the automobile is the dominant mode of transportation, the county wants to provide a balanced and coordinated “multi-modal” transportation system to accommodate ongoing growth and development. Comprehensive improvements to all modes of travel can help improve the operation and capacity of the road system.

Road Network

Colquitt County is split down the middle by U.S. Highway 319 running northeast/southwest. State highways in the county include highways 33, 37, 111, 133, 202 and 270. Highway 37 comes from Camilla and Mitchell County through Funston and Moultrie on to Cook County and the City of Adel while highway 133

originates in Valdosta and runs northwest through Berlin, Moultrie and Doerun on its way to Albany. Highway 111 originates in Havana, Florida and runs northeast through Cairo and Meigs before ending just outside of Moultrie in Colquitt County. All these thoroughfares are in fair to good condition and are not overloaded with the exception of possible Highway 133 that is being widened to from Valdosta to Moultrie to Albany. The widening will increase the capacity of Highway 133 considerably and will give Colquitt County another higher capacity transportation route for goods and services to travel upon thus increasing its economic development potential.

Source: SWGRC GIS

Traffic count locations and AADT numbers. Source: GDOT

Traffic counts in Colquitt County are highest on US Highway 319 with annual average daily traffic (AADT) counts of approximately 5,500 to 6,600. Highway 133 is the next busiest with similar numbers to that of US Highway 319. Not surprisingly, the highest numbers are concentrated around Moultrie due to the amount of development present.

Alternative Modes

With regards to bicycling, Colquitt County has little to no bicycle activity and part of this may be since there are no designated bicycle lanes in the county. Many of the county and state roads see so little traffic however that bicycling by any average adult, at least, would be fairly safe.

There is no route based public transportation system that serves the residents of Colquitt County. While the smaller communities may not need a fixed-route system, there is a need for some sort of affordable route-based transportation system in the City of Moultrie. The low-income and elderly populations often do not have access to a personal vehicle and therefore have limited means of getting around town. This becomes problematic as many essential services such as medical and even commercial are not evenly distributed across the city, requiring some to drive across town for these services.

Parking

The current level of service for parking is adequate for the rural nature of Colquitt County and the parking requirements for new development have been designed to provide more than enough parking for commercial developments along the bypass near Moultrie.

Railroads

Colquitt County is serviced by the Norfolk Southern rail line that comes from Sparks (just North of Adel) through Ellenton, just north of Moultrie and finally through Doerun on its way through Worth and Dougherty Counties to the City of Albany. The rail line provides critical freight transport for a number of industries in Colquitt County and the Cities of Ellenton and Doerun.

Land Use

The Future Land Use Map is a required component for all communities that have zoning. It is intended to be an expression of the community's vision for the future, and a guide to its future development patterns citywide. It is based off of previous Future land use maps with updates added to fully meet the trends of development in Colquitt County and was refined with the help of the public during the public outreach portion of the plan's development. It is intended to be representation of the community's vision for the future. Below are descriptions of categories which are utilized on the Future Land Use Map.

Residential

This residential category is intended to correspond primarily to existing neighborhoods but is also proposed for undeveloped areas adjacent to existing neighborhoods. The residential category means residential lot sizes of approximately 7,500 square feet to 22,000 square feet or more. The primary housing type is detached, single-family residential, duplexes and manufactured homes. This future land use category is implemented with one or more residential zoning districts. Regulations may differ according to zoning district; for instance, manufactured homes may be permitted in residential category but not in another. Furthermore, different lot sizes may be established as may be necessary.

Commercial

This category is for land dedicated to commercial business uses, including retail sales, services, and entertainment facilities and service industries. Commercial uses may be located as a single use in one building or grouped together in a shopping center.

Commercial areas are intended to provide suitable areas for those business and commercial uses which primarily serve the public traveling by automobile, and which benefit from direct access to highways. Such districts are generally designed so that the automobile has precedence over the pedestrian. This area is intended to be implemented with one or more commercial zoning districts.

Industrial

This category corresponds to industrial operations which may or may not be objectionable due to the emission of noise, vibration, smoke, dust, gas, fumes, odors, or radiation and that may create fire or explosion hazards or other objectionable conditions. Uses within this district may require substantial quantities of water for manufacturing operations and may require rail, air, or water transportation.

Agricultural/Forestry

The agricultural/forestry land use designation in Colquitt County is intended for those areas outside of the urban service areas which are associated with agricultural farm operations and associated activities, forestry, natural resource conservation, groundwater recharge areas, and low-density residential development that may or may not be accessory to agricultural or farm operation of varying sizes.

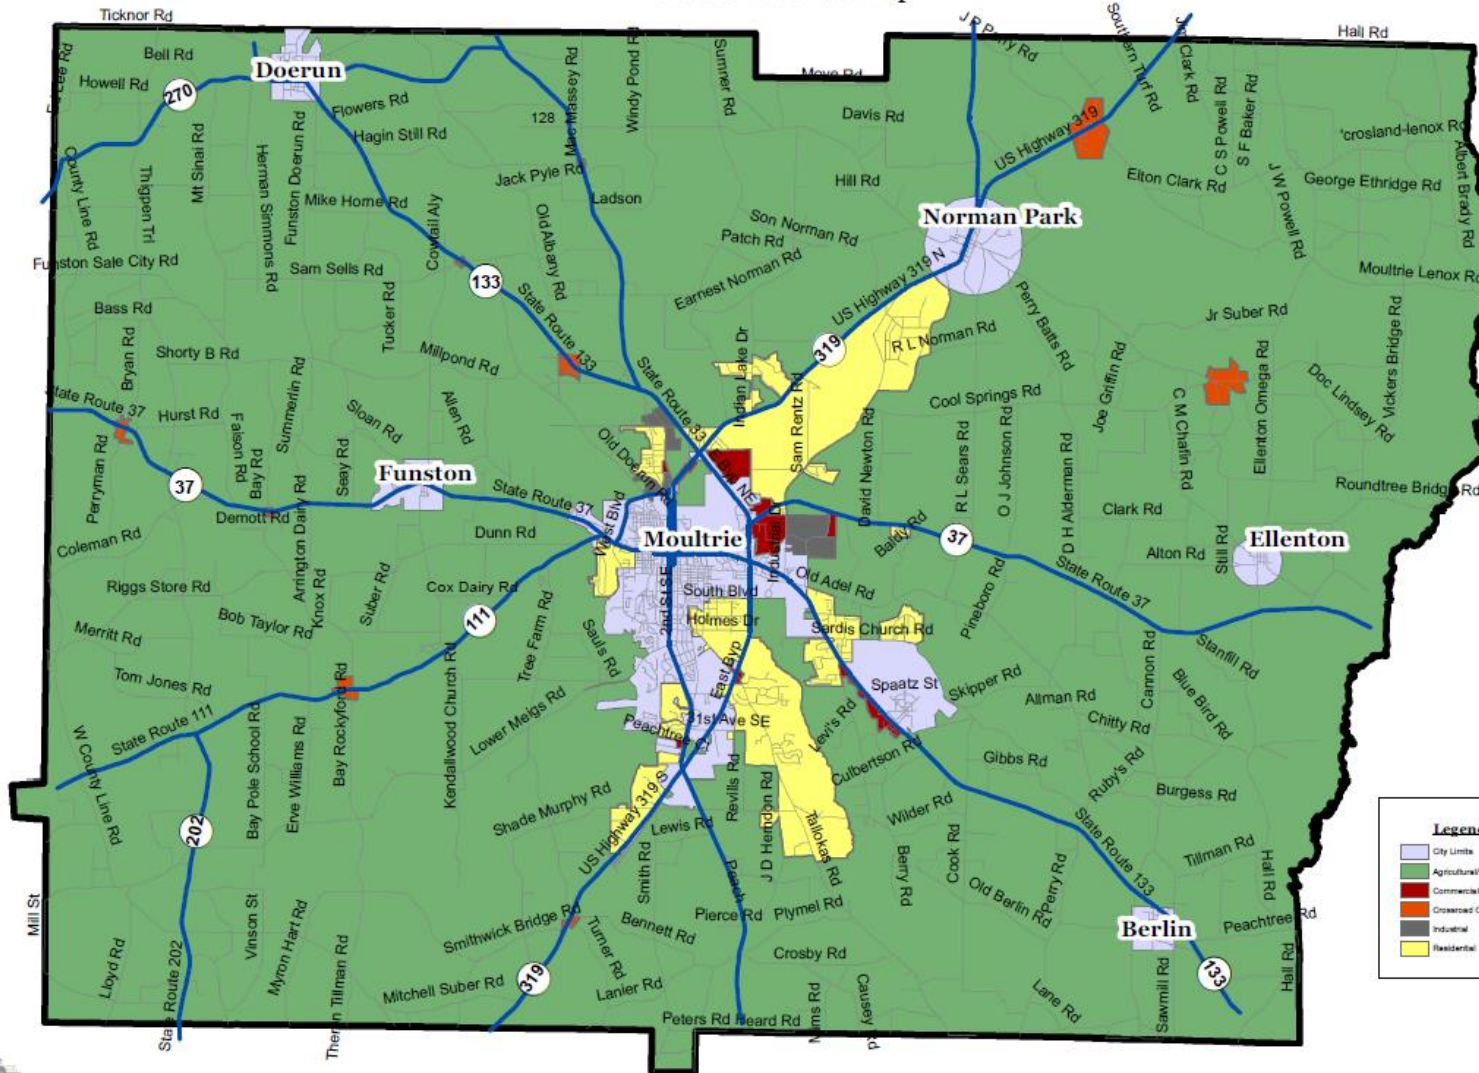

Crossroad Community

Remnants of earlier Colquitt County communities are scattered across the county's landscape and make up this character area. The county has 14 unincorporated communities within its boundaries and includes: Autreyville, Bay, Barbers, Center Hill, Cool Springs, Crosland, Hartsfield, Minnesota, Murphy, New Elm, Pineboro, Schley, Sigsbee and Ticknor. All but two communities (Barbers and Cool Springs) are located along county highways that connect the city of Moultrie to other communities inside and outside of the region. The few homes that can be found in these areas are typically located far apart from one another on large agricultural lots. The communities have few paved roads and the majority of the dirt roads leading to area farms. Sidewalks are non-existent, confining pedestrian access to the gravel edge of area roads. Commercial activities are limited and may not extend beyond a local post office or convenience store.

Development patterns for crossroads communities' areas include Residential developments that incorporate "Corner Commercial" sites, single family homes and commercial centers on appropriate sites. Neighborhood level commercial ventures are allowed and community facilities such as, fire departments voting precincts and community centers.

Colquitt County Report of Accomplishments

In this section, the projects listed within the ROA are evaluated by the municipalities and assessed. The status of each project was assessed and classified. Four classification responses were used to determine the project's status. These classifications are:

- Completed
- Currently Underway (Include a projected completion date)
- Postponed (Include an explanation of the reason)
- Not Accomplished and will no longer be undertaken or pursued by the local government (Include an explanation for the reason)

Any projects that are not completed and active are moved to the new community work program (2023-2027).

Adoption Resolution

Resolution 2022-R-6

A RESOLUTION TO ADOPT THE COLQUITT COUNTY COMPREHENSIVE PLAN

WHEREAS, Colquitt County, Georgia found it necessary to update their joint comprehensive plan as part of the requirements to maintain its Qualified Local Government Status;

WHEREAS, the County Commission held public meetings and hearings to allow private citizens to review the Comprehensive Plan and gathered citizens input;

WHEREAS, in the development of the comprehensive plan, Colquitt County examined, evaluated, and where applicable, incorporated considerations of both the Flint River Basin Regional Water Development and Conservation Plan and the Environmental Planning Criteria pursuant to O.C.G.A. 12-2-8, and;

THEREFORE, BE IT RESOLVED by the Colquitt County Board of Commissioners that the Comprehensive Plan shall be adopted, hereby certifying that adequate citizen participation requirements have been met.

SO RESOLVED, this 5th day of July, 2022.

Denver F. Braswell
Chairman
Colquitt County, Georgia

ATTEST:

Melissa Lawson
County Clerk
Colquitt County, Georgia

Moultrie

The statistical information presented in this element was produced using Census information for 1990 through 2020. Traditionally, data was collected using a detailed questionnaire, now the American Community Survey (ACS) is utilized to collect a smaller sample size, which impacts small area estimates. Making projections is not an accurate science, and the best information has been utilized to predict future occurrences. The following predictions offer a basis for population projections. It is assumed that there will be no large-scale economic, political, legal, or environmental crisis in the region that would impact the City of Moultrie's long-term growth. It is further assumed that Moultrie's economic growth will not deviate significantly, and the city will have the necessary resources (water, power, land) and infrastructure to accommodate projected growth.

Executive Summary

Moultrie
Area: 14.25 square miles

Prepared by SWGRC

Median Household Income

2016 Median Household Income	\$26,006
2021 Median Household Income	\$27,405
2016-2021 Annual Rate	1.05%

Average Household Income

2016 Average Household Income	\$41,138
2021 Average Household Income	\$44,927
2016-2021 Annual Rate	1.78%

Per Capita Income

2016 Per Capita Income	\$15,925
2021 Per Capita Income	\$17,264
2016-2021 Annual Rate	1.63%

Households by Income

Current median household income is \$26,006 in the area, compared to \$54,149 for all U.S. households. Median household income is projected to be \$27,405 in five years, compared to \$59,476 for all U.S. households

Current average household income is \$41,138 in this area, compared to \$77,008 for all U.S. households. Average household income is projected to be \$44,927 in five years, compared to \$84,021 for all U.S. households

Current per capita income is \$15,925 in the area, compared to the U.S. per capita income of \$29,472. The per capita income is projected to be \$17,264 in five years, compared to \$32,025 for all U.S. households

Housing

2000 Total Housing Units	6,322
2000 Owner Occupied Housing Units	2,833
2000 Renter Occupied Housing Units	2,681
2000 Vacant Housing Units	808
2010 Total Housing Units	6,088
2010 Owner Occupied Housing Units	2,460
2010 Renter Occupied Housing Units	2,891
2010 Vacant Housing Units	737
2016 Total Housing Units	6,308
2016 Owner Occupied Housing Units	2,349
2016 Renter Occupied Housing Units	3,217
2016 Vacant Housing Units	742
2021 Total Housing Units	6,423
2021 Owner Occupied Housing Units	2,365
2021 Renter Occupied Housing Units	3,286
2021 Vacant Housing Units	772

Currently, 37.2% of the 6,308 housing units in the area are owner occupied; 51.0%, renter occupied; and 11.8% are vacant. Currently, in the U.S., 55.4% of the housing units in the area are owner occupied; 32.9% are renter occupied; and 11.7% are vacant. In 2010, there were 6,088 housing units in the area - 40.4% owner occupied, 47.5% renter occupied, and 12.1% vacant. The annual rate of change in housing units since 2010 is 1.59%. Median home value in the area is \$93,953, compared to a median home value of \$198,891 for the U.S. In five years, median value is projected to change by 5.27% annually to \$121,473.

Data Note: Income is expressed in current dollars

Strengths, Weaknesses, Opportunities and Threats (SWOT)

Strengths

- Dedicated municipal staff
- Community spirit
- Ability to work together with other jurisdictions and authorities
- Good schools
- Ample recreational opportunities
- Dive Center
- YMCA
- Small town feel
- Location along transportation network
- Hospital
- Downtown
- A fiber ring has been installed around our downtown area
- PCOM Philadelphia College of Osteopathic Medicine
- Widening of state route 133 from Albany to Valdosta

Weaknesses

- Blighted neighborhoods
- Lower educational levels of residents and untrained workforce
- Lack of higher paying jobs in Moultrie
- Technology (Improve the Broadband)
- Ill-defined service area
- Ill-defined city limits
- Infrastructure in SE

Opportunities

- Redevelopment potential throughout town
- Infill development
- Market Moultrie's Potential
- More nightlife in the downtown
- Stadium near downtown
- Improved connections to bypass
- Commercial growth
- Industrial growth

Threats

- Declining income levels
- Health of the public
- Loss of big industries
- Noise and air pollution from vehicles using I-75
- Drugs & crime

Needs and Opportunities

Needs

- We'd like to promote revitalization throughout our town, particularly in residential neighborhoods and some former commercial and industrial areas.
- We need to promote training opportunities for our workforce to improve our local workforce.
- We need to improve our levels of educational and promote the benefits of finishing school and continuing with lifelong education to attract higher paying, higher skill jobs.

Opportunities

- Moultrie can be described as a full-service city (hospital, YMCA, full range of utilities, access to transportation routes, etc.) with excellent amenities and promoting those benefits and the potential Moultrie has would attract the industry and jobs the City of Moultrie desires.
- There is redevelopment potential throughout Moultrie that could be done to increase the tax rolls and reuse land that already has utilities.
- The residential neighborhoods around town have numerous infill opportunities available.
- Downtown Moultrie (particularly the square) is easily characterized as the gem of Moultrie and there is lots of opportunities for improving and strengthening that image. Bringing nightlife to the downtown would provide an attraction for young individuals and assuage the negative aspects of the small-town feel. Basically, rebranding downtown Moultrie as a destination any time of the day would be a huge benefit.
- One key problem with Moultrie's downtown is the fact that it is relatively hidden in the fact that visitors have a confusing route to enter and exit the downtown to and from the bypass. Connections need to be more visible and aesthetically appealing to and from the downtown.

Goals and Policies

Goal: Economic Prosperity

Encourage development or expansion of businesses and industries that are suitable for the community. Factors to consider when determining suitability include job skills required; long-term sustainability; linkages to other economic activities in the region; impact on the resources of the area; or prospects for creating job opportunities that meet the needs of a diverse local workforce.

Policies:

- We will support programs for retention, expansion and creation of businesses that are a good fit for our community's economy in terms of job skill requirements and linkages to existing businesses.
- We will target reinvestment to declining, existing neighborhoods, vacant or underutilized sites or buildings in preference to new economic development projects in Greenfield (previously undeveloped) areas of our community.

Goal: Resource Management

Promote the efficient use of natural resources and identify and protect environmentally sensitive areas of the community. This may be achieved by promoting energy efficiency and renewable energy generation; encouraging green building construction and renovation; utilizing appropriate waste management techniques; fostering water conservation and reuse; or setting environmentally sensitive areas aside as green space or conservation reserves.

Policies:

- We will encourage new development to locate in suitable locations in order to protect natural resources, environmentally sensitive areas, or valuable historic, archaeological or cultural resources from encroachment.
- We will factor potential impacts on air and water quality in making decisions on new developments and transportation improvements. We will promote the protection and maintenance of trees and green open space in all new development.
- We will promote enhanced solid waste reduction and recycling initiatives.

Goal: Efficient Land Use

Maximize the use of existing infrastructure and minimize the costly conversion of undeveloped land at the periphery of the community. This may be achieved by encouraging development or redevelopment of sites closer to the traditional core of the community; designing new development to minimize the amount of land consumed; carefully planning expansion of public infrastructure; or maintaining open space in agricultural, forestry, or conservation uses.

Policies:

- We are committed to redeveloping and enhancing existing commercial and industrial areas within our community in preference to new development in Greenfield (previously undeveloped) areas of the community.
- We will encourage development of a rational network of commercial nodes (villages, or activity centers) to meet the service needs of citizens while avoiding unattractive and inefficient strip development along major roadways.

Goal: Local Preparedness

Identify and put in place the prerequisites for the type of future the community seeks to achieve. These prerequisites might include infrastructure (roads, water, and sewer) to support or direct new growth; ordinances and regulations to manage growth as desired; leadership and staff capable of responding to opportunities and managing new challenges; or undertaking an all-hazards approach to disaster preparedness and response.

Policies:

- Our community will make efficient use of existing infrastructure and public facilities to minimize the need for costly new/expanded facilities and services.
- We will protect existing infrastructure investments (i.e., already paid for) by encouraging infill redevelopment, and compact development patterns.

Goal: Sense of Place

Protect and enhance the community's unique qualities. Maintain the downtown as a focal point of the community; fostering compact, walkable, mixed-use development; protecting and revitalizing historic areas of the community; encouraging new development that is compatible with the traditional features of the community; or protecting scenic and natural features that are important to defining the community's character.

Policies:

- We will encourage the development of downtown as a vibrant center of the community to improve overall attractiveness and local quality of life.

Goal: Regional Cooperation

Cooperate with neighboring jurisdictions to address shared needs. This may be achieved by actively participating in regional organizations; identifying joint projects that will result in greater efficiency and less cost to the taxpayer; or developing collaborative solutions for regional issues such as protection of shared natural resources, development of the transportation network, or creation of a tourism plan.

Policies:

- We will work jointly with neighboring jurisdictions on developing solutions for shared regional issues (such as growth management, watershed protection)
- We will consult other public entities in our area when making decisions that are likely to impact them.

Goal: Housing Options

Promote an adequate range of safe, affordable, inclusive, and resource efficient housing in the community. This may be achieved by encouraging development of a variety of housing types, sizes, costs, and densities in each neighborhood; instituting programs to provide housing for residents of all socio-economic backgrounds; or coordinating with local economic development programs to ensure availability of adequate workforce housing in the community.

Policies:

- We will eliminate substandard or dilapidated housing in our community.
- We will stimulate infill housing development in existing neighborhoods
- We will encourage development of housing opportunities that enable residents to live close to their places of employment. We will increase opportunities for low-to-moderate income families to move into affordable owner-occupied housing.

Goal: Transportation Options

Address the transportation needs, challenges, and opportunities of all community residents. This may be achieved by fostering alternatives to transportation by automobile, including walking, cycling, and transit; employing traffic calming measures throughout the community; requiring adequate connectivity between adjoining developments; or coordinating transportation and land use decision-making within the community.

Policies:

- We support creation of a community-wide pedestrian/bike path network.

Goal: Educational Opportunities

Make educational and training opportunities readily available to enable all community residents to improve their job skills, adapt to technological advances, or pursue life ambitions. This can be achieved by expanding and improving local educational institutions or programs; providing access to other institutions in the region; or coordinating with local economic development programs to ensure an adequately trained and skilled workforce.

Policies:

- We will promote and encourage the development of advanced educational programs for all residents in Moultrie to meet the needs of existing and future industry.

Goal: Community Health

Ensure that all community residents, regardless of age, ability, or income, have access to critical goods and services, safe and clean neighborhoods, and good work opportunities. This may be achieved by providing services to support the basic needs of disadvantaged residents; instituting programs to foster better health and fitness; or providing all residents the opportunity to improve their circumstances in life and to fully participate in the community.

Policies:

- Creation of recreational facilities and set-aside of greenspace are important to our community.
- We are committed to providing pleasant, accessible public gathering places and parks throughout the community.

Goal: Broadband Options

Make the City of Moultrie a broadband ready community and accessibility to a high-speed internet service to improve the economy, education, agriculture, address the needs, and improve the well-being of the community residents.

Policies:

- We will be a broadband certified community.
- We will develop a broadband ordinance and adopt it to regulate the installation.
- We will collaborate with broadband service providers to extend a high internet service to unserved and underserved areas.
- We will amend the land-use ordinance when necessary to accommodate broadband installation.

The map below shows locations with the City of Moultrie that are served, unserved and no location for a broadband availability. According to the U.S Census bureau, 69.9% of households have a broadband internet subscription between 2016-2020. That is 30.1% of households are not with a broadband subscription. Also, the number of households with a computer is 83.9%. Every community deserve access to a high-speed internet. According to the Pew Institute, nearly 21 million Americans, mostly in rural areas, still lack a reliable high-speed connection.

Broadband is a critical infrastructure in the 21st century and very essential to our education, healthcare, agriculture, economic vitality, and basic quality of life.

Economic Development

The Comprehensive Economic Development Strategy (CEDS) as developed by the Southwest Georgia Regional Commission under a grant from the US Department of Commerce Economic Development Administration is hereby incorporated by reference into this Comprehensive Plan to serve as the Economic Development Element for Colquitt County and the Cities of Moultrie, Doerun, Norman Park, Ellenton, Berlin and Funston.

The Southwest Georgia Regional Commission's (SWGRC) Comprehensive Economic Development Strategy (CEDS) was designed to bring together the public and private sectors in the creation of an economic roadmap to diversify and strengthen the regional economy. The SWGRC CEDS analyzed the regional economy and serves as a guide for establishing regional goals and objectives, a regional plan of action, and the investment priorities and funding sources.

As a performance-based plan, this CEDS plays a critical role in adapting to global economic conditions by fully utilizing the region's unique advantages to maximize economic opportunity for its residents by attracting the private investment that creates jobs. The SWGRC CEDS is a regionally owned strategy that is the result of a continuing economic development planning process developed with regional public and private sector participation. This plan sets forth the goals and objectives necessary to solve the economic development problems of the Southwest Georgia region and clearly defines the measures of success.

The Southwest Georgia CEDS gives an overview of the region briefly describing geography, population, economy, labor, and workforce development and use, education, transportation access, environment, and regional resources. It reviews the state of the Regional Economy and provides a list of achievable Goals and Objectives for the region, a Plan of Action to ensure success, and Performance Measures used to evaluate the Southwest Georgia Regional Commission's successful development and implementation of the 2012-2017 CEDS. Implementation of the goals identified in this plan is significant to the economic future of the SWGRC District.

Policies, issues and opportunities, and Short-Term Work Program implementation strategies located in the current Comprehensive Plans for each county in our 14 county region were used extensively to develop the CEDS Goals and Objectives, Vital Projects and Problems and Opportunities.

Included below are goals and objectives from the CEDS which are aligned with the current economic development goals of Colquitt County and the Cities of Moultrie, Doerun, Norman Park, Ellenton, Berlin and Funston.

Goal: Encourage and increase regional collaboration among cities and counties.

Objective: To increase the likelihood of large-scale economic development projects resulting in jobs and private investment.

Goal: Expand existing industries.

Objective: To increase the potential that existing industries will expand in the region.

Goal: Improve infrastructure of water, sewer roads and technology.

Objective: To increase the likelihood that businesses will be started or moved to the region.

Goal: Support technical colleges within the region.

Objective: To increase the level of education of the region's workforce.

Goal: Increase tourism in the region.

Objective: Increase the region's tax base and local government's ability to provide services and recreational opportunities.

Goal: Recruit retirees to the region.

Objective: Support communities in the region and increase the tax base by recruiting retirees.

Goal: Increase access to capital for small businesses in the region.

Objective: To increase availability and likelihood to access low-interest financing for businesses creating jobs and making private investments.

Goal: Create a diverse economy resistant to economic recession.

Objective: To promote the development of diverse employment opportunities at various skill levels.

Goal: Improve and upgrade the educational attainment levels of the labor workforce skills within the region.

Objective: Develop and support community-based efforts to address improved education levels and labor force skills. Support the continued improvement of the education system in addressing education issues and education skill improvement for the region.

Goal: Provide a well-trained workforce, professional, technical, and skilled, capable of accommodating new industry and maintaining existing industry.

Objective: Improved education attainment by reducing high school drop-out rate.

Colquitt County and its municipalities according to the CEDS...

The population of Colquitt County (including cities) is 45,898, which is a population increase of 400 from the 2010 Census. The poverty rate has grown from 26.7% to 27.0% from 2013-2020. The median household income is \$28,621. Twenty-four percent (24.1%) of the population does not have a high school diploma. With its long growing season and varied types of soils, the county has traditionally been a state leader in agricultural production. Colquitt County currently has the largest farm gate in Georgia. Despite the county's agricultural strength, manufacturing has replaced farming as the largest employment sector in the county. There are six cities in Colquitt County: Berlin, Doerun, Ellenton, Funston, Moultrie and Norman Park. Berlin is a small town in Colquitt County, named after a German city, and is considered to be a speed trap. The City of Doerun is home to the GA Annual May Day Festival and is sponsored by the Doerun Booster Association. Ellenton, Funston, and Riverside are small towns located within Colquitt County. The City of Norman Park is home to the Georgia Baptist Conference Center.

Colquitt County is located within the Southwest Georgia Regional Commission area, a very rural and agriculturally oriented portion of Georgia. Agribusiness and textile manufacturing remain the most significant contributors to the region's economy. Colquitt County is ranked as the 40th most populous county in the state and is the region's third most populous county, following Dougherty and Thomas Counties. Moultrie is a city of 14,638 in a county of 45,898 people covering 544.15 square miles. Colquitt County also has one of the largest concentrations of Hispanic or migrant workers in Georgia, an important asset to the local farmers. It is estimated the county has between 2,000 to 5,000 migrant workers, depending on the season. The majority of these workers are available on a temporary work permit and after five years some become regular U.S. citizens. Migrant farm workers are important to the local economy and are generally undercounted during the census. It is expected that the historical

growth trend of the minority population in the county will continue. In contrast, the unincorporated portion of the county has experienced a reverse trend.

The Annual Sunbelt Agricultural Expo is Colquitt County's largest attraction and adds millions of dollars to the local economy. The Expo, held annually in October, draws over 300,000 visitors annually and is the largest outdoor farm show in North America with field demonstrations, and more than 1,000 corporate and private exhibitors at the annual event. This event has evolved into an incredible economic development opportunity for the City of Moultrie and Colquitt County.

The Sanderson Farms project brought in 1,500 jobs for the county, exceeding expectations of all involved. That impact has translated into \$90 million of investment from Sanderson farms, more than \$50 million investment from producers in the region, a 30-percent increase in sales tax collections over the past two years and a 7.3 percent growth in the tax digest.

Educational attainment has grown in Colquitt County. A comprehensive effort by the entire community, to include the business community, is significantly improving workforce education and readiness. Results certified by the Georgia Board of Education gave Colquitt County High School (CCHS) a 93% graduation rate for 2015, making CCHS a state leader in that category. The number of adults without elementary education has dropped, as the number of adults with some college or college degrees has grown. However, educational attainment is growing faster at the state level than in Colquitt County. The city of Moultrie is catching up to the state level of adults with college degrees somewhat faster than the county as a whole. Colquitt County is home to Southern Regional Technical College that has over 2,000 students. Brewton-Parker has a 2-year extension degree program, and also Abraham Baldwin Agricultural College which is located on the square in downtown Moultrie.

Supplementary Economic Statistics/Data (See Appendix)

Tapestry Segments Explained

Tapestry segmentation provides an accurate, detailed description of America's neighborhoods—U.S. residential areas are divided into 67 distinctive segments based on their socioeconomic and demographic composition. The top three tapestry segments in Moultrie are: Small Town Simplicity, Heartland Communities and Hardscrabble Road.

Transportation

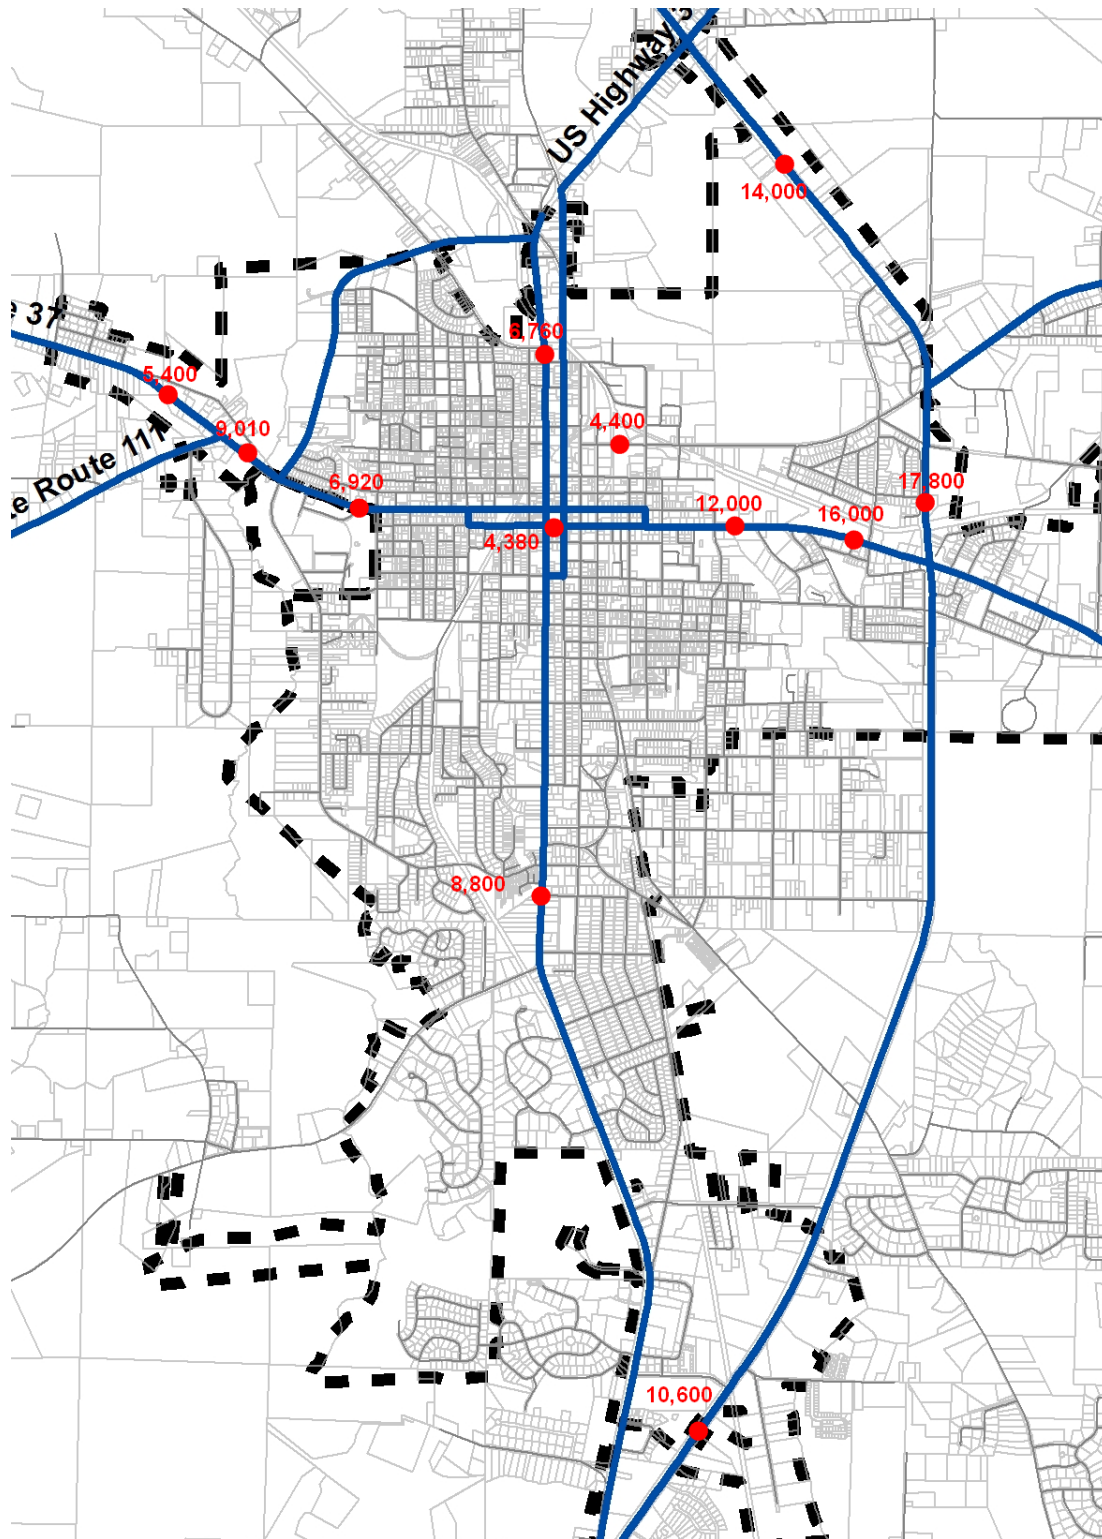

An integrated transportation system should contribute to a high quality of life for residents and a desirable climate for business. Many transportation issues in Moultrie are related to the increase in vehicular volumes and congestion. While the automobile is the dominant mode of transportation, the City wants to provide a balanced and coordinated “multi-modal” transportation system to accommodate ongoing growth and development. Comprehensive improvements to all modes of travel can help improve the operation and capacity of the road system.

Road Network

The City of Moultrie is split by Georgia Highway 37 through the Downtown. As seen on the traffic count map below the average annual daily trips (AADT) along the route vary at

different points along the route through Moultrie. The highest counts occur just east of US Highway 319 with 16,000 AADT. Moultrie essentially has a bypass around 75% of the city formed by US319, GA33 and GA111.

Traffic count locations and AADT numbers. Source: GDOT

Alternative Modes

With regards to bicycling, Colquitt County has little to no bicycle activity and part of this may be due to the fact that there are no designated bicycle lanes available in the county. Many of the county and state roads see so little traffic however that bicycling by any average adult, at least, would be fairly safe. Moultrie has a lot of sidewalks, but they tend to be concentrated in downtown and the historic residential areas south of the downtown. The City of Moultrie does have a walking trail that was a rail-to-trail project that is used by many local residents. However, the trail lacks connectivity within Moultrie and does not connect to any of the surrounding communities.

There is no route based public transportation system that serves the residents of Colquitt County. While the smaller communities may not need a fixed-route system, there is a need for some sort of affordable route-based transportation system in the City of Moultrie. The low-income and elderly populations often do not have access to a personal vehicle and therefore have limited means of getting around town. This becomes problematic as many essential services such as medical and even commercial are not evenly distributed across the city, requiring some to drive across town for these services.

Parking

On-street is the preferred method of parking in all of the communities in Colquitt County. Commercial activity centers typically have ample on-site parking for their customers. However, there are very few public parking lots in any of the downtowns in Colquitt County. As commercial activity increases in downtown Moultrie, the parking around civic buildings may become increasingly problematic, as these same parking spots must be shared with patrons of the surrounding commercial entities. Coupled with the one-way streets in Moultrie's downtown, circling the area numerous times in order to find available parking or park a considerable way away from their intended destination may become more common.

Railroads

Moultrie no longer has a railroad in town. It once had a CSX rail line that became abandoned and then became a rail trail. The Norfolk southern line that comes from Ellenton come just north of the city on its way to Doerun bypassing Moultrie.

Land Use

The Future Land Use Map is a required component for all communities that have zoning. It is intended to be an expression of the community's vision for the future, and a guide to its future development patterns citywide. It is based off of previous Future land use maps with updates added to fully meet the trends of development in Moultrie and was refined with the help of the public during the public outreach portion of the plan's development. It is intended to be representation of the community's vision for the future. Below are descriptions of categories which are utilized on the Future Land Use Map.

Residential

This residential category is intended to correspond primarily to existing neighborhoods but is also proposed for undeveloped areas adjacent to existing neighborhoods. The residential category means residential lot sizes of approximately 7,500 square feet to 22,000 square feet or more. The primary housing type is detached, single-family residential, duplexes and manufactured homes. This future land use category is implemented with one or more residential zoning districts. Regulations may differ according to zoning district; for instance, manufactured homes may be permitted in residential category but not in another. Furthermore, different lot sizes may be established as may be necessary.

Commercial

This category is for land dedicated to commercial business uses, including retail sales, services, and entertainment facilities and service industries. Commercial uses may be located as a single use in one building or grouped together in a shopping center.

Commercial areas are intended to provide suitable areas for those business and commercial uses which primarily serve the public traveling by automobile, and which benefit from direct access to highways. Such districts are generally designed so that the automobile has precedence over the pedestrian. This area is intended to be implemented with one or more commercial zoning districts.

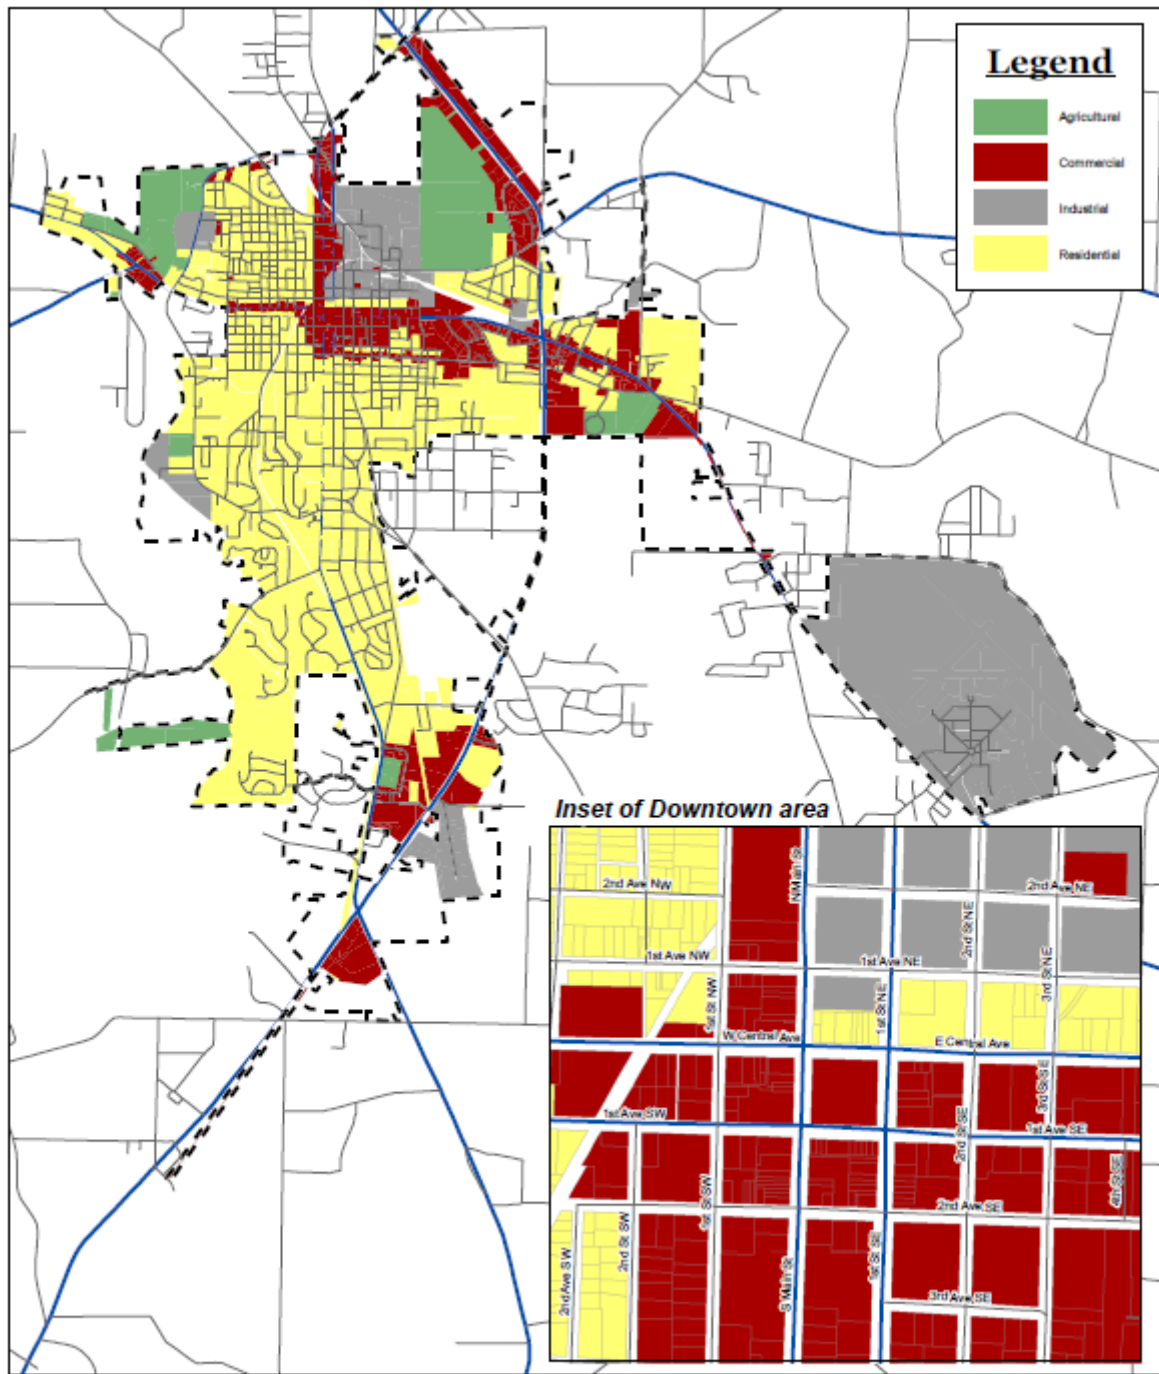

Industrial

This category corresponds to industrial operations which may or may not be objectionable due to the emission of noise, vibration, smoke, dust, gas, fumes, odors, or radiation and that may create fire or

explosion hazards or other objectionable conditions. Uses within this district may require substantial quantities of water for manufacturing operations and may require rail, air, or water transportation.

Agricultural

The agricultural/forestry land use designation in Moultrie is intended for those areas outside of the urban service areas which are associated with agricultural farm operations and associated activities, forestry, natural resource conservation, groundwater recharge areas, and low-density residential development that may or may not be accessory to agricultural or farm operation of varying sizes.

Moultrie

Future Land Use Map

Moultrie Report of Accomplishment 2018-2022

In this section, the projects listed within the ROA are evaluated by the municipalities and assessed. The status of each project was assessed and classified. Four classification responses were used to determine the project's status. These classifications are:

- Completed
- Currently Underway (Include a projected completion date)
- Postponed (Include an explanation of the reason)
- Not Accomplished and will no longer be undertaken or pursued by the local government (Include an explanation for the reason)

Any projects that are not completed and active are moved to the new community work program (2023-2027).

General Planning					
Activity	Years	Responsible Party	Cost Estimate	Funding Source	STATUS UPDATE
NE Moultrie Industrial Area Revitalization/Redevelopment Study	2018-2022	City/Development Authority	\$75,000	General Fund/Grants	Underway. 2027
Improve/ Establish Broadband capabilities in unserved or underserved areas.	2020-2022	City	\$1,000	Grants/General Fund	Postponed - City no longer owns cable company
Economic Development					
Activity	Years	Responsible Party	Cost Estimate	Funding Source	STATUS UPDATE
Corporate Industry Visitations at least once per year and hopefully more	2018-2022	County/Moultrie	\$1,500/year	County/Moultrie	Underway. 2027
Market all attractions in County in statewide publications	2018-2022	City/County/ Chamber of Commerce	\$30,000	Hotel/motel tax	Underway. 2027
Market downtown Moultrie	2018-2022	City	\$20,000/year.	Hotel/motel tax	Underway. 2027
Continue to improve the airport facilities at Spence Field and Moultrie Municipal.	2018-2022	County/Moultrie	TBD	City, DOT, FAA	Underway. 2027

Natural and Historic Resources					
Activity	Years	Responsible Party	Cost Estimate	Funding Source	STATUS UPDATE
Review Historic Design Standards	2018-2022	City	\$5,000	General Fund	Postponed 2027 due to lack of funding
Housing					
Activity	Years	Responsible Party	Cost Estimate	Funding Source	STATUS UPDATE
Eliminate substandard housing in the areas targeted for revitalization (NW Moultrie in particular)	2018-2022	City	\$300,000	Grants/Private Investment/General Fund	Completed grant but working on new process
Community Facilities					
Activity	Years	Responsible Party	Cost Estimate	Funding Source	STATUS UPDATE
Maintain Storm water management project areas	2018-2022	City	TBD	General fund, utility fund	Underway. 2027
Continue sidewalk repair/curb and gutter from 5th street SE to MLK and sidewalk upgrades on 1st avenue, 2nd Street and East Central Avenue.	2018-2022	City	\$15,000/annually	Capital improvement program	Completed
Resurface ten (10) percent of the City's streets every five years.	2018-2022	SPLOST/DOT	\$50,000	City	Completed
Continue to remove excess garbage/litter during Annual Spring cleanup	2018-2022	City	\$2,000	Solid Waste Fund	Underway. 2027
Continue to divert C&D materials from MSW landfill to C&D landfill	2018-2022	City	N/A	Solid Waste Fund	Completed
Develop CNG Fueling Station	2018-2022	City	\$800,000	Gen. Fund/Utilities	Postponed - Cost effectiveness but will continue to monitor for viability

Relocate Fire Station #2	2019-2021	City	\$2 million	General Fund	Underway. 2027

Adoption Resolution

R07-2022-05

A RESOLUTION TO ADOPT THE COLQUITT COUNTY COMPREHENSIVE PLAN

WHEREAS, the City Council of Moultrie, Georgia found it necessary to update their joint comprehensive plan as part of the requirements to maintain its Qualified Local Government Status;

WHEREAS, the City Council held public meetings and hearings to allow private citizens to review the Comprehensive Plan and gathered citizens input;

WHEREAS, in the development of the comprehensive plan, The City of Moultrie examined, evaluated, and where applicable, incorporated considerations of both the Flint River Basin Regional Water Development and Conservation Plan and the Environmental Planning Criteria pursuant to O.C.G.A. 12-2-8, and;

THEREFORE, BE IT RESOLVED by the City Council of Moultrie, Georgia that the Comprehensive Plan shall be adopted, hereby certifying that adequate citizen participation requirements have been met.

Adopted on the 5th day of July 2022.

Mayor

William M. McIntosh

Witness

Tina Coleman, City Clerk

Norman Park

Community Profile

Norman Park city, Georgia

Place in Georgia

Norman Park city, Georgia is a city, town, place equivalent, and township located in Georgia. Norman Park city, Georgia has a land area of 3.1 square miles.

City of Norman Park Demographics (Cont'd)

Executive Summary

Norman Park
Area: 3.13 square miles

Prepared by SWGRC

Population

2000 Population	815
2010 Population	972
2016 Population	1,051
2021 Population	1,091
2000-2010 Annual Rate	1.78%
2010-2016 Annual Rate	1.26%
2016-2021 Annual Rate	0.75%
2016 Male Population	50.5%
2016 Female Population	49.5%
2016 Median Age	35.5

In the identified area, the current year population is 1,051. In 2010, the Census count in the area was 972. The rate of change since 2010 was 1.26% annually. The five-year projection for the population in the area is 1,091 representing a change of 0.75% annually from 2016 to 2021. Currently, the population is 50.5% male and 49.5% female.

Median Age

The median age in this area is 35.5, compared to U.S. median age of 38.0.

Race and Ethnicity

2016 White Alone	71.6%
2016 Black Alone	10.4%
2016 American Indian/Alaska Native Alone	0.9%
2016 Asian Alone	0.8%
2016 Pacific Islander Alone	0.0%
2016 Other Race	14.0%
2016 Two or More Races	2.5%
2016 Hispanic Origin (Any Race)	23.8%

Persons of Hispanic origin represent 23.8% of the population in the identified area compared to 17.9% of the U.S. population. Persons of Hispanic Origin may be of any race. The Diversity Index, which measures the probability that two people from the same area will be from different race/ethnic groups, is 66.7 in the identified area, compared to 63.5 for the U.S. as a whole.

Households

2000 Households	318
2010 Households	356
2016 Total Households	381
2021 Total Households	394
2000-2010 Annual Rate	1.14%
2010-2016 Annual Rate	1.09%
2016-2021 Annual Rate	0.67%
2016 Average Household Size	2.72

The household count in this area has changed from 356 in 2010 to 381 in the current year, a change of 1.09% annually. The five-year projection of households is 394, a change of 0.67% annually from the current year total. Average household size is currently 2.72, compared to 2.69 in the year 2010. The number of families in the current year is 294 in the specified area.

City of Norman Park Demographics (Cont'd)

Executive Summary

Norman Park
Area: 3.13 square miles

Prepared by SWGRC

Median Household Income

2016 Median Household Income	\$34,313
2021 Median Household Income	\$40,295
2016-2021 Annual Rate	3.27%

Average Household Income

2016 Average Household Income	\$46,842
2021 Average Household Income	\$52,478
2016-2021 Annual Rate	2.30%

Per Capita Income

2016 Per Capita Income	\$15,826
2021 Per Capita Income	\$17,628
2016-2021 Annual Rate	2.18%

Households by Income

Current median household income is \$34,313 in the area, compared to \$54,149 for all U.S. households. Median household income is projected to be \$40,295 in five years, compared to \$59,476 for all U.S. households

Current average household income is \$46,842 in this area, compared to \$77,008 for all U.S. households. Average household income is projected to be \$52,478 in five years, compared to \$84,021 for all U.S. households

Current per capita income is \$15,826 in the area, compared to the U.S. per capita income of \$29,472. The per capita income is projected to be \$17,628 in five years, compared to \$32,025 for all U.S. households

Housing

2000 Total Housing Units	350
2000 Owner Occupied Housing Units	247
2000 Renter Occupied Housing Units	70
2000 Vacant Housing Units	33
2010 Total Housing Units	384
2010 Owner Occupied Housing Units	268
2010 Renter Occupied Housing Units	88
2010 Vacant Housing Units	28
2016 Total Housing Units	391
2016 Owner Occupied Housing Units	273
2016 Renter Occupied Housing Units	108
2016 Vacant Housing Units	10
2021 Total Housing Units	398
2021 Owner Occupied Housing Units	277
2021 Renter Occupied Housing Units	117
2021 Vacant Housing Units	4

Currently, 69.8% of the 391 housing units in the area are owner occupied; 27.6% renter occupied; and 2.6% are vacant. Currently, in the U.S., 55.4% of the housing units in the area are owner occupied; 32.9% are renter occupied; and 11.7% are vacant. In 2010, there were 384 housing units in the area - 69.8% owner occupied, 22.9% renter occupied, and 7.3% vacant. The annual rate of change in housing units since 2010 is 0.81%. Median home value in the area is \$74,438, compared to a median home value of \$198,891 for the U.S. In five years, median value is projected to change by 5.05% annually to \$95,238.

Data Note: Income is expressed in current dollars

Strengths, Weaknesses, Opportunities and Threats (SWOT)

Strengths

- Relatively safe community
- Up & coming downtown
- Low ISO fire rating
- Proximity to Moultrie
- Location along major thoroughfare (Hwy 319)
- Good elementary school compared to other small towns
- Local health clinic

Weaknesses

- Sewer System lacks capacity and needs upgrades
- Aging housing stock
- Lack of commercial development along Hwy 319
- Technology (Improve the Broadband)

Opportunities

- Georgia Baptist College
- Commercial development opportunities along Hwy 319

Threats

- Unfunded mandates
- The sewage plant is “fragile” w/ no backups if something happened.

Needs and Opportunities

Needs

- Upgrades to sanitary sewer system and sewer plant
- Newer housing in neighborhoods
- More variety of housing styles, prices, etc.
- More commercial development

Opportunities

- The Georgia Baptist College is a large complex that can function as a number of different things and can bring in a lot of people.

- Opportunities exist along Hwy 319 for commercial development.
- Norman Park has qualities that make it a good community to live including a good elementary school, relatively low crime, low ISO fire rating, a local health clinic and proximity to Moultrie and Tifton.

Goals and Policies

Goal: Economic Prosperity

Encourage development or expansion of businesses and industries that are suitable for the community. Factors to consider when determining suitability include job skills required; long-term sustainability; linkages to other economic activities in the region; impact on the resources of the area; or prospects for creating job opportunities that meet the needs of a diverse local workforce.

Policies:

- We will support programs for retention, expansion and creation of businesses that are a good fit for our community's economy in terms of job skill requirements and linkages to existing businesses.

Goal: Local Preparedness

Identify and put in place the prerequisites for the type of future the community seeks to achieve. These prerequisites might include infrastructure (roads, water and sewer) to support or direct new growth; ordinances and regulations to manage growth as desired; leadership and staff capable of responding to opportunities and managing new challenges; or undertaking an all-hazards approach to disaster preparedness and response.

Policies:

- We will consider impacts on infrastructure and natural resources in our decision making on economic development projects.
- Our community will make efficient use of existing infrastructure and public facilities to minimize the need for costly new/expanded facilities and services.

Goal: Sense of Place

Protect and enhance the community's unique qualities. This may be achieved by maintaining the downtown as focal point of the community; fostering compact, walkable, mixed-use development; protecting and revitalizing historic areas of the community; encouraging new development that is compatible with the traditional features of the community; or protecting scenic and natural features that are important to defining the community's character.

Policies:

- We will encourage the development of downtown as a vibrant center of the community in order to improve overall attractiveness and local quality of life.

Goal: Housing Options

Promote an adequate range of safe, affordable, inclusive, and resource efficient housing in the community. This may be achieved by encouraging development of a variety of housing types, sizes, costs, and densities in each neighborhood; instituting programs to provide housing for residents of all socio-economic backgrounds; or coordinating with local economic development programs to ensure availability of adequate workforce housing in the community.

Policies:

- We will eliminate substandard or dilapidated housing in our community.

Goal: Broadband Options

Make the Norman Park City a broadband ready community and accessibility to a high-speed internet service to improve the economy, education, agriculture, address the needs, and improve the well-being of the community residents.

Policies:

- We will be a broadband certified community.
- We will develop a broadband ordinance and adopt it to regulate the installation.
- We will collaborate with broadband service providers to extend a high-speed internet service to unserved and underserved areas.
- We will amend the land-use ordinance when necessary to accommodate broadband installation.

Economic Development

The Comprehensive Economic Development Strategy (CEDS) as developed by the Southwest Georgia Regional Commission under a grant from the US Department of Commerce Economic Development Administration is hereby incorporated by reference into this Comprehensive Plan to serve as the Economic Development Element for Colquitt County and the Cities of Moultrie, Doerun, Norman Park, Ellenton, Berlin and Funston.

The Southwest Georgia Regional Commission's (SWGRC) Comprehensive Economic Development Strategy (CEDS) was designed to bring together the public and private sectors in the creation of an economic roadmap to diversify and strengthen the regional economy. The SWGRC CEDS analyzed the regional economy and serves as a guide for establishing regional goals and objectives, a regional plan of action, and the investment priorities and funding sources.

As a performance-based plan, this CEDS plays a critical role in adapting to global economic conditions by fully utilizing the region's unique advantages to maximize economic opportunity for its residents by attracting the private investment that creates jobs. The SWGRC CEDS is a regionally owned strategy that is the result of a continuing economic development planning process developed with regional public and private sector participation. This plan sets forth the goals and objectives necessary to solve the economic development problems of the Southwest Georgia region and clearly defines the measures of success.

The Southwest Georgia CEDS gives an overview of the region briefly describing geography, population, economy, labor, and workforce development and use, education, transportation access, environment, and regional resources. It reviews the state of the Regional Economy and provides a list of achievable Goals and Objectives for the region, a Plan of Action to ensure success, and Performance Measures used to evaluate the Southwest Georgia Regional Commission's successful development and implementation of the 2012-2017 CEDS. Implementation of the goals identified in this plan is significant to the economic future of the SWGRC District.

Policies, issues and opportunities, and Short-Term Work Program implementation strategies located in the current Comprehensive Plans for each of our 14-county region were used extensively to develop the CEDS Goals and Objectives, Vital Projects and Problems and Opportunities.

Included below are goals and objectives from the CEDS which are aligned with the current economic development goals of Colquitt County and the Cities of Moultrie, Doerun, Norman Park, Ellenton, Berlin and Funston.

Goal: Encourage and increase regional collaboration among cities and counties.

Objective: To increase the likelihood of large-scale economic development projects resulting in jobs and private investment.

Goal: Expand existing industries.

Objective: To increase the potential that existing industries will expand in the region.

Goal: Improve infrastructure of water, sewer roads and technology.

Objective: To increase the likelihood that businesses will be started or moved to the region.

Goal: Support technical colleges within the region.

Objective: To increase the level of education of the region's workforce.

Goal: Increase tourism in the region.

Objective: Increase the region's tax base and local government's ability to provide services and recreational opportunities.

Goal: Recruit retirees to the region.

Objective: Support communities in the region and increase the tax base by recruiting retirees.

Goal: Increase access to capital for small businesses in the region.

Objective: To increase availability and likelihood to access low-interest financing for businesses creating jobs and making private investments.

Goal: Create a diverse economy resistant to economic recession.

Objective: To promote the development of diverse employment opportunities at various skill levels.

Goal: Improve and upgrade the educational attainment levels of the labor workforce skills within the region.

Objective: Develop and support community-based efforts to address improved education levels and labor force skills. Support the continued improvement of the education system in addressing education issues and education skill improvement for the region.

Goal: Provide a well-trained workforce, professional, technical, and skilled, capable of accommodating new industry and maintaining existing industry.

Objective: Improved education attainment by reducing high school drop-out rate.

Colquitt County and its municipalities according to the CEDS...

The population of Colquitt County (including cities) is 45,812, which is a population increase of 400 from the 2010 Census. The poverty rate has reduced from 26.7% to 26.0% from 2013-2020. There is an increase of median household income from \$32,484 to \$34,514. Fifty-eight percent (58.1%) of the population does not have a high school diploma. With its long growing season and varied types of soils, the county has traditionally been a state leader in agricultural production. Colquitt County currently has the largest farm gate in Georgia. Despite the county's agricultural strength, manufacturing has replaced farming as the largest employment sector in the county. There are six cities in Colquitt County: Berlin, Doerun, Ellenton, Funston, Moultrie and Norman Park. Berlin is a small town in Colquitt County, named after a German city, and is considered to be a speed trap. The City of Doerun is home to the GA Annual May Day Festival and is sponsored by the Doerun Booster Association. Ellenton, Funston, and Riverside are small towns located within Colquitt County. The City of Norman Park is home to the Georgia Baptist Conference Center.

Colquitt County is located within the Southwest Georgia Regional Commission area, a very rural and agriculturally oriented portion of Georgia. Agribusiness and textile manufacturing remain the most significant contributors to the region's economy. Colquitt County is ranked as the 40th most populous county in the state and is the region's third most populous county, following Dougherty and Thomas Counties. Moultrie is a city of 14,638 in a county of 45,898 people covering 544.15 square miles. Colquitt County also has one of the largest concentrations of Hispanic or migrant workers in Georgia, an important asset to the local farmers. It is estimated the county has between 2,000 to 5,000 migrant workers, depending on the season. The majority of these workers are available on a temporary work permit and after five years some become regular U.S. citizens. Migrant farm workers are important to the local economy and are generally undercounted during the census. It is expected that the historical growth trend of the minority population in the county will continue. In contrast, the unincorporated portion of the county has experienced a reverse trend.

The Annual Sunbelt Agricultural Expo is Colquitt County's largest attraction and adds millions of dollars to the local economy. The Expo, held annually in October, draws over 300,000 visitors annually and is the largest outdoor farm show in North America with field demonstrations, and more than 1,000 corporate and private exhibitors this year marked the 38th Annual event. This event has evolved into an incredible economic development opportunity for the City of Moultrie and Colquitt County.

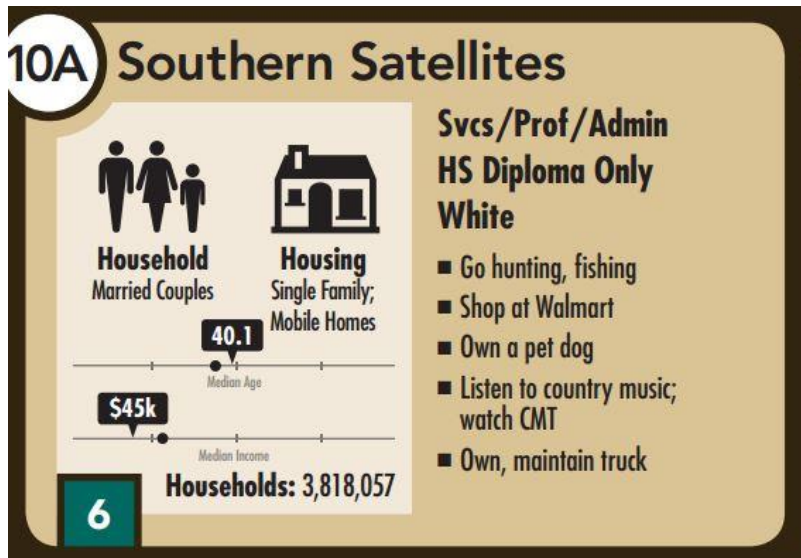

The Sanderson Farms project brought in 1,500 jobs for the county, exceeding expectations of all involved. That impact has translated into \$90 million of investment from Sanderson farms, more than \$50 million investment from producers in the region, a 30-percent increase in sales tax collections over the past two years and a 7.3 percent growth in the tax digest.

Educational attainment has grown in Colquitt County. A comprehensive effort by the entire community, to include the business community, is significantly improving workforce education and readiness. Results certified by the Georgia Board of Education gave Colquitt County High School (CCHS) a 93% graduation rate for 2015, making CCHS a state leader in that category. The number of adults without elementary education has dropped, as the number of adults with some college or college degrees has grown. However, educational attainment is growing faster at the state level than in Colquitt County. The city of Moultrie is catching up to the state level of adults with college degrees somewhat faster than the county as a whole. Colquitt County is home to Southern Regional Technical College that has over 2,000 students. Brewton-Parker has a 2-year extension degree program, and also Abraham Baldwin Agricultural College which is located on the square in downtown Moultrie.

Supplementary Economic Statistics/Data (See Appendix)

Tapestry Segments Explained

Tapestry segmentation provides an accurate, detailed description of America's neighborhoods—U.S. residential areas are divided into 67 distinctive segments based on their socioeconomic and demographic composition. The top three tapestry segments in Norman Park are: Down the Road, Southern Satellites and Top Tier.

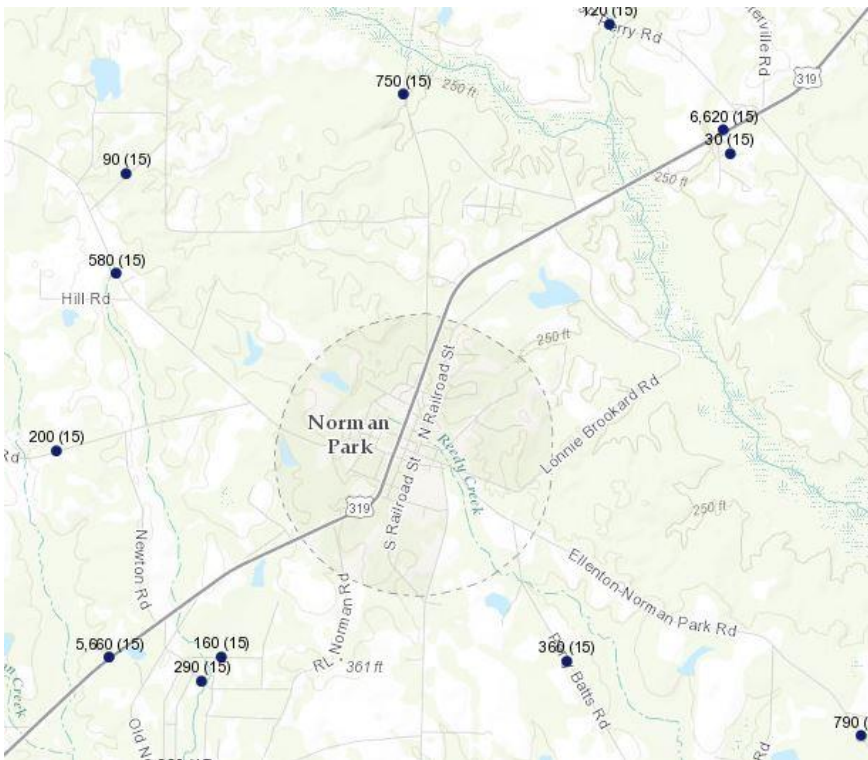

Transportation

An integrated transportation system should contribute to a high quality of life for residents and a desirable climate for business. Some transportation issues in Norman Park are related to the increase in vehicular volumes and congestion. While the automobile is the dominant mode of transportation, the city wants to provide a balanced and coordinated “multi-modal” transportation system to accommodate ongoing growth and development. Comprehensive improvements to all modes of travel can help improve the operation and capacity of the road system.

Road Network

U.S. Hwy 319 bisects Norman Park and is by far the busiest route in town. Although no traffic counts are available from within the city limits, counts nearby indicate approximately 6,000 Annual Average Daily Trips (AADT) through Norman Park.

Alternative Modes

The road network in Norman Park is largely a simple grid pattern. Sidewalks are available on some of the streets particularly in the downtown and older residential areas and out to the Elementary school. There are no dedicated bicycle lanes in Norman Park, but residents find that most city streets have very low traffic and can provide a fairly safe avenue for cycling.

Colquitt County is a member of the Southwest Georgia Regional Rural Transit System. Transit buses are available for all residents of Colquitt County, Doerun, Norman Park, Ellenton, Moultrie, Berlin and Funston. The transit system provides transport to anywhere in the region for a fee based on mileage. Users must call to schedule a pickup by 3 pm the day before their scheduled trip. This service has proven to be very beneficial for those that do not drive. Typically, elderly or those that do not have a license have utilized the service for daily life activities including grocery shopping and doctor's appointments.

Parking

On-street is the preferred method of parking in Norman Park. As Norman Park's downtown begins to see a potential resurgence lack of parking may become an issue in the future where a public parking lot may be needed. The current level of parking is adequate for the City of Norman Park at this time.

Railroad

There is no railroad in the City of Norman Park.

Land Use

The Future Land Use Map is a required component for all communities that have zoning. It is intended to be an expression of the community's vision for the future, and a guide to its future development patterns citywide. It is based off of previous Future land use maps with updates added to fully meet the trends of development in Norman Park and was refined with the help of the public during the public outreach portion of the plan's development. It is intended to be representation of the community's vision for the future. Below are descriptions of categories which are utilized on the Future Land Use Map.

Residential

This residential category is intended to correspond primarily to existing urban neighborhoods but is also proposed for undeveloped areas adjacent to existing urban neighborhoods. Residential means residential development ranging from approximately three to five (3-5) units per acre (i.e., lot sizes minimum of approximately 8,000 square feet to 10,000 square feet). The primary housing type is detached, single-family residential, though other housing types such as duplexes and manufactured homes may be allowed by applicable zoning regulations under certain circumstances. This future land use category is implemented with one or more residential zoning districts. Regulations may differ according to zoning district; for instance, manufactured homes may be permitted in one residential category but not in another. Furthermore, different lot sizes may be established as may be necessary.

Commercial

This category is for land dedicated to non-industrial business uses, including retail sales, services, and entertainment facilities. Commercial uses may be located as a single use in one building or grouped together in a shopping center.

Given the small rural nature of Norman Park, one category can fulfill the needs of encompassing both highway and downtown commercial uses. The Norman Park zoning ordinance has three different zoning classifications for commercial and a commercial planned unit development district that will place development in the appropriate locations.

Industrial

This category corresponds to industrial operations which may or may not be objectionable due to the emission of noise, vibration, smoke, dust, gas, fumes, odors, or radiation and that may create fire or explosion hazards or other objectionable conditions. Uses within this district may require substantial quantities of water for manufacturing operations and may require rail, air, or water transportation.

Agricultural

The agricultural land use designation in Norman Park is intended for those areas outside of the urban service areas which are associated with agricultural farm operations and associated activities, forestry, natural resource conservation, groundwater recharge areas, and low-density residential development that may or may not be accessory to agricultural or farm operation of varying sizes.

City of Norman Park Report of Accomplishment 2018-2022

In this section, the projects listed within the ROA are evaluated by the municipalities and assessed. The status of each project was assessed and classified. Four classification responses were used to determine the project's status. These classifications are:

- Completed
- Currently Underway (Include a projected completion date)
- Postponed (Include an explanation of the reason)
- Not Accomplished and will no longer be undertaken or pursued by the local government (Include an explanation for the reason)

Any projects that are not completed and active are moved to the new community work program (2023-2027).

City of Norman Park Report of Accomplishments

Activity	Years	Responsible Party	Cost Estimate	Funding Source	STATUS (COMPLETED, UNDERWAY, POSTPONED, NOT ACCOMPLISHED)
Improve/ Establish Broadband capabilities in unserved or underserved	2020-2022	City	\$1,000	Grants/General Fund	Underway. Projected completion date 2027.
Economic Development					
Investigate ways to market the City of Norman Park as a great place to live.	2018-2022	City	\$3,000	General Fund	Underway. Projected completion date 2027
Try and redevelop or find a new tenant for the Georgia Baptist College	2018-2022	City	Staff time	General Fund	Completed
Community Facilities					
Upgrade sewer system and sewer plant	2018-2022	City	\$150,000	General Fund, Grants	Underway. Improvements and repairs are completed when necessary or when available funding allows.
Housing					
Pursue grants and loans that would make possible rehabilitation projects for elderly homeowners	2018-2022	City	\$10,000/y r.	General Fund	Underway. Grants and other forms of funding are pursued when they become available. Completion date 2027
Demolish substandard housing in neighborhoods	2018-2022	City	\$10,000/y r.	General Fund	Underway. Projected completion date 2027.
Land Use					
Identify areas along Hwy 319 for rezoning to encourage commercial development	2018	City, RC	\$1,000	General Fund	Underway. Areas have been identified, and commercial development is encouraged. 2027

City of Norman Park Community Work Program 2023-2027

General Planning				
Activity	Years	Responsible Party	Cost Estimate	Funding Source
Partner with Southwest Georgia Regional Commission to develop Age Friendly activities that support the Age-Friendly designation.	2023-2027	Southwest Regional Commission/ County	RC Staff-Time	Grants
Participate in the development and updating Pre-Hazard Mitigation Plan	2023-2027	City	\$25000	GEMA, FEMA, Grants
Participate in the development and updating the Joint Comprehensive Plan	2023-2027	City	Staff-Time	General Fund
Economic Development				
Investigate ways to market the City of Norman Park as a great place to live.	2023-2027	City	\$3,000	General Fund
Community Facilities				
Upgrade sewer system, water and sewer plant.	2023-2027	City	\$6 Million	General Fund, Grants, loans
Housing				
Pursue grants and loans that would make possible rehabilitation projects for elderly homeowners	2023-2027	City	\$10,000/yr.	General Fund, Grants
Demolish non-historical substandard or dilapidated structures that failed to meet building codes and regulation.	2023-2027	City	\$10,000/yr.	General Fund
Pursue grants to rehabilitate substandard houses.	2023-2027	City	\$400,000	Grants
Land Use				
Identify areas along Hwy 319 for rezoning to encourage commercial development	2023-2027	City, RC	\$1,000	General Fund
Broadband Element				
Collaborate with broadband providers to Improve/ Establish Broadband capabilities in unserved or underserved areas.	2023-2027	City	\$1.5M	Grants
Develop a broadband ordinance and adopt it to accommodate and regulate broadband installation.	2023-2027	City	Staff Time	Grants/General Fund

Adoption Resolution

A RESOLUTION TO ADOPT THE COLQUITT COUNTY COMPREHENSIVE PLAN

WHEREAS, the City Council of Norman Park, Georgia found it necessary to update their joint comprehensive plan as part of the requirements to maintain its Qualified Local Government Status;

WHEREAS, the City Council held public meetings and hearings to allow private citizens to review the Comprehensive Plan and gathered citizens input;

WHEREAS, in the development of the comprehensive plan, The City of Norman Park examined, evaluated, and where applicable, incorporated considerations of both the Flint River Basin Regional Water Development and Conservation Plan and the Environmental Planning Criteria pursuant to O.C.G.A. 12-2-8, and;

THEREFORE, BE IT RESOLVED by the City Council of Norman Park, Georgia that the Comprehensive Plan shall be adopted, hereby certifying that adequate citizen participation requirements have been met.

Adopted on the 30th day of June 2022.

Executive Summary

Berlin
Area: 0.75 square miles

Prepared by SWGRC

Population

2000 Population	514
2010 Population	551
2016 Population	417
2021 Population	386
2000-2010 Annual Rate	0.70%
2010-2016 Annual Rate	-4.36%
2016-2021 Annual Rate	-1.53%
2016 Male Population	51.1%
2016 Female Population	48.9%
2016 Median Age	38.6

In the identified area, the current year population is 417. In 2010, the Census count in the area was 551. The rate of change since 2010 was -4.36% annually. The five-year projection for the population in the area is 386 representing a change of -1.53% annually from 2016 to 2021. Currently, the population is 51.1% male and 48.9% female.

Median Age

The median age in this area is 38.6, compared to U.S. median age of 38.0.

Race and Ethnicity

2016 White Alone	74.1%
2016 Black Alone	9.1%
2016 American Indian/Alaska Native Alone	0.7%
2016 Asian Alone	1.2%
2016 Pacific Islander Alone	0.0%
2016 Other Race	13.7%
2016 Two or More Races	1.2%
2016 Hispanic Origin (Any Race)	18.5%

Persons of Hispanic origin represent 18.5% of the population in the identified area compared to 17.9% of the U.S. population. Persons of Hispanic Origin may be of any race. The Diversity Index, which measures the probability that two people from the same area will be from different race/ethnic groups, is 61.0 in the identified area, compared to 63.5 for the U.S. as a whole.

Households

2000 Households	182
2010 Households	196
2016 Total Households	148
2021 Total Households	136
2000-2010 Annual Rate	0.74%
2010-2016 Annual Rate	-4.39%
2016-2021 Annual Rate	-1.68%
2016 Average Household Size	2.82

The household count in this area has changed from 196 in 2010 to 148 in the current year, a change of -4.39% annually. The five-year projection of households is 136, a change of -1.68% annually from the current year total. Average household size is currently 2.82, compared to 2.81 in the year 2010. The number of families in the current year is 107 in the specified area.

Data Note: Income is expressed in current dollars

Strengths, Weaknesses, Opportunities and Threats (SWOT)

Strengths

- Unity of the community
- Low crime rate
- Local Fire Department
- Local EMT station
- Location along major thoroughfare (Hwy 133)
- Available land
- Cheap utilities
- Affordable housing

Weaknesses

- No grocery store
- Lack of sewer
- Lack of commercial development
- Technology (Improve the Broadband)

Opportunities

- Commercial development potential along Hwy 133 after widening
- Rorey Davis Memorial Park changes/updates

Threats

- None identified

Needs and Opportunities

Needs

- Berlin needs a sewer system top help attract commercial development.
- More commercial development particularly along Hwy 133.
- Grocery store

Opportunities

- Market the strengths of the small town (sense of community, low crime, local fire/ems, cheap utilities, etc.) to bring residents and commercial development.
- Opportunities exist along Hwy 133 for commercial development. The 4-laning should provide more traffic along the roadway and increase the potential for commercial development.
- Making upgrades to Rorey Davis Memorial Park will increase its usability by the community.

Goals and Policies

Goal: Economic Prosperity

Encourage development or expansion of businesses and industries that are suitable for the community.

Policies:

- Our decisions on new development will contribute to, not take away from, our community's character and sense of place.

Goal: Local Preparedness

Identify and put in place the prerequisites for the type of future the community seeks to achieve. These prerequisites might include infrastructure (roads, water and sewer) to support or direct new growth; ordinances and regulations to manage growth as desired; leadership and staff capable of responding to opportunities and managing new challenges; or undertaking an all-hazards approach to disaster preparedness and response.

Policies:

- We will ensure that new development does not cause a decline in existing levels of service for the community's residents and employers.

Goal: Sense of Place

Protect and enhance the community's unique qualities. Maintain the downtown as a focal point of the community; fostering compact, walkable, mixed-use development; protecting and revitalizing historic areas of the community; encouraging new development that is compatible with the traditional features of the community; or protecting scenic and natural features that are important to defining the community's character.

Policies:

- We will encourage the development of downtown as a vibrant center of the community in order to improve overall attractiveness and local quality of life.

Goal: Housing Options

Promote an adequate range of safe, affordable, inclusive, and resource efficient housing in the community. This may be achieved by encouraging development of a variety of housing types, sizes, costs, and densities in each neighborhood; instituting programs to provide housing for residents of all socio-economic backgrounds; or coordinating with local economic development programs to ensure availability of adequate workforce housing in the community.

Policies:

- We will eliminate substandard or dilapidated housing in our community.
- We will increase opportunities for low-to-moderate income families to move into affordable owner-occupied housing.

Goal: Community Health

Ensure that all community residents, regardless of age, ability, or income, have access to critical goods and services, safe and clean neighborhoods, and good work opportunities. This may be achieved by providing services to support the basic needs of disadvantaged residents; instituting programs to foster better health and fitness; or providing all residents the opportunity to improve their circumstances in life and to fully participate in the community.

Policies:

- We are committed to creating walkable, safe, and attractive neighborhoods throughout the community, where people have easy access to schools, parks, and necessary services (grocery store, drug store) without having to travel by car.
- We are committed to providing pleasant, accessible public gathering places and parks throughout the community.
- We will invest in parks and open space to enhance the quality of life for our citizens.

Goal: Broadband Options

Make Berlin City a broadband ready community and accessibility to a high-speed internet service to improve the economy, education, agriculture, address the needs, and improve the well-being of the community residents.

Policies:

- We will be a broadband certified community.
- We will develop a broadband ordinance and adopt it to regulate the installation.
- We will collaborate with broadband service providers to extend a high-speed internet service to unserved and underserved areas.
- We will amend the land-use ordinance when necessary to accommodate broadband installation.

Produced: November, 2021

Economic Development

The Comprehensive Economic Development Strategy (CEDS) as developed by the Southwest Georgia Regional Commission under a grant from the US Department of Commerce Economic Development Administration is hereby incorporated by reference into this Comprehensive Plan to serve as the Economic Development Element for Colquitt County and the Cities of Moultrie, Doerun, Norman Park, Ellenton, Berlin and Funston.

The Southwest Georgia Regional Commission's (SWGRC) Comprehensive Economic Development Strategy (CEDS) was designed to bring together the public and private sectors in the creation of an economic roadmap to diversify and strengthen the regional economy. The SWGRC CEDS analyzed the regional economy and serves as a guide for establishing regional goals and objectives, a regional plan of action, and the investment priorities and funding sources.

As a performance-based plan, this CEDS plays a critical role in adapting to global economic conditions by fully utilizing the region's unique advantages to maximize economic opportunity for its residents by attracting the private investment that creates jobs. The SWGRC CEDS is a regionally owned strategy that is the result of a continuing economic development planning process developed with regional public and private sector participation. This plan sets forth the goals and objectives necessary to solve the economic development problems of the Southwest Georgia region and clearly defines the measures of success.

The Southwest Georgia CEDS gives an overview of the region briefly describing geography, population, economy, labor, and workforce development and use, education, transportation access, environment, and regional resources. It reviews the state of the Regional Economy and provides a list of achievable Goals and Objectives for the region, a Plan of Action to ensure success, and Performance Measures used to evaluate the Southwest Georgia Regional Commission's successful development and implementation of the 2012-2017 CEDS. Implementation of the goals identified in this plan is significant to the economic future of the SWGRC District.

Policies, issues and opportunities, and Short-Term Work Program implementation strategies located in the current Comprehensive Plans for each of our 14-county region were used extensively to develop the CEDS Goals and Objectives, Vital Projects and Problems and Opportunities.

Included below are goals and objectives from the CEDS which are aligned with the current economic development goals of Colquitt County and the Cities of Moultrie, Doerun, Norman Park, Ellenton, Berlin and Funston.

Goal: Encourage and increase regional collaboration among cities and counties.

Objective: To increase the likelihood of large-scale economic development projects resulting in jobs and private investment.

Goal: Expand existing industries.

Objective: To increase the potential that existing industries will expand in the region.

Goal: Improve infrastructure of water, sewer roads and technology.

Objective: To increase the likelihood that businesses will be started or moved to the region.

Goal: Support technical colleges within the region.

Objective: To increase the level of education of the region's workforce.

Goal: Increase tourism in the region.

Objective: Increase the region's tax base and local government's ability to provide services and recreational opportunities.

Goal: Recruit retirees to the region.

Objective: Support communities in the region and increase the tax base by recruiting retirees.

Goal: Increase access to capital for small businesses in the region.

Objective: To increase availability and likelihood to access low-interest financing for businesses creating jobs and making private investments.

Goal: Create a diverse economy resistant to economic recession.

Objective: To promote the development of diverse employment opportunities at various skill levels.

Goal: Improve and upgrade the educational attainment levels of the labor workforce skills within the region.

Objective: Develop and support community-based efforts to address improved education levels and labor force skills. Support the continued improvement of the education system in addressing education issues and education skill improvement for the region.

Goal: Provide a well-trained workforce, professional, technical and skilled, capable of accommodating new industry and maintaining existing industry.

Objective: Improved education attainment by reducing high school drop-out rate.

Colquitt County and its municipalities according to the CEDS...

The population of Colquitt County (including cities) is 45,898 which is a population increase of 400 from the 2010 Census. The poverty rate has reduced from 26.7% to 22.8% from 2013-2020. The median household income has also increased from \$32,484 to \$40,536 based on U.S Census 2020. Fifty-six percent (56.9%) of the population does not have a high school diploma. With its long growing season and varied types of soils, the county has traditionally been a state leader in agricultural production. Colquitt County currently has the largest farm gate in Georgia. Despite the county's agricultural strength, manufacturing has replaced farming as the largest employment sector in the county. There are six cities in Colquitt County; Berlin, Doerun, Ellenton, Funston, Moultrie and Norman Park. Berlin is a small town in Colquitt County, named after a German city, and is considered to be a speed trap. The City of Doerun is home to the GA Annual May Day Festival and is sponsored by the Doerun Booster Association. Ellenton, Funston, and Riverside are small towns located within Colquitt County. The City of Norman Park is home to the Georgia Baptist Conference Center.

Colquitt County is located within the Southwest Georgia Regional Commission area, a very rural and agriculturally oriented portion of Georgia. Agribusiness and textile manufacturing remain the most significant contributors to the region's economy. Colquitt County is ranked as the 40th most populous county in the state and is the region's third most populous county, following Dougherty and Thomas Counties. Moultrie is a city of 14,638 in a county of 45,898 people covering 544.15 square miles. Colquitt County also has one of the largest concentrations of Hispanic or migrant workers in Georgia, an important asset to the local farmers. It is estimated the county has between 2,000 to 5,000 migrant workers, depending on the season. The majority of these workers are available on a temporary work permit and after five years some become regular U.S. citizens. Migrant farm workers are important to the local economy and are generally undercounted during the census. It is expected that the historical growth trend of the minority population in the county will continue. In contrast, the unincorporated portion of the county has experienced a reverse trend.

The Annual Sunbelt Agricultural Expo is Colquitt County's largest attraction and adds millions of dollars to the local economy. The Expo, held annually in October, draws over 300,000 visitors annually and is the largest outdoor farm show in North America with field demonstrations, and more than 1,000 corporate and private exhibitors this year marked the 38th Annual event. This event has evolved into an incredible economic development opportunity for the City of Moultrie and Colquitt County.

The Sanderson Farms project brought in 1,500 jobs for the county, exceeding expectations of all involved. That impact has translated into \$90 million of investment from Sanderson farms, more than \$50 million investment from producers in the region, a 30-percent increase in sales tax collections over the past two years and a 7.3 percent growth in the tax digest.

Educational attainment has grown in Colquitt County. A comprehensive effort by the entire community, to include the business community, is significantly improving workforce education and readiness. Results certified by the Georgia Board of Education gave Colquitt County High School (CCHS) a 93% graduation rate for 2015, making CCHS a state leader in that category. The number of adults without elementary education has dropped, as the number of adults with some college or college degrees has grown. However, educational attainment is growing faster at the state level than in Colquitt County. The city of Moultrie is catching up to the state level of adults with college degrees somewhat faster than the county as a whole. Colquitt County is home to Southern Regional Technical College that has over 2,000 students. Brewton-Parker has a 2-year extension degree program, and also Abraham Baldwin Agricultural College which is located on the square in downtown Moultrie.

Supplementary Economic Statistics/Data (See Appendix)

Tapestry Segments Explained

Tapestry segmentation provides an accurate, detailed description of America's neighborhoods—U.S. residential areas are divided into 67 distinctive segments based on their socioeconomic and demographic composition. The top three tapestry segments in Berlin are: Southern Satellites, Top Tier and Professional Pride.

10A Southern Satellites

Household

- Hold 401(k) and IRA plans/securities
- Own latest tablets, smartphones, and laptops
- Read epicurean, sports, home service magazines
- Own 2–3 vehicles

Transportation

An integrated transportation system should contribute to a high quality of life for residents and a desirable climate for business. While the automobile is the dominant mode of transportation, the City wants to provide a balanced and coordinated “multi-modal” transportation system to accommodate ongoing growth and development. Comprehensive improvements to all modes of travel can help improve the operation and capacity of the road system.

Road Network

GA Hwy 133 cuts across the northeast corner of Berlin and is by far the busiest route in town. Although no traffic counts are available from within the city limits, counts nearby indicate approximately 2,920 Annual Average Daily Trips (AADT) through Berlin.

Alternative Modes

The road network in Berlin is largely a simple grid pattern. Sidewalks are only available on Langford Street in the downtown and in front of the old school building complex. There are no dedicated bicycle lanes in Berlin but residents find that most city streets have very low traffic and can provide a fairly safe avenue for cycling.

Colquitt County is a member of the Southwest Georgia Regional Rural Transit System. Transit buses are available for all residents of Colquitt County, Doerun, Norman Park, Ellenton, Moultrie, Berlin and Funston. The transit system provides transport to anywhere in the region for a fee based on mileage. Users must call to schedule a pickup by 3 pm the day before their scheduled trip. This service has proven to be very beneficial for those that do not drive. Typically, elderly or those that do not have a license have utilized the service for daily life activities including grocery shopping and doctor's appointments in particular.

Parking

On-street is the preferred method of parking in Berlin. Berlin's downtown is in a state of extreme decline and on street parking is still available but the buildings are mostly empty and falling down. The current level of parking is adequate for the City of Berlin at this time.

Railroad

There is no railroad in the City of Berlin.

Land Use

The Future Land Use Map is a required component for all communities that have zoning. It is intended to be an expression of the community's vision for the future, and a guide to its future development patterns citywide. It is based off of previous Future land use maps with updates added to fully meet the trends of development in Berlin and was refined with the help of the public during the public outreach portion of the plan's development. It is intended to be representation of the community's vision for the future. Below are descriptions of categories which are utilized on the Future Land Use Map.

Residential

This residential category is intended to correspond primarily to existing urban neighborhoods but is also proposed for undeveloped areas adjacent to existing urban neighborhoods. Residential means residential development ranging from approximately three to five (3-5) units per acre (i.e., lot sizes minimum of approximately 8,000 square feet to 10,000 square feet). The primary housing type is detached, single-family residential, though other housing types such as duplexes and manufactured homes may be allowed

by applicable zoning regulations under certain circumstances. This future land use category is implemented with one or more residential zoning districts. Regulations may differ according to zoning district; for instance, manufactured homes may be permitted in one residential category but not in another. Furthermore, different lot sizes may be established as may be necessary.

Commercial

This category is for land dedicated to non-industrial business uses, including retail sales, services, and entertainment facilities. Commercial uses may be located as a single use in one building or grouped together in a shopping center.

Given the small rural nature of Berlin, one category can fulfill the needs of encompassing both highway and downtown commercial uses. The Berlin zoning ordinance has three different zoning classifications for commercial and a commercial planned unit development district that will place development in the appropriate locations.

Industrial

This category corresponds to industrial operations which may or may not be objectionable due to the emission of noise, vibration, smoke, dust, gas, fumes, odors, or radiation and that may create fire or explosion hazards or other objectionable conditions. Uses within this district may require substantial quantities of water for manufacturing operations and may require rail, air, or water transportation.

Agricultural

The agricultural land use designation in Berlin is intended for those areas outside of the urban service areas which are associated with agricultural farm operations and associated activities, forestry, natural resource conservation, groundwater recharge areas, and low-density residential development that may or may not be accessory to agricultural or farm operation of varying sizes.

City of Berlin Report of Accomplishment 2018-2022

In this section, the projects listed within the ROA are evaluated by the municipalities and assessed. The status of each project was assessed and classified. Four classification responses were used to determine the project's status. These classifications are:

- Completed
- Currently Underway (Include a projected completion date)
- Postponed (Include an explanation of the reason)
- Not Accomplished and will no longer be undertaken or pursued by the local government (Include an explanation for the reason)

Any projects that are not completed and active are moved to the new community work program (2023-2027).

Economic Development					
Activity	Years	Responsible Party	Cost Estimate	Funding Source	STATUS (COMPLETED, UNDERWAY, POSTPONED, NOT ACCOMPLISHED)
Participate in annual clean-up and other beautification programs	2018-2022	City	N/A	N/A	Underway. Projected completion date 2027.
General Planning					
Resurface streets within residential areas	2018-2022	City	\$200,000	Local, DOT	Underway. Projected completion date 2027.
Continue to support Berlin VFD with gas, oil and vehicle maintenance costs	2018-2022	City	\$6,000	Local	Underway. Projected completion date 2027.
Make upgrades to Rorey Davis Memorial Park.	2018-2022	City	\$150,000	Local	Underway. Projected completion date 2027.
Improve/Establish Broadband capabilities in unserved or underserved areas	2020-2022	City	\$1,000	Grants/General Fund	Not Accomplished and will no longer be undertaken due to budget constraints.

City of Berlin Community Work Program 2023-2027

Community Work Program 2023-2027				
Economic Development				
Activity	Years	Responsible Party	Cost Estimate	Funding Source
Participate in annual clean-up and other beautification programs	2023-2027	City	N/A	General Fund. Local and solid waste
General Planning				
Resurface streets within residential areas	2023-2027	City	\$200,000	Grants, TSPLOST GDOT and General Fund
Continue to support Berlin Variable Frequency Drive with gas, oil, and vehicle maintenance costs	2023-2027	City	\$6,000	Local
Rehabilitate/ upgrades the Roy Davis Memorial Park.	2023-2027	City	\$150,000	Grants/ Local
Partner with Southwest Georgia Regional Commission to develop Age Friendly activities that support the Age-Friendly designation.	2023-2027	Southwest Regional Commission / County	RC Staff-Time	Grants
Participate in the development and updating Pre-Hazard Mitigation Plan.	2023-2027	City	\$25000	GEMA, FEMA, Grants
Participate in the development and updating the Joint Comprehensive Plan	2023-2027	City	Staff-Time	General Fund

Adoption Resolution

A RESOLUTION TO ADOPT THE COLQUITT COUNTY COMPREHENSIVE PLAN

WHEREAS, the City Council of Berlin, Georgia found it necessary to update their joint comprehensive plan as part of the requirements to maintain its Qualified Local Government Status;

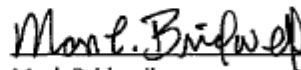

WHEREAS, the City Council held public meetings and hearings to allow private citizens to review the Comprehensive Plan and gathered citizens input;

WHEREAS, in the development of the comprehensive plan, The City of Berlin examined, evaluated, and where applicable, incorporated considerations of both the Flint River Basin Regional Water Development and Conservation Plan and the Environmental Planning Criteria pursuant to O.C.G.A. 12-2-8, and;

THEREFORE, BE IT RESOLVED by the City Council of Berlin, Georgia that the Comprehensive Plan shall be adopted, hereby certifying that adequate citizen participation requirements have been met.

Adopted on the 30 day of June 2022.

2016 Vacant Housing Units	13
2021 Total Housing Units	126
2021 Owner Occupied Housing Units	84
2021 Renter Occupied Housing Units	29
2021 Vacant Housing Units	13

Currently, 65.3% of the 124 housing units in the area are owner occupied; 23.4%, renter occupied; and 10.5% are vacant. Currently, in the U.S., 55.4% of the housing units in the area are owner occupied; 32.9% are renter occupied; and 11.7% are vacant. In 2010, there were 120 housing units in the area - 68.3% owner occupied, 20.8% renter occupied, and 10.8% vacant. The annual rate of change in housing units since 2010 is 1.47%. Median home value in the area is \$83,824, compared to a median home value of \$198,891 for the U.S. In five years, median value is projected to change by 4.32% annually to \$103,571.

Data Note: Income is expressed in current dollars

Source: U.S. Census Bureau, Census 2010 Summary File 1. Esri forecasts for 2016 and 2021. Esri converted Census 2000 data into 2010 geography.

Strengths, Weaknesses, Opportunities and Threats (SWOT)

Strengths

- Small town feel
- Low crime rate
- Low tax rate
- Excellent local fire department
- Lack of competition for business
- Newly renovated water system with extra capacity
- Ellenton is debt free
- Local health clinic
- Early warning system
- Good working relationship with neighboring local governments

Weaknesses

- Apathy amongst citizens
- Lack of sanitary sewer
- No local police department
- Lack of commercial development
- Poor housing stock
- Little available (purchasable) land
- No sidewalks for pedestrians
- Technology (improve broadband)

Opportunities

- Room for growth
- Room for and market for public housing
- Community center

Threats

- Natural and Man-made disasters (trainwrecks)
- Costs associated with state mandated advertising are expensive
- Existing codes are not well enforced

Needs and Opportunities

Needs

- More commercial development is needed.
- Sidewalks are important for pedestrian travel and do not exist in Ellenton.
- Ellenton needs a sewer system to help attract commercial development.
- New housing stock is needed, and rehabilitation is needed throughout town.
- Public apathy needs to be addressed by involving the public as much as possible through a variety of means (citizens' academy on local government?). Whether the public chooses to participate or not the opportunities need to be offered.
- A beautification program is needed.
- A tree-planting program is desired.

Opportunities

- Market the strengths of the small town (sense of community, local health clinic, low crime, local fire protection, cheap utilities, etc.) to bring residents and commercial development.
- There is a market for more public housing in Ellenton but getting the housing authority to build it is difficult due to budget constraints.
- There is a land that could be available for new development within the city limits and near existing water lines.
- Constructing a community center would help in a couple of ways—rental fees provide income and having a place for the community to gather would help bring the community together.
- The city recently partnered with UGA to develop gateway signage.

Goals and Policies

Goal: Economic Prosperity

Encourage development or expansion of businesses and industries that are suitable for the community. Factors to consider when determining suitability include job skills required; long-term sustainability; linkages to other economic activities in the region; impact on the resources of the area; or

prospects for creating job opportunities that meet the needs of a diverse local workforce.

Policies:

- We will support programs for retention, expansion and creation of businesses that are a good fit for our community's economy in terms of job skill requirements and linkages to existing businesses.
- We will carefully consider costs as well as benefits in making decisions on proposed economic development projects.

Goal: Local Preparedness

Identify and put in place the prerequisites for the type of future the community seeks to achieve. These prerequisites might include infrastructure (roads, water and sewer) to support or direct new growth; ordinances and regulations to manage growth as desired; leadership and staff capable of responding to opportunities and managing new challenges; or undertaking an all-hazards approach to disaster preparedness and response.

Policies:

- We will consider impacts on infrastructure and natural resources in our decision making on economic development projects.

Goal: Housing Options

Promote an adequate range of safe, affordable, inclusive, and resource efficient housing in the community. This may be achieved by encouraging development of a variety of housing types, sizes, costs, and densities in each neighborhood; instituting programs to provide housing for residents of all socio-economic backgrounds; or coordinating with local economic development programs to ensure availability of adequate workforce housing in the community.

Policies:

- We will eliminate substandard or dilapidated housing in our community.
- We will create affordable housing opportunities to ensure that all those who work in the community have a viable option to live in the community.
- We will increase opportunities for low-to-moderate income families to move into affordable owner-occupied housing.

Goal: Broadband Options

Make Ellenton town a broadband ready community and accessibility to a high-speed internet service to improve the economy, education, agriculture, address the needs, and improve the well-being of the community residents.

Policies:

- We will be a broadband certified community.
- We will develop a broadband ordinance and adopt it to regulate broadband installation.
- We will collaborate with broadband service providers to extend a high-speed internet service to unserved and underserved areas.
- We will amend the land-use ordinance when necessary to accommodate broadband installation.

Economic Development

The Comprehensive Economic Development Strategy (CEDS) as developed by the Southwest Georgia Regional Commission under a grant from the US Department of Commerce Economic Development Administration is hereby incorporated by reference into this Comprehensive Plan to serve as the Economic Development Element for Colquitt County and the Cities of Moultrie, Doerun, Norman Park, Ellenton, Berlin and Funston.

The Southwest Georgia Regional Commission's (SWGRC) Comprehensive Economic Development Strategy (CEDS) was designed to bring together the public and private sectors in the creation of an economic roadmap to diversify and strengthen the regional economy. The SWGRC CEDS analyzed the regional economy and serves as a guide for establishing regional goals and objectives, a regional plan of action, and the investment priorities and funding sources.

As a performance-based plan, this CEDS plays a critical role in adapting to global economic conditions by fully utilizing the region's unique advantages to maximize economic opportunity for its residents by attracting the private investment that creates jobs. The SWGRC CEDS is a regionally owned strategy that is the result of a continuing economic development planning process developed with regional public and private sector participation. This plan sets forth the goals and objectives necessary to solve the economic development problems of the Southwest Georgia region and clearly defines the measures of success.

The Southwest Georgia CEDS gives an overview of the region briefly describing geography, population, economy, labor, and workforce development and use, education, transportation access, environment, and regional resources. It reviews the state of the Regional Economy and provides a list of achievable Goals and Objectives for the region, a Plan of Action to ensure success, and Performance Measures used to evaluate the Southwest Georgia Regional Commission's successful development and implementation of the 2012-2017 CEDS. Implementation of the goals identified in this plan is significant to the economic future of the SWGRC District.

Policies, issues and opportunities, and Short-Term Work Program implementation strategies located in the current Comprehensive Plans for each of our 14-county region were used extensively to develop the CEDS Goals and Objectives, Vital Projects and Problems and Opportunities.

Included below are goals and objectives from the CEDS which are aligned with the current economic development goals of Colquitt County and the Cities of Moultrie, Doerun, Norman Park, Ellenton, Berlin and Funston.

Goal: Encourage and increase regional collaboration among cities and counties.

Objective: To increase the likelihood of large-scale economic development projects resulting in jobs and private investment.

Goal: Expand existing industries.

Objective: To increase the potential that existing industries will expand in the region.

Goal: Improve infrastructure of water, sewer roads and technology.

Objective: To increase the likelihood that businesses will be started or moved to the region.

Goal: Support technical colleges within the region.

Objective: To increase the level of education of the region's workforce.

Goal: Increase tourism in the region.

Objective: Increase the region's tax base and local government's ability to provide services and recreational opportunities.

Goal: Recruit retirees to the region.

Objective: Support communities in the region and increase the tax base by recruiting retirees.

Goal: Increase access to capital for small businesses in the region.

Objective: To increase availability and likelihood to access low-interest financing for businesses creating jobs and making private investments.

Goal: Create a diverse economy resistant to economic recession.

Objective: To promote the development of diverse employment opportunities at various skill levels.

Goal: Improve and upgrade the educational attainment levels of the labor workforce skills within the region.

Objective: Develop and support community-based efforts to address improved education levels and labor force skills. Support the continued improvement of the education system in addressing education issues and education skill improvement for the region.

Goal: Provide a well-trained workforce, professional, technical and skilled, capable of accommodating new industry and maintaining existing industry.

Objective: Improved education attainment by reducing high school drop-out rate.

Colquitt County and its municipalities according to the CEDS...

The population of Colquitt County (including cities) is 45,898 which is a population increase of 400 from the 2010 Census. The poverty rate has grown from 26.7% to 27.5% from 2013-2022. The median household income is \$40,625. Sixty-five (65.9%) of the population does not have a high school diploma. With its long growing season and varied types of soils, the county has traditionally been a state leader in agricultural production. Colquitt County currently has the largest farm gate in Georgia. Despite the county's agricultural strength, manufacturing has replaced farming as the largest employment sector in the county. There are six cities in Colquitt County: Berlin, Doerun, Ellenton, Funston, Moultrie and Norman Park. Berlin is a small town in Colquitt County, named after a German city, and is considered to be a speed trap. The City of Doerun is home to the GA Annual May Day Festival and is sponsored by the Doerun Booster Association. Ellenton, Funston, and Riverside are small towns located within Colquitt County. The City of Norman Park is home to the Georgia Baptist Conference Center.

Colquitt County is located within the Southwest Georgia Regional Commission area, a very rural and agriculturally oriented portion of Georgia. Agribusiness and textile manufacturing remain the most significant contributors to the region's economy. Colquitt County is ranked as the 40th most populous county in the state and is the region's third most populous county, following Dougherty and Thomas Counties. Moultrie is a city of 14,638 in a county of 45,898 people covering 544.15 square miles. Colquitt County also has one of the largest concentrations of Hispanic or migrant workers in Georgia, an important asset to the local farmers. It is estimated the county has between 2,000 to 5,000 migrant workers, depending on the season. The majority of these workers are available on a temporary work permit and after five years some become regular U.S. citizens. Migrant farm workers are important to the local economy and are generally undercounted during the census. It is expected that the historical growth trend of the minority population in the county will continue. In contrast, the unincorporated portion of the county has experienced a reverse trend.

The Annual Sunbelt Agricultural Expo is Colquitt County's largest attraction and adds millions of dollars to the local economy. The Expo, held annually in October, draws over 300,000 visitors annually and is the largest outdoor farm show in North America with field demonstrations, and more than 1,000 corporate and private exhibitors in the Annual event. This event has evolved into an incredible economic development opportunity for the City of Moultrie and Colquitt County.

The Sanderson Farms project brought in 1,500 jobs for the county, exceeding expectations of all involved. That impact has translated into \$90 million of investment from Sanderson farms, more than \$50 million investment from producers in the region, a 30-percent increase in sales tax collections over the past two years and a 7.3 percent growth in the tax digest.

Educational attainment has grown in Colquitt County. A comprehensive effort by the entire community, to include the business community, is significantly improving workforce education and readiness. Results certified by the Georgia Board of Education gave Colquitt County High School (CCHS) a 93% graduation rate for 2015, making CCHS a state leader in that category. The number of adults without elementary education has dropped, as the number of adults with some college or college degrees has grown. However, educational attainment is growing faster at the state level than in Colquitt County. The city of Moultrie is catching up to the state level of adults with college degrees somewhat faster than the county as a whole. Colquitt County is home to Southern Regional Technical College that has over 2,000 students. Brewton-Parker has a 2-year extension degree program, and also Abraham Baldwin Agricultural College which is located on the square in downtown Moultrie.

Supplementary Economic Statistics/Data (See Appendix)

Tapestry Segments Explained

Tapestry segmentation provides an accurate, detailed description of America's neighborhoods—U.S. residential areas are divided into 67 distinctive segments based on their socioeconomic and demographic composition. The top three tapestry segments in Ellenton are: Southern Satellites, Top Tier and Professional Pride.

10A Southern Satellites

- Own 2–3 vehicles

Transportation

An integrated transportation system should contribute to a high quality of life for residents and a desirable climate for business. While the automobile is the dominant mode of transportation, the City wants to provide a balanced and coordinated “multi-modal” transportation system to accommodate ongoing growth and development. Comprehensive improvements to all modes of travel can help improve the operation and capacity of the road system.

Road Network

Ellenton lies just one mile off the beaten path of GA Hwy 37 approximately halfway between Moultrie to the west and Adel to the east. Baker Street is the main thoroughfare in Ellenton and is by far the busiest route in town. Georgia Department of Transportation (GDOT) traffic counts indicate approximately 2,060 Annual Average Daily Trips (AADT) through Ellenton. Nearby GA Hwy 37 has about 2,700 AADT.

Alternative Modes

The road network in Ellenton is largely a simple grid pattern. Sidewalks are not present anywhere in town. There are no dedicated bicycle lanes in Ellenton, but residents find that most city streets have very low traffic and can provide a fairly safe avenue for cycling.

Colquitt County is a member of the Southwest Georgia Regional Rural Transit System. Transit buses are available for all residents of Colquitt County, Doerun, Norman Park, Ellenton, Moultrie, Berlin and Funston. The transit system provides transport to anywhere in the region for a fee based on mileage. Users must call to schedule a pickup by 3 pm the day before their scheduled trip. This service has proven to be very beneficial for those that do not drive. Typically, elderly or those that do not have a license have utilized the service for daily life activities including grocery shopping and doctor's appointments in particular.

Parking

Off street parking is the only method available in Ellenton and since Ellenton lacks any traditional downtown, the current parking method is adequate at this time.

Railroad

Ellenton is serviced by the Norfolk Southern rail line that comes from Sparks (just North of Adel) through Ellenton, just north of Moultrie and finally through Doerun on its way through Worth and Dougherty Counties to the City of Albany. The rail line provides critical freight transport for a number of industries in Colquitt County and the Cities of Ellenton and Doerun.

Land Use

The City of Ellenton is not required to have a Land Use Element because they do not have a zoning ordinance.

City of Ellenton Report of Accomplishment 2018-2022

City of Ellenton Report of Accomplishment 2018-2022

Activity	Years	Responsible Party	Cost Estimate	Funding Source	STATUS UPDATE

Adoption Resolution

A RESOLUTION TO ADOPT THE COLQUITT COUNTY COMPREHENSIVE PLAN

WHEREAS, the City Council of Ellenton, Georgia found it necessary to update their joint comprehensive plan as part of the requirements to maintain its Qualified Local Government Status;

WHEREAS, the City Council held public meetings and hearings to allow private citizens to review the Comprehensive Plan and gathered citizens input;

WHEREAS, in the development of the comprehensive plan, The City of Ellenton examined, evaluated, and where applicable, incorporated considerations of both the Flint River Basin Regional Water Development and Conservation Plan and the Environmental Planning Criteria pursuant to O.C.G.A. 12-2-8, and;

THEREFORE, BE IT RESOLVED by the City Council of Ellenton, Georgia that the Comprehensive Plan shall be adopted, hereby certifying that adequate citizen participation requirements have been met.

Adopted on the 30th day of June 2022.

2016 Total Housing Units	378
2016 Owner Occupied Housing Units	216
2016 Renter Occupied Housing Units	100
2016 Vacant Housing Units	62
2021 Total Housing Units	385
2021 Owner Occupied Housing Units	220
2021 Renter Occupied Housing Units	102
2021 Vacant Housing Units	63

Currently, 57.1% of the 378 housing units in the area are owner occupied; 26.5%, renter occupied; and 16.4% are vacant. Currently, in the U.S., 55.4% of the housing units in the area are owner occupied; 32.9% are renter occupied; and 11.7% are vacant. In 2010, there were 368 housing units in the area - 59.8% owner occupied, 23.1% renter occupied, and 17.1% vacant. The annual rate of change in housing units since 2010 is 1.20%. Median home value in the area is \$104,297, compared to a median home value of \$198,891 for the U.S. In five years, median value is projected to change by 3.86% annually to \$126,056.

Data Note: Income is expressed in current dollars

Strengths, Weaknesses, Opportunities and Threats (SWOT)

Strengths

- Great place to raise a family
- Fairly low crime rate
- Services comparable to larger cities
- Good police protection
- Good local festivals (May Day, Alumni Day, Christmas in the Park)
- Rail line

Weaknesses

- Sense of community has decreased from the past
- Economic development. Need to go out and get it!
- Community involvement
- Lack of recreational opportunities
- Technology (Improve the Broadband)

Opportunities

- New development potential along Hwy 133 after bypass created
- Medical clinic
- Downtown beautification
- Grant opportunities

Threats

- Hwy 133 bypass
- Unemployable population growth

Needs and Opportunities

Needs

- We need to get the community back together and increase community involvement.
- More economic development efforts need to happen throughout town. Since the Moultrie-Colquitt County Development Authority does not seem to help, perhaps creating a local one would meet the needs of Doerun.
- Doerun needs more recreational opportunities. Baseball facilities are there but there is no organized program.

Opportunities

- With the coming of the Hwy 133 bypass in the next few years it is too early to tell whether it will help or hurt Doerun. The city would like to begin planning for development near the bypass but at the same time trying not to steer development away from the downtown area.
- Opportunity exists for a medical clinic to be developed in Doerun even if it is only open a few days per week.
- Downtown Doerun is in need of some beautification in order to help attract businesses. Streetscape improvements and lighting would help immensely.
- Although there is not as many grants available as there used to be, they are still available and are still worth pursuing to assist with various projects around town.

Goals and Policies

Goal: Economic Prosperity

Encourage development or expansion of businesses and industries that are suitable for the community. Factors to consider when determining suitability include job skills required; long-term sustainability; linkages to other economic activities in the region; impact on the resources of the area; or prospects for creating job opportunities that meet the needs of a diverse local workforce.

Policies:

- We will support programs for retention, expansion and creation of businesses that are a good fit for our community's economy in terms of job skill requirements and linkages to existing businesses.

- We will take into account impacts on infrastructure and natural resources in our decision making on economic development projects.

Goal: Resource Management

Promote the efficient use of natural resources and identify and protect environmentally sensitive areas of the community. This may be achieved by promoting energy efficiency and renewable energy generation; encouraging green building construction and renovation; utilizing appropriate waste management techniques; fostering water conservation and reuse; or setting environmentally sensitive areas aside as green space or conservation reserves.

Policies:

- Infrastructure networks will be developed to steer new development away from sensitive natural resource areas.
- We will ensure safe and adequate supplies of water through protection of ground and surface water sources.

Goal: Efficient Land Use

Maximize the use of existing infrastructure and minimize the costly conversion of undeveloped land at the periphery of the community. This may be achieved by encouraging development or redevelopment of sites closer to the traditional core of the community; designing new development to minimize the amount of land consumed; carefully planning expansion of public infrastructure; or maintaining open space in agricultural, forestry, or conservation uses.

Policies:

- We are open to land planning and development concepts that may be new to our area but have been tried successfully in other places.

Goal: Local Preparedness

Identify and put in place the prerequisites for the type of future the community seeks to achieve. These prerequisites might include infrastructure (roads, water, sewer) to support or direct new growth; ordinances and regulations to manage growth as desired; leadership and staff capable of responding to opportunities and managing new challenges; or undertaking an all-hazards approach to disaster preparedness and response.

Policies:

- Our community will make efficient use of existing infrastructure and public facilities in order to minimize the need for costly new/expanded facilities and services.
- We will protect existing infrastructure investments (i.e., already paid for) by encouraging infill redevelopment, and compact development patterns.

Goal: Sense of Place

Protect and enhance the community's unique qualities. Maintain the downtown as a focal point of the community; fostering compact, walkable, mixed-use development; protecting and revitalizing historic areas of the community; encouraging new development that is compatible with the traditional features of the community; or protecting scenic and natural features that are important to defining the community's character.

Policies:

- We are committed to providing pleasant, accessible public gathering places and parks throughout the community.

Goal: Regional Cooperation

Cooperate with neighboring jurisdictions to address shared needs. This may be achieved by actively participating in regional organizations; identifying joint projects that will result in greater efficiency and less cost to the taxpayer; or developing collaborative solutions for regional issues such as protection of shared natural resources, development of the transportation network, or creation of a tourism plan.

Policies:

- We will work jointly with neighboring jurisdictions on developing solutions for shared regional issues (such as growth management, watershed protection)
- We will consult other public entities in our area when making decisions that are likely to impact them.

Goal: Housing Options

Promote an adequate range of safe, affordable, inclusive, and resource efficient housing in the community. This may be achieved by encouraging development of a variety of housing types, sizes, costs, and densities in each neighborhood; instituting programs to provide housing for residents of all socio-economic backgrounds; or coordinating with local economic development programs to ensure availability of adequate workforce housing in the community.

Policies:

- We will eliminate substandard or dilapidated housing in our community.

Goal: Educational Opportunities

Make educational and training opportunities readily available to enable all community residents to improve their job skills, adapt to technological advances, or pursue life ambitions. This can be achieved by expanding and improving local educational institutions or programs; providing access to other institutions in the region; or coordinating with local economic development programs to ensure an adequately trained and skilled workforce.

Policies:

- We will promote and encourage the development of advanced educational programs for all residents in Doerun to meet the needs of existing and future industry and for the betterment of our residents.

Goal: Broadband Options

Make Ellenton town a broadband ready community and accessibility to a high-speed internet service to improve the economy, education, agriculture, address the needs, and improve the well-being of the community residents.

Policies:

- We will be a broadband certified community.
- We will develop a broadband ordinance and adopt it to regulate broadband installation.
- We will collaborate with broadband service providers to extend a high-speed internet service to unserved and underserved areas.
- We will amend the land-use ordinance when necessary to accommodate broadband installation.

Produced: November, 2021

Economic Development

The Comprehensive Economic Development Strategy (CEDS) as developed by the Southwest Georgia Regional Commission under a grant from the US Department of Commerce Economic Development Administration is hereby incorporated by reference into this Comprehensive Plan to serve as the Economic Development Element for Colquitt County and the Cities of Moultrie, Doerun, Norman Park, Ellenton, Berlin and Funston.

The Southwest Georgia Regional Commission's (SWGRC) Comprehensive Economic Development Strategy (CEDS) was designed to bring together the public and private sectors in the creation of an economic roadmap to diversify and strengthen the regional economy. The SWGRC CEDS analyzed the regional economy and serves as a guide for establishing regional goals and objectives, a regional plan of action, and the investment priorities and funding sources.

As a performance-based plan, this CEDS plays a critical role in adapting to global economic conditions by fully utilizing the region's unique advantages to maximize economic opportunity for its residents by attracting the private investment that creates jobs. The SWGRC CEDS is a regionally owned strategy that is the result of a continuing economic development planning process developed with regional public and private sector participation. This plan sets forth the goals and objectives necessary to solve the economic development problems of the Southwest Georgia region and clearly defines the measures of success.

The Southwest Georgia CEDS gives an overview of the region briefly describing geography, population, economy, labor, and workforce development and use, education, transportation access, environment, and regional resources. It reviews the state of the Regional Economy and provides a list of achievable Goals and Objectives for the region, a Plan of Action to ensure success, and Performance Measures used to evaluate the Southwest Georgia Regional Commission's successful development and implementation of the 2012-2017 CEDS. Implementation of the goals identified in this plan is significant to the economic future of the SWGRC District.

Policies, issues and opportunities, and Short-Term Work Program implementation strategies located in the current Comprehensive Plans for each of our 14-county region were used extensively to develop the CEDS Goals and Objectives, Vital Projects and Problems and Opportunities.

Included below are goals and objectives from the CEDS which are aligned with the current economic development goals of Colquitt County and the Cities of Moultrie, Doerun, Norman Park, Ellenton, Berlin and Funston.

Goal: Encourage and increase regional collaboration among cities and counties.

Objective: To increase the likelihood of large-scale economic development projects resulting in jobs and private investment.

Goal: Expand existing industries.

Objective: To increase the potential that existing industries will expand in the region.

Goal: Improve infrastructure of water, sewer roads and technology.

Objective: To increase the likelihood that businesses will be started or moved to the region.

Goal: Support technical colleges within the region.

Objective: To increase the level of education of the region's workforce.

Goal: Increase tourism in the region.

Objective: Increase the region's tax base and local government's ability to provide services and recreational opportunities.

Goal: Recruit retirees to the region.

Objective: Support communities in the region and increase the tax base by recruiting retirees.

Goal: Increase access to capital for small businesses in the region.

Objective: To increase availability and likelihood to access low-interest financing for businesses creating jobs and making private investments.

Goal: Create a diverse economy resistant to economic recession.

Objective: To promote the development of diverse employment opportunities at various skill levels.

Goal: Improve and upgrade the educational attainment levels of the labor workforce skills within the region.

Objective: Develop and support community-based efforts to address improved education levels and labor force skills. Support the continued improvement of the education system in addressing education issues and education skill improvement for the region.

Goal: Provide a well-trained workforce, professional, technical, and skilled, capable of accommodating new industry and maintaining existing industry.

Objective: Improved education attainment by reducing high school drop-out rate.

Colquitt County and its municipalities according to the CEDS...

The population of Colquitt County (including cities) is 45,898, which is a population increase of 400 from the 2010 Census. The poverty rate has decreased from 26.7% to 21.5% from 2013-2020. The median household income also decreased from \$32,484 to \$28,750. Fifty-seven percent (57.3%) of the population does not have a high school diploma. With its long growing season and varied types of soils, the county has traditionally been a state leader in agricultural production. Colquitt County currently has the largest farm gate in Georgia. Despite the county's agricultural strength, manufacturing has replaced farming as the largest employment sector in the county. There are six cities in Colquitt County: Berlin, Doerun, Ellenton, Funston, Moultrie and Norman Park. Berlin is a small town in Colquitt County, named after a German city, and is considered to be a speed trap. The City of Doerun is home to the GA Annual May Day Festival and is sponsored by the Doerun Booster Association. Ellenton, Funston, and Riverside are small towns located within Colquitt County. The City of Norman Park is home to the Georgia Baptist Conference Center.

Colquitt County is located within the Southwest Georgia Regional Commission area, a very rural and agriculturally oriented portion of Georgia. Agribusiness and textile manufacturing remain the most significant contributors to the region's economy. Colquitt County is ranked as the 40th most populous county in the state and is the region's third most populous county, following Dougherty and Thomas Counties. Moultrie is a city of 14,638 in a county of 45,989 people covering 544.5 square miles. Colquitt County also has one of the largest concentrations of Hispanic or migrant workers in Georgia, an important asset to the local farmers. It is estimated the county has between 2,000 to 5,000 migrant workers, depending on the season. The majority of these workers are available on a temporary work permit and after five years some become regular U.S. citizens. Migrant farm workers are important to the local economy and are generally undercounted during the census. It is expected that the historical growth trend of the minority population in the county will continue. In contrast, the unincorporated portion of the county has experienced a reverse trend.

The Annual Sunbelt Agricultural Expo is Colquitt County's largest attraction and adds millions of dollars to the local economy. The Expo, held annually in October, draws over 300,000 visitors annually and is the largest outdoor farm show in North America with field demonstrations, and more than 1,000 corporate and private exhibitors attend the annual event. This event has evolved into an incredible economic development opportunity for the City of Moultrie and Colquitt County.

The Sanderson Farms project brought in 1,500 jobs for the county, exceeding expectations of all involved. That impact has translated into \$90 million of investment from Sanderson farms, more than \$50 million investment from producers in the region, a 30-percent increase in sales tax collections over the past two years and a 7.3 percent growth in the tax digest.

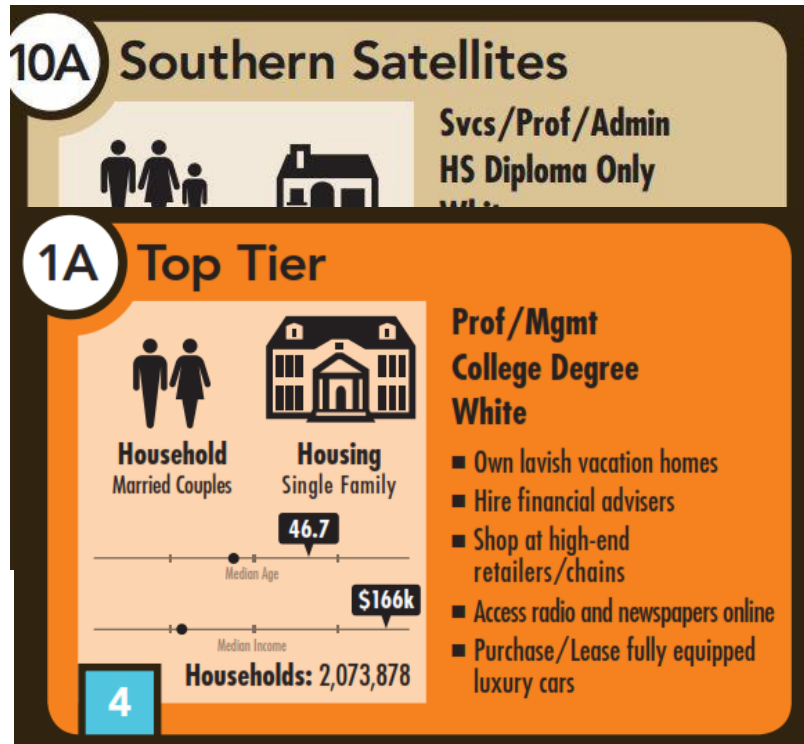

Educational attainment has grown in Colquitt County. A comprehensive effort by the entire community, to include the business community, is significantly improving workforce education and readiness. Results certified by the Georgia Board of Education gave Colquitt County High School (CCHS) a 93% graduation rate for 2015, making CCHS a state leader in that category. The number of adults without elementary education has dropped, as the number of adults with some college or college degrees has grown. However, educational attainment is growing faster at the state level than in Colquitt County. The city of Moultrie is catching up to the state level of adults with college degrees somewhat faster than the county as a whole. Colquitt County is home to Southern Regional Technical College that has over 2,000 students. Brewton-Parker has a 2-year extension degree program, and also Abraham Baldwin Agricultural College which is located on the square in downtown Moultrie.

Supplementary Economic Statistics/Data (See Appendix)

Tapestry Segments Explained

Tapestry segmentation provides an accurate, detailed description of America's neighborhoods—U.S. residential areas are divided into 67 distinctive segments based on their socioeconomic and demographic composition. The top three tapestry segments in Doerun are: Heartland Communities, Southern Satellites and Top Tier.

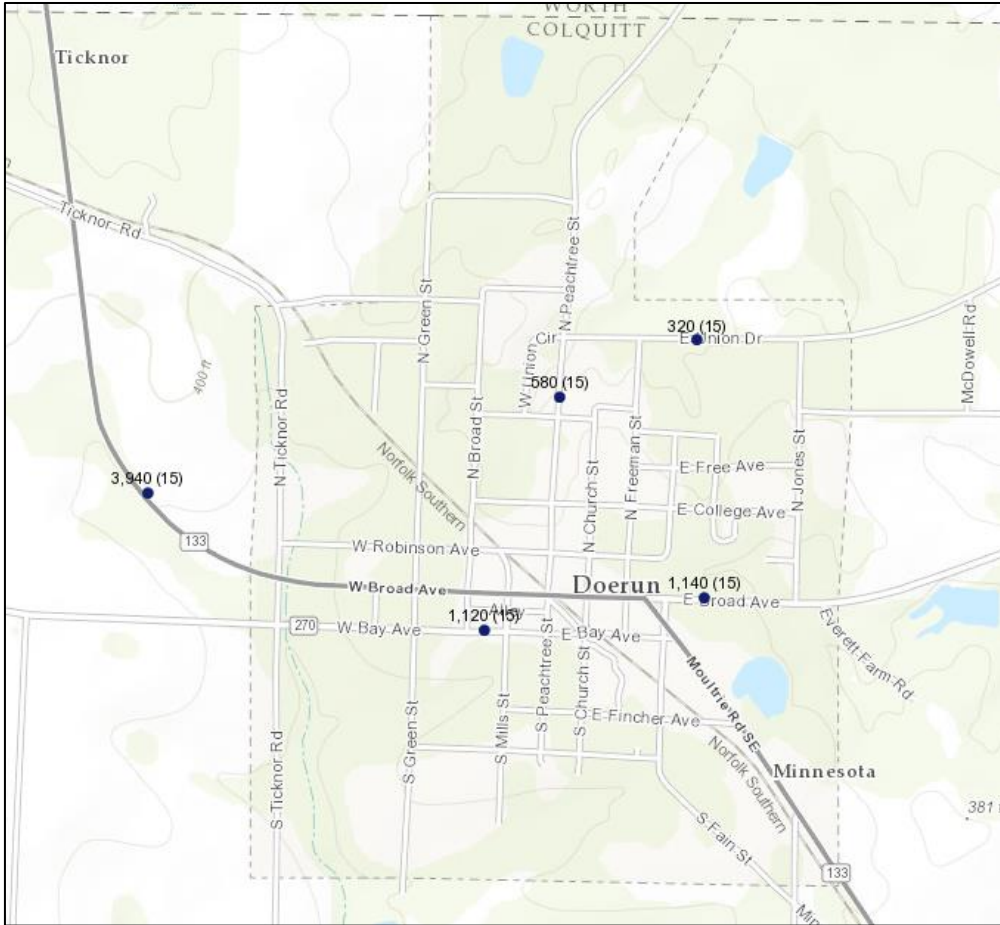

Transportation

An integrated transportation system should contribute to a high quality of life for residents and a desirable climate for business. While the automobile is the dominant mode of transportation, the City wants to provide a balanced and coordinated “multi-modal” transportation system to accommodate ongoing growth and development. Comprehensive improvements to all modes of travel can help improve the operation and capacity of the road system.

Road Network

Doerun lies just south of the Worth County line along GA Hwy 133 and GA Hwy 270. Broad Street (Hwy 133) is the main thoroughfare in Doerun and is the busiest route in town. Bay Street (Hwy 270) is second. Georgia Department of Transportation (GDOT) traffic counts indicate approximately 3,900 Annual Average Daily Trips (AADT) through Doerun on Hwy 133. Nearby GA Hwy 270 has about 1,100 AADT.

Significant changes lay in store in the near future for Doerun as the GA Hwy 133 bypass has been planned. The proposed route will take traffic around Doerun on the east and north sides of town. On the plus side this will alleviate traffic downtown but, on the downside, downtown revival will be difficult without that traffic. Opportunities may exist for development along the bypass but that still does not necessarily help the downtown in any revival efforts. The Google earth image below shows Doerun with the approximate position of the new bypass in red.

Alternative Modes

The road network in Doerun is largely a simple grid pattern. Sidewalks are present along Broad Street in the downtown area and a small stretch is located on Peachtree Street near the Elementary School. There are no dedicated bicycle lanes in Doerun, but residents find that most city streets have very low traffic and can provide a fairly safe avenue for cycling.

Colquitt County is a member of the Southwest Georgia Regional Rural Transit System. Transit buses are available for all residents of Colquitt County, Doerun, Norman Park, Ellenton, Moultrie, Berlin and Funston. The transit system provides transport to anywhere in the region for a fee based on mileage. Users must call to schedule a pickup by 3 pm the day before their scheduled trip. This service has proven to be very beneficial for those that do not drive. Typically, elderly or those that do not have a license

have utilized the service for daily life activities including grocery shopping and doctor's appointments in particular.

Parking

Doerun has a mix of both on and off-street parking in town. The current parking method seems to be adequate at this time.

Railroad

Doerun is serviced by the Norfolk Southern rail line that comes from Moultrie through Doerun on its way through Worth and Dougherty Counties to the City of Albany. The rail line provides critical freight transport for a number of industries in Colquitt County and the Cities of Ellenton and Doerun.

Land Use

The Future Land Use Map is a required component for all communities that have zoning. It is intended to be an expression of the community's vision for the future, and a guide to its future development patterns citywide. It is based off of previous Future land use maps with updates added to fully meet the trends of development in Doerun and was refined with the help of the public during the public outreach portion of the plan's development. It is intended to be representation of the community's vision for the future. Below are descriptions of categories which are utilized on the Future Land Use Map.

Residential

This residential category is intended to correspond primarily to existing urban neighborhoods but is also proposed for undeveloped areas adjacent to existing urban neighborhoods. Residential means residential development ranging from approximately three to five (3-6) units per acre (i.e., lot sizes minimum of approximately 7,000 square feet to 12,000 square feet). The primary housing type is detached, single-family residential, though other housing types such as duplexes and manufactured homes may be allowed by applicable zoning regulations under certain circumstances. This future land use category is implemented with one or more residential zoning districts. Regulations may differ according to zoning district; for instance, manufactured homes may be permitted in one residential category but not in another. Furthermore, different lot sizes may be established as may be necessary.

Commercial

This category is for land dedicated to non-industrial business uses, including retail sales, services, and entertainment facilities. Commercial uses may be located as a single use in one building or grouped together in a shopping center.

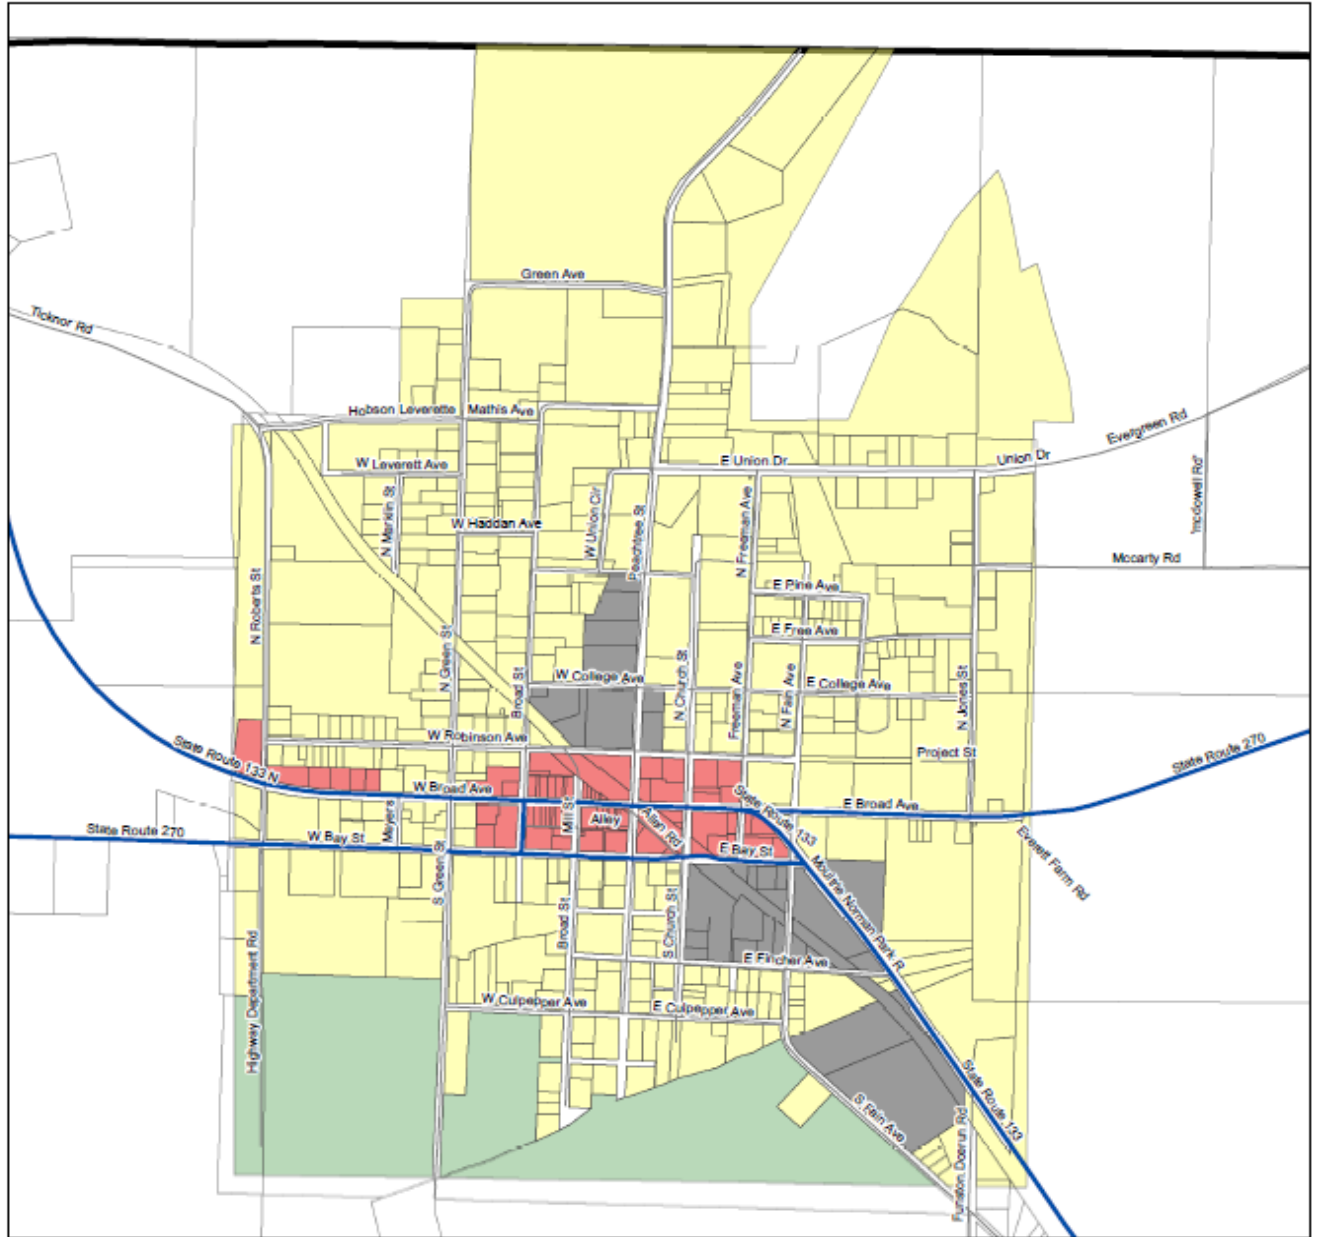

Given the small rural nature of Doerun, one category can fulfill the needs of encompassing both highway and downtown commercial uses. The Berlin zoning ordinance has four different zoning classifications for commercial and a commercial planned unit development district that will place development in the appropriate locations.

Industrial

This category corresponds to industrial operations which may or may not be objectionable due to the emission of noise, vibration, smoke, dust, gas, fumes, odors, or radiation and that may create fire or explosion hazards or other objectionable conditions. Uses within this district may require substantial quantities of water for manufacturing operations and may require rail, air, or water transportation.

Agricultural

The agricultural land use designation in Doerun is intended for those areas outside of the urban service areas which are associated with agricultural farm operations and associated activities, forestry, natural resource conservation, groundwater recharge areas, and low-density residential development that may or may not be accessory to agricultural or farm operation of varying sizes.

City of Doerun Report of Accomplishment

In this section, the projects listed within the ROA are evaluated by the municipalities and assessed. The status of each project was assessed and classified. Four classification responses were used to determine the project's status. These classifications are:

- Completed
- Currently Underway (Include a projected completion date)
- Postponed (Include an explanation of the reason)
- Not Accomplished and will no longer be undertaken or pursued by the local government (Include an explanation for the reason)

Any projects that are not completed and active are moved to the new community work program (2023-2027)

City of Doerun Report of Accomplishment 2018-2022					
Activity	Years	Responsible Party	Cost Estimate	Funding Source	STATUS UPDATE
Upgrade wastewater collection system to combat infiltration problems	2018	City	\$300,000	City, Grants	Completed
Construct new city well	2018-2020	City	\$500,000	City, Grants	Underway, completed projection date 10/1/2025
Develop tennis courts	2018-2021	City	\$100,000	Grants/SPLOST	Underway, completed projection date 10/1/2026

Adoption Resolution

A RESOLUTION TO ADOPT THE COLQUITT COUNTY COMPREHENSIVE PLAN

WHEREAS, the City Council of Doerun, Georgia found it necessary to update their joint comprehensive plan as part of the requirements to maintain its Qualified Local Government Status;

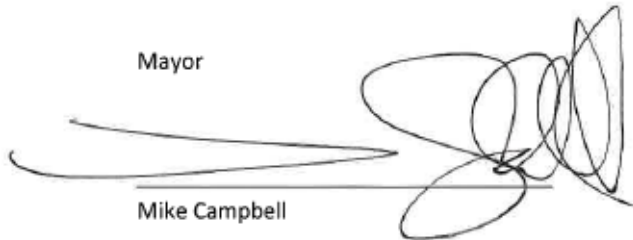

WHEREAS, the City Council held public meetings and hearings to allow private citizens to review the Comprehensive Plan and gathered citizens input;

WHEREAS, in the development of the comprehensive plan, The City of Doerun examined, evaluated, and where applicable, incorporated considerations of both the Flint River Basin Regional Water Development and Conservation Plan and the Environmental Planning Criteria pursuant to O.C.G.A. 12-2-8, and;

THEREFORE, BE IT RESOLVED by the City Council of Doerun, Georgia that the Comprehensive Plan shall be adopted, hereby certifying that adequate citizen participation requirements have been met.

Adopted on the 30 day of June 2022.

City of Funston Demographics (Cont'd)

Executive Summary

Funston
Area: 1.17 square miles

Prepared by SWGRC

Population

2000 Population	378
2010 Population	449
2016 Population	463
2021 Population	467
2000-2010 Annual Rate	1.74%
2010-2016 Annual Rate	0.49%
2016-2021 Annual Rate	0.17%
2016 Male Population	50.3%
2016 Female Population	49.7%
2016 Median Age	33.1

In the identified area, the current year population is 463. In 2010, the Census count in the area was 449. The rate of change since 2010 was 0.49% annually. The five-year projection for the population in the area is 467 representing a change of 0.17% annually from 2016 to 2021. Currently, the population is 50.3% male and 49.7% female.

Median Age

The median age in this area is 33.1, compared to U.S. median age of 38.0.

Race and Ethnicity

2016 White Alone	68.3%
2016 Black Alone	6.7%
2016 American Indian/Alaska Native Alone	0.2%
2016 Asian Alone	0.0%
2016 Pacific Islander Alone	0.0%
2016 Other Race	23.5%
2016 Two or More Races	1.3%
2016 Hispanic Origin (Any Race)	32.8%

Persons of Hispanic origin represent 32.8% of the population in the identified area compared to 17.9% of the U.S. population. Persons of Hispanic Origin may be of any race. The Diversity Index, which measures the probability that two people from the same area will be from different race/ethnic groups, is 73.7 in the identified area, compared to 63.5 for the U.S. as a whole.

Households

2000 Households	137
2010 Households	154
2016 Total Households	157
2021 Total Households	158
2000-2010 Annual Rate	1.18%
2010-2016 Annual Rate	0.31%
2016-2021 Annual Rate	0.13%
2016 Average Household Size	2.95

The household count in this area has changed from 154 in 2010 to 157 in the current year, a change of 0.31% annually. The five-year projection of households is 158, a change of 0.13% annually from the current year total. Average household size is currently 2.95, compared to 2.92 in the year 2010. The number of families in the current year is 122 in the specified area.

Data Note: Income is expressed in current dollars

2016 Per Capita Income	\$19,469
2021 Per Capita Income	\$21,416
2016-2021 Annual Rate	1.92%

Households by Income

Current median household income is \$46,653 in the area, compared to \$54,149 for all U.S. households. Median household income is projected to be \$52,920 in five years, compared to \$59,476 for all U.S. households

Current average household income is \$58,855 in this area, compared to \$77,008 for all U.S. households. Average household income is projected to be \$64,633 in five years, compared to \$84,021 for all U.S. households

Current per capita income is \$19,469 in the area, compared to the U.S. per capita income of \$29,472. The per capita income is projected to be \$21,416 in five years, compared to \$32,025 for all U.S. households

Housing

2000 Total Housing Units	152
2000 Owner Occupied Housing Units	107
2000 Renter Occupied Housing Units	30
2000 Vacant Housing Units	15
2010 Total Housing Units	168
2010 Owner Occupied Housing Units	109
2010 Renter Occupied Housing Units	45
2010 Vacant Housing Units	14
2016 Total Housing Units	169
2016 Owner Occupied Housing Units	105
2016 Renter Occupied Housing Units	52
2016 Vacant Housing Units	12
2021 Total Housing Units	171
2021 Owner Occupied Housing Units	106
2021 Renter Occupied Housing Units	52
2021 Vacant Housing Units	13

Currently, 62.1% of the 169 housing units in the area are owner occupied; 30.8%, renter occupied; and 7.1% are vacant. Currently, in the U.S., 55.4% of the housing units in the area are owner occupied; 32.9% are renter occupied; and 11.7% are vacant. In 2010, there were 168 housing units in the area - 64.9% owner occupied, 26.8% renter occupied, and 8.3% vacant. The annual rate of change in housing units since 2010 is 0.26%. Median home value in the area is \$87,121, compared to a median home value of \$198,891 for the U.S. In five years, median value is projected to change by 5.15% annually to \$112,000.

Data Note: Income is expressed in current dollars

Strengths, Weaknesses, Opportunities and Threats (SWOT)

Strengths

- Well managed city
- Cheapest water in Colquitt County
- Cheapest garbage rates in Colquitt County
- Good water infrastructure
- Civic pride
- Small town feel
- Good city park with tennis and basketball courts
- Local school
- No city taxes
- Excellent volunteer fire department
- Proximity to Moultrie

Weaknesses

- Lack of manpower for maintenance in town
- Need better code enforcement
- Technology (Improve the Broadband)

Opportunities

- More additions to the city park
- Growth opportunities
- Street & drainage improvements (Peachtree St and Circle, Manning St)
- Mulberry Street (Hwy 37) beautification

Threats

- Natural disasters

Needs and Opportunities

Needs

- Funston needs more code enforcement.
- Street and drainage improvements are needed along Manning St, Peachtree St and Peachtree Circle, and Daniel St.
- Funston lacks the manpower to complete a lot of the general maintenance type work in town. County prisoners are a big help when they are available.
- Water system improvements at the end of Spivey Dr. to loop the water line around to connect to the main line at Hwy 37.

Opportunities

- Opportunities exist for improvements and expansion to the city park(s)
- Lots of opportunities for growth in the residential and commercial sectors.
- Mulberry Street (Hwy 37) beautification. The “Main Street” of Funston needs an identity.
- Promotion of the town’s strengths (no city taxes, cheap water/garbage rates, local school, responsive city leadership, small town feel and proximity to Moultrie) could attract residents and businesses.

Goals and Policies

Goal: Economic Prosperity

Encourage development or expansion of businesses and industries that are suitable for the community. Factors to consider when determining suitability include job skills required; long-term sustainability; linkages to other economic activities in the region; impact on the resources of the area; or prospects for creating job opportunities that meet the needs of a diverse local workforce.

Policies:

- We will support programs for retention, expansion and creation of businesses that are a good fit for our community's economy in terms of job skill requirements and linkages to existing businesses.
- We will take into account impacts on infrastructure and natural resources in our decision making on economic development projects.
- We will carefully consider costs as well as benefits in making decisions on proposed economic development projects.

Goal: Local Preparedness

Identify and put in place the prerequisites for the type of future the community seeks to achieve. These prerequisites might include infrastructure (roads, water, sewer) to support or direct new growth; ordinances and regulations to manage growth as desired; leadership and staff capable of responding to opportunities and managing new challenges; or undertaking an all-hazards approach to disaster preparedness and response.

Policies:

- Our community will make efficient use of existing infrastructure and public facilities to minimize the need for costly new/expanded facilities and services.
- We will ensure that capital improvements needed to accommodate future development are provided concurrent with new development.
- We will work with the local school board to encourage school location decisions that support the community's overall growth and development plans.

Goal: Sense of Place

Protect and enhance the community’s unique qualities. Maintain the downtown as a focal point of the community; fostering compact, walkable, mixed-use development; protecting and revitalizing historic areas of the community; encouraging new development that is compatible with the traditional features of the community; or protecting scenic and natural features that are important to defining the community’s character.

Policies:

- We will encourage the development of downtown as a vibrant center of the community in order to improve overall attractiveness and local quality of life.
- We are committed to creating walkable, safe, and attractive neighborhoods throughout the community, where people have easy access to schools, parks, and necessary services (grocery store, drug store) without having to travel by car.
- We are committed to providing pleasant, accessible public gathering places and parks throughout the community.

Goal: Broadband Options

Make the City of Funston a broadband ready community and accessibility to a high-speed internet service to improve the economy, education, agriculture, address the needs, and improve the well-being of the community residents.

Policies:

- We will be a broadband certified community.
- We will develop a broadband ordinance and adopt it to regulate broadband installation.
- We will collaborate with broadband service providers to extend a high-speed internet service to unserved and underserved areas.
- We will amend the land-use ordinance when necessary to accommodate broadband installation.

Produced: November, 2021

Economic Development

The Comprehensive Economic Development Strategy (CEDS) as developed by the Southwest Georgia Regional Commission under a grant from the US Department of Commerce Economic Development Administration is hereby incorporated by reference into this Comprehensive Plan to serve as the Economic Development Element for Colquitt County and the Cities of Moultrie, Doerun, Norman Park, Ellenton, Berlin and Funston.

The Southwest Georgia Regional Commission's (SWGRC) Comprehensive Economic Development Strategy (CEDS) was designed to bring together the public and private sectors in the creation of an economic roadmap to diversify and strengthen the regional economy. The SWGRC CEDS analyzed the regional economy and serves as a guide for establishing regional goals and objectives, a regional plan of action, and the investment priorities and funding sources.

As a performance-based plan, this CEDS plays a critical role in adapting to global economic conditions by fully utilizing the region's unique advantages to maximize economic opportunity for its residents by attracting the private investment that creates jobs. The SWGRC CEDS is a regionally owned strategy that is the result of a continuing economic development planning process developed with regional public and private sector participation. This plan sets forth the goals and objectives necessary to solve the economic development problems of the Southwest Georgia region and clearly defines the measures of success.

The Southwest Georgia CEDS gives an overview of the region briefly describing geography, population, economy, labor, and workforce development and use, education, transportation access, environment, and regional resources. It reviews the state of the Regional Economy and provides a list of achievable Goals and Objectives for the region, a Plan of Action to ensure success, and Performance Measures used to evaluate the Southwest Georgia Regional Commission's successful development and implementation of the 2012-2017 CEDS. Implementation of the goals identified in this plan is significant to the economic future of the SWGRC District.

Policies, issues and opportunities, and Short-Term Work Program implementation strategies located in the current Comprehensive Plans for each of our 14-county region were used extensively to develop the CEDS Goals and Objectives, Vital Projects and Problems and Opportunities.

Included below are goals and objectives from the CEDS which are aligned with the current economic development goals of Colquitt County and the Cities of Moultrie, Doerun, Norman Park, Ellenton, Berlin and Funston.

Goal: Encourage and increase regional collaboration among cities and counties.

Objective: To increase the likelihood of large-scale economic development projects resulting in jobs and private investment.

Goal: Expand existing industries.

Objective: To increase the potential that existing industries will expand in the region.

Goal: Improve infrastructure of water, sewer roads and technology.

Objective: To increase the likelihood that businesses will be started or moved to the region.

Goal: Support technical colleges within the region.

Objective: To increase the level of education of the region's workforce.

Goal: Increase tourism in the region.

Objective: Increase the region's tax base and local government's ability to provide services and recreational opportunities.

Goal: Recruit retirees to the region.

Objective: Support communities in the region and increase the tax base by recruiting retirees.

Goal: Increase access to capital for small businesses in the region.

Objective: To increase availability and likelihood to access low-interest financing for businesses creating jobs and making private investments.

Goal: Create a diverse economy resistant to economic recession.

Objective: To promote the development of diverse employment opportunities at various skill levels.

Goal: Improve and upgrade the educational attainment levels of the labor workforce skills within the region.

Objective: Develop and support community-based efforts to address improved education levels and labor force skills. Support the continued improvement of the education system in addressing education issues and education skill improvement for the region.

Goal: Provide a well-trained workforce, professional, technical, and skilled, capable of accommodating new industry and maintaining existing industry.

Objective: Improved education attainment by reducing high school drop-out rate.

Colquitt County and its municipalities according to the CEDS...

The population of Colquitt County (including cities) is 45,898, which is a population increase of 400 from the 2010 Census. The poverty rate has increased from 26.7% to 27.3% from 2013-2020. Per capita income (Mean income) is above forty-seven thousand (\$47,462) based on U.S Census 2020.

Forty-nine percent (49.6%) of the population does not have a high school diploma. With its long growing season and varied types of soils, the county has traditionally been a state leader in agricultural production. Colquitt County currently has the largest farm gate in Georgia. Despite the county's agricultural strength, manufacturing has replaced farming as the largest employment sector in the county. There are six cities in Colquitt County: Berlin, Doerun, Ellenton, Funston, Moultrie and Norman Park. Berlin is a small town in Colquitt County, named after a German city, and is considered to be a speed trap. The City of Doerun is home to the GA Annual May Day Festival and is sponsored by the Doerun Booster Association. Ellenton, Funston, and Riverside are small towns located within Colquitt County. The City of Norman Park is home to the Georgia Baptist Conference Center.

Colquitt County is located within the Southwest Georgia Regional Commission area, a very rural and agriculturally oriented portion of Georgia. Agribusiness and textile manufacturing remain the most significant contributors to the region's economy. Colquitt County is ranked as the 40th most populous county in the state and is the region's third most populous county, following Dougherty and Thomas Counties. Moultrie is a city of 14,638 in a county of 45,989 people covering 544.5 square miles. Colquitt County also has one of the largest concentrations of Hispanic or migrant workers in Georgia, an important asset to the local farmers. It is estimated the county has between 2,000 to 5,000 migrant workers, depending on the season. The majority of these workers are available on a temporary work permit and after five years some become regular U.S. citizens. Migrant farm workers are important to the local economy and are generally undercounted during the census. It is expected that the historical growth trend of the minority population in the county will continue. In contrast, the unincorporated portion of the county has experienced a reverse trend.

The Annual Sunbelt Agricultural Expo is Colquitt County's largest attraction and adds millions of dollars to the local economy. The Expo, held annually in October, draws over 300,000 visitors annually and is the largest outdoor farm show in North America with field demonstrations, and more than 1,000 corporate and private exhibitors attend the annual event. This event has evolved into an incredible economic development opportunity for the City of Moultrie and Colquitt County.

The Sanderson Farms project brought in 1,500 jobs for the county, exceeding expectations of all involved. That impact has translated into \$90 million of investment from Sanderson farms, more than \$50 million investment from producers in the region, a 30-percent increase in sales tax collections over the past two years and a 7.3 percent growth in the tax digest.

Educational attainment has grown in Colquitt County. A comprehensive effort by the entire community, to include the business community, is significantly improving workforce education and readiness. Results certified by the Georgia Board of Education gave Colquitt County High School (CCHS) a 93% graduation rate for 2015, making CCHS a state leader in that category. The number of adults without elementary education has dropped, as the number of adults with some college or college degrees has grown. However, educational attainment is growing faster at the state level than in Colquitt County. The city of Moultrie is catching up to the state level of adults with college degrees somewhat faster than the county as a whole. Colquitt County is home to Southern Regional Technical College that has over 2,000 students. Brewton-Parker has a 2-year extension degree program, and also Abraham Baldwin Agricultural College which is located on the square in downtown Moultrie.

Supplementary Economic Statistics/Data (See Appendix)

Tapestry Segments Explained

Tapestry segmentation provides an accurate, detailed description of America's neighborhoods—U.S. residential areas are divided into 67 distinctive segments based on their socioeconomic and demographic composition. The top three tapestry segments in Funston are: Middleburg, Down the Road and Top Tier.

Transportation

An integrated transportation system should contribute to a high quality of life for residents and a desirable climate for business. While the automobile is the dominant mode of transportation, the City wants to provide a balanced and coordinated “multi-modal” transportation system to accommodate ongoing growth and development. Comprehensive improvements to all modes of travel can help improve the operation and capacity of the road system.

Road Network

Funston lies just east of the City of Moultrie along GA Hwy 37. Mulberry Street (Hwy 37) is the main thoroughfare in Funston and is the busiest route in town. Church Street is second. Georgia Department of Transportation (GDOT) traffic counts indicate approximately 3,700 Annual Average Daily Trips (AADT) through Funston on Hwy 37. No counts have been done within the city limits of Funston so a lack of data hampers transportation planning efforts.

Alternative Modes

The road network in Funston is largely a simple grid pattern. There are no sidewalks in the City of Funston. There are no dedicated bicycle lanes in Funston, but residents find that most city streets have very low traffic and can provide a safe avenue for cycling.

Colquitt County is a member of the Southwest Georgia Regional Rural Transit System. Transit buses are available for all residents of Colquitt County, Doerun, Norman Park, Ellenton, Moultrie, Berlin and Funston. The transit system provides transport to anywhere in the region for a fee based on mileage. Users must call to schedule a pickup by 3 pm the day before their scheduled trip. This service has proven to be very beneficial for those that do not drive. Typically, elderly or those that do not have a license have utilized the service for daily life activities including grocery shopping and doctor’s appointments.

Parking

Funston has a mix of both on and off-street parking in town. The current parking method seems to be adequate currently.

Railroad

Funston is not serviced by a rail line.

Land Use

The Future Land Use Map is a required component for all communities that have zoning. It is intended to be an expression of the community's vision for the future, and a guide to its future development patterns citywide. It is based on previous Future land use maps with updates added to fully meet the trends of development in Funston and was refined with the help of the public during the public outreach portion of the plan's development. It is intended to be representation of the community's vision for the future. Below are descriptions of categories which are utilized on the Future Land Use Map.

Residential

This residential category is intended to correspond primarily to existing urban neighborhoods but is also proposed for undeveloped areas adjacent to existing urban neighborhoods. Residential means residential development ranging from approximately three to five (3-6) units per acre (i.e., lot sizes minimum of approximately 7,000 square feet to 12,000 square feet). The primary housing type is detached, single-family residential, though other housing types such as duplexes and manufactured homes may be allowed by applicable zoning regulations under certain circumstances. This future land use category is implemented with one or more residential zoning districts. Regulations may differ according to zoning district; for instance, manufactured homes may be permitted in one residential category but not in another. Furthermore, different lot sizes may be established as may be necessary.

Commercial

This category is for land dedicated to non-industrial business uses, including retail sales, services, and entertainment facilities. Commercial uses may be located as a single use in one building or grouped together in a shopping center.

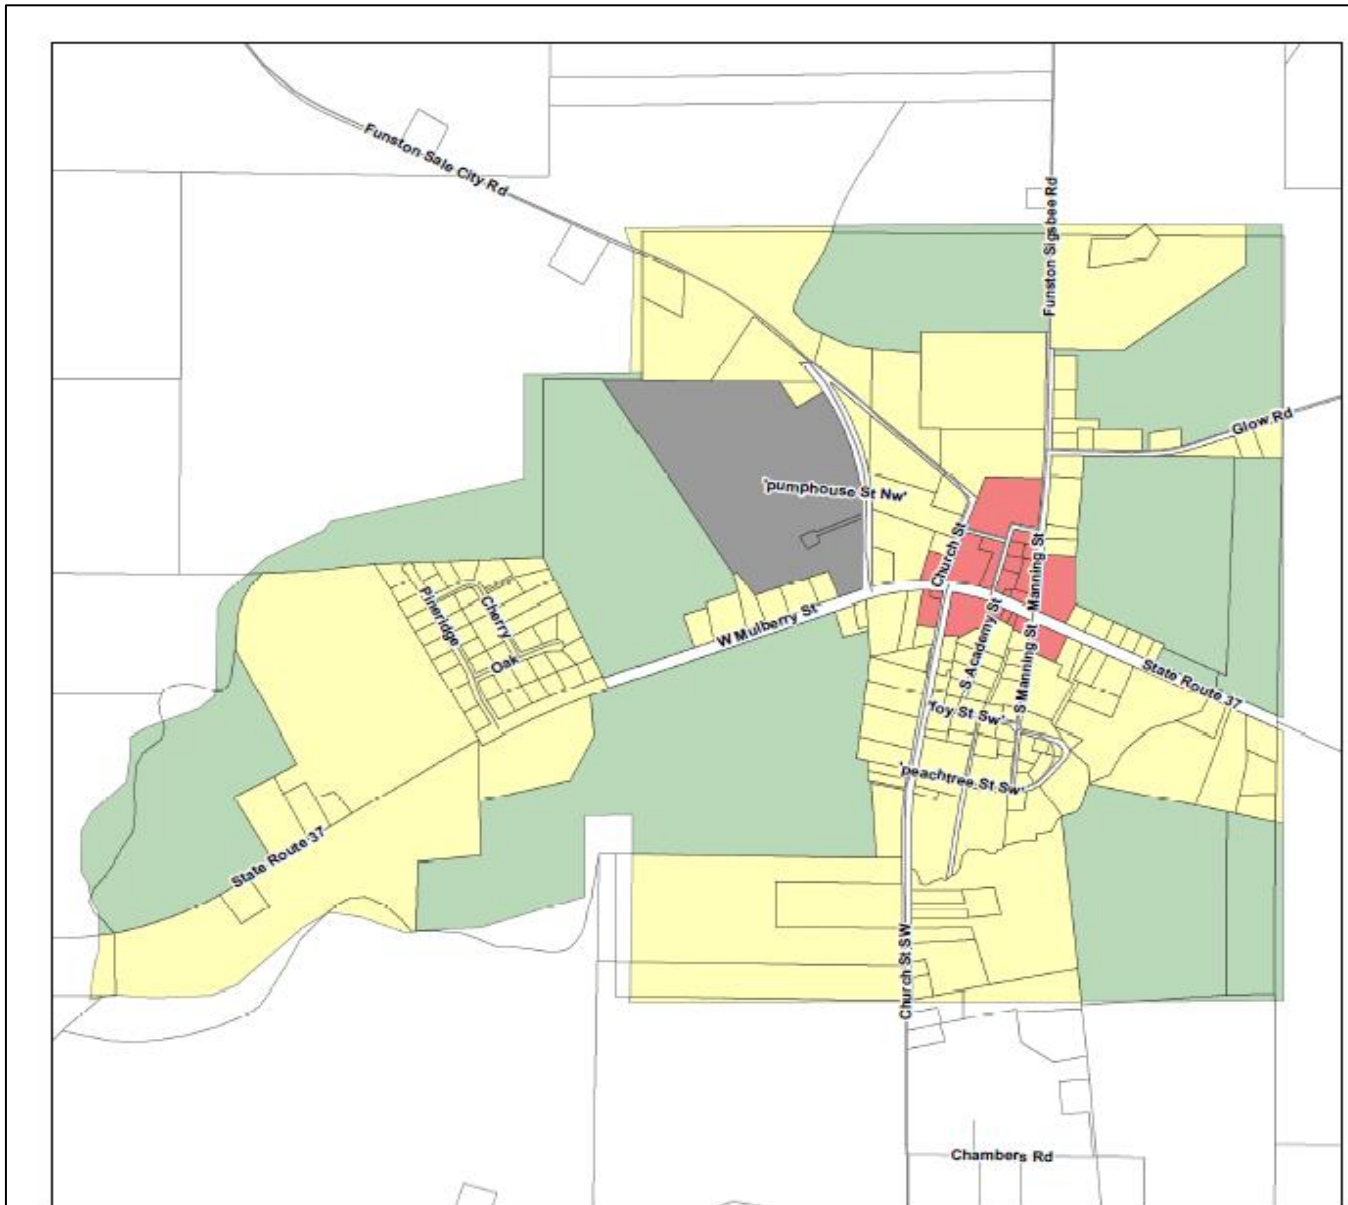

Given the small rural nature of Funston, one category can fulfill the needs of encompassing both highway and downtown commercial uses.

Industrial

This category corresponds to industrial operations which may or may not be objectionable due to the emission of noise, vibration, smoke, dust, gas, fumes, odors, or radiation and that may create fire or explosion hazards or other objectionable conditions. Uses within this district may require substantial quantities of water for manufacturing operations and may require rail, air, or water transportation.

Agricultural

The agricultural land use designation in Funston is intended for those areas outside of the urban service areas which are associated with agricultural farm operations and associated activities, forestry, natural resource conservation, groundwater recharge areas, and low-density residential development that may or may not be accessory to agricultural or farm operation of varying sizes.

City of Funston Report of Accomplishment

In this section, the projects listed within the ROA are evaluated by the municipalities and assessed. The status of each project was assessed and classified. Four classification responses were used to determine the project's status. These classifications are:

- Completed
- Currently Underway (Include a projected completion date)
- Postponed (Include an explanation of the reason)
- Not Accomplished and will no longer be undertaken or pursued by the local government (Include an explanation for the reason)

Any projects that are not completed and active are moved to the new community work program (2023-2027)

City of Funston Report of Accomplishment 2018-2022					
Activity	Years	Responsible Party	Cost Estimate	Funding Source	STATUS UPDATE
Make curb and gutter improvements to South Manning, Spivey Drive, and Foy Street, Peachtree Circle, Peachtree Street, Anderson Street, Pitchford	2018-2022	City	\$200,000	General Funds/SPLOST, CDBG	Underway - Completion Date of 2026
Develop museum on the second floor of City Hall	2018-2019	City	\$10,000	GA Humanities, GA Arts Council, Local Foundations	Underway - Completion Date of 2026
The addition of sidewalks in neighborhoods and downtown	2018-2019	City	\$250,000	TE Grants/General Funds	Underway - Completion Date of 2026
Develop small town event such as `Funston Day`	2018-2019	City	\$5,000	Grants, General Funds	Postponed due to lack of participation
Explore grant for downtown businesses	2018-2019	City	N/A	N/A	No longer being considered due to staffing
Work with local businesses to increase the appearance and attractiveness of commercial and industrial areas.	2018-2022	City	N/A	N/A	Underway - Completion date of 2024

Develop a plan to attract businesses	2018-2022	City	\$1,000	General Funds/Grants	No longer being considered due to lack of participation
Acquire Park signs for City Park and directional signs	2018-2019	City	\$5,000	General Funds	Completed
Purchase playground equipment for Pineridge subdivision	2018-2022	City	\$18,000	General Funds/SPLOST	Completed
Construct fence at Pine Ridge Park to enclose playground areas	2018-2019	City	\$6,000	Grants, General Funds	Underway - Completion date of 2024
Connect main water line from Pivey Dr to N. Church St.	2018-2022	City	\$26,000	Grants, General Funds	Completed
Improve/ Establish Broadband capabilities in unserved or underserved areas.	2020-2022	City	\$1,000	Grants/General Fund	Postponed due to funding

City of Funston Community Work Program

City of Funston Community Work Program 2023-2027				
Activity	Years	Responsible Party	Cost Estimate	Funding Source

Adoption Resolution

A RESOLUTION TO ADOPT THE COLQUITT COUNTY COMPREHENSIVE PLAN

WHEREAS, the City Council of Funston, Georgia found it necessary to update their joint comprehensive plan as part of the requirements to maintain its Qualified Local Government Status;

WHEREAS, the City Council held public meetings and hearings to allow private citizens to review the Comprehensive Plan and gathered citizens input;

WHEREAS, in the development of the comprehensive plan, The City of Funston examined, evaluated, and where applicable, incorporated considerations of both the Flint River Basin Regional Water Development and Conservation Plan and the Environmental Planning Criteria pursuant to O.C.G.A. 12-2-8, and;

THEREFORE, BE IT RESOLVED by the City Council of Funston, Georgia that the Comprehensive Plan shall be adopted, hereby certifying that adequate citizen participation requirements have been met.

Adopted on the 30th day of June 2022.

Public Hearing Notice

Colquitt County and the City of Berlin, Doerun, Ellenton, Funston, Moultrie and Norman Park are conducting a Joint Public Hearing to begin the Colquitt County 5 Year Comprehensive Plan Update on Wednesday, June 9th, 2021 at 6:00 pm at the Colquitt County Courthouse Annex Building, 101 East Central Avenue, 2nd Floor, Room 261-C. The current plan will expire on June 30, 2022. In accordance with the Georgia Minimum Standards and Procedures for Local Comprehensive Planning (O.C.G.A. Chapter 110-12-1), each community must conduct a public hearing prior to the start of the planning process.

The purpose of this hearing is to brief the community on the process to be used to develop the plan, opportunities for public participation in development of the plan, and to obtain input on the proposed planning process. Once public comments have been addressed, the community may begin the process of developing the plan.

Copies of the current Comprehensive Plan are available at:

Public Hearing Notice

Colquitt County and the Cities of Berlin, Doerun, Ellenton, Funston, Moultrie, and Norman Park are conducting a Public Hearing to present a draft of the Colquitt County Joint Comprehensive Plan on Thursday, April 21, at 5:00 p.m. at the Colquitt County Courthouse Annex, 2nd Floor, Room 261-C, 101 East Central Avenue, Moultrie, Georgia, 31768. The current plan will expire on June 30, 2022. In accordance with the Georgia Minimum Standards and Procedures for Local Comprehensive Planning (Chapter 110-12-1), each community must conduct a public hearing once an update of the plan is drafted and made available for public review, but before transmittal to the Regional Commission for review.

The purpose of this hearing is to brief the community on the contents of the plan, provide an opportunity for residents to make final suggestions, additions, or revisions, and notify the community of when the plan is submitted to the Georgia Department of Community Affairs for review.

Copies of the draft Comprehensive Plan are available for viewing and downloading at <https://www.swgrcplanning.org/comprehensive-plans.html>

Questions should be directed to the Cities of Berlin, Doerun, Ellenton, Funston, Moultrie, Norman Park, and Colquitt County Offices or to Shane Kelsey or Barbara Reddick, Southwest Georgia Regional Commission, 229.522.3552.

SHANE

box; 2 people charged

By Jack R. Jordan
jordanr@gofnews.com

MOULTRIE, Ga. — Two arrests were made in a methamphetamine trafficking case after a resident in Norman Park video taped the suspects trying to bury the drugs.

Karrie Elizabeth English, 31 and Claude Cowart, 47, both of Moultrie, were identified by an investigator with the Moultrie Police Department-Colquitt County Sheriff's Office Drug Enforcement Team as the suspects in the trafficking case.

A resident of Norman Park happened to be looking out their window late Monday morning when a vehicle pulled up and two individuals got out. The resident captured the two individuals on video as they walked towards a tree line on the resident's property.

"Cowart and English were seen on the video

to be walking towards the tree line where they somewhat buried what was later confirmed to be a blue box containing 56 grams of meth," DET investigator Channing McDowell said in an interview Wednesday.

The responding officer of the Norman Park Police Department was able to find the box, which was then turned over to DET. After seeing the video, McDowell recognized English from a previous possession of meth case that occurred in February. He did not know the man later identified as Cowart.

Tuesday afternoon as McDowell was driving down Highway 319, he saw what he thought was the vehicle seen in the video — which had a distinguishable crack in the windshield — driven by a man with similar features to the man in the video.

"He turned into the Pure Gas Station at the intersection of Highway

Jack R. Jordan/The Moultrie Observer

Inside the box shown above were 56 grams of methamphetamine and a scale. An eyewitness's video showed two suspects burying the box on private property in Norman Park.

319 and Veterans Parkway. I decided to pursue and see who was driving. He was parked at a gas pump when I pulled up and tried to get into a parking space. He saw I was following him and he peeled out," McDowell said.

He said he was able to conduct a traffic stop on Shady Grove Road and arrested Cowart without incident.

"He then started cooperating a bit after we got into

the interview room and he told us where we could find English," McDowell said.

English was arrested without incident at an abandoned home in the 200 block of West Belbel Ave.

Both Cowart and English were charged Tuesday with trafficking methamphetamine. The reported street value of the 56 grams was "approximately \$500," according to McDowell.

Doerun Police Department

ARRESTS

• Kyle Turner Akridge, 31, 2974 Hwy. 270 W., Sale City, was charged April 26 with probation violation.

Norman Park Police Department

ARRESTS

• Gretchen Plummer Smith, 51, 1082 Rossmore Ave., McDonough, Ga., was charged April 25 with driving while license suspended or revoked and tail lights required.

Moultrie Police Department

ARRESTS

• Ronald Dale Durbam Jr., 17, 124 Dunn Rd., was charged April 28 with armed robbery and first degree home invasion.

• Brodrick Jerrel Blackwell, 32, was charged April 28 with theft by misdemeanor shoplifting.

• Marshia Lynn

Presley, 51, 1726 South Main St., was charged April 28 with two counts of failure to appear and driving while license suspended or revoked.

• Eric Lamar Palmore, 27, 424 First Ave. S.W., was charged April 28 with probation violation.

• Dontrerio Marquez Uzzell, 21, 1009 Eighth Ave., was charged April 28 with willful obstruction of law enforcement officers.

• Otis Leonard Hargraves, 68, 227 Second Ave. Apt. 307, was charged April 27 with tag lights required, D.U.I. and failure to drive within a single lane.

• Keith Brandon Dean, 25, 920 Second St. S.E., was charged April 27 with probation violation.

• Treyquan Jamerson, 20, 220 Hawthorne Drive, was charged April 27 with probation violation.

• Virginia Lee Baker,

Valdosta man pleads guilty in federal child sex case

By Terry Richards
richardst@gofnews.com

VALDOSTA, Ga. — A Valdosta man pleaded guilty in federal court to possessing child pornography, the U.S. Department of Justice said.

Ricardo Garcia, 25, of Valdosta pleaded guilty to two counts of possessing child pornography Tuesday, according to a Justice Department statement.

Garcia faces up to 20 years of imprisonment followed by five years to life of supervised release and a maximum \$250,000 fine per count. In addition, Garcia will have to register as a sex offender upon his release from federal prison.

Sentencing has been scheduled for July 26, at the Albany federal courthouse, according to the statement.

The Lowndes County Sheriff's Office received a tip from the National Center for Missing and Exploited Children and the Georgia Bureau of Investigation in August 2020 that Dropbox, an Internet file storage company, had found that two child porn videos had been uploaded which a probe that belonged to Garcia, the justice department said.

An investigation showed Garcia's Dropbox account held about 15,000 images and 40 videos of child sexual assault, the statement said.

The case was investigated by the U.S. Department of Homeland Security with assistance from and the Lowndes County Sheriff's Office, FBI and the National Center for Missing and Exploited Children.

Public Hearing Notice

The Cities of Norman Park and Berlin are conducting a Public Hearing to present a draft of the Colquitt County Joint Comprehensive Plan on the 10th day of May, 2022 at 5:30 P.M. at Norman Park City Hall located at 154 East Broad Street, Norman Park. The current plan will expire on June 30, 2022. In accordance with the Georgia Minimum Standards and Procedures for Local Comprehensive Planning (Chapter 110-12-1), each community must conduct a public hearing once an update of the plan is drafted and made available for public review, but before transmittal to the Regional Commission for review.

The purpose of this hearing is to brief the community on the contents of the plan, provide an opportunity for residents to make final suggestions, additions, or revisions, and notify the community of when the plan is submitted to the Georgia Department of Community Affairs for review.

Copies of the draft Comprehensive Plan are available for viewing and downloading at https://www.swgrcplanning.org/uploads/6/1/8/4/61849693/colquitt_county_comprehensive_plan_2022_draft_4-20-2022.pdf

Questions should be directed to the Cities of Berlin, and Norman Park Offices or to Shane Kelsey or Olukayode (Kay) Olubowale, Southwest Georgia Regional Commission, 229.522.3552.

Public Hearing Notice

The Colquitt County Board of Commissioners is conducting a Public Hearing to present a draft of the Colquitt County Joint Comprehensive Plan on Tuesday, February 6, 2018, at 7:00 p.m. The current plan will expire on June 30, 2018. In accordance with the Georgia Minimum Standards and Procedures for Local Comprehensive Planning (Chapter 110-12-1), each community must conduct a public hearing once the plan has been drafted and made available for public review, but prior to transmittal to the Regional Commission for review.

The purpose of this hearing is to brief the community on the contents of the plan, provide an opportunity for residents to make final suggestions, additions or revisions, and notify the community of when the plan will be submitted to the Regional Commission for review.

Copies of the draft Comprehensive Plan are available for viewing and downloading at <http://www.swgrcplanning.org/colquitt-county.html> or a copy may be obtained from the office of Melissa Lawson, County Clerk, at 101 East Central Avenue, 2nd Floor, Room 261-B, Monday through Friday, between the hours of 8:00 a.m. and 5:00 p.m.

Questions should be directed to the Melissa Lawson, County Clerk, at 229-616-7409 or via email at mlawson@ccboc.com. Or, alternatively call Steve O'Neil, Southwest Georgia Regional Commission, 229-522-3552 ext.1616.

42285-1

Tennis

No. 1 singles is Hayden Holloway. Wier said he has about a .500 record individually, but that's because Holloway takes on the best the other side has to offer.

"There are some really solid singles players in this area of the state," he said. "We have one coming in a couple of weeks who signed with Georgia. That's the level he ends up facing."

"Nathan Corley at No. 2, I think he's 8-2. Mark

playing No. 3. He's done real well. He puts a lot into it. He'll be successful. We just need to make sure he gets going where he needs to be."

Last summer Breedlove was the youngest player (14) at the USTA All-American College Combine in Orlando.

Most days the No. 1 doubles is Zach Tucker and Jacob Icard, two sophomores. Seniors Ian Small and Long make up No. 2, Collin Fasion also playing with Small in a rotation.

If Colquitt beats Camden today, it's No. 1 seeds for region; a win for

back in the hunt.

"Being the 1 seed is very important the way the tournament is set up," said Wier. "We'll know (today) if we have to win Tuesday or if we are the 1 seed."

In that space of time leading up to the play-offs, those matches with Thomasville will give the Packers a real post-season-caliber test. Wier said the Bulldogs could well be a finalist in Class AA this season. He said he's not concerned with an overall record because he's always looking to schedule strong clubs no matter their class.

THE STATE

The Moultrie Observer 7A

Riley Bunch/CNHI News Service

Amber Mack, research and policy analyst for Healthy Mothers, Healthy Babies Coalition Georgia talks with a group about the issue of maternal mortality in Georgia at the Capitol Building on Maternal Mortality Awareness Day on Jan. 29.

at six months of extended coverage. The issue, he said, is personal to him.

"If they can figure out a way to pay for a year, that'd be something to consider..." Dugan said. "We've

been looking at the six months — to do the most good for the most people."

Rep. Sandra Scott, D-Rex, introduced legislation on Monday that would allow out-of-state women's

health care providers within 50 miles of the Georgia border to be considered an in-state provider as long as the doctor is in "good standing" in their home state.

REQUEST FOR PROPOSALS FOR THE MOULTRIE COLQUITT COUNTY DEVELOPMENT AUTHORITY TO PROVIDE FINANCIAL AUDITING SERVICES

The Moultrie Colquitt County Development Authority is requesting bids to provide financial auditing services for the Authority, a 501 (c)(6) organization. The audit will address the finances of the organization on an annual fiscal basis. Proposals should be submitted by March 16, 2020, at 3:00pm for consideration.

Proposals must include: Executive Summary, Professional Experience, Team Qualifications, Audit Approach, Fees, Client References, and any additional information. Additionally, the proposal should include fees for a 3-year contract of providing audit services.

Submissions may be sent via e-mail to bgrogan@selectmoultrie.com, or via mail at P.O. Box 487, Moultrie, GA 31776. Submissions should include proof of insurance and licensing. The selected firm will be notified before or by May 7, 2020. The Moultrie Colquitt County Development Authority reserves the right to refuse all bids. For any questions, proposers should contact Barbara Grogan via email or at (229) 985-2131.

367277-1

JOINT PUBLIC HEARING NOTICE

The Colquitt County Board of Commissioners is conducting a Joint Public Hearing to present the Colquitt County Comprehensive Plan on February 17, 2020 at 5:00 p.m., at the Colquitt County Courthouse Annex, 2nd Floor, Room 261-C. In accordance with the Georgia Minimum Standards and Procedures for Local Comprehensive Planning (Chapter 110-12-1), each community must conduct a public hearing prior to the start of the planning process and once a draft is completed before transmitting to the Department of Community Affairs (DCA). The purpose of this hearing is to accept input on the draft plan before transmitting to the DCA. The draft Comprehensive Plan is available by visiting www.swgcrplanning.org. Questions should be directed to Kimberly Brooks, Planner II, with the Southwest Georgia Regional Commission at 229-522-3552 ext. 110.

2010 Housing Units By Urban/ Rural Status

Total Housing Units	10,926
Housing Units Inside Urbanized Area	0.0%
Housing Units Inside Urbanized Cluster	21.1%
Rural Housing Units	78.9%

Data Note: Households with children include any households with people under age 18, related or not. Multigenerational households are families with 3 or more parent-child relationships. Unmarried partner households are usually classified as nonfamily households unless there is another member of the household related to the householder. Multigenerational and unmarried partner households are reported only to the tract level. Esri estimated block group data, which is used to estimate polygons or non-standard geography.

Data Note: Consumer spending shows the amount spent on a variety of goods and services by households that reside in the area. Expenditures are shown by broad budget categories that are not mutually exclusive. Consumer spending does not equal business revenue. Total and Average Amount Spent Per Household represent annual figures. The Spending Potential Index represents the amount spent in the area relative to a national average of 100.

Source: Consumer Spending data are derived from the 2013 and 2014 Consumer Expenditure Surveys, Bureau of Labor Statistics. Esri.

2010 Housing Units By Urban/ Rural Status

Total Housing Units	6,088
Housing Units Inside Urbanized Area	0.0%
Housing Units Inside Urbanized Cluster	90.3%
Rural Housing Units	9.7%

Data Note: Households with children include any households with people under age 18, related or not. Multigenerational households are families with 3 or more parent-child relationships. Unmarried partner households are usually classified as nonfamily households unless there is another member of the household related to the householder. Multigenerational and unmarried partner households are reported only to the tract level. Esri estimated block group data, which is used to estimate polygons or non-standard geography.

Data Note: Consumer spending shows the amount spent on a variety of goods and services by households that reside in the area. Expenditures are shown by broad budget categories that are not mutually exclusive. Consumer spending does not equal business revenue. Total and Average Amount Spent Per Household represent annual figures. The Spending Potential Index represents the amount spent in the area relative to a national average of 100.

Source: Consumer Spending data are derived from the 2013 and 2014 Consumer Expenditure Surveys, Bureau of Labor Statistics. Esri.

2010 Housing Units By Urban/ Rural Status

Total Housing Units	384
Housing Units Inside Urbanized Area	0.0%
Housing Units Inside Urbanized Cluster	0.0%
Rural Housing Units	100.0%

Data Note: Households with children include any households with people under age 18, related or not. Multigenerational households are families with 3 or more parent-child relationships. Unmarried partner households are usually classified as nonfamily households unless there is another member of the household related to the householder. Multigenerational and unmarried partner households are reported only to the tract level. Esri estimated block group data, which is used to estimate polygons or non-standard geography.

Data Note: Consumer spending shows the amount spent on a variety of goods and services by households that reside in the area. Expenditures are shown by broad budget categories that are not mutually exclusive. Consumer spending does not equal business revenue. Total and Average Amount Spent Per Household represent annual figures. The Spending Potential Index represents the amount spent in the area relative to a national average of 100.

Source: Consumer Spending data are derived from the 2013 and 2014 Consumer Expenditure Surveys, Bureau of Labor Statistics. Esri.

Data Note: Household population includes persons not residing in group quarters. Average Household Size is the household population divided by total households. Persons in families include the householder and persons related to the householder by birth, marriage, or adoption. Per Capita Income represents the income received by all persons aged 15 years and over divided by the total population.

Total Housing Units	236
Housing Units Inside Urbanized Area	0.0%
Housing Units Inside Urbanized Cluster	0.0%
Rural Housing Units	100.0%

Data Note: Households with children include any households with people under age 18, related or not. Multigenerational households are families with 3 or more parent-child relationships. Unmarried partner households are usually classified as nonfamily households unless there is another member of the household related to the householder. Multigenerational and unmarried partner households are reported only to the tract level. Esri estimated block group data, which is used to estimate polygons or non-standard geography.

Data Note: Consumer spending shows the amount spent on a variety of goods and services by households that reside in the area. Expenditures are shown by broad budget categories that are not mutually exclusive. Consumer spending does not equal business revenue. Total and Average Amount Spent Per Household represent annual figures. The Spending Potential Index represents the amount spent in the area relative to a national average of 100.

Source: Consumer Spending data are derived from the 2013 and 2014 Consumer Expenditure Surveys, Bureau of Labor Statistics. Esri.

2016	34.7
2021	36.1

Data Note: Household population includes persons not residing in group quarters. Average Household Size is the household population divided by total households. Persons in families include the householder and persons related to the householder by birth, marriage, or adoption. Per Capita Income represents the income received by all persons aged 15 years and over divided by the total population.

2010 Housing Units By Urban/ Rural Status

Total Housing Units	120
Housing Units Inside Urbanized Area	0.0%
Housing Units Inside Urbanized Cluster	0.0%
Rural Housing Units	100.0%

Data Note: Households with children include any households with people under age 18, related or not. Multigenerational households are families with 3 or more parent-child relationships. Unmarried partner households are usually classified as nonfamily households unless there is another member of the household related to the householder. Multigenerational and unmarried partner households are reported only to the tract level. Esri estimated block group data, which is used to estimate polygons or non-standard geography.

Data Note: Consumer spending shows the amount spent on a variety of goods and services by households that reside in the area. Expenditures are shown by broad budget categories that are not mutually exclusive. Consumer spending does not equal business revenue. Total and Average Amount Spent Per Household represent annual figures. The Spending Potential Index represents the amount spent in the area relative to a national average of 100.

Source: Consumer Spending data are derived from the 2013 and 2014 Consumer Expenditure Surveys, Bureau of Labor Statistics. Esri.

Data Note: Consumer spending shows the amount spent on a variety of goods and services by households that reside in the area. Expenditures are shown by broad budget categories that are not mutually exclusive. Consumer spending does not equal business revenue. Total and Average Amount Spent Per Household represent annual figures. The Spending Potential Index represents the amount spent in the area relative to a national average of 100.

Source: Consumer Spending data are derived from the 2013 and 2014 Consumer Expenditure Surveys, Bureau of Labor Statistics. Esri.

Total Housing Units	168
Housing Units Inside Urbanized Area	0.0%
Housing Units Inside Urbanized Cluster	13.7%
Rural Housing Units	86.3%

Data Note: Households with children include any households with people under age 18, related or not. Multigenerational households are families with 3 or more parent-child relationships. Unmarried partner households are usually classified as nonfamily households unless there is another member of the household related to the householder. Multigenerational and unmarried partner households are reported only to the tract level. Esri estimated block group data, which is used to estimate polygons or non-standard geography.

Data Note: Consumer spending shows the amount spent on a variety of goods and services by households that reside in the area. Expenditures are shown by broad budget categories that are not mutually exclusive. Consumer spending does not equal business revenue. Total and Average Amount Spent Per Household represent annual figures. The Spending Potential Index represents the amount spent in the area relative to a national average of 100.

Source: Consumer Spending data are derived from the 2013 and 2014 Consumer Expenditure Surveys, Bureau of Labor Statistics. Esri.
