Introduction

This plan update was completed in accordance with the Georgia Planning Act of 1989 and the Georgia Department of Community Affairs Minimum Standards and Procedures for Local Comprehensive Planning.

It is located in lower central Coweta County approximately seven miles south of Newnan, GA and 43 miles southwest of Atlanta. The major thoroughfare through the community is US 29/US 27 Alternate. The CSX Railway bisects the town. According to the 2010 census, the population is 399.

Purpose of the Comprehensive Plan

The Town of Moreland Comprehensive Plan shall provide guidance and policy standards for future growth and development. The plan also identifies needs and opportunities which currently exist within the community. Goals, polices, and specific implementation measures are also listed to set policy for particular segments and specific areas of the city.

City Council Members

Dick Ford, *Mayor*

Allyn Bell, *Councilman*

Jeff Burgess, *Councilman*

David Lee, *Councilman*

Troy Payne, *Councilman*

Comprehensive Plan Steering Committee and Public Participation

The Town of Moreland Council appointed a Comprehensive Plan Steering Committee to assist and guide the update of the comprehensive plan. A series of consecutive meetings took place to address the components of the plan update. The Steering Committee included ten members and included members of the city council, city government and other community stakeholders. The members of the committee are listed in the appendix of the plan.

As part of the public participation component, a community visioning meeting was held on June 20th, 2016 to gather input from the citizens. Additional information can be found in the appendix. Two public hearings were held in regards to the comprehensive plan update process in which citizens could obtain information about the planning process, review, and comment on the plan. The public hearings were held on March 15th, 2016 and September 5th, 2016.

Community Goals

The purpose of the Community Goals and Policies section is to guide and direct the Town of Moreland's decision making process for the future of the community. Following the established goals and policies ensures the plan is implemented by the citizens and local leaders.

Vision Statement

A broad vision statement which was developed by the community stakeholders is below and depicts what the community is and what it desires to become in the future.

Vision Statement for the Town of Moreland, Georgia

Moreland is a historic small town with strong community spirit. While honoring and promoting the heritage which makes Moreland unique and embracing the past we will welcome the new. The diversification of the economy and opportunities for growth will be pursued with thoughtful planning and citizen involvement. The historic town center of Moreland will be the social and cultural heart of the community and neighborhoods will exude a small town charm where people feel safe and secure, away from the stresses of big town life.

List of Goals and Policies

Economic and Community Development

Goal: Expand economic development opportunities within the Town of Moreland by supporting the expansion and creation of new businesses, capitalizing on assets, marketing for increased tourism.

Policies:

- We will seek to adopt a Quality Development Corridor overlay ordinance to protect and enhance the Gateway Corridor Character Area.
- We will target reinvestment in the Gateway Corridor Character Area to encourage private sector business development and redevelopment to accommodate future growth.
- We will encourage the development of the Historic Town Center as a vibrant place which features local culture, festivals, and recreation.
- The Town of Moreland will accommodate new development while enhancing existing local assets.
- We will collaborate with Coweta County in the planning of developments near Moreland so as to protect the area within the current town limits and to provide nearby employment, retail, and residential opportunities.
- The Town of Moreland will promote the historic mill, pavilion and other assets to increase tourism opportunities.
- We will work with Moreland Elementary on various projects, promotions and community events.
- We will work to implement the recommendations from the Blueprints for Successful Communities report.

Natural and Cultural Resources

Goal: Protect, enhance, and efficiently use the natural and cultural resources within the Town of Moreland.

Policies:

- Establish a tree planting program and other natural enhancements throughout the town and especially along the Gateway Corridor.
- The protection and conservation of our community's resources will play an important role in the decision-making process.
- We will incorporate the connection, maintenance, and enhancement of greenspace in all new development.
- We will reduce the impact of development on existing vegetation through limiting land disturbance activities and clear cutting.
- We will encourage new development in suitable locations in order to protect natural resources and valuable historic or cultural resources from human encroachment through land development regulations and or incentives.
- We will invest in parks and open space within our community.
- We will promote the Town of Moreland's rich literary heritage and other historic assets.

Community Facilities and Services

Goal: Provide for the citizens of Moreland adequate facilities and services, infrastructure, which meet their needs and make the Town a quality place to live.

Policies:

- We will seek to limit the amount of development within our community to areas that can be reasonably served by public infrastructure.
- We will seek opportunities for the expansion of sewer into the Town of Moreland limits as feasible.
- Our community will use planned infrastructure to support areas identified as suitable for development.
- We will expand the system of sidewalks within the Town of Moreland to enhance pedestrian safety and connectivity.
- We will encourage open space, walking paths, and bicycle lanes that are accessible to all.

- We will seek to incorporate bike lanes and shared use signage to appropriate roadways.
- We will provide pleasant, accessible public gathering spaces for community wide events and festivals.

Housing

Goal: Allow for accessible, affordable, diverse housing options for all the citizens that want to call the Town of Moreland home.

Policies:

- We will encourage infill housing development in existing neighborhoods.
- Our residential neighborhoods will gain increased access to schools, parks, homes, and businesses through extended sidewalks, bike paths, and connected roadways.
- The Town of Moreland will promote walkable and safe neighborhoods for its citizens.
- We will encourage parks and community facilities to be located as focal points in existing and new neighborhoods.
- We will seek to incorporate appropriate housing choices for the senior citizen community.

Land Use

Goal: To make the best and most efficient use of land within the Town of Moreland while utilizing existing infrastructure, and maintaining the small town nature of the community.

Policies:

- Our gateway corridor and other roadways will create a sense of place and offer a welcoming nature into our community.
- Recreation and greenspace will become an important part of our community's land use policy.
- Greenspace will be a major component with existing and new residential neighborhoods, along roadways, and commercial developments.

- We will support opportunities for residential and non-residential in-fill development that positively impacts the character of existing neighborhoods.
- Throughout the community we will encourage the use of landscaping, lighting, signage, underground utilities, and building design which will add aesthetic value.
- We will encourage increased walkability and safe access to businesses and public services.
- We will utilize innovative planning concepts to achieve well designed residential neighborhoods, preserve open space and improve traffic flow.
- We will review land planning and development concepts successful in other areas and feasibly apply them to the Town of Moreland.

Transportation

Goal: To meet the transportation needs of every resident while focusing on safety, accessibility, and connectivity.

Policies:

- We will implement the Coweta County Transportation Plan.
- We will encourage transportation corridors that support multiple modes of transportation which make areas of town safe and accessible for all users.
- We will ensure that vehicular traffic will not harm the safety and small town nature of our community.
- We will seek to incorporate traffic calming measures especially along the Gateway Corridor Character Area.
- Increase accessibility and connectivity for cyclists and pedestrians.
- Consider Complete Streets policies when planning for transportation improvements.

Needs and Opportunities

The Needs and Opportunities section addresses what the Town of Moreland needs to make it what it wants to become and what it currently lacks to achieve its vision. This section also showcases existing opportunities available within the community which should be utilized and supported to implement the vision.

To help gain a more accurate and balanced list of needs and opportunities, a SWOT (Strengths, Weaknesses, Opportunities, and Threats) analysis is conducted.

SWOT Analysis (Strengths, Weaknesses, Opportunities, Threats)

Strengths	
<ul style="list-style-type: none"> • Parks • Sidewalks • Local community events • Proactive planning and ordinances • Recreational facilities • Financially stable • Literary history • Puckett Station Festival 	<ul style="list-style-type: none"> • Moreland Elementary School • Small town charm • Moreland mill • Citizens • Local authors and museums • Tourism potential • Fire station •
Weaknesses	
<ul style="list-style-type: none"> • Small city limits • Property maintenance both business and residential • Highway traffic • Lack of retail and businesses • Lack of welcome and directional signage 	<ul style="list-style-type: none"> • Lack of consistent community involvement • Hospital access • Lack of housing variety • Additional trash along streets • Lack of sewer
Opportunities	
<ul style="list-style-type: none"> • Additional community wide events such as a community yard sale • Senior housing • Additional events at the mill • Sports and social clubs such as walking and tennis • Implementation of the Georgia Conservancy Blueprints Report • Bike facilities and clubs • Implement Moreland Economic Strategy report 	<ul style="list-style-type: none"> • Sidewalk expansion • Sewer system • Beautification of Hwy 29/27 corridor and gateways • Mega site • Streetscape improvements • Annexation • Cemetery expansion • Walking and biking paths
Threats	
<ul style="list-style-type: none"> • Increased crime • Lack of neighborhood watch groups 	<ul style="list-style-type: none"> • Lack of street and intersection lighting • Increased population placing pressure on infrastructure

Comprehensive List of Needs and Opportunities:

The Plan Steering Committee identified needs and opportunities which exist within the Town of Moreland. This list should help guide future planning efforts and prioritize projects undertaken by the City.

Needs:

- Sidewalk expansion throughout the town
- Increased commercial and business recruitment
- Increased housing appropriate for seniors
- Expand city limits to grow and expand tax base
- Establish bike and walking paths
- Increase lighting in needed areas of town
- Zoning for senior housing
- Welcome and directional signage
- Establish sports and leisure clubs
- Need to establish neighborhood watch groups

Opportunities

- Increased opportunities for tourism with the combination of mill museum and writer and author heritage
- Moreland mill museum and events
- Gateway beautification possibilities with the 27/29 round-about
- Blueprints for Successful Communities implementation
- Expansion of local festivals and establish a community wide yard sale
- Mega site could increase housing and job opportunities
- Streetscape downtown will enhance historic town center

- Possible sewer connections which could bring additional commercial and residential expansion.

Character Areas and Land Use

Character areas are geographic sub-areas of a community which contain unique characteristics and physical form. According to the Department of Community Affairs, Character areas have unique or special characteristics, have potential to evolve into a unique area when provided specific and intentional guidance, or require special attention due to unique development issues. Character areas may be identified by the types of development found there which vary from historic downtowns, commercial/industrial areas, or residential neighborhoods. Other character areas may lack development and include more natural features such as greenspace or parkland.

The following list identifies character areas found within the Town of Moreland. Each character area listed contains a description and desired development patterns, recommended land uses, and a list of implementation measures. Current photos are also included which give an actual snap shot into each distinct character area.

Character areas within the Town of Moreland are designated as:

- Historic Town Center
- Traditional Residential
- Rural Residential Development
- Gateway Corridor

Historic Town Center

Description

The Historic Town Center of the Town of Moreland is the heart of the community and encompasses the majority of the built environment. At the center of this area sits the historic Moreland hosiery mill which also now serves as city hall. Other civic uses are located within this area as well which include the two historic churches, a Masonic hall, a fire station, Founder's Cemetery, and many historic residences.

Desired Development Patterns

The Historic Town Center is and will remain the traditional focal point and gathering place for the Town. Preserving, enhancing and improving will be first and foremost with any future development in the area. Future improvements will increase pedestrian access and safety, landscaping, and enhanced gathering spaces. Site plans and building design of any new infill development of vacant spaces should match the character of the surrounding area. Facilities for bikes such as racks and bike lanes to the area from surrounding residential neighborhoods should be incorporated. The revitalization of existing commercial structures and the reuse of any vacant or underutilized structures should be encouraged.

Land Use

Multiple land uses are allowed within the Historic Town Center and will include single family residential, commercial, and civic/institutional.

Implementation Measures

- Building in vacant property and infill should be of similar quality and compatible with the existing architecture
- Pedestrian and bicycle facilities should be expanded throughout the area to increase connectivity to other sections of the community.
- Consider listing the area as a historic district nomination to the National Register of Historic Places
- Install directional signage to important sites and attractions.
- Initiate beautification program

Traditional Neighborhood

Description

Traditional neighborhood residential surrounds the Historic Town Center to the east of the CSX Railroad. Homes within this area are relatively well maintained, are placed on similar lot sizes, located close to the street and for the most part served by sidewalks. There is a mix of historic, mid-century, and recently built residences. Single family residential makes up the majority of the land use and also includes Moreland Elementary School, Southview Cemetery, and parkspace.

Desired Development Patterns

New residential development should match the mix of housing types and styles of the older residential neighborhoods closer to the Historic Town Center. New development that reflects traditional neighborhood design principles, such as smaller lots, orientation to the street, mix of housing types, and pedestrian/bicycle access to the elementary school and the Historic Town Center.

Land Use

The primary land uses within this character area will be single-family residential along with civic/institutional.

Implementation Measures

- Encourage home ownership to maintain neighborhood stability and property maintenance.
- Building in vacant property and infill should be of similar quality and compatible with the existing architecture
- Pedestrian and bicycle facilities should be expanded throughout the area to increase connectivity to other sections of the community.

Rural Development

Description

The area west of the Historic Town Center and the CSX Railroad and the extreme northeast area within the Town of Moreland is largely undeveloped land and large acre residential development. The northern section of this part of town will likely face pressure for new residential and possible commercial or industrial development.

Desired Development Pattern

Although there will be future growth possibilities in this area, the community would seek to preserve as much of the rural character that can be achieved. Maintaining open space and tree cover while allowing for limited residential development. Conservation subdivision development would be the ideal approach to new residential development.

Land Use

Currently the primary land use in this character area will be single-family residential.

Implementation Strategies

- Maintain rural and small town atmosphere
- Encourage cluster or conservation subdivision design to save open space
- Encourage compatible architectural design which is compatible with surrounding rural character
- Preserve tree cover and open space
- Buffer any possible future development
- Protect rural and scenic viewshed
- Encourage farmland preservation and conservation easements

Gateway Corridor

Description

The main artery which travels through the entire length of the Town of Moreland is the combined highways of US 27 Alternate and US 29. The roadway acts as a gateway and gives direct access to the Historic Town Center and the surrounding residential neighborhoods.

Desired Development Patterns

The Gateway Corridor is a heavily travelled route and highly visible. The newly established Moreland beautification committee will strive to make this corridor aesthetically pleasing to visitors to Moreland and those just passing through. Tree planting, landscaping and implementing traffic calming measures will be a priority. Redevelopment of older commercial centers and quality design of new development will be encouraged. Locating commercial parking to the rear of will be desired for any new construction. Welcome signage at the north and south entry points should be incorporated.

Land Use

A variety of uses are to be located along the Gateway Corridor and include, commercial, single-family residential, and civic/institutional.

Implementation Measures

- Incorporate welcome and directional/wayfinding signage along the route
- Implement beautification and landscaping
- Consider adopting a quality development overlay along the route to ensure quality design and compatible land use
- Install traffic calming measures

Town of Moreland Character Area Map

Community Work Program

The Town of Moreland Community Work Program is a list of priority projects to be undertaken by the City within in the next five years. The Community Work Program includes the specific activity or project, an estimated timeframe in which to complete the activity, the responsible entity overseeing the activity, the estimated cost, and the likely source of funding.

Report of Plan Accomplishments (STWP 2011-2015)

A Report of Plan Accomplishments serves as a status report for the most recent Short Term Work Program covering the years 2011-2015.

TOWN OF MORELAND 2011-2015 SHORT TERM WORK PROGRAM REPORT OF ACCOMPLISHMENTS			
Project or Activity		Status*	Explanation
Community and Cultural Development			
1	Develop phased preservation plan for Moreland Mill, including structural rehab plans, costs, priorities	Complete	
2	Continue to rehabilitate Moreland Mill	Underway/Ongoing	
3	Continue July 4 th Celebrations	Underway/Ongoing	
4	Continue Lewis Grizzard Bike Ride Day	Underway/Ongoing	
5	Continue Memorial Day, Heritage Day, Taste & Tour, Christmas dinner, Movies in Park, others	Underway/Ongoing	
6	Work toward Better Hometown status	Not Complete	Not a city priority at this time.
7	Develop a “Blueprints for Successful Communities” Plan	Complete	
8	Develop concept renderings for Town museums, archives, media center	Underway	Moved to new CWP

9	Develop upstairs author media center at Mill	Underway	Moved to new CWP
10	Improve site drainage at Caldwell boyhood house	Complete	
11	Rehabilitate, repair Caldwell boyhood house	Complete	
12	Develop house museum at Caldwell boyhood house	Complete	
13	Locate barn behind house museum for historic farm equipment	Underway	Moved to new CWP
14	Develop mini-rest station, parking area on US 29	Underway	Moved to new CWP
15	Brick the Coweta Fire Station exterior, if feasible	Not Complete	Not feasible at this time.
16	Appoint a Beautification Committee	Complete	
17	Offer façade incentives and beautification contests	Postponed	Will address at a later time. Moved to new CWP
18	Schedule outside events at Mill	Underway/Ongoing	Moved to new CWP
19	Update and maintain Moreland brochure, website and Facebook page	Underway	Brochure will be completed next. Moved to new CWP
20	Include Moreland in the “Camera Ready” program for movie productions	Not complete	Will address at a later time. Moved to new CWP
21	Participate in Southern Treasures Marketing Trail	Not complete	Not a priority at this time.
22	Participate in Southern Literary Trail	Complete	
23	Participate in GA Made – GA Grown; antique car club events, auctions	Underway/Ongoing	Moved to new CWP
24	Work w/ Moreland Elementary on projects and promotions	Underway/Ongoing	Moved to new CWP

25	Organize and secure Town records	Underway/Ongoing	Moved to new CWP
Land Use and Development Regulations			
26	Provide Planning and Zoning Commissioner training	Not complete	Will address in the near future. Moved to new CWP
27	Develop permit fee schedule	Complete	
28	Review current development regulations for consistency with 2006 Comprehensive Plan	Complete	
29	Revise development and Zoning ordinances to be consistent with Comprehensive Plan	Complete	
30	Work closely with County on development plans for areas north and west of Moreland	Complete	
31	Re-establish Historic Preservation Commission and designated preservation district	Not complete	Not a priority at this time.
Transportation			
32	Upgrade Town Square w/ sidewalks, lights, benches, pedestrian lights, link to School and trail in park	Underway	Will be addressed with the completion of the current TE grant. Moved to new CWP.
33	Add sidewalks to East Camp Street	Complete	
34	Continue adding sidewalks to all remaining streets	Underway/Ongoing	Will continue as funding is made available. Moved to new CWP
35	Install directional signs for downtown and Mill	Postponed	Will address in the near future. Moved to the new CWP
Economic Development			
36	Utilize Georgia programs supporting Economic development	Not complete	Moved to policies
37	Develop a Strategic Plan	Complete	

38	Coordinate efforts of Moreland Historical Society, Erkskine Caldwell Birthplace Museum Board, and Lewis Grizzard Trust	Complete	
39	Undertake a Corporate Collections Campaign	Not Complete	Not a priority at this time.
40	Work with Coweta Chamber on County-wide branding, logo	X	Moved to policies
41	Establish a downtown development authority	X	Not a priority at this time
42	Pursue businesses that could use Coweta Airport	X	
43	Pursue businesses for vacant stores next to Mill	X	Not city owned
44	Explore options for downtown restaurant	X	Moved to policies
Natural Resources			
45	Continue to meet solid waste disposal goals	Complete	
46	Develop a Tree Protection Ordinance	Not Complete	Not a priority at this time.
47	Develop strategies for acquiring Open Space and recreation areas	Underway/Ongoing	Moved to new CWP

*** Currently underway or temporarily postponed activities or projects should appear in new STWP**

Community Work Program (2016-2021)

Below is the Town of Moreland Community Work Program running from year 2016 to 2021.

Town of Moreland - Community Work Program 2016-2021				
Activity	Years	Estimated Cost	Responsible Party	Funding Sources
Community and Cultural Development				
Continue to rehabilitate Moreland Mill	2017-2021	\$45,000	Town	SPLOST
Develop upstairs author media center at Mill	2017-2021	N/A	Town	General Fund
Continue July 4 th Celebrations	2017-2021	N/A	Town	Local churches
Continue Lewis Grizzard Bike Ride Day	2017-2021	N/A	Ferst Foundation	Lewis Grizzard Trust
Continue Memorial Day, Heritage Day, Taste & Tour, Christmas dinner, Movies in Park, others	2017-2021	N/A	Town, Historical Society	General Fund, Local Community
Locate barn behind house museum for historic farm equipment	2018-2019	TBD	Town	General Fund, Local Community
Develop mini-rest station, parking area on US 29	2017-2019	TBD	Town	GDOT, GDEcD, General Fund
Offer façade incentives and beautification contests	2017-2019	\$1,500 / yr	Town, Beautification Committee	General Fund
Update and maintain Moreland brochure, website and Facebook page	2017	TBD	Town, MCAA	General Fund
Include Moreland in the "Camera Ready" program for movie productions	2016-2021	TBD	Town, Coweta CVB	General Fund

Participate in GA Made – GA Grown; antique car club events, auctions	2017	TBD	Town	General Fund
Develop visitor welcome center at the Mill	2017-2019	TBD	Town, MCAA	General Fund
Relocate Caldwell House to God’s Little Acre Park	2018-2021	\$25,000	Town	General Fund
Land Use and Development Regulations				
Provide Planning and Zoning Commissioner training	2017-2018	TBD	Town, RC	General Fund
Transportation				
Upgrade Town Square w/ sidewalks, lights, benches, pedestrian lights, link to School and trail in park	2017-2018	\$375,000	Town, RC	TE Grant, SPLOST
Continue adding sidewalks to all remaining streets	2017-2021	\$100,000	Town	General Fund, SPLOST
Install directional signs for downtown and Mill	2017-2018	TBD	Town, GDOT	General Fund, GDOT
Install cross walks and “stop for pedestrian” signs at key intersections	2017-2018	\$1,000	Town, GDOT	General Fund
Natural Resources				
Develop strategies for acquiring open space and recreation areas	2017-2021	N/A	Town, Beautification Committee	General Fund
Establish a tree planting program	2018-2021	TBD	Town, Beautification Committee	General Fund
Develop “God’s Little Acre” Park	2016-2018	TBD	Town, Beautification Committee	General Fund

Town of Moreland Comprehensive Plan Transportation Element

The Town of Moreland is located within the Atlanta MPO (Metropolitan Planning Organization) which requires a Transportation Element to be included in the comprehensive plan update. The Town of Moreland participated in the recent update to the Joint Coweta County Comprehensive Transportation Plan (CTP) and it will serve as the transportation element. A summary of the CTP can be found on the following pages of the appendix.

Joint Comprehensive Transportation Plan (CTP) Update - Plan Summary (FINAL)

The Plan Summary provides an overview of the entire transportation plan update process and details the suite of multimodal projects and strategies to meet the transportation needs of Coweta County and the municipalities of Grantville, Haralson, Moreland, Newnan, Senoia, Sharpsburg, and Turin through year 2040. The CTP Update Plan Summary and supporting technical documentation was adopted by the Coweta County Board of Commissioners on March 4, 2014, followed by adoptions by the various municipalities:

City of Senoia	Adopted March 3, 2014
Town of Sharpsburg	Adopted March 24, 2014
City of Newnan	Adopted March 25, 2014
Town of Moreland	Adopted April 1, 2014
City of Grantville	Adopted April 14, 2014
Town of Turin	Adopted March 18, 2014
City of Haralson	Adopted May 12, 2014

The ultimate goal of the CTP Update is to develop a plan for a comprehensive transportation system that improves mobility, connectivity, and safety for the efficient movement of people and goods within and outside of Coweta County.

Introduction

PLANNING PROCESS AND PURPOSE

In 2005, the Atlanta Regional Commission (ARC) initiated a program to encourage counties and their municipalities to develop joint long-range transportation plans. Coweta County and the municipalities of Grantville, Haralson, Moreland, Newnan, Senoia, Sharpsburg and Turin completed a *Joint Comprehensive Transportation Plan (CTP)* in 2006. The jurisdictions came together again to complete the Joint CTP Update, which was initiated in October 2012 and completed in December 2013.

Building on the 2006 CTP, the Update assesses changes in demographics and transportation conditions over the intervening seven years in order to identify transportation needs and prioritize a suite of multimodal projects and strategies to meet those needs through year 2040. During the update process, Coweta County coordinated with other planning partners, including adjacent counties, the Georgia Department of Transportation (GDOT), Georgia Regional Transportation Authority, (GRTA), Three Rivers Regional Commission (TRRC), and ARC.

A CTP serves several important purposes. First, it provides a means of tying growth to infrastructure, pacing transportation improvements to when the growth actually occurs. It is a guide for ensuring the transportation system that needs to be in place to support existing and future growth is known and used when preparing project programs and funding. It also relates proposed improvements to “real world” funding availability. The CTP furthers the relationship between planning and programming at the local, regional and state level. The CTP Update process included a review of transportation and related plans and programs completed and/or adopted by the County and its jurisdictions over recent years. This provides for continuity in planning efforts, community goals, and desired results.

STUDY AREA

The CTP study area, shown on the next page, includes all of Coweta County and its seven municipalities. The City of Palmetto, located in both Fulton and Coweta counties, conducts its planning primarily with Fulton County and as such was included in the recent *South Fulton CTP*. A “buffer” area stretching several miles into adjacent counties ensured consideration of transportation conditions in areas that directly impact one another.

Vision & Goals

OVERALL CTP VISION

The vision can best be defined as how the community sees itself in the future and the role of the transportation system in achieving its ideal. At the start of the transportation planning process, it is necessary to develop an overarching “community vision” that guides goals and objectives, and eventually, transportation project needs. Together, the vision and goals create a means of identifying and monitoring county transportation system performance and needs.

The CTP update effort began by relooking the vision and goals established during the 2006 CTP. Through coordination with staff representing Coweta County and its jurisdictions, as well as input from stakeholders, the 2006 CTP’s vision and goals were revised slightly so as to be more reflective of current conditions. The overall vision of the Coweta County Joint CTP Update is highlighted at right.

Coweta County will strive to develop a comprehensive transportation system that improves mobility, connectivity, and safety for the efficient movement of people and goods within, into, and out of Coweta County.

It will support economic development through enhanced access to job centers and other destinations, and will improve the operational efficiency of the existing transportation system through investments that are coordinated with local land use plans and policies.

The transportation system will provide multiple modes including public transit, multi-use trails, sidewalks, and bicycle lanes as viable alternatives to the automobile, and will focus on commute alternatives such as additional public transit, carpools, and vanpools for the citizens of the County and its municipalities.

CTP UPDATE GOALS

The goals, objectives and strategies are:

1. Promote coordination of land use and transportation

- Integrate transportation and land use planning
- Limit/control access and development that will negatively impact transportation corridors

2. Support economic and community development

- Develop a transportation system that supports the highest quality sustainable growth and new development opportunities
- Adopt appropriate policies, standards, and guidelines related to transportation system safety, access, efficiency, and sustainability
- Leverage transportation improvements to opportunities to attract businesses to the community

3. Improve accessibility, connectivity, and safety, for the movement of people and goods

- Assure the preservation, maintenance, and operations of existing multimodal transportation system
- Ensure adequate mobility and access to job centers and new development
- Promote improved freight movement to industrial parks and the interstate
- Prioritize and improve transportation corridors
- Improve east/west connectivity
- Create a distributed network that improves interconnectivity of major travel corridors
- Promote alternative modes of transportation to improve quality of life, air and water quality, the visual character, and foster more livable communities
- Provide mobility options for older adults, persons with special needs, persons with disabilities and zero car households

Goals are the long-term general outcomes of the CTP, consistent with the established vision.

They are supported by *objectives* (specific and measurable statements relating to the attainment of goals) and *implementation strategies* (actions undertaken to achieve the goals and objectives).

4. Develop a multimodal transportation system that maximizes community and regional support

- Identify realistic funding opportunities
- Include a sound financial plan and approach to phasing of projects
- Preserve and enhance the multimodal transportation system that includes public transportation
- Provide mobility options for older adults, persons with special needs, persons with disabilities and zero car households
- Integrate the CTP into the regional and state transportation planning efforts
- Improve interagency collaboration and communication between Coweta County and jurisdictions within and adjacent to the County
- Collaborate with federal, state, regional, local, and non-governmental partners
- Accurately classify roads and address potential infrastructure and land use changes associated with new interchanges on I-85 and other major improvements

5. Preserve and enhance the natural and social environment

- Promote alternative modes of transportation to improve quality of life, air and water quality, the visual character, and foster more livable communities
- Identify and preserve local, rural, scenic routes and state corridors

Community Outreach & Input

ADVISORY COMMITTEES

The Coweta County Joint CTP Update incorporated guidance from three committees: the Stakeholder Advisory Committee (SAC), Technical Advisory Committee (TAC), and Transit Technical Advisory Committee (TTAC). Each committee met three times, at key milestones, over the course of the study. The committees served as a check and balance on plan development in terms of political consensus and meeting the diverse needs of a broad-based constituency.

The SAC represented the larger community, helping to build partnerships and share information with major stakeholders. The SAC provided a continuing forum for direct input into the planning process, focusing on education, exchange, understanding, questioning and clarification.

The TAC included representatives from key transportation planning agencies, including Coweta County, its municipalities, regional planning partners (GDOT, ARC, GRTA and TRRC), and neighboring jurisdictions. It was formed to provide input and guidance on technical aspects.

The TTAC was assembled specifically to support the supplemental *Transit Needs and Feasibility Study*. Conducted simultaneous with the CTP Update, the study's focus was to identify and quantify transit needs and define investment strategies. Committee members represented public transit and human services transportation related agencies in Coweta, including the current operator of Coweta's demand response service, GRTA, ARC, TRRC, Southern Crescent Area Agency on Aging, and the Department of Human Services.

LOCAL JURISDICTIONS

Coordination with local jurisdictions occurred throughout the CTP Update process. Local staffs and officials were an important source of information on current and future land use and transportation system conditions, deficiencies and needs. Local jurisdiction representatives participated in TAC/SAC meetings, one-on-one meetings, small group meetings for local jurisdictions only, and the public open house meetings. Their staffs played a key role in clarifying transportation conditions, needs and improvement opportunities, as well as in responding to comments and questions from the general public. They also provided insight into ongoing and recent studies, including the *Newnan Livable Centers Initiative (LCI) Study* within downtown and nearby neighborhoods and the Town of Moreland's *Blueprints* plan with the Georgia Conservancy.

The Coweta Joint CTP Update incorporated guidance from three committees (the SAC, TAC, and TTAC), local jurisdiction representatives, and the general public.

GENERAL PUBLIC

Public participation is the foundation for any planning effort, and efforts must be made to encourage active and widespread participation. This is especially true with transportation planning, which must take into account different types of users, travel modes, geographic areas, and development patterns.

Public information meetings were conducted at two critical points in the CTP Update process. The County also maintained a web page devoted to the CTP Update on its website, where study materials were posted for review and an email address provided for comments.

An initial round of public meetings was conducted between July 25 and August 1, 2013. Hosted by the County Commissioner for each district, the five meetings were held over three evenings at the East Coweta Senior Center, Central Library, Madras Middle School, Newnan Centre, and Grantville Library. The public was informed of the study process and key findings to date, and asked to comment on the potential projects developed to respond to identified needs. A variety of handouts and maps, a formal presentation with Q&A period, and a comment form were provided. A total of 63 general citizens attended, with 12 comment forms received.

Immediately following the meetings, a “Virtual Public Information Meeting (PIM)” was posted to the County’s website. An eight-minute video summarized the key points presented during the actual meetings, including the maps and project lists. People were encouraged to submit comments through an online survey tool during the two-week comment period immediately following the public meetings. A total of 46 people submitted comments online.

A final public open house was held on November 7, 2013, at the Coweta County Fairgrounds Conference Center to present draft project recommendations. A brief presentation summarized the study process and recommendations, while project recommendations were identified by project type and geography on handouts and maps. The comment form included a place for attendees to list their top three priorities. A total of 23 individuals attended the meeting, including members of the public, city and county staff, and elected officials.

A summary of all comments received through the public meeting Q&A and comment forms and Virtual PIM online survey are included as appendices to the CTP’s technical reports.

Land Use & Growth

A primary goal of the CTP process is to coordinate and integrate land use and transportation.

Transportation needs must be considered within the larger context of community dynamics with regards to population and employment trends, land use and development characteristics, and associated factors. Essentially, the needs of the people who comprise the community translate into travel patterns, travel demand, and transportation facility needs. Furthermore, the broader plan for future development described in the local Comprehensive Plans provides a strong basis for projecting future needs.

One of the greatest determinants of transportation need is total population and population density. Transportation needs in sparsely populated rural areas are generally less than those of highly populated areas due to less demand. Coweta County has historically had a rural, agriculturally based economy and community structure, but this has changed dramatically in recent decades. ARC forecasts for 2040 show Coweta at nearly 250,000 in population, which equates to a 95 percent increase above the 2010 population of 127,317. According to projections, population and employment densities will likely continue to grow in the central and northeastern portion of Coweta while the southern and western portion remains less populous.

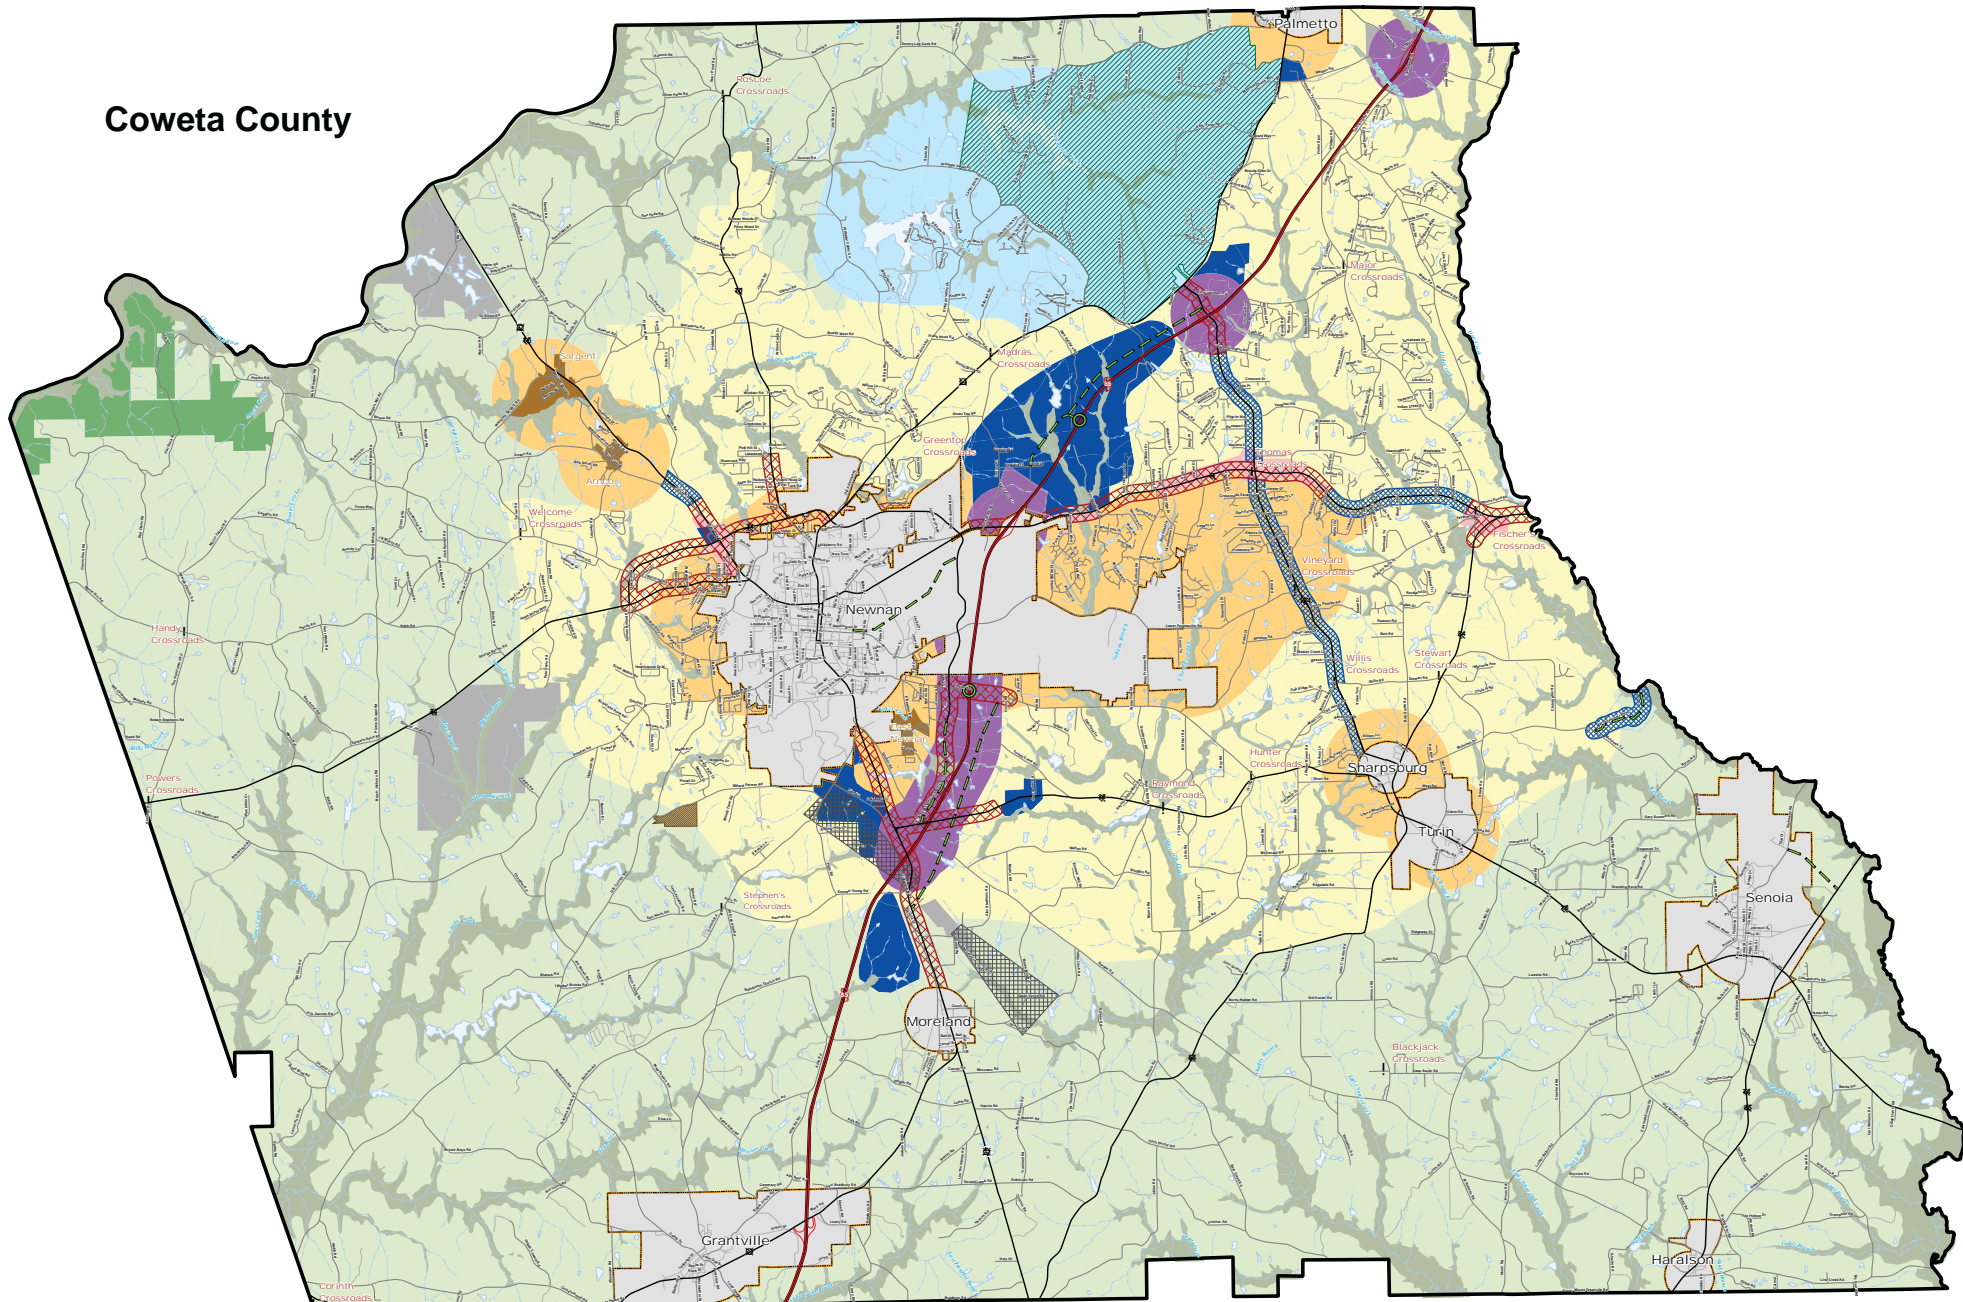

Coweta's population is concentrated in an area from Newnan northward and eastward to the county lines. In 2010, Coweta's population density was 511 people per square mile in this area, while the rural areas to the west and south had a density of 90 people per square mile.

Coweta County has also experienced growth in employment. However, employment growth since 2000 has been significantly reduced in comparison to 1990-2000 growth and has not kept pace with the rate of population growth. Discussions with local staff indicate the expectation for more aggressive employment growth in coming years, reflecting the community's ongoing efforts to promote additional economic development, particularly in the medical and education sectors.

Although Coweta's established land use patterns generally favor a vehicle-oriented transportation system, the Coweta County Future Development Map recommends that new development concentrate in compact, mixed use and crossroads service centers. These centers, which include the cities and towns, are intended to accommodate a mix of residential, commercial and institutional uses that reduce the need for automobiles and encourage walking and biking. Internal job growth can also positively impact transportation needs since shorter trips have a greater likelihood to be made by alternate modes.

Coweta County

Existing Conditions & Identified Needs

ROADWAYS & BRIDGES

A number of improvements to the roadway network have occurred since the previous CTP, including new/upgraded traffic signals, intersection geometric improvements, and additional capacity through new roadways and widening. While there are some areas where traffic volumes exceed capacity, overall the roadway network continues to operate at acceptable levels of service under existing and projected 2040 conditions. Locations where notable volumes or deficient levels of service exist are within the City of Newnan limits and on major state routes throughout the county, including SR 154, SR 34, and SR 16.

Intersections and roadway segments experiencing operational or safety deficiencies remain a top priority. In coordination with Georgia DOT, bridges are also closely monitored to identify and prioritize any requiring rehabilitation or replacement.

FREIGHT

Freight is a critical element of the transportation system that increasingly imposes significant mobility, safety, economic, and quality of life impacts on the county. Primary truck corridors in Coweta include I-85, US 27 Alt/ SR16, US 29, SR 16, SR 34, and SR 74/85. Several freight issues to be addressed include: funding for maintenance, rehabilitation, and replacement of transportation facilities that carry a majority of the freight in the county; conflict of truck traffic with local commercial and residential traffic; degradation of roads and bridges due to truck traffic; and continued coordination/outreach on ways to improve the existing freight system and allow for positive freight growth in the future.

PUBLIC TRANSPORTATION

Transportation mobility has improved in and around Coweta County since inception of two transit services available to all within the county. GRTA operates the Xpress commuter bus service weekdays between Newnan and Midtown/ Downtown Atlanta. Countywide demand response service is offered by Coweta Transit Dial-A-Ride. The utilization of current transit hints at opportunities to expand the fleet and services.

Coweta County continues to experience growth in employment, medical facilities, shopping centers, educational institutions, public and private services, and recreational amenities. Connecting citizens geographically with economic opportunity centers will be challenging under current conditions, particularly for those seeking alternatives to private vehicles and/or those without access to personal transportation.

The primary transit enhancement needs include:

- Increasing the Coweta Transit Dial-A-Ride fleet to accommodate growing travel demands
- Expanding and connecting local transit service to local and regional activity centers
- Connecting the GRTA Park & Ride Lot via expanded local circulator services

BICYCLE NETWORK & PEDESTRIAN FACILITIES

Bicycle facilities in Coweta have essentially not changed since the previous CTP, although significant work has occurred in planning for expanded bicycling infrastructure. Together, the *Coweta County Bicycle Plan* and *Coweta County Greenway Master Plan* serve as the foundation for future bicycle improvements. Securing capital funds for implementation remains the challenge.

Newer and recently upgraded sidewalks are in good condition, although some older sidewalks have deteriorated. Except in subdivisions and commercial developments, sidewalks are minimal, particularly outside the cities. As a result, the biggest need regarding pedestrian facilities is the need to add them. Additionally, most existing sidewalks in the cities do not meet Americans with Disabilities Act (ADA) requirements. If Coweta County wants to encourage walking, emphasis is needed for more aggressive development regulations and a larger local match to capture additional external funds for construction.

Overall, stakeholders identified safety as the first priority when discussing the needs of bicycle and pedestrian facilities in Coweta County. It was also recognized that the needs of bicyclists are different from those of pedestrians. Finally, the jurisdictions expressed the need for additional sidewalks to connect the gaps in the existing network and link to activity centers, particularly within the downtowns.

LAND USE & TRANSPORTATION

In recent years, Coweta County, Newnan and Senoia have adopted ordinances and development guidelines that promote important aspects of land use and transportation coordination. During this time, development activity has been significantly less than in prior years. As development begins to ramp up again, it will be important to implement adopted regulations, track their effectiveness, and refine regulations based on practical outcomes.

Coweta's Comprehensive Land Use Plan encourages growth to develop in a compact fashion and in population centers to maximize efficient expansion of infrastructure.

To realize the *Coweta County Comprehensive Plan's* goal of concentrating new development in mixed use centers and infill neighborhoods, mobility enhancements will be important. Priority should be given to roadway enhancements complementary to the Future Development Map, particularly within and connecting mixed use and infill areas. Expanded transit service where feasible, as well as bicycle and pedestrian facilities connecting between and within activity centers, will be needed. Coordination of land use, transportation and future expansion of sewer infrastructure, in concert with a sewer service area strategy, can further encourage the desired development outcome.

Recommendations

PROJECT IDENTIFICATION

A comprehensive list of potential projects to address the identified needs was developed and then refined to form a list of recommended projects. The project lists included in the currently adopted 2006 Coweta County Joint CTP, Coweta County SPLOST, and ARC short-term Transportation Improvement Program (TIP) and long-term Regional Transportation Plan (RTP) were the primary sources for existing project recommendations. Due to the long horizon period of many planning studies (often as much as 30 years), only a small fraction of recommended projects are typically completed within the relatively short update interval (every 5-8 years) of a CTP. As such, many recommended but as yet incomplete projects remain viable improvements and are carried forward into subsequent plans. Recommendations included within other planning efforts at the regional, local, and subarea levels are also important resources for project identification.

Stakeholder coordination and public involvement are important resources for project identification.

Combined with background socioeconomic and land use data, the travel demand model utilizes data on current and projected future traffic volumes and roadway characteristics and capacities to forecast current and future conditions across Coweta's entire roadway network. Through this process, locations with deficient operations can be readily identified for further analysis. Crash statistics also indicate locations for which increased safety may be achieved through targeted improvements. However, quantitative data alone cannot provide a sufficiently complete picture of existing and future conditions and needs, so qualitative assessments are also used.

Importantly, the stakeholders' and public's daily experiences using the transportation network can confirm what the data indicates. They ensure that problem areas do not get overlooked and that the community's vision and goals remain at the forefront during the prioritization process.

COMPARATIVE EVALUATION OF PROJECTS

Five key “factors” were used to comparatively evaluate individual roadway and bridge projects. Each factor consists of several “considerations,” which helped to highlight relative differences between similar projects.

The evaluation factors tie back to the overall CTP vision and goals, thereby ensuring a continued connection between goals and recommendations.

The factors and their considerations are:

1. Mobility

- Delay/constriction
- Congestion
- Access management

2. Safety

- Crashes
- Bridge condition
- Bicycle/pedestrian interactions

3. Connectivity

- Cross-county/inter-county connectivity
- Subarea connectivity (activity centers)
- “Fill the gaps”
- Transit access

4. Economic Development

- Freight routes
- Improved access to commercial/industrial/job sites

5. Community & Environment

- Consistent with land use
- In another approved plan
- Access to alternate modes and community facilities

Individual projects were scored for each factor on a low-to-high scale of 1 to 5. As a way for some factors to provide relatively more impact on the total score than others, the factors were weighted from 3 (maximum) to 1 (minimum), as follows: 3=mobility and safety; 2=connectivity and economic development; 1=community and environment. When complete, a project’s total score ranged from 11 to 55, with higher scores indicating relatively greater need for the project.

This scored approach to project evaluation was a primary input to the prioritization process for roadway and bridge recommendations. However, additional knowledge gained from local staff and professional experience, stakeholder coordination and public outreach also played an important role in project prioritization.

This type of scored evaluation was not conducted for freight, bicycle/pedestrian, or transit recommendations. There are a number of reasons for this, several of which are: (1) prioritization and implementation may primarily be done locally by the county and the towns/cities; (2) funding limitations and schedule requirements necessitate extreme flexibility in project selection and initiation, and (3) other regional considerations and partners are involved.

ROADWAYS & BRIDGES

The list of proposed roadway recommendations includes projects to improve the safety and operational efficiency of the roadway network while decreasing congestion. Projects are categorized as follows:

- Capacity Additions = 18
 - New Interchange (I) = 2
 - New Location Roadway (N)= 11
 - Road Widening/Capacity (C) = 5
- Operations Improvements = 65
 - Operational Upgrade* (OP) = 25
 - Intersection Modification (M) = 40
- Corridor Improvements** (COR) = 7
- Bridge Upgrades (B) = 30
- Railroad Crossings (R) = 7

* Examples include safety/shoulder/intersection radii improvements and addition of sidewalks/bike lanes

**Further detailed analysis required; could include a combination of widening, operational upgrades, intersection modifications and new location roadways

ROADWAY & BRIDGE PROJECT LIST

Map ID	Roadway/Location	Jurisdiction	Phase
NEW INTERCHANGES			
I1	Poplar Rd at I-85 (Mile Marker 44) and widening from Newnan Crossing Bypass to Newnan Crossing Blvd	Coweta Co	Short

FREIGHT, RAIL & AVIATION

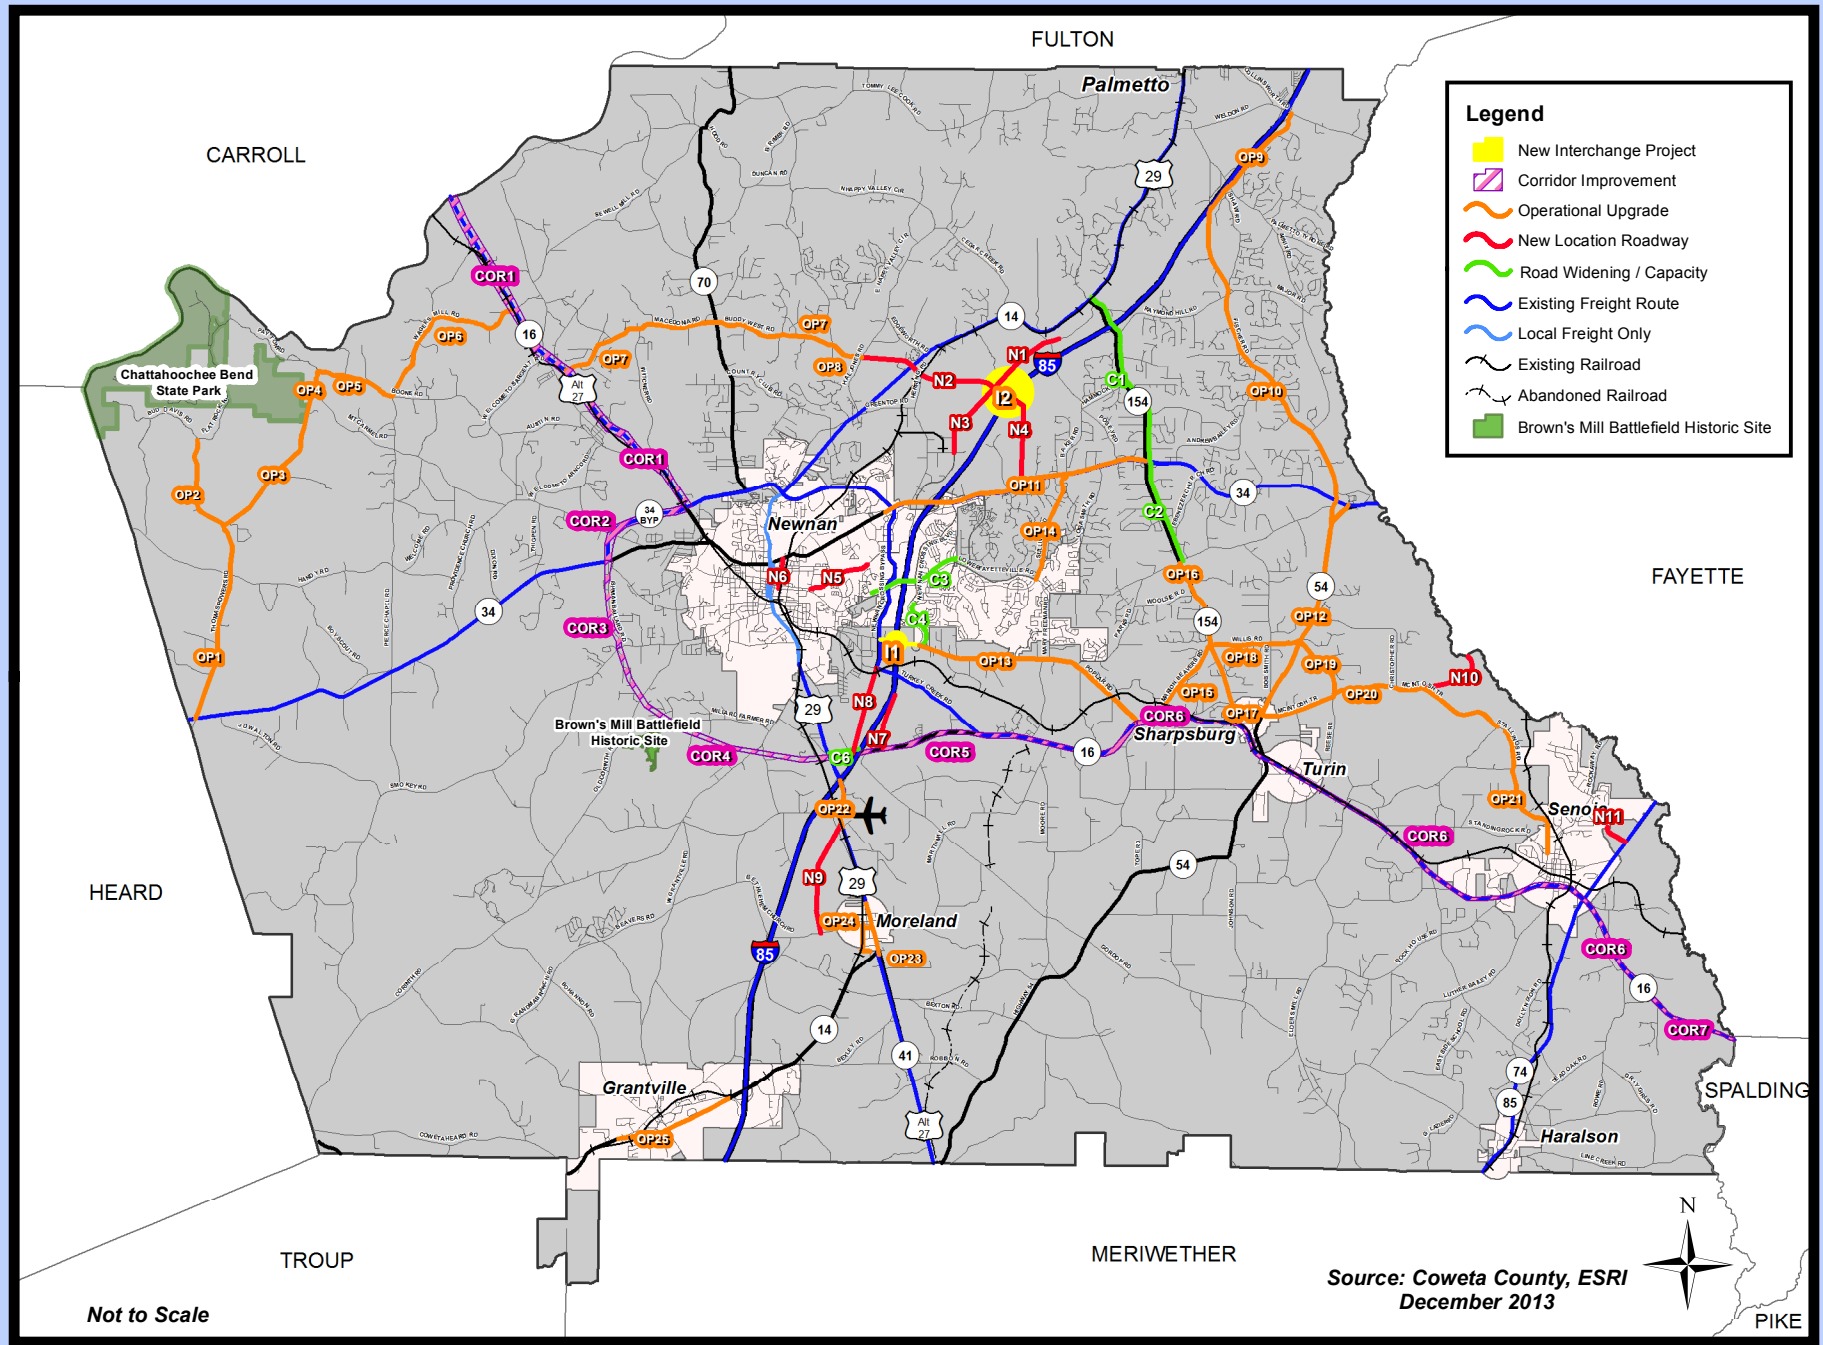

Freight movement in Coweta predominantly involves trucking and railroads. The CTP's freight recommendations are designed to respond to several specific needs:

- Optimize economic growth by ensuring a balanced and efficient goods transport system
- Provide roadway and intersection facilities that maintain safe and efficient freight access and mobility
- Improve the roadway network to accommodate growing freight transport, delivery and transfer needs
- Minimize the impact of freight movement in environmentally sensitive and populated areas

The CTP freight recommendations are:

- Develop a Local Freight Route Network to include designated State/Regional Freight Routes and other critical freight corridors
- Designate Local Freight Routes as appropriate
 - Hwy 154 from I-85 westward to US 29
 - Collinsworth Road/Weldon Road from I-85 westward to US 29
 - When Amlajack Boulevard Interchange is constructed, add Amlajack Boulevard, Coweta Industrial Parkway, and Holz Parkway
- When Newnan Bypass Extension is constructed, revise Regional Truck Route Network to add Newnan Bypass Extension from Turkey Creek Road to SR 16 and SR 16 from I-85 to US 29, and remove Turkey Creek Road
- Periodically evaluate Regional Truck Route Network in Coweta with ARC and GDOT
- Continue to monitor at-grade rail crossings to evaluate whether changing conditions in roadway traffic volumes or rail traffic volumes result in greater potential for conflicts
- Upgrade at-grade railroad crossings at key vehicular traffic locations to improve safety and mobility for roadways and rail (refer to Railroad Crossings in the roadway recommendations list for specific locations)

Interchange, New Location, Operational Upgrade, and Widening/Capacity Projects (Coweta County)**

**Coweta County Joint Comprehensive Transportation Plan Update
Interchange, New Location, Operational Upgrade, and Widening/Capacity Projects (City of Newnan)**

Coweta County Joint Comprehensive Transportation Plan Update
Bridge, Railroad Crossing, and Intersection Modification Projects (Coweta County)

Strategically located along US 29 and adjacent to I-85, the Newnan-Coweta Airport is a transportation facility that supports economic growth in Coweta County.

The Newnan-Coweta Airport maintains a Capital Improvement Plan (CIP), updated yearly, detailing needed airport improvements. Need and support for the CIP improvements exists, but a lack of available funding has caused delays. The Airport Authority, supported by the County, will continue to apply for funding for their CIP projects in an effort to continuously expand and improve facilities. In addition, the operational upgrades to US 29/US 27Alt from I-85 to Airport Road, included in the CTP's roadway recommendations, supports improved access to the airport.

TRANSIT STRATEGIES

The focus of transit activities was on developing broad "strategies" covering many different service types to increase access to public transportation opportunities. Strategies fall into one of three categories—expanded service, new service, and service coordination and optimization—and include fixed-route transit circulators/shuttles, vanpool/ rideshare programs, and subscription services.

Expanded Services

- Increase demand response service to high demand areas
- GRTA service to Hartsfield-Jackson Atlanta International Airport
- Add park and ride lot at Exit 51 (serviced as part of existing Newnan Xpress bus service)

New Services

- Fixed route/route deviation service—Downtown Newnan to/from intown neighborhoods and Piedmont Newnan Hospital/West Georgia Technical College
- Newnan Trolley shuttle service—Downtown Newnan/Newnan Centre/Ashley Park
- Express connector service—Downtown Newnan/Bullsboro Corridor/Newnan Crossing/Ashley Park, with morning/afternoon connection to GRTA Xpress park and ride lot
- Circulator service—Ashley Park/Newnan Crossing/Piedmont Newnan Hospital/West Georgia Technical College
- Express shuttle service—Senoia/Sharpsburg/Bullsboro Corridor/Downtown Newnan
- Shuttle service—University of West Georgia's Newnan and Carrollton (main) campuses

Service Coordination and Optimization

- Mobility Manager
- Private sector partnerships
- Marketing and service referral program

Full implementation of recommended strategies is likely to be accomplished in a phased fashion over the next 15-25 years, with continued assessment of the type and geographical distribution of needs.

The success of current Coweta County Transit and GRTA Xpress services, combined with continuing requests for additional services, indicates the need to expand existing public transit services as warranted by demand.

Coweta County Joint Comprehensive Transportation Plan Update Potential Transit Routes

BICYCLE NETWORK & PEDESTRIAN FACILITIES

Coweta County has undertaken efforts in recent years to expand its bicycle and pedestrian network, most notably through the approved Greenway Master Plan. Bicycle and pedestrian facility recommendations aim to tie together existing and proposed facilities by connecting points of interest and upgrading/rehabilitating the existing network. The focus of the CTP Update’s bicycle/pedestrian recommendations is to:

- “Fill the gaps” in the sidewalk network in cities/towns and activity centers
- Prioritize Greenway Master Plan multi-use path segments for construction
- Where feasible and appropriate, evaluate applicable roadway widening and repaving projects using “Complete Streets” criteria to consider adding bicycle lanes/sidewalks
- Install “Share the Road” signage along designated bicycle routes
- Provide for bicycle racks at commercial and industrial developments

Together with these general strategies, the CTP Update recommends 14 specific bicycle and pedestrian projects to improve connections on existing and proposed facilities.

An important consideration for all bicycle and pedestrian facilities remains the safety of the network for all users, whether bicyclist, pedestrian or motorist.

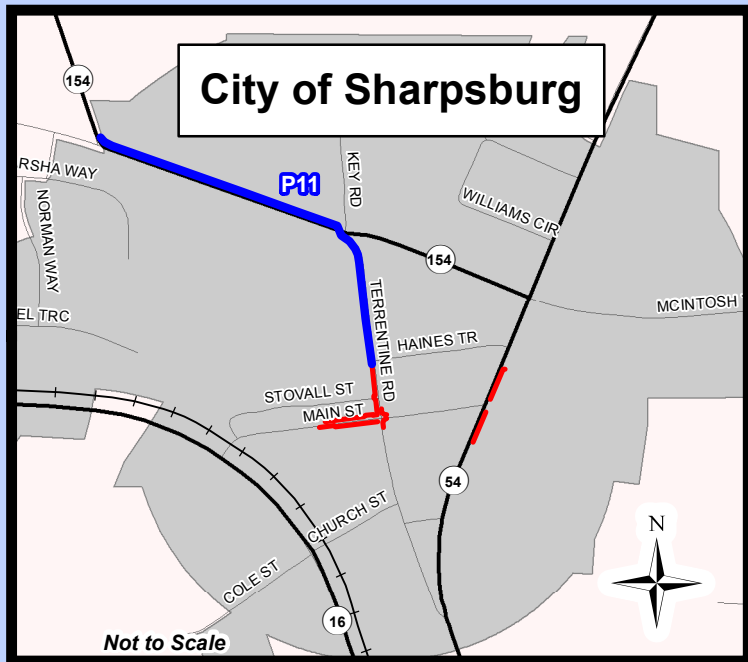

BICYCLE & PEDESTRIAN PROJECT LIST

P1	Bike route connection to Chattahoochee Bend State Park
P2	Extend existing bike route along Franklin Road to Newnan city limits
P3	Rehabilitate non-vehicular use bridge over railroad on Bridge Street at Senoia city limits (bicycle/pedestrian/golf cart use only)
P4	Sidewalks in Moreland between existing sidewalks on Railroad and Church Streets
P5	Chattahoochee Hill Country Regional Greenway Trail System Pilot Project (<i>exact project location yet to be finalized</i>)
P6	Sidewalks along SR 34 Bypass and Newnan Crossing Bypass to connect key destinations
P7	Sidewalks along Shenandoah Boulevard
P8	Sidewalks or bike paths along Lower Fayetteville Road
P9	Multi-use path along SR 34 from Newnan to Peachtree City
P10	Sidewalks along Lora Smith Road to connect two schools to subdivisions along roadway
P11	Sidewalk connection between existing sidewalks in downtown Sharpsburg and East Coweta High School
P12	Bike route on Gordon Road between Johnson Road and Elders Mill Road to connect two existing bike routes
P13	Sidewalk connection on Main Street in Senoia from Couch Street to Johnson Street to connect two existing sidewalks
P14	Sidewalks from Main Street in downtown Senoia to SR 16 (Broad Street)

It should also be noted that, although bicycle and pedestrian facility project recommendations from approved local jurisdiction plans are not listed individually in the CTP project recommendations, the CTP supports local jurisdictions’ continued development of such plans and implementation of the projects recommended therein as funding becomes available.

Coweta County Joint Comprehensive Transportation Plan Update Bicycle and Pedestrian Facility Projects (Coweta County)

**Coweta County Joint Comprehensive Transportation Plan Update
Bicycle and Pedestrian Facility Projects (Moreland, Senoia and Sharpsburg)**

COSTS & PHASING

Costs for all the roadway and bridge project recommendations total an estimated \$673.4 million, broken down by project type as follows:

- New Interchanges = \$70.8 million
- New Location Roadways = \$156.1 million
- Road Widening/Capacity = \$98.3 million
- Operational Upgrades = \$105.0 million
- Intersection Modifications = \$55.9 million
- Corridor Improvements = \$159.5 million
- Bridge Upgrades = \$26.4 million
- Railroad Crossings = \$1.4 million

Prioritization of projects took into consideration several primary factors, including: nature, degree and estimated timing of need, continuity with adjacent improvements, and anticipated funding levels and sources. Projects were prioritized into three implementation time periods:

- Short-term = 2014-2020
- Mid-term = 2021-2030
- Long-term = 2031-2040

Roadway and bridge projects programmed in the ARC 2012-2017 TIP and Coweta County 2013-2018 SPLOST compose the majority of short-term projects. They include 9 ARC TIP projects (\$104.3 million) and 13 remaining Coweta County SPLOST projects (\$7.3 million), with another 5 projects planned in the SPLOST should sufficient funding become available (\$12.7 million).

An additional 17 projects were prioritized into the “gap” years (2018-2020) remaining in the short-term period, assuming inclusion in the next ARC TIP or Coweta County SPLOST (if voter approved). These include several key mobility and economic development projects, such as those connected to the new Amlajack interchange, as well as a number of intersection improvements on locally maintained roads throughout Coweta. These 17 projects total an estimated \$90.8 million.

The 15 projects prioritized into the mid-term period consist mostly of new/widened roadways and corridor operational improvements on both the Federal/State and locally maintained roadway network. They have a total estimated cost of \$183.7 million.

The long-term projects predominantly include corridor operational improvements across the network, as well as intersection modifications on the Federal/State system. These 36 projects have a total estimated cost of \$94.9 million.

Several types of roadway improvements were not included within this prioritization due to the nature of the project and how they are traditionally funded. This includes the “corridor improvements,” bridges (non-programmed only), and railroad crossing upgrades.

As mentioned previously, the 7 projects identified as corridor improvements will require further detailed analysis by the Georgia DOT and/or the ARC to determine the exact nature of the improvement, which could include a combination of widening, operational upgrades, intersection modifications and new location roadways. These projects are all located along SR 16 as it crosses Coweta from Carroll to Spalding counties and including the proposed Southwest Bypass to the west and south of Newnan.

With the exception of any bridge and railroad crossings currently programmed in the ARC TIP or Coweta County SPLOST, it was assumed that all future improvements would be funded under State or regional programs dedicated to bridge upgrades and railroad crossing safety. Georgia DOT maintains a strict monitoring system of all bridges and railroad crossings statewide, and programs improvements as necessary based on need and available funding.

FUNDING

Project funding is categorized into federal, state, and local sources. Locally, SPLOSTs and impact fees are common ways to fund transportation improvements beyond what is available through general funds. Local sources may also include quasi-governmental agencies (school boards/development authorities) and the private sector (business/community improvement organizations and developers/property owners). Federal, state and regionally maintained programs fund specific types of improvements, ranging from bridges and transit to those focused on air quality and safety.

The only CTP projects with committed funding are those in the short-term ARC 2012-2017 TIP and Coweta County 2013-2018 SPLOST. Funding availability through 2040 remains uncertain at all levels. Because of this uncertainty, assumptions were made based on current funding levels to derive the fiscally constrained plan of projects.

Total estimated funding by prioritization period is:

- Short-term (2013-2020) = \$160.7 million
 - ARC 2012-2017 TIP = \$104.3 million
 - Coweta 2013-2018 SPLOST = \$7.3 million
 - “Gap” ARC (2018-2020) = \$26.8 million
 - “Gap” SPLOST (2019-2020) = \$22.3 million
- Mid-term (2021-2030) = \$131.6 million
 - ARC RTP = \$34.4 million
 - Coweta SPLOST = \$97.2 million
- Long-term (2031-2040) = \$123.6 million
 - ARC RTP = \$34.4 million
 - Coweta SPLOST = \$89.2 million

These amounts assume current sources and levels continue mostly unchanged through 2040. As such, SPLOST funding of \$11.15 million per year was assumed for all but four years through 2040. Although Coweta voters have been supportive of the SPLOST in recent years, those four years allow for occasional breaks between SPLOST periods.

Similarly, the ARC funding amount in the short-term “gap” years equals the 2012-2017 TIP value for federal and state sources only, annualized, for three years. In the mid-term period, ARC funding equals the amount already allocated to the one project currently in the RTP. The long-term period funding assumes the same value as currently allocated in the RTP in those years.

Several additional notes should be made regarding funding assumptions. First, future estimated SPLOST amounts do not account for funding set-asides that some ongoing roadway rehabilitation, striping and maintenance programs currently receive. Additionally, several other types of CTP project recommendations, such as bicycle/pedestrian and transit, are not included in this costing, phasing or funding analysis. Finally, federal/state funding typically requires a local match of no less than 20 percent, which Coweta has funded in recent years with SPLOST revenues.

Achieving funding at estimated levels will require significant efforts on the part of Coweta County staff and officials. Local funding, primarily through the SPLOST, necessitates a continued commitment to ensuring that public funds are spent as efficiently and effectively as possible, and that the citizens are aware and supportive of those efforts and projects. Additionally, lean economic times mean that state and regional funding is limited and highly competitive. Coweta County officials and staff must continue to be proactive in efforts to inform regional and state planning partners of the County’s transportation needs and priorities, as well as in stridently promoting the County’s interests in the competition for any available funding.

Municipality Snapshots

CITY OF GRANTVILLE

Located on Coweta's southern border adjacent to Troup and Meriwether counties, the City of Grantville has a population of over 3,000 and area of 5.2 square miles. Grantville area projects are:

- Operational improvements on US 29 between LaGrange Street and Griffin Street
- Intersection modifications on US 29 at Lowery Road and Griffin Street at Charlie Patterson Road
- 7 bridge upgrades over the Messiers and Yellow Jacket creeks
- Railroad crossing upgrade on Main Street
- Sidewalks connecting key destinations

CITY OF HARALSON

The small community of Haralson, on the southeast border with Meriwether and Spalding counties, has a population of 166 and area of 0.7 square miles. CTP projects in/near Haralson are:

- Intersection modifications to SR 74/85 at Gordon Road and Line Creek Road at Shaddix Road and Main Street
- Additional sidewalk to connect downtown destinations and residential areas

TOWN OF MORELAND

South of Newnan in central Coweta County, the Town of Moreland has a population of almost 400 and area of 0.9 square miles. CTP projects located in and around Moreland include:

- Operational improvements on US 29 between SR 41 and Church Street, and on Railroad Street from Main Street to Harris Street
- Intersection modification at SR 14 and SR 41
- New two-lane roadway connecting from US 29 north of Moreland near the airport to Bethlehem Church Road to the west of town
- Sidewalk to connect the gaps in existing facilities along Railroad and Church streets and link other downtown destinations

CITY OF NEWNAN

The City of Newnan is Coweta's county seat and largest city in both population and size, with more than 33,000 residents and a land area of over 18 square miles. Not surprisingly, a number of CTP projects are located in Newnan and adjacent unincorporated areas of the county. Several key CTP projects around Newnan include:

- New I-85 interchanges at Poplar Road and Amlajack Boulevard
- Additional capacity on Lower Fayetteville Road and Newnan Crossing Boulevard East
- New roadway extensions to McIntosh Parkway and Andrews Street
- Various intersection modifications, including realignment of the Five Points intersection
- Sidewalks and multi-use paths connecting key destinations

CITY OF SENOIA

Located in southeastern Coweta adjacent to Fayette County, Senoia has a population of 3,300 and area of 4.7 square miles. The CTP includes a wide variety of projects in and around Senoia:

- New two-lane roadway connecting the end of Ivy Lane to SR 74/85
- Operational improvements along Stallings Road from Couch Street to McIntosh Trail
- Intersection modifications on SR 16 at Pylant Street, Rockaway Road at Heritage Point Parkway, and SR 74/85 at Seavy Street
- Upgrade the bridge over the rail line on SR 74/85 between SR 16 and Seavy Street
- Rehabilitate the bridge over the railroad on Bridge Street for non-vehicular use
- Railroad crossing improvements along Seavy Street and Johnson Street
- Sidewalks along Main Street and in downtown to SR 16 and other key destinations

TOWN OF SHARPSBURG

The Town of Sharpsburg is located in eastern-central Coweta County, along SR 16 between Newnan and Senoia. It has a population of approximately 341 residents and a land area of 0.6 square miles. A number of improvements are recommended in the vicinity of Sharpsburg:

- Intersection modifications on SR 154 at Old Hwy 16 and at Terrentine Street
- Operational improvements along SR 54, SR 154, and McIntosh Trail to the north and east
- Sidewalks to connect downtown with East Coweta High School and other residential destinations

TOWN OF TURIN

Immediately southeast of Sharpsburg along SR 16, the Town of Turin has 274 residents within its 1.3 square miles. The CTP recommends around Turin:

- Intersection improvements on SR 16 at SR 54
- Further detailed analysis along the SR 16 corridor to determine the best combination of specific improvements
- Sidewalk connections to destinations in downtown and residential areas

CTP Documentation

The Coweta County Joint CTP Update was a 15-month study, over the course of which a number of interim and final deliverables were produced. These supplemental study products, listed below, provide more detailed descriptions of study activities, technical analyses and findings. Copies can be requested from the Coweta County Transportation & Engineering Department.

- Project Management Plan
- Public Involvement Plan
- Inventory of Existing Conditions
- Needs Assessment Report
- Recommendations Report
- Final Joint Comprehensive Transportation Plan Technical Report
- Transit Needs and Feasibility Study

Steering Committee and Public Participation

The Moreland Town Council appointed committee met regularly to address each element of the plan. An updated set of needs and opportunities, goals and policies, and vision statement were compiled along with a new character area/land use map. The meetings were productive and the committee gave quality insight into the plan development.

Steering Committee Members

Dick Ford, *Mayor*
Jeff Burgess, *Councilman*
Brandi Loeper, *City Clerk*
Jill Hall, *Citizen/MCAA*
Kathy Brown, *Citizen/MCAA*
Janet Morris, *Citizen*
Nancy McLain, *Citizen*
Robin Burgess, *Citizen*
Steve and Wanda Bledsoe, *Citizens*

Local stakeholders and citizens participated as members of the steering committee but during the planning process a public visioning session was held to gather greater public input for the plan and build upon what the committee had discussed.

Town of Moreland Public Visioning Meeting

The Town of Moreland is updating its comprehensive plan. A public meeting will be held to gather citizens input and to discuss the future vision of the town for the next 20 years.

Please plan to attend and give us your thoughts on the future of Moreland!

Date: Monday, June 20th @ 6PM

Location: Moreland Town Hall (Mill event room)

Town of Moreland

ADOPTION RESOLUTION

WHEREAS, the Town of Moreland has completed its 2016-2036 Comprehensive Plan update; and

WHEREAS, the updated Comprehensive Plan was prepared in accordance with the Minimum Standards and Procedures for Local Comprehensive Planning established by the Georgia Planning Act of 1989; and

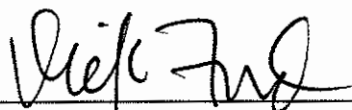

WHEREAS, the two required public hearings were conducted at Moreland Town Hall on March 15th, 2016 and September 5th, 2016; and

WHEREAS, the Comprehensive Plan was transmitted to the Three Rivers Regional Commission and the Department of Community Affairs for review; and

WHEREAS, the Department of Community Affairs has reviewed the Comprehensive Plan and finds that it adequately addresses Minimum Standards for Local Comprehensive Planning; and

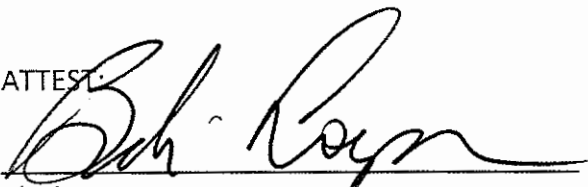

NOW, THEREFORE, LET IT BE RESOLVED, the Town of Moreland Council hereby adopts this 2016-2036 Comprehensive Plan, on this 3 day of Oct, 2016.

BY:

Dick Ford, Mayor
