## *INTRODUCTION*

---

The comprehensive plan is a long-range (15-20-year) statement of a community's vision for development (and redevelopment). By addressing the entire physical environment of the city and the multitudes of functions, policies, and programs that comprise their day to day workings, the plan seeks to guide the what, when, where, why and how of future physical changes to the landscape of Seminole County and its municipalities.

The purpose of a comprehensive plan is to provide a guide for local government officials and other community leaders for making everyday decisions that are supportive of the community's stated goals for its future. The plan should serve as the local government's guide for assessing development proposals, including rezoning applications and redevelopment plans. For residents, business owners and members of the development community, the plan provides insight into what types of land uses and development are appropriate at various locations throughout the city. Finally, evaluating various local government functions and services, the plan is a point of reference for government staff in preparing capital improvements programs and associated budgets.

The last full Comprehensive Plan for Seminole County and the Cities of Donalsonville and Iron City was completed and adopted in 2007 by the Southwest Georgia Regional Commission (SWGRC). Although not a lot has changed since 2007, an updated comprehensive plan is required by the Georgia Department of Community Affairs (DCA). The Seminole County Joint Comprehensive Plan will be completed in 2016, and will lay the groundwork for countywide/citywide decision making through the year 2030 using relevant current data and both quantitative and qualitative analyses.

The DCA oversees and provides guidance for local comprehensive planning in Georgia. The department's Minimum Standards and Procedures for Local Comprehensive Planning, as updated in January 2013, outlines three required components of a comprehensive plan for all local governments: community goals, needs and opportunities and a community work program. The Seminole County is a Tier 1 job Tax Credit community and therefore according to the DCA's rules will be required to do an economic development element. Seminole County and its municipalities also have zoning ordinances and are therefore required to do a land use element as well. Although not required, a transportation element will also be provided by the Southwest Georgia Regional Commission.

## *PUBLIC INVOLVEMENT*

---

### **SWGRC's Role**

The SWGRC's Planning Department facilitated the 2016 Comprehensive Plan update for Seminole County, Donalsonville and Iron City. Leading community input sessions and Steering Committee meetings, the SWGRC team gathered feedback and guidance from the public, and used this information to assemble the Comprehensive Plan and made recommendations that are reflective of the community's desires. The elected officials of each local government hold ultimate responsibility and authority to approve and direct the implementation of the Comprehensive Plan documents.

### **Stakeholder Involvement**

A number of stakeholders were identified and asked to participate in the process including: Business owners, residents around Lake Seminole, large property owners around Lake Seminole, farmers, Chamber of Commerce, planning commission members and departments heads. Representation of those invited was not great due to scheduling conflicts but word of mouth spread and netted us a few substitutes to fill the stakeholder ranks.

### **Public Input and Steering Committee**

The 2016 update of the Seminole County Comprehensive Plan relied heavily on public involvement. The planning process began with initial public hearings at County Commission and City Council meetings in October 2015 where the plan requirements were discussed and an overview of the process as well as various ways the public could participate in the plan process. Aside from public meetings, the SWGRC planning website ([www.swgrcplanning.org](http://www.swgrcplanning.org)) was utilized to further explain the plan process, requirements and provide an avenue for residents to be notified of meetings and send questions and concerns to the planner. Following the initial public hearings, a series of community input sessions was held where the public was invited to help identify the strengths, weaknesses, opportunities and threats and from that develop a list of needs and opportunities Seminole County, Donalsonville and Iron City. The next meeting that was held was to develop goals and policies for Seminole County, Donalsonville and Iron City regarding a variety of topics. The steering committee was formed from various department heads, business owners, residents and at least one elected official, as required by the DCA's rules for comprehensive planning. The steering committee members are as follows:

- Brenda Peterson, Seminole County Board of Commissioners Vice Chairperson
- Paula Granger, Seminole County Administrator/Clerk
- Darrell Hampton, Donalsonville City Manager
- Mitchell Banks, Donalsonville City Council
- Ronnie Ingram, Iron City Mayor
- Sara McCalvin, Iron City Clerk

The steering committee provided valuable feedback, guidance, and recommendations about the comprehensive plan and served the integral role of guiding the plan as a document representative of the overall goals of Seminole County, Donalsonville and Iron City.

## **Review Process**

According to the DCA's new rules for comprehensive planning, effective March 1, 2014, each community must transmit the plan to the Southwest Georgia Regional Commission (SWGRC) when all components are complete. The transmittal must also include the community's certification that it has considered both the Regional Water Plan and the Rules for Environmental Planning Criteria. Once it completes its review, the SWGRC will forward the plan to the DCA for review. Once the plan has been found by the DCA to be in compliance with the Minimum Standards and Procedures, each community must adopt the approved plan.

Renter Occupied	19.6%

**Data Note:** Households with children include any households with people under age 18, related or not. Multigenerational households are families with 3 or more parent-child relationships. Unmarried partner households are usually classified as nonfamily households unless there is another member of the household related to the householder. Multigenerational and unmarried partner households are reported only to the tract level. Esri estimated block group data, which is used to estimate polygons or non-standard geography.

**Source:** U.S. Census Bureau, Census 2010 Summary File 1. Esri forecasts for 2015 and 2020. Esri converted Census 2000 data into 2010 geography.

## ***STRENGTHS, WEAKNESSES, OPPORTUNITIES, THREATS (SWOT)***

---

### **Strengths**

- School System
- Ag Industry
- Healthcare System
- Public Health Dept
- Library System
- Recreation Dept
- Excellent Airport
- Excellent Transportation Network connected to other areas
- Good rail system
- Strong Development Authority
- Chamber of Commerce is Advancing
- Strong Emergency Services
- Senior Assisted Living facilities
- Excellent newspaper
- Civic organizations/church groups
- Bainbridge College satellite campus
- Strong marketing of community to industry
- Friendship House of Jesus afterschool program

### **Weaknesses**

- Skilled labor
- Lack of Low income housing
- Property availability
- Quality transient housing
- Eating establishments
- Public apathy
- Tourism marketing
- Deteriorating county roads
- No mental health care facilities/services

### **Opportunities**

- Lake Seminole
- Chamber Website
- Computer/IT basic training
- TSPLOST
- Solid Waste Service
- Commercial distribution Centers
- 4-laning Hwy 91 from Albany to Florida
- Improvement to Spring Creek Park
- Solar Power development
- Farmers Market

### **Threats**

- Army Corps of Engineers and Spring Creek
- GATE Cards
- Low wage index

## *NEEDS AND OPPORTUNITIES*

---

The list of needs and opportunities represent both the major problems facing Seminole County and potential strategies for improving on those problems. The list was developed from the identified strengths, weaknesses, opportunities and threats that face Seminole County.

- We need to promote Lake Seminole to increase tourism in our community
- We would love to see Highway 91 four-laned from Albany to the Florida line
- Our available property for new development is limited or not for sale.
- Our community lacks any kind of low income housing developments
- Our labor force is lacking in specific skills and needs more training
- We lack need more eating establishments and better hotels/motels
- Our roadways needs maintenance
- We lack proper mental healthcare facilities in our community
- Our citizens for the most part art apathetic towards being involved in the local government
- Our Chamber of Commerce needs a new/better website to provide information
- Our citizens could benefit from a basic computer/IT skills training
- Our community desperately needs the TSPLOST to go through
- We feel there is an opportunity for commercial distribution centers to develop in our community
- We would like to see changes made to our solid waste service

## GOALS AND POLICIES

---

### **Goal: Economic Prosperity**

*Encourage development or expansion of businesses and industries that are suitable for the community. Factors to consider when determining suitability include job skills required; long-term sustainability; linkages to other economic activities in the region; impact on the resources of the area; or prospects for creating job opportunities that meet the needs of a diverse local workforce.*

#### **Policies:**

- We will preserve the rural character of our community and provide the opportunity for agricultural and forestry activities to remain a vital part of the community.
- We will support programs for retention, expansion and creation of businesses that are a good fit for our community's economy in terms of job skill requirements and linkages to existing businesses.
- We will encourage housing policies, choices and patterns that move people upward on the housing ladder from dependence to independence (homeownership).

### **Goal: Resource Management**

*Promote the efficient use of natural resources and identify and protect environmentally sensitive areas of the community. This may be achieved by promoting energy efficiency and renewable energy generation; encouraging green building construction and renovation; utilizing appropriate waste management techniques; fostering water conservation and reuse; or setting environmentally sensitive areas aside as green space or conservation reserves.*

#### **Policies:**

- The protection and conservation of our community's resources will play an important role in the decision-making process when making decisions about future growth and development.
- We will encourage new development to locate in suitable locations in order to protect natural resources, environmentally sensitive areas, or valuable historic, archaeological or cultural resources from encroachment.
- We will ensure safe and adequate supplies of water through protection of ground and surface water sources.
- We will promote enhanced solid waste reduction and recycling initiatives.

### **Goal: Efficient Land Use**

*Maximize the use of existing infrastructure and minimize the costly conversion of undeveloped land in areas of the community not identified in the comprehensive plan. This may*

*be achieved by encouraging development or redevelopment of sites closer to the traditional core of the community; designing new development to minimize the amount of land consumed; carefully planning expansion of public infrastructure; or maintaining open space in agricultural, forestry, or conservation areas.*

**Policies:**

- We are committed to redeveloping and enhancing existing commercial and industrial areas within our community in preference to new development in Greenfield (previously undeveloped) areas of the community.
- We are open to land planning and development concepts that may be new to our area but have been tried successfully in other places.
- Our community will make efficient use of existing infrastructure and public facilities in order to minimize the need for costly new/expanded facilities and services.

**Goal: Local Preparedness**

*Identify and put in place the prerequisites for the type of future the community seeks to achieve. These prerequisites might include infrastructure (roads) to support or direct new growth; ordinances and regulations to manage growth as desired; leadership and staff capable of responding to opportunities and managing new challenges; or undertaking an all-hazards approach to disaster preparedness and response.*

**Policies:**

- Our new and reconstructed roadways will be appropriately designed, using context sensitive design considerations, to enhance community aesthetics and to minimize environmental impacts.
- Our community will use planned infrastructure expansion to support development in areas identified (in the comprehensive plan) as suitable for such development.
- We will channel more county resources to improve conditions around Lake Seminole

**Goal: Regional Cooperation**

*Cooperate with neighboring jurisdictions to address shared needs. This may be achieved by actively participating in regional organizations; identifying joint projects that will result in greater efficiency and less cost to the taxpayer; or developing collaborative solutions for regional issues such as protection of shared natural resources, development of the transportation network, or creation of a tourism plan.*

**Policies:**

- We will seek opportunities to share services and facilities with neighboring jurisdictions when mutually beneficial.

- We will work jointly with neighboring jurisdictions on developing solutions for shared regional issues (such as growth management, watershed protection)

**Goal: Educational Opportunities**

*Make educational and training opportunities readily available to enable all community residents to improve their job skills, adapt to technological advances, or pursue life ambitions. This can be achieved by expanding and improving local educational institutions or programs; providing access to other institutions in the region; or coordinating with local economic development programs to ensure an adequately trained and skilled workforce.*

**Policies:**

- We will consider the employment needs and skill levels of our existing population in making decisions on proposed economic development projects

**Goal: Community Health**

*Ensure that all community residents, regardless of age, ability, or income, have access to critical goods and services, safe and clean neighborhoods, and good work opportunities. This may be achieved by providing services to support the basic needs of disadvantaged residents; instituting programs to foster better health and fitness; or providing all residents the opportunity to improve their circumstances in life and to fully participate in the community*

**Policies:**

- No specific policy in place.

## *ECONOMIC DEVELOPMENT*

---

The Comprehensive Economic Development Strategy (CEDS) as developed by the Southwest Georgia Regional Commission under a grant from the US Department of Commerce Economic Development Administration is hereby incorporated by reference into this Comprehensive Plan to serve as the Economic Development Element for Seminole County and the Cities of Donalsonville and Iron City.

The Southwest Georgia Regional Commission's (SWGRC) Comprehensive Economic Development Strategy (CEDS) was designed to bring together the public and private sectors in the creation of an economic roadmap to diversify and strengthen the regional economy. The SWGRC CEDS analyzed the regional economy and serves as a guide for establishing regional goals and objectives, a regional plan of action, and the investment priorities and funding sources.

As a performance-based plan, this CEDS plays a critical role in adapting to global economic conditions by fully utilizing the region's unique advantages to maximize economic opportunity for its residents by attracting the private investment that creates jobs. The SWGRC CEDS is a regionally owned strategy that is the result of a continuing economic development planning process developed with regional public and private sector participation. This plan sets forth the goals and objectives necessary to solve the economic development problems of the Southwest Georgia region and clearly defines the measures of success.

The Southwest Georgia CEDS gives an overview of the region briefly describing geography, population, economy, labor, and workforce development and use, education, transportation access, environment, and regional resources. It reviews the state of the Regional Economy and provides a list of achievable Goals and Objectives for the region, a Plan of Action to ensure success, and Performance Measures used to evaluate the Southwest Georgia Regional Commission's successful development and implementation of the 2012-2017 CEDS. Implementation of the goals identified in this plan is significant to the economic future of the SWGRC District.

Policies, issues and opportunities, and Short-Term Work Program implementation strategies located in the current Comprehensive Plans for each of our 14 county region were used extensively to develop the CEDS Goals and Objectives, Vital Projects and Problems and Opportunities.

Included below are goals and objectives from the CEDS which are aligned with the current economic development goals of Seminole County and the Cities of Donalsonville and Iron City:

**Goal: Encourage and increase regional collaboration among cities and counties.**

Objective: To increase the likelihood of large-scale economic development projects resulting in jobs and private investment.

**Goal: Expand existing industries.**

Objective: To increase the potential that existing industries will expand in the region.

**Goal: Improve infrastructure of water, sewer roads and technology.**

Objective: To increase the likelihood that businesses will be started or moved to the region.

**Goal: Support technical colleges within the region.**

Objective: To increase the level of education of the region's workforce.

**Goal: Increase tourism in the region.**

Objective: Increase the region's tax base and local government's ability to provide services and recreational opportunities.

**Goal: Recruit retirees.**

Objective: Support communities in the region and increase the tax base by recruiting retirees.

**Goal: Increase access to capital for small businesses in the region.**

Objective: To increase availability and likelihood to access low-interest financing for businesses creating jobs and making private investments.

**Goal: Create a diverse economy resistant to economic recession.**

Objective: To promote the development of diverse employment opportunities at various skill levels.

**Goal: Create and Promote agritourist activities and enterprises.**

Objective: To increase farm income and farm tourism.

#### *Seminole County and its municipalities according to the CEDS...*

Seminole County is located in the extreme southwest corner of Georgia, a short distance from Alabama and Florida. Seminole County was named for the Seminole Indians. It is located above one of the largest known aquifers in the world. The county seat is Donalsonville. According to census data, Seminole County lost 7 percent of its population from 2000 to 2010. Seminole County is known as the "Gateway to Lake Seminole," a large lake maintained by the Army Corps of Engineers where the Flint and Chattahoochee Rivers come together to form the Apalachicola River. Lake Seminole is recognized as one of the best bass fishing lakes in the country. Named twice as one of the top 100 small hospitals in the nation, Donalsonville Hospital is a state of the art medical facility with 12 doctors on staff. The Industrial Park has 18 acres available for prospective businesses. A few of the top employers include Donalsonville Hospital, JH Harvey Co., Lewis Carter Manufacturing and Three Notch Electric Membership. Seminole County has the opportunity to become a retirement community. Much of Seminole County has been deemed by the United States Department of Agriculture as prime farm land. Innovative uses of agriculture land and products could expand agricultural profitability. The county owns one of the very few self-supporting airports in Georgia. This facility is jet capable, has 5,000 of bituminous runway, aircraft tie downs, hangers, and a lighted runway.

Donalsonville is the county seat of Seminole county and has a population of 2,650. It was originally part of Decatur County and a prominent business man paved the way for the City's growth when he built the first lumber mill in Donalsonville. The Olive Theatre is in an old building downtown, which has been renovated and hosts the local talents and the murals present on a few of the downtown buildings depict the main industry in the county. The Harvest Festival, hosted in October, is a vast part of Donalsonville's culture and supports the local industry of agriculture. There are other attractions, including the Christmas Tour of Homes and the PRCA Rodeo, that are held in Donalsonville.

Iron City is a small town within the County and folk lore has it hast the name came about when a new well was being dug and hit a spot of iron ore. The citizens thought the discovery would bring great wealth to the people of the town and the economy was booming with new construction. Since that time the economy has declined with only a grocery store, gas station and hardware store. The major employer is Greene Poultry, which employs about 25 people and a local mechanic shop. The town is a small rural community that relies greatly on farming.

**Data Note:** Households with children include any households with people under age 18, related or not. Multigenerational households are families with 3 or more parent-child relationships. Unmarried partner households are usually classified as nonfamily households unless there is another member of the household related to the householder. Multigenerational and unmarried partner households are reported only to the tract level. Esri estimated block group data, which is used to estimate polygons or non-standard geography.

Spending Potential Index		68

**Data Note:** Consumer spending shows the amount spent on a variety of goods and services by households that reside in the area. Expenditures are shown by broad budget categories that are not mutually exclusive. Consumer spending does not equal business revenue. Total and Average Amount Spent Per Household represent annual figures. The Spending Potential Index represents the amount spent in the area relative to a national average of 100.

**Source:** Consumer Spending data are derived from the 2011 and 2012 Consumer Expenditure Surveys, Bureau of Labor Statistics. Esri.

**Source:** U.S. Census Bureau, Census 2010 Summary File 1. Esri forecasts for 2015 and 2020. Esri converted Census 2000 data into 2010 geography.

## Tapestry Segmentation Explained

Tapestry segmentation provides an accurate, detailed description of America's neighborhoods—U.S. residential areas are divided into 67 distinctive segments based on their socioeconomic and demographic composition. The top three tapestry segments in Seminole County are: Senior Escapes, Rural Bypasses and Prairie Living

## *TRANSPORTATION*

---

An integrated transportation system should contribute to a high quality of life for residents and a desirable climate for business. While the automobile is the dominant mode of transportation, the County wants to provide a balanced and coordinated “multi-modal” transportation system to accommodate ongoing growth and development. Comprehensive improvements to all modes of travel can help improve the operation and capacity of the road system.

### **Road Network**

Seminole County is crisscrossed by numerous state highways and U.S. Hwy 84. State highway numbers include: 39, 45, 91, 253, 285 and 374. U.S. Highway 84 sees the heaviest traffic loads averaging approximately 6,500 average annual daily traffic (AADT) counts. Georgia Highway 39 averages the most of any on the state highways in Seminole County with approximately 1,400 AADT. Georgia Highway 91 and U.S. Hwy 84 have the most truck traffic in the county, mostly in and out of Donalsonville.

### **Alternative Modes**

With regards to bicycling, Seminole County is home to two different sections of the State Bicycle route system. Parts of Both the Chattahoochee Trace Route (5) and the Southern Crossing Route (10) intersect in Seminole County near Lake Seminole.

Source: GDOT

Seminole should consider building off of what the State of Georgia has already done and expand the bicycle routes in areas of the County that can be ridden safely by cyclists. There are no local bicycle routes or bike lanes in Seminole County. Although even the State bicycle routes in the area do not have bicycle lanes so riders have to ride at their own risk and automobiles need to share the road.

Seminole County is a member of the Southwest Georgia Regional Rural Transit System. Transit buses are available for all residents of Seminole County, Donalsonville and Iron City. The transit system provides transport to anywhere in the region for a fee based on mileage. Users must call to schedule a pickup by 3 pm the day before their scheduled trip. This service has proven to be very beneficial for those that do not drive. Typically, elderly or those that do not have a license have utilized the service for daily life activities including grocery shopping and doctor's appointments in particular.

### Parking

The current level of service for parking is adequate for the rural nature of Seminole County.

### Railroads

Seminole County is serviced by the CSX rail line that runs parallel to U.S. Hwy 84 from Decatur County through Iron City and Donalsonville to the lower reaches of Early County and the City of Jakin. The rail line provides critical freight transport for a number of industries in Seminole County and the Cities of Iron City and Donalsonville.

## *LAND USE*

---

The Future Land Development Map is a required component for all communities that have zoning. It is intended to be an expression of the community's vision for the future, and a guide to its future development patterns citywide. It is based off of previous Future land use maps with updates added to fully meet the trends of development in Seminole County and was refined with the help of the public during the public outreach portion of the plan's development. It is intended to be representation of the community's vision for the future. Below are descriptions of categories which are utilized on the Future Land Use Map.

### **Agriculture**

The agricultural land use designation in Seminole County is intended for those areas outside of the urban service areas which are associated with agricultural farm operations and associated activities, forestry, natural resource conservation, groundwater recharge areas, and low-density residential development. Because of the rural nature of Seminole County, commercial development is also allowed under the agricultural designation but should be directed to the state highways and areas around Donalsonville and Iron City.

### **Residential**

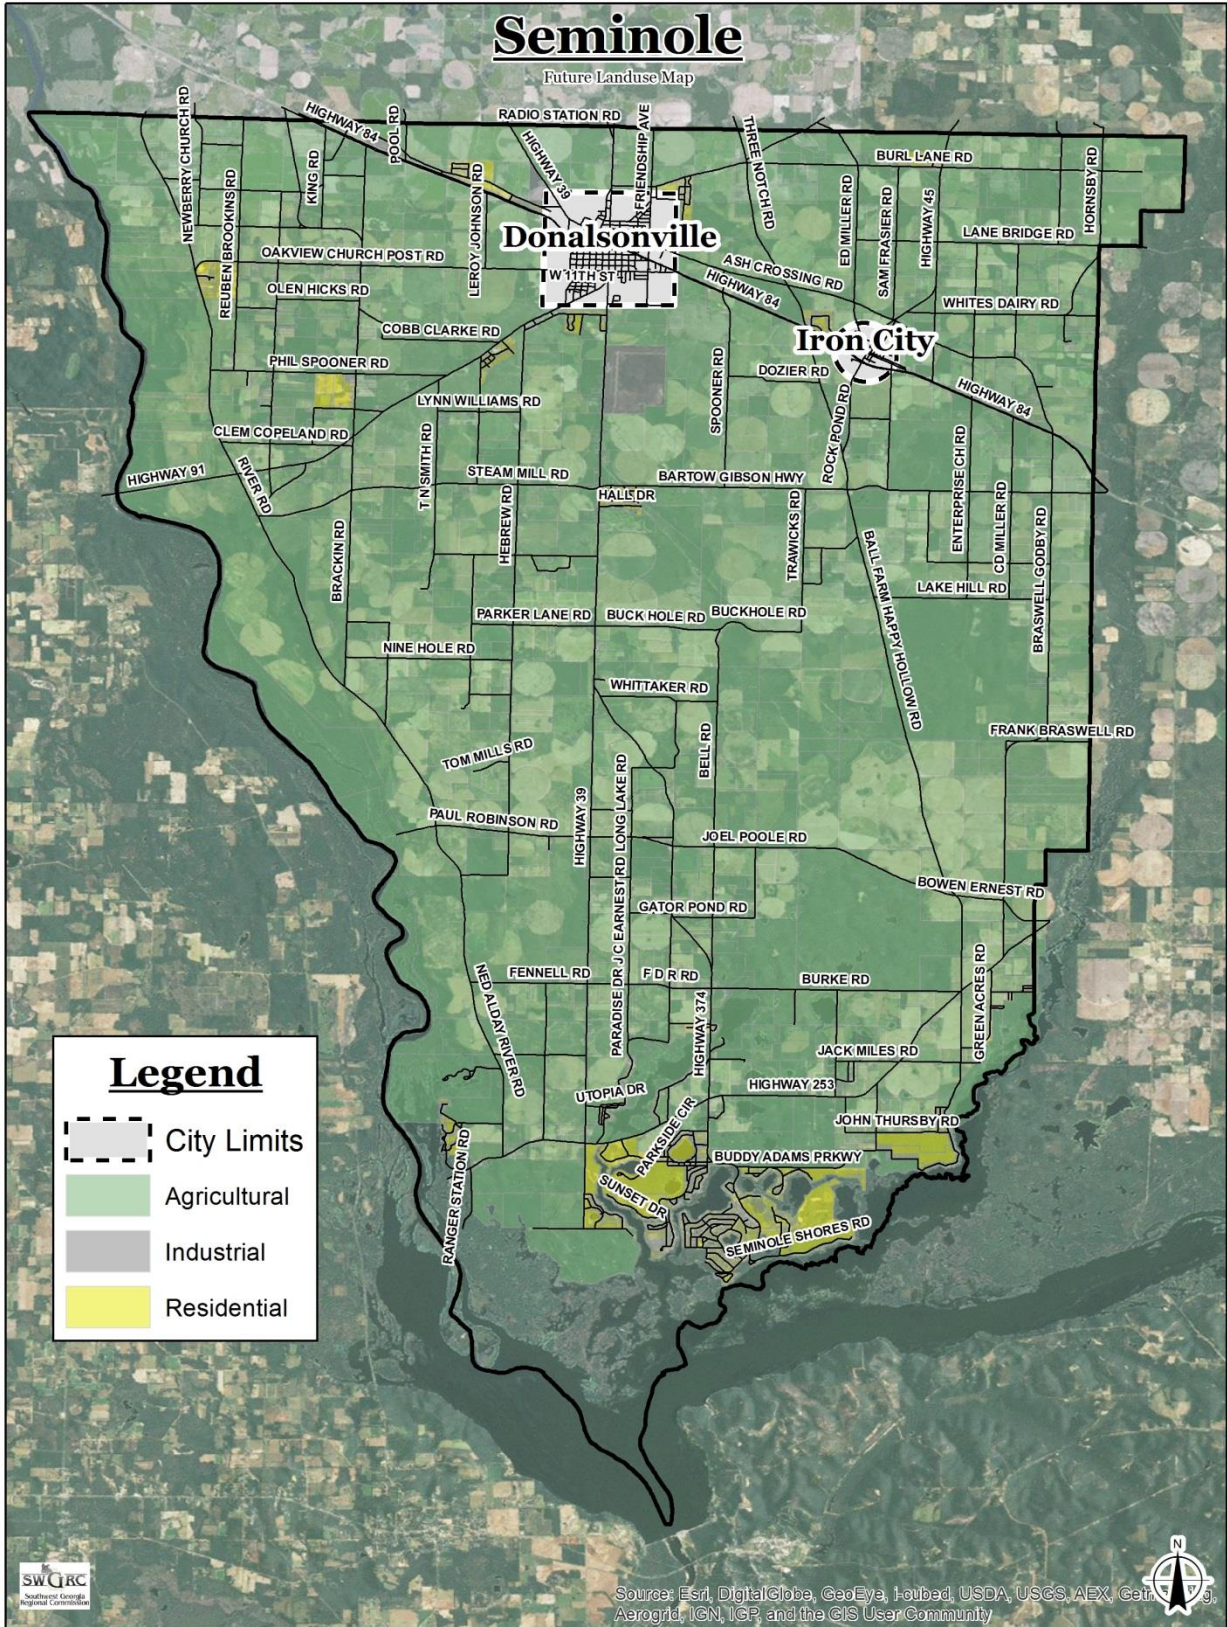

This residential category is intended to correspond primarily to existing neighborhoods but is also proposed for undeveloped areas adjacent to existing urban neighborhoods. The primary housing type is detached, single-family residential, though other housing types such as duplexes and manufactured homes may be allowed by applicable zoning regulations under certain circumstances. This future land use category is implemented with one or more low-density residential zoning districts. Regulations may differ according to zoning district; for instance, manufactured homes may be permitted in one urban residential category but not in another. Furthermore, different lot sizes may be established as may be necessary.

### **Industrial**

This category corresponds to industrial operations which may or may not be objectionable due to the emission of noise, vibration, smoke, dust, gas, fumes, odors, or radiation and that may create fire or explosion hazards or other objectionable conditions. Uses within this district may require substantial quantities of water for manufacturing operations and may require rail, air, or water transportation.

# ADOPTION RESOLUTION

2017-09-01

## A RESOLUTION TO ADOPT THE SEMINOLE COUNTY COMPREHENSIVE PLAN

**WHEREAS**, the Board of Commissioners of Seminole County, Georgia found it necessary to update their joint comprehensive plan as part of the requirements to maintain its Qualified Local Government Status;

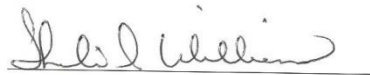

**WHEREAS**, the Board of Commissioners held public meetings and hearings to allow private citizens to review the Comprehensive Plan and gathered citizens input;

**WHEREAS**, in the development of the comprehensive plan, the Seminole County Board of Commissioners examined, evaluated, and where applicable, incorporated considerations of both the Flint River Basin Regional Water Development and Conservation Plan and the Environmental Planning Criteria pursuant to O.C.G.A. 12-2-8, and;

**THEREFORE, BE IT RESOLVED** by the Board of Commissioners of Seminole County, Georgia that the Comprehensive Plan shall be adopted, hereby certifying that adequate citizen participation requirements have been met.

Adopted on this 19<sup>th</sup> day of September, 2017.

Seminole County Commission Chairman:

  
Shelia Williams

Attest:

  
Paula Granger, County Clerk

Owned with a Mortgage/Loan	38.8%
Owned Free and Clear	27.3%
Renter Occupied	33.8%

**Data Note:** Households with children include any households with people under age 18, related or not. Multigenerational households are families with 3 or more parent-child relationships. Unmarried partner households are usually classified as nonfamily households unless there is another member of the household related to the householder. Multigenerational and unmarried partner households are reported only to the tract level. Esri estimated block group data, which is used to estimate polygons or non-standard geography.

## STRENGTHS, WEAKNESSES, OPPORTUNITIES, THREATS (SWOT)

---

### Strengths

- Strong agricultural economy
  - Numerous businesses directly & indirectly related to agriculture
- Excellent airport
- Good school system
  - Bainbridge College satellite campus recently added
- Hospital
  - Large employer, latest equipment, very/needed/important to community
- Public safety has expanded
  - New facility built recently and looking to lower ISO rating
- Close proximity to Lake Seminole
- Active civic/volunteer/religious groups
- Downtown revitalization interest (community backed endeavor)
- Downtown celebrations increasing and improving
- Excellent Library System
- Transportation networks to popular areas (gulf coast beaches)
- Commercial/Industrial building permits are increasing
- Friendship House of Jesus (out-of-school time program of Friends with Jesus, Inc., a non-profit organization located in Bainbridge, Georgia, offers free services to children in low-income families to help reduce or eliminate the influence of crime and poverty in the lives of at-risk youth)

### Weaknesses

- Lack of skilled workforce
- People wanting handouts
- Mental Healthcare (social services are very lacking)
- Brain drain
- Lack of available property for development
- Aging/undersized utility lines for potential customers in the commercial/industrial sector
- Lack of hotels/motels
- Weak Chamber of Commerce
- Public apathy

### Opportunities

- Food processing opportunity
- Farmers market facility
- Four-Laning of Highway 91 from Albany to Florida Line
- Citywide Wifi
- Small scale solar electric
- Distributions centers for goods and subsequent spinoff businesses that support it
- City website
- Retirement Village
- Opportunity/Enterprise Zones
- Tourism/Lake Seminole
- City/County Cooperation

### Threats

- GATE cards
- Weak Chamber of Commerce can lead to poor business retention
- Aging citizenry
- Lack of support from State of GA for small local communities
  - The state in some respects is becoming part of the problem instead of part of the solution
- Low wage index
- Complacency of citizens & elected officials (never stop improving)

## *NEEDS AND OPPORTUNITIES*

---

The list of needs and opportunities represent both the major problems facing Seminole County and potential strategies for improving on those problems. The list was developed from the identified strengths, weaknesses, opportunities and threats that face the City of Donalsonville.

- We need to promote revitalization of our downtown
  - There is a strong community support for revitalizing downtown and a number of celebrations that take place downtown, so many of the pieces are there for this to happen.
- We need to provide an economic atmosphere where kids can come back to after college and get a job.
- We have a strong agricultural economy but need to build on that by developing some value added agriculture.
- The farmer's market facility is not being utilized and we think it should put to use as a farmers market again.
- We would love to see Highway 91 four-laned from Albany to the Florida line
- Our city website needs improving
- Citywide wifi is a possibility in our town
- We want to see more small scale solar power farms or retrofits to existing buildings
- We feel that we are in a prime location and would like to see distribution centers for goods located here.
- We have an excellent hospital and the support infrastructure along with an increasing aging population and we feel that we could have a retirement village in our town
- We need to consider DCA opportunity and enterprise zones in our community
- There are more opportunities for City/County cooperation
- We need to promote Lake Seminole to increase tourism in our community

## GOALS AND POLICIES

---

### **GOAL: Economic Development and Prosperity**

*Encourage development or expansion of businesses and industries that are suitable for the community. Factors to consider when determining suitability include job skills required; long-term sustainability; linkages to other economic activities in the region; impact on the resources of the area; or prospects for creating job opportunities that meet the needs of a diverse local workforce.*

#### **Policies:**

- We will encourage the development of downtown as a vibrant center of the community in order to improve overall attractiveness and local quality of life.
- We will support programs for retention, expansion and creation of businesses that are a good fit for our community's economy in terms of job skill requirements and linkages to existing businesses.
- We will consider the employment needs and skills of our existing population in making decisions on proposed economic development projects.
- We will carefully consider costs as well as benefits in making decisions on proposed economic development projects.
- Our community will make efficient use of existing infrastructure and public facilities in order to minimize the need for costly new/expanded facilities and services.

### **GOAL: Sense of Place**

*Protect and enhance the community's unique qualities. This may be achieved by maintaining the downtown as focal point of the community; fostering compact, walkable, mixed-use development; protecting and revitalizing historic areas of the community; encouraging new development that is compatible with the traditional features of the community; or protecting scenic and natural features that are important to defining the community's character.*

#### **Policies:**

- We are committed to creating walkable, safe, and attractive neighborhoods throughout the community, where people have easy access to schools, parks, and necessary services (grocery store, drug store) without having to travel by car.

### **GOAL: Regional Cooperation**

*Cooperate with neighboring jurisdictions to address shared needs. This may be achieved by actively participating in regional organizations; identifying joint projects that will result in greater efficiency and less cost to the taxpayer; or developing collaborative solutions for regional issues such as protection of shared natural resources, development of the transportation network, or creation of a tourism plan.*

**Policies:**

- We will consult other public entities in our area when making decisions that are likely to impact them.

**GOAL: Housing Options**

*Promote an adequate range of safe, affordable, inclusive, and resource efficient housing in the community. This may be achieved by encouraging development of a variety of housing types, sizes, costs, and densities in each neighborhood; instituting programs to provide housing for residents of all socio-economic backgrounds; or coordinating with local economic development programs to ensure availability of adequate workforce housing in the community.*

**Policies:**

- We will eliminate substandard housing or dilapidated housing in our community.
- We will create affordable housing opportunities to ensure that all those who work in the community have a viable option to live in the community.

**GOAL: Educational Opportunities**

*Make educational and training opportunities readily available to enable all community residents to improve their job skills, adapt to technological advances, or pursue life ambitions. This can be achieved by expanding and improving local educational institutions or programs; providing access to other institutions in the region; or coordinating with local economic development programs to ensure an adequately trained and skilled workforce.*

**Policies:**

- We will seek to improve training opportunities for the local labor force to gain the skills needed to further their career and better themselves.

## *ECONOMIC DEVELOPMENT*

---

The Comprehensive Economic Development Strategy (CEDS) as developed by the Southwest Georgia Regional Commission under a grant from the US Department of Commerce Economic Development Administration is hereby incorporated by reference into this Comprehensive Plan to serve as the Economic Development Element for Seminole County and the Cities of Donalsonville and Iron City.

The Southwest Georgia Regional Commission's (SWGRC) Comprehensive Economic Development Strategy (CEDS) was designed to bring together the public and private sectors in the creation of an economic roadmap to diversify and strengthen the regional economy. The SWGRC CEDS analyzed the regional economy and serves as a guide for establishing regional goals and objectives, a regional plan of action, and the investment priorities and funding sources.

As a performance-based plan, this CEDS plays a critical role in adapting to global economic conditions by fully utilizing the region's unique advantages to maximize economic opportunity for its residents by attracting the private investment that creates jobs. The SWGRC CEDS is a regionally owned strategy that is the result of a continuing economic development planning process developed with regional public and private sector participation. This plan sets forth the goals and objectives necessary to solve the economic development problems of the Southwest Georgia region and clearly defines the measures of success.

The Southwest Georgia CEDS gives an overview of the region briefly describing geography, population, economy, labor, and workforce development and use, education, transportation access, environment, and regional resources. It reviews the state of the Regional Economy and provides a list of achievable Goals and Objectives for the region, a Plan of Action to ensure success, and Performance Measures used to evaluate the Southwest Georgia Regional Commission's successful development and implementation of the 2012-2017 CEDS. Implementation of the goals identified in this plan is significant to the economic future of the SWGRC District.

Policies, issues and opportunities, and Short-Term Work Program implementation strategies located in the current Comprehensive Plans for each of our 14 county region were used extensively to develop the CEDS Goals and Objectives, Vital Projects and Problems and Opportunities.

Included below are goals and objectives from the CEDS which are aligned with the current economic development goals of Seminole County and the Cities of Donalsonville and Iron City:

**Goal: Encourage and increase regional collaboration among cities and counties.**

Objective: To increase the likelihood of large-scale economic development projects resulting in jobs and private investment.

**Goal: Expand existing industries.**

Objective: To increase the potential that existing industries will expand in the region.

**Goal: Improve infrastructure of water, sewer roads and technology.**

Objective: To increase the likelihood that businesses will be started or moved to the region.

**Goal: Support technical colleges within the region.**

Objective: To increase the level of education of the region's workforce.

**Goal: Increase tourism in the region.**

Objective: Increase the region's tax base and local government's ability to provide services and recreational opportunities.

**Goal: Recruit retirees.**

Objective: Support communities in the region and increase the tax base by recruiting retirees.

**Goal: Increase access to capital for small businesses in the region.**

Objective: To increase availability and likelihood to access low-interest financing for businesses creating jobs and making private investments.

**Goal: Create a diverse economy resistant to economic recession.**

Objective: To promote the development of diverse employment opportunities at various skill levels.

**Goal: Create and Promote agritourist activities and enterprises.**

Objective: To increase farm income and farm tourism.

#### *Seminole County and its municipalities according to the CEDS...*

Seminole County is located in the extreme southwest corner of Georgia, a short distance from Alabama and Florida. Seminole County was named for the Seminole Indians. It is located above one of the largest known aquifers in the world. The county seat is Donalsonville. According to census data, Seminole County lost 7 percent of its population from 2000 to 2010. Seminole County is known as the "Gateway to Lake Seminole," a large lake maintained by the Army Corps of Engineers where the Flint and Chattahoochee Rivers come together to form the Apalachicola River. Lake Seminole is recognized as one of the best bass fishing lakes in the country. Named twice as one of the top 100 small hospitals in the nation, Donalsonville Hospital is a state of the art medical facility with 12 doctors on staff. The Industrial Park has 18 acres available for prospective businesses. A few of the top employers include Donalsonville Hospital, JH Harvey Co., Lewis Carter Manufacturing and Three Notch Electric Membership. Seminole County has the opportunity to become a retirement community. Much of Seminole County has been deemed by the United States Department of Agriculture as prime farm land. Innovative uses of agriculture land and products could expand agricultural profitability. The county owns one of the very few self-supporting airports in Georgia. This facility is jet capable, has 5,000 of bituminous runway, aircraft tie downs, hangers, and a lighted runway.

Donalsonville is the county seat of Seminole county and has a population of 2,650. It was originally part of Decatur County and a prominent business man paved the way for the City's growth when he built the first lumber mill in Donalsonville. The Olive Theatre is in an old building downtown, which has been renovated and hosts the local talents and the murals present on a few of the downtown buildings depict the main industry in the county. The Harvest Festival, hosted in October, is a vast part of Donalsonville's culture and supports the local industry of agriculture. There are other attractions, including the Christmas Tour of Homes and the PRCA Rodeo, that are held in Donalsonville.

Iron City is a small town within the County and folk lore has it hast the name came about when a new well was being dug and hit a spot of iron ore. The citizens thought the discovery would bring great wealth to the people of the town and the economy was booming with new construction. Since that time the economy has declined with only a grocery store, gas station and hardware store. The major employer is Greene Poultry, which employs about 25 people and a local mechanic shop. The town is a small rural community that relies greatly on farming.

#### **Supplementary Economic Statistics/Data**

2020	\$75,896
<b>Per Capita Income</b>	
2015	\$15,472
2020	\$17,815
<b>Median Age</b>	
2010	38.5
2015	38.9
2020	40.5

**Data Note:** Household population includes persons not residing in group quarters. Average Household Size is the household population divided by total households. Persons in families include the householder and persons related to the householder by birth, marriage, or adoption. Per Capita Income represents the income received by all persons aged 15 years and over divided by the total population.

**Data Note:** Households with children include any households with people under age 18, related or not. Multigenerational households are families with 3 or more parent-child relationships. Unmarried partner households are usually classified as nonfamily households unless there is another member of the household related to the householder. Multigenerational and unmarried partner households are reported only to the tract level. Esri estimated block group data, which is used to estimate polygons or non-standard geography.

**Data Note:** Consumer spending shows the amount spent on a variety of goods and services by households that reside in the area. Expenditures are shown by broad budget categories that are not mutually exclusive. Consumer spending does not equal business revenue. Total and Average Amount Spent Per Household represent annual figures. The Spending Potential Index represents the amount spent in the area relative to a national average of 100.

**Source:** Consumer Spending data are derived from the 2011 and 2012 Consumer Expenditure Surveys, Bureau of Labor Statistics. Esri.

**Source:** U.S. Census Bureau, Census 2010 Summary File 1. Esri forecasts for 2015 and 2020. Esri converted Census 2000 data into 2010 geography.

## Tapestry Segmentation Explained

Tapestry segmentation provides an accurate, detailed description of America's neighborhoods—U.S. residential areas are divided into 67 distinctive segments based on their socioeconomic and demographic composition. The top three tapestry segments in Donalsonville are: Heartland Communities, Modest Income Homes and Prairie Living

# TRANSPORTATION

An integrated transportation system should contribute to a high quality of life for residents and a desirable climate for business. While the automobile is the dominant mode of transportation, the City of Donalsonville wants to provide a balanced and coordinated “multi-modal” transportation system to accommodate ongoing growth and development. Comprehensive improvements to all modes of travel can help improve the operation and capacity of the road system.

## Road Network

The City of Donalsonville is split by U.S. Hwy 84 and state highways 39 and 91. Donalsonville sees some fairly heavy traffic on both US Hwy 84 and Hwy 91. US Hwy 84 sees approximately 10,000 AADT while GA Hwy 91 sees approximately 7,000 AADT. Past traffic data show that US Hwy 84 has had a moderate decline in traffic while GA Hwy 91 has continued moderate increases. The continued increases in traffic along GA Hwy 91 can probably be attributed to the increased presence of residential development near Lake Seminole.

### GDOT Traffic Monitoring Locations

**Alternative Modes**

With regards to bicycling, Donalsonville has nothing in the way of bicycle lanes or paths. Donalsonville should consider working with both Seminole County and Iron City on coordinating their efforts to provide a well thought out network of Bicycle lanes and paths.

Seminole County is a member of the Southwest Georgia Regional Rural Transit System. Transit buses are available for all residents of Seminole County, Donalsonville and Iron City. The transit system provides transport to anywhere in the region for a fee based on mileage. Users must call to schedule a pickup by 3 pm the day before their scheduled trip. This service has proven to be very beneficial for

those that do not drive. Typically, elderly or those that do not have a license have utilized the service for daily life activities including grocery shopping and doctor's appointments in particular.

### **Parking**

The current level of service for parking is adequate for the rural nature of the City of Donalsonville.

### **Railroads**

Seminole County is serviced by the CSX rail line that runs parallel to U.S. Hwy 84 from Decatur County through Iron City and Donalsonville to the lower reaches of Early County and the City of Jakin. The rail line provides critical freight transport for a number of industries in Seminole County and the Cities of Iron City and Donalsonville.

## *LAND USE*

---

The Future Land Development Map is a required component for all communities that have zoning. It is intended to be an expression of the community's vision for the future, and a guide to its future development patterns citywide. It is based off of previous Future land use maps with updates added to fully meet the trends of development in Donalsonville and was refined with the help of the public during the public outreach portion of the plan's development. It is intended to be representation of the community's vision for the future. Below are descriptions of categories which are utilized on the Future Land Use Map.

### **Urban Low-Density Residential**

This residential category is intended to correspond primarily to existing urban neighborhoods but is also proposed for undeveloped areas adjacent to existing urban neighborhoods. Urban low-density means residential development ranging from approximately three to five (3-5) units per acre (i.e., lot sizes of approximately 3,630 square feet to 15,000 square feet). The primary housing type is detached, single-family residential, though other housing types such as duplexes and manufactured homes may be allowed by applicable zoning regulations under certain circumstances. This future land use category is implemented with one or more urban low-density residential zoning districts. Regulations may differ according to zoning district; for instance, manufactured homes may be permitted in one urban residential category but not in another. Furthermore, different lot sizes may be established as may be necessary.

### **Mixed Use**

This category corresponds to the city's central business district as well as some existing commercial areas targeted for mixed use redevelopment. Downtown Donalsonville consists of a concentration of region-serving and "Main Street" type commercial stores. It is also intended to provide a mixture of land uses in addition to commercial, including institutional, public, office, and housing mixed in with non-residential uses. This district is unique in that the existing development pattern consists of buildings covering very large percentages of the lot, little if any building setbacks from front, side, and rear property lines, and a reliance on on-street parking or shared parking lots. This district has higher

intensities of lot coverage and floor area than the other commercial land use categories. This area is intended to be implemented with a C-1 zoning district.

### **Highway Commercial**

This category is for land dedicated to non-industrial business uses, including retail sales, services, and entertainment facilities. Commercial uses may be located as a single use in one building or grouped together in a shopping center.

As one of two sub-classifications of commercial land use, highway commercial areas are intended to provide suitable areas for those business and commercial uses which primarily serve the public traveling by automobile and which benefit from direct access to highways. Such districts are generally designed so that the automobile has precedence over the pedestrian. This area is intended to be implemented with one or more commercial zoning districts.

### **Industrial**

This category corresponds to industrial operations which may or may not be objectionable due to the emission of noise, vibration, smoke, dust, gas, fumes, odors, or radiation and that may create fire or explosion hazards or other objectionable conditions. Uses within this district may require substantial quantities of water for manufacturing operations and may require rail, air, or water transportation.

# ADOPTION RESOLUTION

---

## RESOLUTION 09-05-17

### A RESOLUTION TO ADOPT THE SEMINOLE COUNTY COMPREHENSIVE PLAN

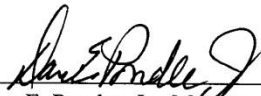

**WHEREAS**, the City Council of Donalsonville, Georgia found it necessary to update their joint comprehensive plan as part of the requirements to maintain its Qualified Local Government Status;

**WHEREAS**, the City Council held public meetings and hearings to allow private citizens to review the Comprehensive Plan and gathered citizens input;

**WHEREAS**, in the development of the comprehensive plan, the City of Donalsonville examined, evaluated, and where applicable, incorporated considerations of both the Flint River Basin Regional Water Development and Conservation Plan and the Environmental Planning Criteria pursuant to O.C.G.A. 12-2-8, and;

**THEREFORE, BE IT RESOLVED** by the City Council of Donalsonville, Georgia that the Comprehensive Plan shall be adopted, hereby certifying that adequate citizen participation requirements have been met.

Adopted on the 5<sup>th</sup> day of September 2017.

**Data Note:** Household population includes persons not residing in group quarters. Average Household Size is the household population divided by total households. Persons in families include the householder and persons related to the householder by birth, marriage, or adoption. Per Capita Income represents the income received by all persons aged 15 years and over divided by the total population.

**Data Note:** Households with children include any households with people under age 18, related or not. Multigenerational households are families with 3 or more parent-child relationships. Unmarried partner households are usually classified as nonfamily households unless there is another member of the household related to the householder. Multigenerational and unmarried partner households are reported only to the tract level. Esri estimated block group data, which is used to estimate polygons or non-standard geography.

## *STRENGTHS, WEAKNESSES, OPPORTUNITIES, THREATS (SWOT)*

---

### **Strengths**

- Small Size
- Amenities/parks
- Social Events
- Active ladies group
- Good emergency services
- Reasonable utility bill rates
- Ample supply of churches
- Railroad access
- Town feels like a big family
- Park w/gazebos

### **Opportunities**

- Highway access
- Proximity to other larger towns
- A yearning to get better
- Close access to nearby medical facilities

### **Weaknesses**

- Infrastructure insufficient for growth
- Drainage problems
- Lack of a sewer system
- Lack of commercial development
- We need to clean up our town (property maintenance)
- Lack of housing variety

### **Threats**

- Georgia Agricultural Tax Exemption Cards (lower SLOST money for town)

## NEEDS AND OPPORTUNITIES

---

The list of needs and opportunities represent both the major problems facing Seminole County and potential strategies for improving on those problems. The list was developed from the identified strengths, weaknesses, opportunities and threats that face the Town of Iron City.

- Our infrastructure is old and needs constant maintenance and our capacity is not sufficient for new development
- We need a sewer system to spur economic development as we have very little commercial/industrial development
- We need to increase the variety of housing available in our town
- We need to clean up our town and enforce our city ordinances
- We have good access to a major highway but we lack commercial development
- GATE cards are killing our SPLOST funding and we need to find ways to make up for that loss of revenue.

## GOALS AND POLICIES

---

### **GOAL: Economic Development and Prosperity**

*Encourage development or expansion of businesses and industries that are suitable for the community. Factors to consider when determining suitability include job skills required; long-term sustainability; linkages to other economic activities in the region; impact on the resources of the area; or prospects for creating job opportunities that meet the needs of a diverse local workforce.*

#### **Policies:**

- We want development whose design, landscaping, lighting, signage, and scale add value to our community.
- We will support programs for retention, expansion and creation of businesses that are a good fit for our community's economy in terms of job skill requirements and linkages to existing businesses.

### **GOAL: Local Preparedness**

*Identify and put in place the prerequisites for the type of future the community seeks to achieve. These prerequisites might include infrastructure (roads, water, sewer) to support or direct new growth; ordinances and regulations to manage growth as desired; leadership and staff capable of responding to opportunities and managing new challenges; or undertaking an all-hazards approach to disaster preparedness and response.*

#### **Policies:**

- We will concentrate on fixing our existing infrastructure (water system and streets) before expanding to ensure a good quality of life for our residents.

**GOAL: Sense of Place**

*Protect and enhance the community's unique qualities. This may be achieved by maintaining the downtown as focal point of the community; fostering compact, walkable, mixed-use development; protecting and revitalizing historic areas of the community; encouraging new development that is compatible with the traditional features of the community; or protecting scenic and natural features that are important to defining the community's character.*

**Policies:**

- We will encourage the development of downtown as a vibrant center of the community in order to improve overall attractiveness and local quality of life.

**GOAL: Housing Options**

*Promote an adequate range of safe, affordable, inclusive, and resource efficient housing in the community. This may be achieved by encouraging development of a variety of housing types, sizes, costs, and densities in each neighborhood; instituting programs to provide housing for residents of all socio-economic backgrounds; or coordinating with local economic development programs to ensure availability of adequate workforce housing in the community.*

**Policies:**

- We will eliminate substandard or dilapidated housing in our community.

## *ECONOMIC DEVELOPMENT*

---

The Comprehensive Economic Development Strategy (CEDS) as developed by the Southwest Georgia Regional Commission under a grant from the US Department of Commerce Economic Development Administration is hereby incorporated by reference into this Comprehensive Plan to serve as the Economic Development Element for Seminole County and the Cities of Donalsonville and Iron City.

The Southwest Georgia Regional Commission's (SWGRC) Comprehensive Economic Development Strategy (CEDS) was designed to bring together the public and private sectors in the creation of an economic roadmap to diversify and strengthen the regional economy. The SWGRC CEDS analyzed the regional economy and serves as a guide for establishing regional goals and objectives, a regional plan of action, and the investment priorities and funding sources.

As a performance-based plan, this CEDS plays a critical role in adapting to global economic conditions by fully utilizing the region's unique advantages to maximize economic opportunity for its residents by attracting the private investment that creates jobs. The SWGRC CEDS is a regionally owned strategy that is the result of a continuing economic development planning process developed with regional public and private sector participation. This plan sets forth the goals and objectives necessary to solve the economic development problems of the Southwest Georgia region and clearly defines the measures of success.

The Southwest Georgia CEDS gives an overview of the region briefly describing geography, population, economy, labor, and workforce development and use, education, transportation access, environment, and regional resources. It reviews the state of the Regional Economy and provides a list of achievable Goals and Objectives for the region, a Plan of Action to ensure success, and Performance Measures used to evaluate the Southwest Georgia Regional Commission's successful development and implementation of the 2012-2017 CEDS. Implementation of the goals identified in this plan is significant to the economic future of the SWGRC District.

Policies, issues and opportunities, and Short-Term Work Program implementation strategies located in the current Comprehensive Plans for each of our 14 county region were used extensively to develop the CEDS Goals and Objectives, Vital Projects and Problems and Opportunities.

Included below are goals and objectives from the CEDS which are aligned with the current economic development goals of Seminole County and the Cities of Donalsonville and Iron City:

**Goal: Encourage and increase regional collaboration among cities and counties.**

Objective: To increase the likelihood of large-scale economic development projects resulting in jobs and private investment.

**Goal: Expand existing industries.**

Objective: To increase the potential that existing industries will expand in the region.

**Goal: Improve infrastructure of water, sewer roads and technology.**

Objective: To increase the likelihood that businesses will be started or moved to the region.

**Goal: Support technical colleges within the region.**

Objective: To increase the level of education of the region's workforce.

**Goal: Increase tourism in the region.**

Objective: Increase the region's tax base and local government's ability to provide services and recreational opportunities.

**Goal: Recruit retirees.**

Objective: Support communities in the region and increase the tax base by recruiting retirees.

**Goal: Increase access to capital for small businesses in the region.**

Objective: To increase availability and likelihood to access low-interest financing for businesses creating jobs and making private investments.

**Goal: Create a diverse economy resistant to economic recession.**

Objective: To promote the development of diverse employment opportunities at various skill levels.

**Goal: Create and Promote agritourist activities and enterprises.**

Objective: To increase farm income and farm tourism.

*Seminole County and its municipalities according to the CEDS...*

Seminole County is located in the extreme southwest corner of Georgia, a short distance from Alabama and Florida. Seminole County was named for the Seminole Indians. It is located above one of the largest known aquifers in the world. The county seat is Donalsonville. According to census data, Seminole County lost 7 percent of its population from 2000 to 2010. Seminole County is known as the "Gateway to Lake Seminole," a large lake maintained by the Army Corps of Engineers where the Flint and Chattahoochee Rivers come together to form the Apalachicola River. Lake Seminole is recognized as one of the best bass fishing lakes in the country. Named twice as one of the top 100 small hospitals in the nation, Donalsonville Hospital is a state of the art medical facility with 12 doctors on staff. The Industrial Park has 18 acres available for prospective businesses. A few of the top employers include Donalsonville Hospital, JH Harvey Co., Lewis Carter Manufacturing and Three Notch Electric Membership. Seminole County has the opportunity to become a retirement community. Much of Seminole County has been deemed by the United States Department of Agriculture as prime farm land. Innovative uses of agriculture land and products could expand agricultural profitability. The county owns one of the very few self-supporting airports in Georgia. This facility is jet capable, has 5,000 of bituminous runway, aircraft tie downs, hangers, and a lighted runway.

Donalsonville is the county seat of Seminole county and has a population of 2,650. It was originally part of Decatur County and a prominent business man paved the way for the City's growth when he built the first lumber mill in Donalsonville. The Olive Theatre is in an old building downtown, which has been renovated and hosts the local talents and the murals present on a few of the downtown buildings depict the main industry in the county. The Harvest Festival, hosted in October, is a vast part of Donalsonville's culture and supports the local industry of agriculture. There are other attractions, including the Christmas Tour of Homes and the PRCA Rodeo, that are held in Donalsonville.

Iron City is a small town within the County and folk lore has it hast the name came about when a new well was being dug and hit a spot of iron ore. The citizens thought the discovery would bring great wealth to the people of the town and the economy was booming with new construction. Since that time the economy has declined with only a grocery store, gas station and hardware store. The major employer is Greene Poultry, which employs about 25 people and a local mechanic shop. The town is a small rural community that relies greatly on farming.

**Data Note:** Households with children include any households with people under age 18, related or not. Multigenerational households are families with 3 or more parent-child relationships. Unmarried partner households are usually classified as nonfamily households unless there is another member of the household related to the householder. Multigenerational and unmarried partner households are reported only to the tract level. Esri estimated block group data, which is used to estimate polygons or non-standard geography.

**Data Note:** Consumer spending shows the amount spent on a variety of goods and services by households that reside in the area. Expenditures are shown by broad budget categories that are not mutually exclusive. Consumer spending does not equal business revenue. Total and Average Amount Spent Per Household represent annual figures. The Spending Potential Index represents the amount spent in the area relative to a national average of 100.

**Source:** Consumer Spending data are derived from the 2011 and 2012 Consumer Expenditure Surveys, Bureau of Labor Statistics. Esri.

**Source:** U.S. Census Bureau, Census 2010 Summary File 1. Esri forecasts for 2015 and 2020. Esri converted Census 2000 data into 2010 geography.

## Tapestry Segmentation Explained

Tapestry segmentation provides an accurate, detailed description of America's neighborhoods—U.S. residential areas are divided into 67 distinctive segments based on their socioeconomic and demographic composition. The top three tapestry segments in Iron City are: Rural Bypasses, Top Tier and Professional Pride.

# TRANSPORTATION

An integrated transportation system should contribute to a high quality of life for residents and a desirable climate for business. While the automobile is the dominant mode of transportation, the Town of Iron City wants to provide a balanced and coordinated “multi-modal” transportation system to accommodate ongoing growth and development. Comprehensive improvements to all modes of travel can help improve the operation and capacity of the road system.

## Road Network

Iron City lies at the intersection of U.S. Hwy 84 and Georgia Highway 45. Iron City sees some fairly light traffic around town, but traffic on US Hwy 84 has fluctuating AADT count of approximately 5,000-8,000. GA Hwy 45 sees approximately 7,000 AADT. Past traffic data show that both US Hwy 84 and GA Hwy 45 have had moderate declines in traffic overall but US Hwy 84, as mentioned before, continues to be fluctuating.

**GDOT Traffic Monitoring Locations**

2005	790						

**Alternative Modes**

With regards to bicycling, Iron City has nothing in the way of bicycle lanes or paths. They do however have a number of quiet streets that can be considered quite safe for riding bicycles or even walking. Iron City should consider working with both Seminole County and Donalsonville on coordinating their efforts to provide a well thought out network of bicycle lanes and paths.

Seminole County is a member of the Southwest Georgia Regional Rural Transit System. Transit buses are available for all residents of Seminole County, Donalsonville and Iron City. The transit system provides transport to anywhere in the region for a fee based on mileage. Users must call to schedule a

pickup by 3 pm the day before their scheduled trip. This service has proven to be very beneficial for those that do not drive. Typically, elderly or those that do not have a license have utilized the service for daily life activities including grocery shopping and doctor's appointments in particular.

### **Parking**

The current level of service for parking is adequate for the rural nature of Iron City.

### **Railroads**

Seminole County is serviced by the CSX rail line that runs parallel to U.S. Hwy 84 from Decatur County through Iron City and Donalsonville to the lower reaches of Early County and the City of Jakin. The rail line provides critical freight transport for a number of industries in Seminole County and the Cities of Iron City and Donalsonville.

## *LAND USE*

---

The Future Land Development Map is a required component for all communities that have zoning. It is intended to be an expression of the community's vision for the future, and a guide to its future development patterns citywide. It is based off of previous Future land use maps with updates added to fully meet the trends of development in Iron City and was refined with the help of the public during the public outreach portion of the plan's development. It is intended to be representation of the community's vision for the future. Below are descriptions of categories which are utilized on the Future Land Use Map.

### **Agriculture**

The rural and agricultural character area designation in Seminole County is intended for those areas outside of the urban service areas which are associated with agricultural farm operations and associated activities, forestry, natural resource conservation, groundwater recharge areas, and low-density residential development accessory to agricultural or farm operation of varying sizes.

### **Urban Low-Density Residential**

This residential category is intended to correspond primarily to existing urban neighborhoods but is also proposed for undeveloped areas adjacent to existing urban neighborhoods. Urban low-density means residential development ranging from approximately three to five (3-5) units per acre (i.e., lot sizes of approximately 3,630 square feet to 15,000 square feet). The primary housing type is detached, single-family residential, though other housing types such as duplexes and manufactured homes may be allowed by applicable zoning regulations under certain circumstances. This future land use category is implemented with one or more urban low-density residential zoning districts. Regulations may differ according to zoning district; for instance, manufactured homes may be permitted in one urban residential category but not in another. Furthermore, different lot sizes may be established as may be necessary.

### **Mixed Use**

This category corresponds to the city's central business district. It is also intended to provide a mixture of land uses in addition to commercial, including institutional, public, office, and housing mixed in with non-residential uses. This district is unique in that the existing development pattern consists of buildings covering very large percentages of the lot, little if any building setbacks from front, side, and rear property lines, and a reliance on on-street parking or shared parking lots. This district has higher intensities of lot coverage and floor area than the other commercial land use categories. This area is intended to be implemented with a CBD zoning district.

### **Highway Commercial**

This category is for land dedicated to non-industrial business uses, including retail sales, services, and entertainment facilities. Commercial uses may be located as a single use in one building or grouped together in a shopping center.

As one of two sub-classifications of commercial land use, highway commercial areas are intended to provide suitable areas for those business and commercial uses which primarily serve the public traveling by automobile and which benefit from direct access to highways. Such districts are generally designed so that the automobile has precedence over the pedestrian. This area is intended to be implemented with one or more commercial zoning districts.

### **Industrial**

This category corresponds to industrial operations which may or may not be objectionable due to the emission of noise, vibration, smoke, dust, gas, fumes, odors, or radiation and that may create fire or explosion hazards or other objectionable conditions. Uses within this district may require substantial quantities of water for manufacturing operations and may require rail, air, or water transportation.

# ADOPTION RESOLUTION

---

## A RESOLUTION TO ADOPT THE SEMINOLE COUNTY COMPREHENSIVE PLAN

**WHEREAS**, the City Council of Iron City, Georgia found it necessary to update their joint comprehensive plan as part of the requirements to maintain its Qualified Local Government Status;

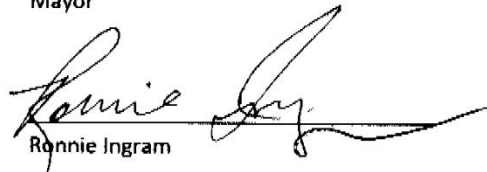

**WHEREAS**, the City Council held public meetings and hearings to allow private citizens to review the Comprehensive Plan and gathered citizens input;

**WHEREAS**, in the development of the comprehensive plan, the City of Iron City examined, evaluated, and where applicable, incorporated considerations of both the Flint River Basin Regional Water Development and Conservation Plan and the Environmental Planning Criteria pursuant to O.C.G.A. 12-2-8, and;

**THEREFORE, BE IT RESOLVED** by the City Council of Iron City, Georgia that the Comprehensive Plan shall be adopted, hereby certifying that adequate citizen participation requirements have been met.

Adopted on the 14<sup>th</sup> day of August 2017.

Mayor

  
Ronnie Ingram

Witness

  
Sara McCalvin, City Clerk

## Public Hearing Notice

Seminole County and the Cities of Donalsonville and Iron City are conducting Public Hearings to begin the Seminole County Comprehensive Plan. The public hearings are scheduled as follows:

**October 27th, 2015 at 5:00 p.m.**

Donalsonville City Hall – 127 East 2nd St. – Donalsonville, GA 39845

**October 27th, 2015 at 6:00 p.m.**

Seminole County Courthouse – 200 S. Knox Ave.  
Donalsonville, GA 39845

**October 27th, 2015 at 7:00 p.m.**

Iron City City Hall – 115 Church St. – Iron City, GA 39859

The current plan will expire on October 31, 2017. In accordance with the Georgia Minimum Standards and Procedures for Local Comprehensive Planning (Chapter 110-12-1), each community must conduct a public hearing prior to the start of the planning process.

The purpose of this hearing is to brief the community on the process to be used to develop the plan, opportunities for public participation in development of the plan, and to obtain input on the proposed planning process. Once public comments have been addressed, the community may begin the process of developing the plan.

Copies of the current Comprehensive Plan are available for viewing at Seminole County Board of Commissioners offices and the City Halls of Donalsonville and Iron City

Questions should be directed to:  
Donalsonville – Darrell Hampton – (229) 524-2118  
Seminole County – Paula George – (229) 524-2878

## Be a part of the planning of your city's future

The City is in the process of updating its comprehensive plan. In doing so we will be holding two (2) public input meetings.

**These meetings are set for Today, January 7th and January 21st at 6:00 p.m. in City Hall.**

Steve O'Neil, planner with the Georgia Regional Commission will be facilitating these meetings.

The purpose of these meetings is to encourage citizen's input as to the needs of the city and to address items of interest or concern.

Questions should be directed to O'Neil by calling 229-522-3552 ext. 1616

## Help shape the future of your community

**Meeting dates and times for the City of Donalsonville and Seminole County are listed on page 4 in this edition**

The Southwest Georgia Regional Commission (RC) is working with several communities on the update of the Comprehensive Plan. The RC is currently working with Seminole, Baker, Calhoun, Decatur, Dougherty, Early, Grady, Miller and Mitchell counties and cities. The comprehensive plan is the roadmap for a community's future and allows communities to plan for the next 20 years. The meetings have already started in most communities and everyone has the opportunity to help create this vision for the future.

Communities get the opportunity to identify and prioritize

issues and opportunities and develop goals and strategies to make the plan a reality. Comprehensive plans typically include maps, charts and text that analyze existing trends and conditions of growth and make recommendations for the general development of the community.

The plan gives a community direction on how to guide quality growth and development and develop strategies to improve transportation, utilities, land use, recreation and housing. The comprehensive plan is considered a vital tool in aiding growth and development and progress according to the Georgia Department of Community Affairs (DCA).

All local governments in Georgia are required to submit comprehensive plans to DCA every ten years. See PARTICIPATE on Page 3

location is 426 North Friendship Avenue, across from Friendship Cemetery. Contact information: Cindy Meadows, Acting CEC 524-2326 or email cindym@uga.edu.

## Help shape the future

PARTICIPATE from Page 1 years. Right now communities need your input. The plans are just beginning and residents are asked to share their concerns about the community and what they would like to see happen in the next 20 years.

"Planning allows communities to use their dollars more effectively and reduces duplication," says Steve O'Neil, planner with the Southwest Georgia Regional Commission.

The plan creates an environment of predictability for local governments, businesses, tax payers and the

general public.

If you have been unable to attend meetings, please go to the following website ([www.swgrc.org](http://www.swgrc.org)) and click on "Planning" then "Comprehensive Plans" then click on green check mark to take the survey. You can also go to this site to keep up with the process as it unfolds.

For information and updates on the Comprehensive Plans go to: <http://www.swgrc.org> or contact Kimberly Brooks, Steve O'Neil or Barbara Reddick at (229) 522-3552 or email: [kbrooks@swgrc.org](mailto:kbrooks@swgrc.org); [soneil@swgrc.org](mailto:soneil@swgrc.org); [breddick@swgrc.org](mailto:breddick@swgrc.org)

229-524-2878 office 229-524-8984 fax

## Public Hearing Notice

The Seminole County Board of Commissioners along with the city council of Donalsonville and Iron City are conducting a Public Hearing to present a draft of the Seminole County Comprehensive Plan on Tuesday, June 20, 2017 at 6:00 p.m. The meeting will be held in the Superior Courtroom located at the Seminole County Courthouse.

The current plan will expire on October 31, 2017. In accordance with the Georgia Minimum Standards and Procedures for Local Comprehensive Planning (Chapter 110-12-1), each community must conduct a public hearing once the plan has been drafted and made available for public review, but prior to transmittal to the Regional Commission for review.

The purpose of this hearing is to brief the community on the contents of the plan, provide an opportunity for residents to make final suggestions, additions or revisions, and notify the community of when the plan will be submitted to the Regional Commission for review.

Copies of the draft Comprehensive Plan are available for viewing and/or downloading at <http://www.swgrcplanning.org/seminole-county-2017.html>. Copies can be obtained during regular business hours at Donalsonville City Hall, Iron City City Hall, or the Board of Commissioners' office at the Courthouse.

Questions can be directed to the Seminole County Board of Commissioners at 229-524-2878, [countymanager@seminolecountyga.com](mailto:countymanager@seminolecountyga.com), or, alternatively call Steve O'Neil, Southwest Georgia Regional Commission, 229-522-3552 ext.1616.
