

RESOLUTION

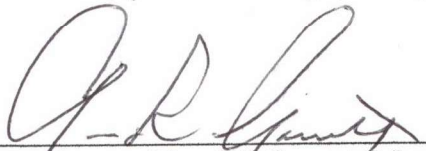

WHEREAS, the 1989 Georgia General Assembly enacted House Bill 215, the Georgia Planning Act, requiring all local governments to prepare a comprehensive plan in accordance with the Minimum Planning Standards and Procedures promulgated by the Georgia Department of Community Affairs; and

WHEREAS, the Comprehensive Plan Update for the **City of Good Hope**, Georgia, was prepared in accordance with the Minimum Planning Standards and Procedures; and

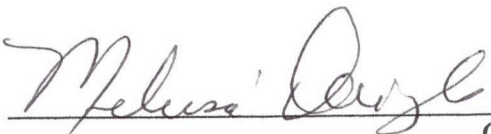

NOW THEREFORE, BE IT RESOLVED by the **City of Good Hope** that the Comprehensive Plan Update for the City of Good Hope, Georgia dated 2022, as approved by the Georgia Department Community Affairs is hereby adopted, and furthermore, that the Northeast Georgia Regional Commission shall be notified of said adoption within seven (7) days of the adoption of this resolution.

Adopted this 22nd day of June, 2022.

CHAPTER 1 INTRODUCTION

A Comprehensive Plan is a community's guide for growth and improvement to public services, community resources, local policies, and the built environment. The Plan represents the preferred vision for the community's future and provides a tangible list of actions that the community is committed to undertaking to achieve that vision. It is intended to provide guidance to local elected officials on land use patterns, the existing needs of facilities and services, and the protection and enhancement of quality of life within the community.

The Plan seeks to establish the ground rules for how the community will develop and invest by asking three questions:

- Where are we now?
- Where do we want to be?
- How do we get there?

By considering current needs and existing opportunities, the plan provides a foundation for decision-making in support of achieving short- and long-term goals.

Process Overview

The Comprehensive Plan process follows the Rules of the Georgia Department of Community Affairs ("DCA"), O.C.G.A. Chapter 110-12-1, Minimum Standards and Procedures for Local Comprehensive Planning, effective October 1, 2018. The DCA rules require that the Comprehensive Plan of Good Hope consist of the following elements:

Needs and Opportunities

An analysis of the community's needs and opportunities helps to determine local conditions. Public engagement was used to identify existing issues, and opportunities on which the City can capitalize to address those issues.

Community Vision and Goals

Through public and steering committee engagement, the City's vision, goals, and policies are developed to determine the community's future direction. As a part of this component, policies are identified to assist in making decisions that are consistent with community goals.

Future Land Use

This section is required for any community that has a local zoning ordinance and assigns future land use categories by parcel. The map and narrative in this section will guide local elected officials on zoning and land use policy decisions. The intention is to influence growth and development throughout the community in consideration of existing development patterns, access to utilities and services, and community needs and goals.

Broadband Services

All communities require a broadband element to analyze available services and identify potential improvements. This element is an action plan with steps for promoting reasonable and cost-effective access to broadband.

Community Work Program

The final element of the comprehensive plan, the Community Work Program, outlines steps and strategies for achieving the community's goals and implementing its plans. The Work Program will include a Report of Accomplishments from a previous list of projects and a Short Term Work Program that identifies priority projects, timelines for implementation, responsible parties, and funding strategies for the next five years.

Public Involvement

Public Input and Steering Committee

The Comprehensive Plan update incorporated public involvement throughout. The planning process began with a public hearing and community input session on July 6, 2021, where the public was invited to discuss the assets and challenges found in the city and their hopes for its future. Following the initial public meeting, several publicly available work sessions were held with a Steering Committee, a group of citizens representing various communities and interests throughout the city. This Committee provided valuable feedback, guidance, and recommendations and served an integral role in developing a plan representative of the community's vision. In addition, an online public survey was available from September 14 through October 13, 2021. The online survey allowed the local government to receive a wider range of input than otherwise would have been possible. Responses were received from three residents of Good Hope, and these responses are provided in the appendix.

A final public hearing was held on May 12, 2022, before submittal of the plan to the DCA for review.

NEGRC's Role

The Northeast Georgia Regional Commission (NEGRC) Planning & Government Services Division oversaw the development of this plan, including facilitating public

involvement and input meetings.

Review Process

According to the DCA's rules for comprehensive planning, effective October 1, 2018, the City must transmit the plan to the NEGRC when all required components are complete. The transmittal must also include the community's certification that it has considered both the Regional Water Plan and the Rules for Environmental Planning Criteria. Once it completes its review, the NEGRC will forward the plan to the DCA for review.

Once the plan has been found by the DCA to be in compliance with Minimum Standards and Procedures, the approved Plan must be adopted in order to maintain Qualified Local Government status.

Data & Statistics

The facts, figures, and statistics used to develop the Plan were generated from data compiled throughout the planning process. The data and analyses were used to identify general trends, and provide a reliable quantitative context to describe existing conditions and assist in informing the recommendations and policies.

C H A P T E R 2

VISION, GOALS, AND POLICIES

VISION STATEMENT

Good Hope is a small, rural town with a heart bigger than its limits. The city welcomes conservative, quality growth guided by planning and resident engagement. A strong community bond, sense of place, and supportive City framework provide a safety net for residents to access resources when needed. The centerpieces of the community are safe and attractive streets for all users, excellent service provision, and a beautiful, historic town center.

Goals and Policies

The goals and policies below are designed to help Good Hope elected officials and staff in decision-making processes. They target identified needs and opportunities from the previous section.

- Develop a comprehensive system of paths and trails for safe, healthy walking and bicycling, gathering, and community-building
- Preserve natural and cultural resources by concentrating commercial development in and around the town center and maintain large-lot residential characteristics
- Develop development guidelines to protect and coincide with existing historic resources
- Increase sense of community by creating creative outlets to educate and engage residents in local government operations and decision making
- Encourage healthy living by developing parks, playgrounds, passive and organized recreation opportunities, safe spaces for walking and bicycling, greenspace, and accessibility for all abilities and ages
- Anticipate and control impacts and opportunities associated with nearby growth, including traffic, development patterns, aesthetics, and functionality of space
- Work with other local governments throughout Walton County to achieve the vision of this plan
- Partner with Walton County to target public infrastructure in the manner favored by the community

CHAPTER 3

NEEDS AND OPPORTUNITIES

The following list of needs and opportunities were identified during a series of input meetings and an online survey, including both the Steering Committee and the public, as well as a professional analysis of relevant data. The list is intended to capture the most prescient needs that the community will have over the next five to ten years, in order to establish a set of goals the community can work toward achieving. Unless otherwise noted, all data are sourced from Esri's Business Analyst Software, which is based on the U.S. Census American Community Survey. Items are categorized into the following topics:

- Population, Community, and Governance • Economic Development • Planning, Land Use, and Housing • Transportation • Natural and Cultural Resources • Community Facilities and Services • Intergovernmental Coordination

Additional community statistics used in the local analysis to determine needs and opportunities and guide discussions during public input meetings can be found in the Appendix.

**High priorities within the community are italicized.*

Population, Community, and Governance

The City of Good Hope, population 339, is a small community in the rural, eastern portion of Walton County. Although Good Hope is small, the surrounding Walton County area as a whole has grown by approximately 13,000 people every ten years since 2000, and a similar growth rate is expected over the next five years (Figure 1). Good Hope has experienced some suburban growth pressure on the northern periphery of city limits, and that may continue to be a factor throughout the rest of the city in the near future. However, the City's ordinance prohibiting residential development on lots less than two acres, combined with limits on infrastructure access, may limit the growth Good Hope experiences.

In spite of the area's growth, the median age of the area continues to increase. The median age of Walton County is expected to grow from 37.3 in 2010 to 40 by 2026 (Figure 2). An aging population can present challenges for a community including inadequate housing, transportation, and social opportunities for seniors. It can also be a sign that the community struggles to retain young people. General strategies for addressing these challenges include permitting a wider variety of housing types in

Figure 1. Walton County population over time, Census (2000 and 2010) and projected (2021 and 2016).

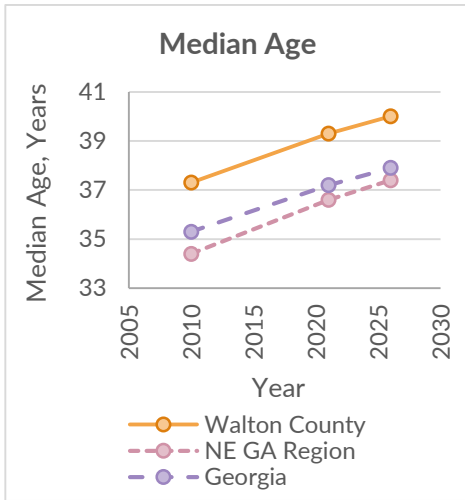

Figure 2. Median age of Walton County residents over time, compared with the Northeast Georgia Region and the state, Census (2010) and projected (2021 and 2026).

Figure 3. 2021 median income of Walton County, compared with the Northeast Georgia Region and the state.

Figure 4. Unemployment rates for 2021 civilian population ages 16+ in Walton County, the Northeast Georgia Region, and the state.

central city areas, building walkable neighborhoods where people can travel without a personal car, and providing attractive places for people to gather.

The area’s 2021 median income is \$65,399, which is higher than the region and state median incomes (Figure 3). However, the organization United for ALICE calculates the area’s poverty rate at 12% and the ALICE rate at 37% in 2018 ([United for ALICE](#)). This is in line with the state average. ALICE stands for households that are Asset Limited, Income Constrained, and Employed. These households, according to United for ALICE, “earn enough to be above the Federal Poverty Level, but not enough to afford a bare-bones household budget.” People in these households often work in the service industry and many were classified as “essential workers” during the COVID-19 pandemic. Although employed, these households are still in financially precarious conditions. *Stabilizing these households can have a significant impact on lowering poverty in the community. Stabilizing these households can have a significant impact on lowering poverty in the community.*

Good Hope’s government is led by a Mayor and five-member City Council. City ordinances and minutes from the Council’s monthly meetings are shared on the City’s website, and the public may comment during the Council meetings. The City partners with Walton County for the provision of all services through the various County Departments.

Needs and opportunities identified through stakeholder input sessions and public surveys that relate to population, community, and governance are as follows:

Needs

- The City should seek opportunities to diversify its revenue stream; most of Good Hope’s revenue comes from franchise fees and insurance programs due to the lack of municipal taxes.

Opportunities

- Use the Athens Technical College’s Monroe campus to create educational attainment opportunities for residents.
- Develop a clear list of resources or an assistance network that the local government can provide for households in poverty.
- Improve citizen participation in and engagement with local government operations and events.

Economic Development

According to Esri’s Business Analyst, Walton County area unemployment stands at 3.9%, which is lower than the regional and state average (Figure 4). The top industries in the area are Services (39%), Retail (14%), and Manufacturing (12%),

Figure 5). The workforce is primarily employed in jobs categorized as Professional (17%), Management/Business/Financial (16%), Administrative Support (14%), and Services (13%, Figure 6). About 56% of the workforce, over the age of 25, has a high school diploma, diploma equivalent, or some college credit, while 12% did not finish high school; 32% of the workforce population has a college degree (Figure 7). Generally, building a diverse local employment base helps people with a variety of credentials find work. *Given that over half of the workforce does not have a college degree, the City should focus workforce training and economic development efforts on creating jobs that do not require a college degree. Also, the City should focus on improving skilled workforce training through resources such as the Athens Technical College campus in Monroe.*

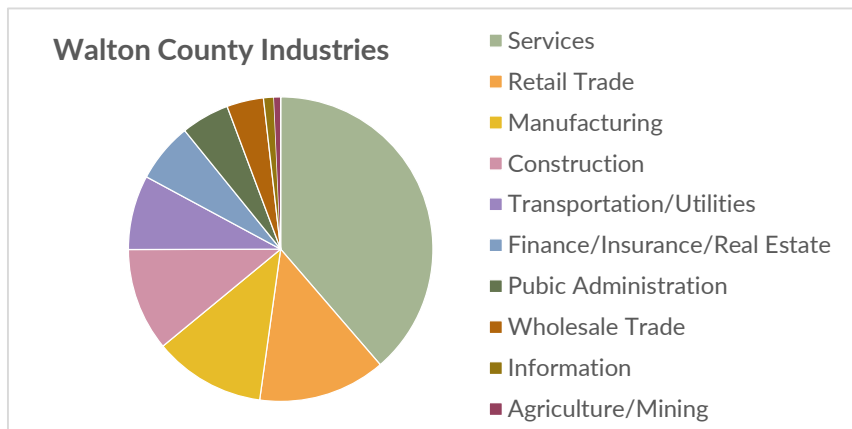

Figure 5. Walton County's 2021 employed population, ages 16+, by industry.

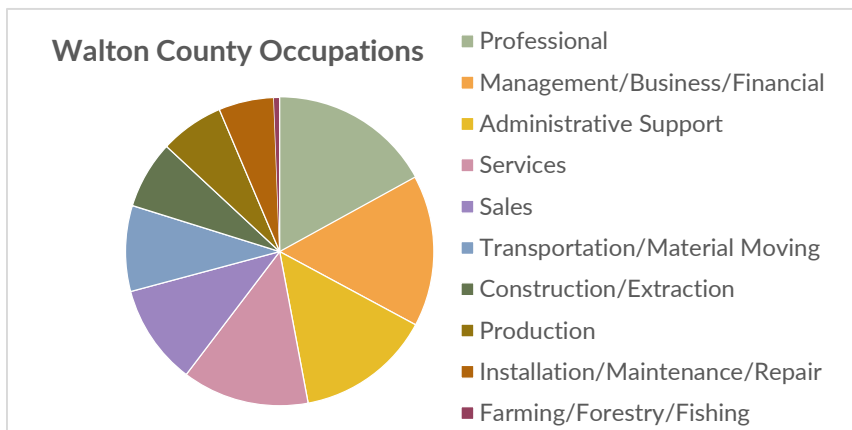

Figure 6. Walton County's 2021 employed population, ages 16+, by occupation.

Figure 7. Workforce, ages 25+, by highest level of education attained, for Walton County, the Northeast Georgia Region, and the state, 2021.

Needs and opportunities identified through stakeholder input sessions and public surveys that relate to economic development are as follows:

Needs

- Good Hope retains a very low percentage of its employed population for jobs within city limits. To offer more local employment opportunities the limited presence of businesses need to be increased. The City should determine to what level this is desired.

Opportunities

- Capitalize on major private investments in the manufacturing sector underway along the Interstate 20 corridor; the proximity to this area will improve access to jobs for Good Hope residents.
- Create a unified vision, based upon the stated goals in this plan, of encouraging conservative growth in the city center that references and respects the community's natural and cultural resources.
- Participate with the Development Authority of Walton County to identify the most appropriate business types to attract for Good Hope.

Figure 8. Median home values in Walton County, the Northeast Georgia Region, and the state, 2021.

Planning, Land Use, and Housing

Good Hope's housing stock, like most communities in the region and state, is mostly comprised of single-family houses. According to ESRI's Business Analyst, 85% of the overall area's housing stock is single-family houses, 7% is "Missing Middle" housing (2-19 unit structures), and 8% is mobile homes. The average household size is 2.82 people, and the median home value is \$236,000. The area's average home values are higher than regional and state averages (Figure 8). From 2015-2019,

median rent averaged \$744, which is higher than the median rent in the region, but lower than the state's median rent of \$804 (Figure 9). According to the Center for Neighborhood Technology's Housing + Transportation Index, the average Good Hope household spends 28% of their income on housing. A household that spends more than 30% of its income on housing is considered cost burdened. The vacancy rate stands at 7.5%, lower than the region's rate of 9.5% as well as the state's rate of 11.6%. This indicates that there is stronger demand for housing in the area than in other parts of the state, as would be expected, given the growth in Walton County. Nationally, household sizes are shrinking, and both seniors and young people may find that single-family housing does not meet their needs at a reasonable price point. *Infrastructure permitting, Good Hope should consider a broader range of housing types near the town center that are sensitive to the existing historic buildings to ensure that current and future residents can meet their housing needs at an acceptable price.*

Currently, new development is limited by a minimum of two acre lot sizes throughout the city, the extent of county water services, and lack of municipal sewer access. The City expects to continue their partnership with Walton County Water Department for services and do not plan to make significant amendments to the local zoning ordinance.

Needs and opportunities identified through stakeholder input sessions and public surveys that relate to planning, land use, and housing are as follows:

Needs

- Regulations should be improved to require aesthetics reminiscent of historic town centers, and discourage residential tract development.
- The City should ensure that new construction avoids environmentally sensitive areas such as wetlands and floodplains.

Opportunities

- Review and amend the local zoning ordinance, as necessary.
- Address flooding issues of homes built within the 100-year floodplain.

Transportation

Good Hope's development pattern generally requires a vehicle for easy access to destinations. It is a town where residents mostly commute outside of city limits for work and services, similar to Walton County as a whole. In Walton County, about 60% of workers leave the county for work, 52% commute at least 30 minutes to work, and 18% commute over 60 minutes to work. Only 8% of workers commute less than ten minutes to work. Approximately, 82% of workers drove alone to their place of employment. This type of commuting pattern increases the cost of transportation on average. The Housing and Transportation Index estimates that the

Figure 9. Median monthly rent in Walton County, the Northeast Georgia Region, and the state, 2015-2019.

average Good Hope household spends 27% of their income on transportation. This far exceeds the affordability threshold of 15%. Generally, communities can address the conditions of long commutes by substituting local destinations for regional ones and by redesigning their streets for multi-modal use. The city expects to continue to act as a bedroom community for the larger area and not expand the road network extensively.

The Georgia Department of Transportation (GDOT) reports 51 crashes and zero fatalities in Good Hope from 2013–2020. Crashes are heavily concentrated on State Route 83, the main thoroughfare of the community. Specifically, the intersection of State Routes 83 and 186 saw the highest concentration of crashes of 25 over this period. State Route 83 carries approximately 3,000–4,000 vehicles daily with local leaders stating that traffic loads continue to increase. The corridor has some sidewalks and appears to be a good candidate for multi-modal infrastructure so that residents on the periphery of city limits can have safe and comfortable multi-modal access to the heart of the city. The City of Good Hope should work with the Georgia Department of Transportation and Walton County to redesign the city's two main corridors to create safe and comfortable complete streets with lower speed limits for recreational cyclists and pedestrians.

Needs and opportunities identified through stakeholder input sessions and public surveys that relate to transportation are as follows:

Needs

- Safety enhancements are needed along State Routes 83 and 186 for all user types.
- Improved signage for cyclists would be beneficial; Good Hope experiences significant recreational cycling use on weekends.

Opportunities

- Collaborate with GDOT and Walton County to address concerns and incorporate safety enhancements and new street designs to improve safety for all user types.
- Improve crosswalks at the city's central intersection.
- Add street design standards to the local ordinance.

Natural and Cultural Resources

Good Hope has a significant portion of undeveloped land as either open pasture or woodland. If development pressure materializes, a walkable, compact development pattern in the town center can slow the conversion of this rural land into suburban development.

There are a collection of historic buildings located in the town center. *The city would like to explore opportunities for a local historic resource survey and a historic preservation commission that could oversee the preservation of local history and improve resident engagement with local government operations.* City leadership stated the need to ensure new development match the character of historic buildings.

Needs and opportunities identified through stakeholder input sessions and public surveys that relate to natural and cultural resources are as follows:

Needs

- City leadership noted a need to assess the city's historic resources and determine the capacity to create a local historic preservation committee.

Opportunities

- Ensure quality growth practices through local ordinances to protect the town's rural setting.
- Create a strategy to preserve open, undeveloped space.

Community Facilities and Services

City residents rely on Walton County Parks and Recreation for recreational facilities and programs. The Mayor Jimmy Guthrie Memorial Park offers the public a playground and pavilion and it is connected to the sidewalk that runs along State Route 83.

Good Hope relies on Walton County for water services. The Walton County Water Department is responsible for all water infrastructure maintenance and development. Good Hope intends to maintain this agreement and expand services when and where necessary. Water capacity for the area will be greatly improved following the completion of the Hard Labor Creek water treatment plant in 2023. There are no sewer services available or planned within the town limits for the near future. Stormwater facilities are managed on a site-specific level and the local government has no plans to install community-wide stormwater infrastructure. All new commercial development will need to be compatible with septic systems and should require low water usage.

Needs and opportunities identified through stakeholder input sessions and public surveys that relate to community facilities and services are as follows:

Needs

- The City should develop a strategy to communicate community facilities to the public.
- There is a need for enhancing park amenities available to town residents;

Good Hope Park offers limited facilities that are only catered to small children. A more diverse set of recreational facilities could add to the quality of life for town residents.

Opportunities

- Include community facility information on the local government website.
- Continue collaboration with the Walton County Water Department for local infrastructure maintenance.

Intergovernmental Coordination

City elected officials maintain an active relationship with the other local governments throughout Walton County. Mayoral gatherings and collaboration with the various Walton County departments occur on a regular basis and are planned to continue. As with the development of this plan, Good Hope intends to provide a platform for informed decision making and effective government investment.

Needs and opportunities identified through stakeholder input sessions and public surveys that relate to intergovernmental coordination are as follows:

Needs

- Increased participation and collaboration between City Council members and residents is desirable, where possible.

Opportunities

- Facilitate more local groups and committees to engage with and learn from local government operations.
- Host annual public information sessions regarding town and county services, available either virtually through the City's website or in-person.

CHAPTER 4

BROADBAND SERVICES

Expansion of broadband is a top priority region-wide. The Northeast Georgia Comprehensive Economic Development Strategy (CEDS) 2017-2021 update, crafted through key stakeholder input from the entire Northeast Georgia Region (including economic development professionals, educators, business leaders, and elected officials), prioritizes broadband expansion through specific tasks in its Action Plan (Strategy 2.a). Additionally, in 2018 the Georgia Department of Community Affairs launched the Georgia Broadband Deployment Initiative (GDBI) to coordinate and establish broadband programs to increase economic, educational, and social opportunities for Georgia citizens and businesses. The initiative provides for the expansion of broadband infrastructure and services through new state and local broadband planning policies.

**High priorities within the community are italicized.*

Existing Services

The Georgia Department of Community Affairs (DCA) considers Good Hope to be “served” by broadband with the exception of a few locations (Figure 10). The DCA defines “served” as a download speed of 25 Mbps and an upload speed of 3 Mbps. This speed may be sufficient for certain kinds of digital needs, it may not meet the speeds necessary for higher demand needs like streaming content or virtual learning. Walton County has received \$3,159,215 in grant funds from the Georgia Local Fiscal Recovery Fund, originating from the American Rescue Plan Act. This grant was submitted on behalf of Windstream, a broadband provider, and will enable an expansion of gigabit-speed broadband access to 2,078 unserved locations in the Walton County areas most lacking in connectivity. The total number of impacted locations will be 4,084 within the targeted project areas in Walton County. This expansion is expected to be complete by 2026 and intends to serve Good Hope entirely, once implemented. Currently, there are no options for free, publicly accessible Wi-Fi. Residents must travel to the Monroe library to access public broadband service. The City should explore options for upgrading service and offering public Wi-Fi, as necessary.

Figure 10. Broadband availability in Walton County, according to the Georgia Department of Community Affairs.

Currently, there are no options for free, publicly accessible Wi-Fi. Residents must travel to the Monroe library to access public broadband service. *The City should explore options for upgrading service and offering public Wi-Fi, as necessary.*

Needs and opportunities identified through stakeholder input sessions and public surveys that relate to broadband services are as follows:

Needs

- City officials should determine the necessary coordination with Walton County in regard to the broadband expansion initiative at the appropriate time.

Opportunities

- Become a Broadband Ready Community.

CHAPTER 5 LAND USE

The Land Use Chapter includes a description of future development categories with synchronized zoning designations and a Future Land Use Map. The “future land use” methodology was chosen for the format of land use planning in this document in lieu of the “character area” methodology. The future land use method involves assigning land use categories to each parcel with example uses associated with each category.

It is crucial to have a holistic understanding of land use patterns and existing regulations as they will have the most significant influence over future growth and development. A review of existing land use was performed to accurately inform any potential future changes. In addition, the future land use map is conceptually consistent with the local zoning ordinance so that the local government’s ability to manage land use appropriately is not diminished.

Future Land Use Categories

These future land use (FLU) categories correspond to the map that follows. While zoning and development regulations vary, FLU represents a standardized approach to envisioning and planning for desired scenarios. As such, it is natural that certain areas may appear to be inconsistent between the FLU and zoning maps because FLU presents a blueprint for what is to come.

Residential

Predominantly single-family homes. Certain civic and recreational uses are typically allowed.

Commercial

Retail, office space, and highway-commercial land uses, though small-scale neighborhood shops or offices may be desirable in certain places. Often restricted to nodes and arterial/major collector roads.

Industrial

Industrial land includes land dedicated to warehousing, wholesale trade facilities, manufacturing facilities, processing plants, factories, mining or mineral extraction facilities, or other similar uses.

Public/Institutional

Federal, state, local, and institutional land uses. Uses such as government offices, public safety posts, libraries, schools, religious institutions, cemeteries, and hospitals are representative.

Agriculture/Forestry

Farms and timberland. Residential development should maintain a rural character with single-family detached homes on large lots.

COMMUNITY WORK PROGRAM

The Report of Accomplishments provides a status report of the 2017–2021 Short-Term Work Program. Subsequently, the Short-Term Work Program is updated to reflect new tangible list of projects to complete over the following five years (2022–2026). The list identifies priority projects, timelines for implementation, responsible parties, and funding strategies.

Report of Accomplishments (2017–2021)

(*Entries with an asterisk represent items carried over to the next Short-Term Work Program)

#	ACTIVITY	STATUS (COMPLETE, ONGOING, POSTPONED, CANCELLED)	NOTES
POPULATION			
1	Designate staff member or elected official to serve as public engagement officer to increase volunteerism and foster participation in local government activities (meeting notices, social media, etc.).	Completed	Two Council members update and post to Good Hope City and related social media accounts. Mayor maintains contact with local media and Chamber of Commerce.
2	Implement Model Councilmember program similar to City of Oxford (citizen shadows councilmember for a month).	Cancelled	Impractical with current Council make up due to day to day employment obligations – removed from new STWP.

#	ACTIVITY	STATUS (COMPLETE, ONGOING, POSTPONED, CANCELLED)	NOTES
ECONOMIC DEVELOPMENT			
3	Identify suitable locations (if any) for commercial development that is consistent with the community's vision and seek out developers and business owners (establishing a DDA or Main Street Program could be beneficial in assisting with this).	Postponed	Limited sites available for potential commercial development – determined current need does not necessitate establishment of a DDA/Main Street manager. Monitoring of suitable locations will continue through Good Hope Planning & Zoning – removed from new STWP.
4	Install city gateway signage.	Completed	
5	Develop downtown plan for economic development, historic preservation, complete streets connectivity, tourism, etc.	Postponed	Town center planning will be inter-related historical overlay planning. Postponed until historic district overlay is established and adequate funding available to develop plan – removed from new STWP.
LAND USE, HOUSING, AND DEVELOPMENT			
6	Review and, if appropriate, update zoning and development code to ensure that new development is compatible with the community's vision, especially regarding residential development and natural and cultural resource preservation.	Completed	Review completed, no updates are required at this time.
7	*Develop historic district overlay for downtown area.	Postponed	Working to establish a citizens' Historic Preservation Board – revised and carried over to STWP #5
8	Review land use ordinance for compatibility with Walton County's ordinance.	Completed	Planning & Zoning will continue to perform this on an annual basis for the foreseeable future – removed from new STWP
NATURAL AND CULTURAL RESOURCES			
9	Establish a tree-planting program.	Completed	
COMMUNITY FACILITIES AND SERVICES			
10	*Research, evaluate, and implement alternative revenue sources in place of municipal tax collections.	Ongoing	This is an evolving process, bringing new and additional grants and other resources into play – intended as a continuing effort; revised and carried over to STWP #6

(continued on next page)

COMMUNITY WORK PROGRAM

#	ACTIVITY	STATUS (COMPLETE, ONGOING, POSTPONED, CANCELLED)	NOTES
11	Develop infrastructure and services master plan(s) for water, sewerage, recreation, transportation, aging-related assistance, etc.	Ongoing	A partner in Service Delivery Strategy with other Cities and County – since many of these services are provided by Walton County, this item will be accomplished through various continuing collaborative planning efforts between local government leadership; Item not carried over to new STWP
12	*Improve drainage along Jacks Creek Rd.	Ongoing	Referred to Walton county Roads and Bridges – City is currently in discussion with Walton County departments to determine mitigation strategies for flooding issues; carried over to STWP #8
13	Develop City Park master plan for facility and programming.	Completed	
14	Construct new walking path.	Completed	
15	Study the viability of and, if appropriate, implement a complementary event to the Poppy Festival (at another time of year or in concert).	Completed	Implementation of a complementary event determined to be not viable at this time.
16	Prepare for emergencies by establishing a volunteer response unit and participating in countywide disaster planning.	Completed	Good Hope residents attended Walton County EMA CERT training. Additional training opportunities will be made available annually and advertised by the City; planned as ongoing item and removed from new STWP
TRANSPORTATION			
17	Develop a local complete streets and trails plan.	Completed	
18	*Develop a plan (formal or informal) to improve local impact on decisions regarding SR83 and SR186.	Ongoing	Currently monitoring GDOT information and attending advertised meetings. Working to develop relationship with state, area, and local DOT offices – revised and carried over to STWP #9
19	Establish a preventive road maintenance schedule and program.	Ongoing	Frequent visual inspections of streets and roads inside the city limits and referral to County or State for appropriate action– planned an ongoing work item and removed from new STWP
20	Prioritize transportation needs for inclusion in future community and regional plans (ex.: SPLOST and T-SPLOST).	Ongoing	T-SPLOST voted down. Needs are to be reevaluated and identified as city grows and during upcoming Northeast Georgia Regional Plan update process – planned as ongoing work item and removed from STWP

Short-Term Work Program (2022-2026)

With No Person w/Disability		22,780	71.9%	789	High

Data Note: N/A means not available. Population by Ratio of Income to Poverty Level represents persons for whom poverty status is determined. Household income represents income in 2017, adjusted for inflation.

2015-2019 ACS Estimate: The American Community Survey (ACS) replaces census sample data. Esri is releasing the 2015-2019 ACS estimates, five-year period data collected monthly from January 1, 2015 through December 31, 2019. Although the ACS includes many of the subjects previously covered by the decennial census sample, there are significant differences between the two surveys including fundamental differences in survey design and residency rules.

Margin of error (MOE): The MOE is a measure of the variability of the estimate due to sampling error. MOEs enable the data user to measure the range of uncertainty for each estimate with 90 percent confidence. The range of uncertainty is called the confidence interval, and it is calculated by taking the estimate +/- the MOE. For example, if the ACS reports an estimate of 100 with an MOE of +/- 20, then you can be 90 percent certain the value for the whole population falls between 80 and 120.

Reliability: These symbols represent threshold values that Esri has established from the Coefficients of Variation (CV) to designate the usability of the estimates. The CV measures the amount of sampling error relative to the size of the estimate, expressed as a percentage.

- High Reliability: Small CVs (less than or equal to 12 percent) are flagged green to indicate that the sampling error is small relative to the estimate and the estimate is reasonably reliable.
- Medium Reliability: Estimates with CVs between 12 and 40 are flagged yellow-use with caution.
- Low Reliability: Large CVs (over 40 percent) are flagged red to indicate that the sampling error is large relative to the estimate. The estimate is considered very unreliable.

H+T Fact Sheets

Municipality: Good Hope, GA

Traditional measures of housing affordability ignore transportation costs. Typically a household's second-largest expenditure, transportation costs are largely a function of the characteristics of the neighborhood in which a household chooses to live. [Location Matters](#). Compact and dynamic neighborhoods with walkable streets and high access to jobs, transit, and a wide variety of businesses are more efficient, affordable, and sustainable.

The statistics below are modeled for the Regional Typical Household. Income: \$57,000 Commuters: 1.20 Household Size: 2.77 (Atlanta-Sandy Springs-Roswell, GA)

Map of Transportation Costs % Income

 - 12-15%
 - 15-18%
 - 18-22%
 - 22-26%
 - 26-29%
 - 29%+

Location Efficiency Metrics

Places that are compact, close to jobs and services, with a variety of transportation choices, allow people to spend less time, energy, and money on transportation.

0%

Percent of location efficient neighborhoods

Neighborhood Characteristic Scores (1-10)

As compared to neighborhoods in all 955 U.S. regions in the Index

Job Access
0.8

Very low access to jobs

AllTransit Performance Score
0

Car-dependent with very limited or no access to public transportation

Compact Neighborhood
0.3

Very low density and limited walkability

Average Housing + Transportation Costs % Income

Factoring in both housing *and* transportation costs provides a more comprehensive way of thinking about the cost of housing and true affordability.

Transportation Costs

In dispersed areas, people need to own more vehicles and rely upon driving them farther distances which also drives up the cost of living.

Survey Responses

1. **Do you feel that the local government manages land use and zoning appropriately in your community? If not, explain what changes you would make:**
 - a. They do an ok job, possibly could do better.
 - b. Keep good hope Ag
 - c. Land use and zoning done through Walton County. There is nothing local.

2. **Are there any activities you would like to do in your community but cannot? Explain:**
 - a. No (1)
 - b. No response (2)

3. **Are the streets and sidewalks adequately maintained?**
 - a. Yes (2)
 - b. No response (1)

4. **If no, where are the streets or sidewalks in most need of repair?**
 - a. No response (3)

5. **Is the community safe, comfortable, and inviting for people to walk or bike to activities, jobs, shopping, dining, services, etc.?**
 - a. Yes (2)
 - b. No response (1)

6. **Does your community have any traffic issues?**
 - a. Yes (2)
 - b. No (31)

7. **If yes, what are the specific traffic issues (check all that apply)**
 - a. It always takes too long to get (1)
 - b. Predictable peaks like rush hour (1)

8. **In your opinion, is park space within your community easily accessible to all residents? If not, explain:**
 - a. Yes some
 - b. This answer is pertaining to traffic The traffic issues are just around the corner with the developers building so much here and surrounding communities

9. **Are there any persistent public safety issues in your community (dangerous intersections, sanitation, crime, run-down properties, etc.)? If yes, please explain**
 - a. Some intersections can be dangerous, and a few run down areas.
 - b. No response (2)

Survey Responses (cont.)

10. How would you rate the water & sewer services in your community:

- a. Good (1)
- b. Average (2)

11. How would you rate the emergency response services in your community:

- a. Excellent (1)
- b. Very good (2)

12. How would you rate the internet services in your community:

- a. Average (1)
- b. Poor (2)

13. How would you rate the leisure/recreation services in your community:

- a. Excellent (1)
- b. Average (2)

14. Are there adequate housing options to meet the future needs of the community?

- a. Yes (2)
- b. No (1)

15. What is the most immediate housing need within your community? Explain.

- a. Young married couples that can't afford large house payments, but would maintain their property well.
- b. I'm afraid over development. Lots of houses going up. Limited roads and access poor quality of schools all the new homes aimed at families will just create a larger problem for the already struggling school system. If I did not homeschool I would not live in this area due to the school system. The fear is this small piece of the country will soon look like every other town; overcrowded and underfunded failing schools.
- c. What is a defining characteristic of your community that you would like to see preserved?

16. Rural appeal.

- a. Farming and large lots I know we cannot stop folks from selling their land but hopefully we can keep the lots larger like Madison county and keep the Agricultural aspect so we don't lose our right that we enjoy on our property already m.
- b. This is a rural community and I would like to see it remain so. The whole area around Good Hope seems to be for sale and we have no input into this.

Survey Responses (cont.)

17. List three small actions your local government could take to improve the quality of life in your neighborhood/ community:

- a. 1)controlled growth 2) controlled growth 3) controlled growth improvements
- b. 1) Not allow lower income housing 2) keep a minimum of at least 2-5 acres for new builds 3) how will our roads support large developments?
- c. No response (1)

18. "What are the most important projects that the community should complete over the next five years?"

- a. Improve internet services.
- b. Internet
- c. No response (1)
