Appendix (Community Participation, Transportation Plan/Element)

INTRODUCTION

This plan update was completed in accordance with the Georgia Planning Act of 1989 and the Georgia Department of Community Affairs Minimum Standards and Procedures for Local Comprehensive Planning.

Sharpsburg, Georgia, is a small rural incorporated village located in the east-central portion of Coweta County, which is in the west-central section of the Georgia Piedmont. The town is some six highway miles from the Coweta County boundary with Fayette County long Line Creek to the north and east.

Purpose of the plan

The Town of Sharpsburg Comprehensive Plan shall provide guidance and policy standards for future growth and development. The plan also identifies needs and opportunities which currently exist within the community. Goals, polices, and specific implementation measures are also listed to set policy for particular segments and specific areas of the town. At the time of the plan update, the members of the Sharpsburg Town Council were:

Town Council

Wendell L. Staley, *Mayor* Standly D. Parten, *Mayor Pro-Tem* J. Clay Cole, *Councilmember* Polly A. Garlington, *Councilmember* D. Keith Rhodes, *Councilmember*

Comprehensive Plan Steering Committee and Public Participation

The Town of Sharpsburg Council appointed a Comprehensive Plan Steering Committee to assist and guide the update of the comprehensive plan. A series of consecutive meetings took place to address the components of the plan update. The Steering Committee included members of the town council, town government and other community stakeholders. The members of the committee were:

> Wendell Staley, Mayor Donna Camp, Town Clerk Dennis Drewyer, Land Use Planner Tim Ridley, Business Owner Katie Cole, Sharpsburg Resident Larry Hyde, Sharpsburg Resident Bobby Vaillancourt, Sharpsburg Resident Tony Crunkleton, Turin Resident

Keith Rhodes, Councilman

As part of the public participation component, a community survey was developed and distributed to gather input from the greater public. A community open house was also held during the plan development process in March, 2016. Two public hearings were held in regards to the comprehensive plan update process in which citizens could obtain information about the planning process, review, and comment on the plan. The public hearings were held November 9, 2015 and August 1, 2016. Citizen participation materials are included in the Appendix.

COMMUNITY GOALS AND POLICIES

The purpose of the Community Goals and Policies section is to guide and direct the Town of Sharpsburg's decision making process for the future of the community.

VISION STATEMENT

The Town of Sharpsburg is a small town with big ideas. Through sound planning and leadership, Sharpsburg will provide an environment for economic growth while maintaining the small town feel. The Town of Sharpsburg and its citizens will do their best to provide a safe, pleasant living and working community that is realistic given the town's resources and capabilities.

COMMUNITY GOALS

Economic Prosperity:

Encourage development of local goods and services. Factors to consider when determining suitability include impact on the resources of the area; or prospects for creating job opportunities that meet the needs of the community.

Resource Management:

Promote the efficient use of natural resources and identify and protect environmentally sensitive areas of the community. This may be achieved by promoting energy efficiency and renewable energy generation; encouraging green building construction and renovation; utilizing appropriate waste management techniques; fostering water conservation and reuse; or setting environmentally sensitive areas aside as green space or conservation reserves as delegated through the zoning ordinance.

Efficient Land Use:

Maximize the use of existing infrastructure and minimize the costly conversion of undeveloped land at the periphery of the community. This may be achieved by encouraging development or redevelopment of sites closer to the traditional core of the community; designing new development to minimize the amount of land consumed; carefully planning expansion of public infrastructure; or maintaining open space in agriculture, forestry or conservation uses.

Local Preparedness:

Identify and put in place the prerequisites for the type of future the community seeks to achieve. These prerequisites might include infrastructure (roads, water, and sewer) to support or direct new growth; ordinances and regulations to manage growth as desired in cooperation with the County and neighboring local governments.

Sense of Place:

Protect and enhance the community's unique qualities. This may be achieved by maintaining the downtown as focal point of the community; protecting and revitalizing historic areas of the community; encouraging new development that is compatible with the traditional features of the community; or protecting scenic and natural features that are important to defining the community's character.

Regional Cooperation:

Cooperate with neighboring jurisdictions and state authorities to address shared needs. This may be achieved by actively participating in regional organizations; identifying joint projects that will result in greater efficiency and less cost to the taxpayer; or developing collaborative solutions for regional issues such as protection of shared natural resources, development of the transportation network, or creation of a tourism plan.

Housing Options:

Promote an adequate range of safe, affordable, inclusive, and resource efficient housing in the community. This may be achieved through the zoning ordinance and long range planning.

Transportation Options:

Address the transportation needs, challenges and opportunities of all community residents. This may be achieved through fostering alternatives to transportation by automobile, including walking and cycling; employing traffic calming measures throughout the community; requiring connectivity between adjoining developments; or coordinating transportation and land use decision-making within the community.

Educational Opportunities:

Make educational and training opportunities readily available to enable all community residents to improve their job skills, adapt to technological advances, or pursue life ambitions. This can be achieved by offering classes at the Town Hall.

Community Health:

Ensure that all community residents, regardless of age, ability, or income, have access to critical goods and services, safe and clean neighborhoods, and good work opportunities. This may be achieved through enforcing the zoning ordinance and offering workshops at Town Hall.

COMMUNITY POLICIES

Development Patterns

-Our decisions on new development will contribute to, not take away from, our planned community's character and sense of place.

-Encourage development that is sensitive to the historic context, sense of place, and overall setting of the community.

-Development whose design, landscaping, lighting, signage, and scale add value to our community.

-Our gateways and corridors will create a "sense of place" for our community.

-Encourage the development of downtown as a vibrant center of the community in order to improve overall attractiveness and local quality of life.

-Committed to creating walkable, safe, and attractive neighborhoods throughout the community, where people have easy access to schools, parks, and necessary services (grocery store, drug store) without having to travel by car.

-Creation of recreational facilities and set-aside of greenspace are important to our community.

-Committed to providing pleasant, accessible public gathering places and parks throughout the community.

-Support appropriate residential and non-residential in-fill development and redevelopment in ways that complement surrounding areas.

-Committed to redeveloping and enhancing existing commercial and industrial areas within our community as well as quality new developments.

-Encourage mixed-use developments that are human-scale and less auto-oriented.

-Support increases in residential density in areas where community design standards, environmental constraints and available infrastructure capacities can satisfactorily accommodate the increased density.

-Support new land uses that contribute to protecting the environment and preserving meaningful open space.

-Support new land uses that enhance housing options in our community.

-Encourage development of a rational network of commercial nodes (villages, or activity centers) to meet the service needs of citizens while avoiding unattractive and inefficient strip development along major roadways.

-Open to land planning and development concepts that may be new to our area but have been tried successfully in other places.

-Make decisions that encourage walking, biking, car-pooling, and other alternative transportation choices.

-Target transportation improvements to support desired development patterns for the community (recognizing that ready availability of transportation creates demand for land development in adjacent areas).

-Our new and reconstructed roadways will be appropriately designed, using context sensitive design considerations, to enhance community aesthetics and to minimize environmental impacts.

-Our new and reconstructed roadways will be designed to accommodate multiple functions, including pedestrian facilities, parking, bicycle routes, as well as local vehicular circulation.

-Promote connectivity of our road network (such as fostering a grid network of streets, multiple connections between subdivisions).

-Support creation of a community-wide pedestrian/bike path network.

-Encourage new development that supports and ties in well with planned public transit options in the community.

-Ensure (through traffic calming and other design considerations) that excessive vehicular traffic will not harm the peaceful nature of our residential neighborhoods.

Resource Conservation

-The protection and conservation of our community's resources will play an important role in the decision-making process when making decisions about future growth and development.

-Minimize inefficient land consumption and encourage more compact urban development in order to preserve green open space and natural resource areas.

-Encourage new development to locate in suitable locations in order to protect natural resources, environmentally sensitive areas, or valuable historic, archaeological or cultural resources from encroachment.

-Factor potential impacts on air and water quality in making decisions on new developments and transportation improvements.

-Infrastructure networks will be developed to steer new development away from sensitive natural resource areas.

-Promote the protection and maintenance of trees and green open space in all new development.

-Endorse low impact development that preserves the natural topography and existing vegetation of development sites.

-Encourage enhanced solid waste reduction and recycling initiatives.

-Ensure safe and adequate supplies of water through protection of ground and surface water sources.

Community Facilities and Infrastructure

-Our community will make efficient use of existing infrastructure and public facilities in order to minimize the need for costly new/expanded facilities and services.

-Protect existing infrastructure investments (i.e., already paid for) by encouraging infill redevelopment, and compact development patterns.

-Ensure that new development does not cause a decline in existing levels of service for the community's residents and employers.

-Limit development within our community to areas that can be reasonably served by public infrastructure.

-Ensure that capital improvements needed to accommodate future development are provided concurrent with new development.

-Coordinate provision of public facilities and services with land use planning to promote more compact urban development.

-Use planned infrastructure expansion to support development in areas identified (in the comprehensive plan) as suitable for such development.

-Seek ways for new growth to pay for itself (in terms of public investment in infrastructure and services to support the development) to the maximum extent possible.

-Use sequential, phased extension of utilities and services to encourage rational expansion of development to areas immediately contiguous to already developed areas of the community.

-Invest in parks and open space to enhance the quality of life for our citizens.

Social and Economic Development

-Support programs for retention, expansion and creation of businesses that are a good fit for our community's economy in terms of job skill requirements and linkages to existing businesses.

-Seek to balance the supply of housing and employment in our community and consider their location in relation to each other.

-Access to housing and impacts on transportation when considering economic development projects.

-Impacts on infrastructure and natural resources in our decision making on economic development projects.

-Consider the employment needs and skill levels of our existing population in making decisions on proposed economic development projects

-Consider costs as well as benefits in making decisions on proposed economic development projects.

-Eliminate substandard or dilapidated housing in our community.

-Stimulate infill housing development in existing neighborhoods.

-Accommodate our diverse population by encouraging a compatible mixture of housing types, densities and costs in each neighborhood.

-Encourage housing policies, choices and patterns that move people upward on the housing ladder from dependence to independence (home-ownership).

Governmental Relations

-Seek opportunities to share services and facilities with neighboring jurisdictions when mutually beneficial.

-Work jointly with neighboring jurisdictions on developing solutions for shared regional issues (such as growth management, watershed protection)

-Pursue joint processes for collaborative planning and decision-making with neighboring jurisdictions

-Consult other public entities in our area when making decisions that are likely to impact them.

-Provide input to other public entities in our area when they are making decision that are likely to have an impact on our community or our plans for future development.

NEEDS AND OPPORTUNITIES

The Needs and Opportunities section addresses what the Town of Sharpsburg currently lacks or sectors of the Town where improvements are needed. This section also lists existing opportunities available which should be utilized.

To help gain a more accurate and balanced list of needs and opportunities, a SWOT (Strengths, Weaknesses, Opportunities, and Threats) analysis was conducted. The results of this exercise resulted in the following list of Needs and Opportunities for Sharpsburg.

Economic Development

- Improve our public facility capacity in order to attract new development.
- Promote tourism in our community, building off our history of the community as well as promoting nearby recreational opportunities.
- Promote revitalization of our downtown with cooperation of business owners.
- Create more jobs or economic opportunities in our community.
- Develop a strategy for appropriate economic development of our community.

Development Patterns

- Develop and promote tourism opportunities in our community.
- Avoid sprawl.
- Improve the appearance of parts of our community.
- Encourage development of vacant sites or abandoned structures in our community.

Mobility

- Provide more bike paths and trails.
- Promote existing public transportation.
- Encourage more sidewalks and pedestrian facilities.
- Size our streets (width, etc.) to better fit neighborhood needs.

Community

- Increase the amount of greenspace in our community.
- Improve the curb-appeal of some commercial and residential areas.
- Discourage visual clutter (such as excessive signage) along roadways.
- Improve our sign ordinance.
- Increase the mix of housing (by size, type, and price range) in our city.
- Provide more protection of historic resources.

Conservation

- We'd like to manage our storm water run-off and drainage.
- We'd like to preserve our rural scenery.
- We'd like to better protect our natural resources.
- We'd like to protect our trees, particularly where new development takes place.
- We'd like to encourage development to locate in areas most suitable for new growth.
- We'd like to ensure our community has enough water now and in the future.

Livability

- Continue to support and promote the Sharpsburg Library for patrons in the area.
- Add parking at busy activity centers.
- More affordable housing in our community.
- Provide more community gathering spaces, like parks.
- Increase mix of uses (like corner groceries or drugstores) in certain neighborhoods.

Governance

- Coordinate with Coweta County and neighboring jurisdictions on shared needs.
- Help addressing neighborhood opposition to new developments.

CHARACTER AREAS AND LAND USE

Character areas are geographic sub-areas of a community which contain unique characteristics and physical form. According to the Department of Community Affairs, Character areas have unique or special characteristics, have potential to evolve into a unique area when provided specific and intentional guidance, or require special attention due to unique development issues. Character areas may be identified by the types of development found there which vary from historic downtowns, commercial/industrial areas, or residential neighborhoods. Other character areas may lack development and include more natural features such as greenspace or parkland.

The following list identifies character areas found within the Town of Sharpsburg. Each character area listed contains a description and desired development patterns, recommended land uses, and a list of implementation measures. Current photos are also included which give an actual snap shot into each distinct character area.

HIGHWAY COMMERCIAL

Definition: Sharpsburg has a highway commercial area that is developing along two major highways that run through the Town. Currently the most thriving businesses are gas stations and dollar store along with small businesses. Most of this development occurred in the 1990's until current time. Development occurred in the classic sprawl type pattern.

Recommended development patterns: Sharpsburg recommends improvement of sidewalk and street appearance and amenities of commercial centers; and shared parking arrangements that reduce overall parking needs.

Specific land usage: Land dedicated to non-industrial business uses, including retail sales, office, service and entertainment facilities, organized into general categories of intensities.

Commercial uses may be located as a single use in one building or grouped together in a shopping center or office building.

Implementation measures: *Community Improvement District (CID)* - Self-taxing entity formed by property owners, businesses, institutions and/or citizens, within a specific geographic area. A CID can be formed to provide additional services, to make the area safer and more attractive, or for various other purposes; *Enterprise Zones*- Offers incentives such as tax exemptions or fee abatements to private businesses to reinvest and rehabilitate underdeveloped or declining areas.

Downtown

Definition: Sharpsburg's location along a railroad has made for a rich history. Many of the historic buildings remain in reasonable condition.

Recommended development patterns: Sharpsburg recommends site plans, building design and landscaping that are sensitive to natural features of the site, including topography and views.

Specific land usage: Land dedicated to homes, sites, buildings and structures greater than 50 years of age.

Implementation measures:

Georgia Historic Resource Survey- Collection and recording of information about extant historic buildings, including architectural descriptions, age, history, setting and location in the community.

Georgia Register of Historic Places Nomination- State's official listing of historic buildings, structures, sites, objects, and districts worthy of preservation. Designation offers eligibility for incentives for preservation and rehabilitation;

Consideration of a multi-use trail to connect historic downtown buildings, recreation facilities, library, and town hall.

NEIGHBORHOOD COMMERCIAL

Definition: Sharpsburg has a neighborhood commercial area that is located just adjacent to the historic downtown. Currently development consists of small businesses located in or adjacent to homes.

Recommended development patterns: Sharpsburg recommends improvement of sidewalk and street appearance and amenities of the area; and shared parking arrangements that reduce overall parking needs.

Specific land usage: Land dedicated to non-industrial business uses, including office and service uses. Commercial uses may be located as a single use in one building or grouped together in an office building.

Implementation measures: *Community Improvement District (CID)* - Self-taxing entity formed by property owners, businesses, institutions and/or citizens, within a specific geographic area. A CID can be formed to provide additional services, to make the area safer and more attractive, or for various other purposes.

TRADITIONAL NEIGHBORHOOD

Definition: Sharpsburg's residential area is one of the largest components of the city. Most homes were built prior to 2010.

Recommended development patterns: Sharpsburg recommends a distribution of affordablypriced homes throughout the town; new residential development that matches the mix of housing types and styles or older, closer-in neighborhoods or the community.

Specific land usage: Land designated for single-family and multi-family dwelling units organized into general categories of net densities according to the Sharpsburg zoning ordinance.

Implementation measures:

Housing for Low to Moderate-Income Households and Special Needs Populations -Affordable housing to meet the needs of persons with disabilities; quality, affordable rental units for large families (rental units with 3 or 4 bedrooms); affordable rental housing to serve the elderly population; or new single family units for moderate-income, first-time homebuyers.

TOWN OF SHARPSBURG

PUBLIC HEARING NOTICE FOR

2016-2036 COMPREHENSIVE PLAN UPDATE

The Town of Sharpsburg is initiating the process to begin a full update of its local comprehensive plan that was originally adopted in 2006. The full comprehensive plan update is required and will be prepared according to new rules promulgated by the Georgia Department of Community Affairs (DCA), which became effective on January 1, 2013.

The purpose of the public hearing is to brief the community on the process to be used to update the local comprehensive plan, opportunities for public participation in development of the plan update, and to obtain input on the proposed planning process. Those interested in learning about and participating in the plan update should attend the meeting.

Following this process will allow participating local governments to maintain their Qualified Local Governments (QLG) status, and therefore be eligible for state grant funds, state loans, and state permits.

This public hearing will be held at **Sharpsburg Town Hall**, **105 Main Street**, Sharpsburg, Georgia on **Monday November 9**, **2015 at 7:00 p.m**. The public is invited to attend and participate in this public hearing. **SPORTS**

OPEN Continued from page 6A

when he missed the green to the left, and failed to hole a par putt from 18 feet.

Everyone else felt like mere spectators,

Bill Haas, a seven-time winner on the PGA Tour who is rarely heard from at majors, was solid with a 69 and alone in third. It's his highest position ever in a major, yet he was six shots out of the lead. Another shot back was Andrew Johnston, the Englishman with a big belly and beard to match who goes by "Beef." He broke par for the third straight day with a 70.

It was unlikely to matter.

This was all about Stenson and Mickelson, two powerful players with different styles and different credentials.

"Unless someone goes out there and posts a silly number," Stenson said. "But as of now, I would pretty much think it's a battle of Phil and myself. "I know he never backs down and he's one of the best players to play the game. I'm just going to try my hardest to keep him behind."

Mickelson finished three shots ahead of Stenson three years ago at Muirfield when Lefty closed with a 66 in one of the best final

PHOTO BY FLICKR.COM

Phil Mickelson, pictured here in an earlier event, led after the first two rounds of The Open, but will start Sunday's final round one shot behind Henrik Stenson.

rounds of a major. He hasn't won another tournament since then, and at age 46, it appeared his time was running out.

Troon is where he first figured out the secret to links golf, and he has managed to avoid big numbers all week. He has made only four bogeys in 54 holes as he goes after a sixth major that would put him alongside than the 12th, where he

He also would be the trouble and was fortunate behind Julius Boros (48) and Morris, with whom Mickelson shares a birthday (June 16) 109 years apart. The 1861 Open was held in September.

Mickelson didn't swing as well as the first two days. His short game, as always, was magic.

No save was more unlikely Nick Faldo and Lee Trevino. pushed his tee shot toward

third-oldest major champion the ball deflected off a piece of prickly gorse.

He had just enough room to hammer it up the fairway, and then played a shot rarely seen in links golf — instead of running it up along the ground, he used his quick hands to produce enough backspin to bring it back down a ridge to 6 feet from the hole.

Johnson wins first NASCAR pole of season

LOUDON, N.H. (AP) — Jimmie Johnson gave Hendrick Motorsports a needed bright spot, turning a lap of 133.971 mph Friday at New Hampshire Motor Speedway to win his first pole of the season.

Johnson, a two-time race winner this season, could use a boost following a five-race slump where he failed to finish better than 13th. He has crashed out of his last two races, finishing 35th at Daytona International Speedway and 32nd last weekend at Kentucky Speedway.

He was the lone Hendrick Motorsports driver in the top five.

Hendrick suffered a blow this week when Dale Earnhardt Jr. dropped out of Sunday's race because he suf-

fered from symptoms of a concussion. Four-time NAS-CAR champion Jeff Gordon will drive the No. 88 Chevrolet next week at Indianapolis if Earnhardt is not cleared to return.

Alex Bowman, making his first Sprint Cup start of the season, qualified 20th subbing for Earnhardt.

Johnson, Earnhardt, Kasey Kahne and Chase Elliott have all contributed to Hendrick Motorsports losing drought over the last 13 races. Johnson's March 20th win in Fontana, California, was the last for a Hendrick driver.

Kyle Busch was second, followed by Martin Truex Jr., Kurt Busch and Denny Hamlin.

ww"The car wasn't driving as well as I would have liked it to drive for qualifying," Busch

way to keep it rolling for a win.

His victory burnout was

what matters right now and being able to put up a good lap like that."

Here's what else was going on during Friday's qualifying:

IT'S ON THE POLE

Johnson has 35 poles in 526 career NASCAR starts and first in 29 career Sprint Cup races at New Hampshire. He's a three-time winner at New Hampshire and one of only two drivers to win two straight times on the track. Johnson has nine top-10 starts this season.

TESTING, **TESTING**

Earnhardt, Denny Hamlin, Ricky Stenhouse Jr. and Aric Almirola were the only drivers to participate in a twoday Goodyear tire test last month at New Hampshire.

"The fact that Dale tested

said. "But good speed, that's time, I have four stickers on my car and that is about it," he said.

BOWMAN'S START

The 23-year-old Bowman has not raced in the Cup series this season and had no top-10 finishes in 71 starts over the 2014-2015 seasons with BK Racing and Tommy Baldwin Racing. He drives part-time in the secondtier Xfinity Series for Earnhardt's JR Motorsports team.

"I felt like we probably could have qualified a little better," he said. "I probably didn't do the best job I possibly could have and we got a little too tight off. Everybody at Hendrick Motorsports has worked really hard on this thing. Obviously, I hope Dale is feeling better

"It's been a crazy 24 hours. I'm ready to go take a nap, eat some food and relax a little bit until tomorrow."

Is everyone sure Gordon

knows he might be driving

next weekend? Gordon is in

France this weekend, which

ruled him out for a potential

"Somebody better call him,

I think he's in the south of

return at New Hampshire.

FINDING GORDON

MOORE

which back then was in the SEC, or Clemson.

Calhoun residents Jimmy Mathews and Henry Malone ers, and helped lead Moore to the ACC school, but it was a face-to-face meeting between Moore's Dad and Howard that sealed the deal.

"I wasn't leaning toward Clemson because they were a single-wing team, and I wasn't a single-wing back. Daddy went up there with me and met Coach Howard. Both were country gentleman. Daddy chewed tobacco, coach offered him some about 11 years ago. and they became big buddies. Clemson gave me a full scholarship."

The former Clemson football player's college career the start of the Korean War, but he was still able to play football for Camp LeJune, where his squad won the Military Electronics Bowl. Navy Academy Prep School, and was on the squad that beat Army.

"Back then, service football was just as competitive as college football because you had so many All-Americans doing their service time by playing ball for the different bases," he said.

Once he was discharged from the Marines, Moore was again able to concentrate on his football career student at Georgia Southern. at Clemson, and like in high school, he put up some impressive numbers.

Atlantic Coast Conference record for most punt return yards in a game.

In his final contest with the Tigers, Moore ran for 153 yards and averaged 30.4 yards per carry. He also had a 78-yard punt return for a touchdown.

He stayed in shape by competing on the Clemson track and a place I am proud of." and field team, where he participated in the broad jump and low hurdles.

After graduating from Clemson, Moore married Marcia Poole, the daughter of Clemson University President Dr. Robert Poole, who served from 1940-1958.

1955.

sary for me to travel a good resident and former Northbit, so the responsibility for gate standout linebacker raising the children was James Skalski to a scholarmostly hers, and she did a ship in February. great job," he said. Moore majored in Dairy Sciences at Clemson and went on to serve as an executive with several companies in that industry.

His career resume is as impressive as his athletic accomplishments.

While working for Searcy were big Clemson support- Ice Cream Company, he came up with the formula for the first fat-free, sugar-free ice cream.

He worked for the W.I.C. program where he helped the government develop nutritious products for the elderly. During his career, he

developed the formula for Freshens Yogurt and Smoothies.

He stayed active in the business before retiring

Their first daughter, Margie, was born in 1958 and is also a Clemson graduate. Her husband, Steve, is a Captain with American Airlines, and was interrupted briefly when their daughters are also in he served in the Marines at the airline industry. Sara is a first officer with Go Jet and Kristi is a flight attendant with American Airlines.

The Moore's other daughter Marcia was born in 1959 He also played briefly for the and is a Columbus State graduate. She works for a dentist in Mount Pleasant, S.C. Marcia's son Hugh works for his father's business, and her daughter Marci is training to be a flight attendant.

The Moore's son, Kenny, was born in 1966 and is also a Tiger, but an Auburn Tiger. Kenny, who met his wife Chris at Auburn, works in his father-in-law's business. Their daughter, Rachel, is a

Through the years, he has been involved in the Kiwanis Club, Junior Achievement At one time, he held the and Fellowship of Christian Athletes.

Moore stays active by playing rounds of golf at the Newnan Country Club as much as possible.

Moore still keeps up with Clemson football and tries to get back to campus as much as possible.

'It's a beautiful campus,

He was excited to follow the Tigers' success last season when they went 14-1, losing to the University of Alabama, 45-40, in the national championship game.

Clemson was ranked second in the final Associated Press college football poll The two met at a YMCA last season, and is expected dance and married when to be in the hunt for a when Moore graduated in national title again this year.

because when we go home we are really focused on that. It's not just driving, it's our whole organization as a family."

The 26-year-old driver appreciates their confidence and guidance, but he admits it can be overwhelming.

"My grandfather does a great job. My dad though, when it's a tough situation I go to him because I know he is going to give me honest things it's just sometimes the approach isn't always right," Austin Dillon said.

"That happens with most father-son combos. But as we grow and success comes, as it's came in the past they go away. It goes like this in racing. It's hard to have that, but the good thing is I have a to thinking in the car, Brad family that cares."

Keselowski finds good balance between MPG, **MPH**

wBrad Keselowski's Ford started to sputter with two day's race at the Kentucky Speedway, but he found a

on fumes, and he wound up needing a tow truck to get to Victory Lane.

"Did I think I was out? Yes, I thought I was out, and I did not think I was going to win the race based on what I felt in the car," Keselowski said.

While he's careful not to give away any secrets, some believe he has a better grasp on how electronic fuel injection works. He understands the balance between easing off the gas pedal and working the brakes. It's even been suggested he turns the engine off in the corners.

"He's still able to do it, so it could just be his driving style in general that works really well when you need to save fuel," crew chief Paul Wolfe said. "When it comes is really good. He's really intelligent and thinks a lot about what's going on and is able to react and stay calm. I think that's key in situations like that is being able to stay calm and stay focused and laps remaining in last Satur- that's definitely one of Brad's strengths."

here, it makes (his absence) a larger issue," Johnson said. "Those face-to-face conversations are so much more important than reading notes. We're going to miss that part, for sure."

Q1: How important are bike trails/walking paths in Sharpsburg?

- Slightly important
- Other (please specify)traffic is too dangerous on main roads. neighborhoods and back roads still safe and easy to
 walk. maybe expanding the area near the recreation area to include trails and published activities for residents of
 Sharpsburg.

Q2: How important is economic development in Sharpsburg?

- Extremely important
- Other (please specify)Brings jobs and revenue while keeping it mostly on the main roads. While our communities still remain peaceful and serene with the wonderful feeling of living in the country.
 Q3: How important is Main Street Beautification?
- Very important

- Other (please specify)The picture when the city is googled looks scary. Would love something like the picture when I googled marietta. Nice landscaping. I love landscaping. Could be a community project added to the budget Q4: How important is the Sharpsburg public library?
- Very important
- Q5: How important is adding new commercial businesses (i.e. Taco Bell, Ingles) in Sharpsburg?
- Extremely important
- Other (please specify)Shopping Center at Fisher- Dave and Busters, Kohls, Burlington Coat factory, Old Navy, Payless Shoes

Q6: How important is promoting tourism in Sharpsburg?

- Slightly important
- Other (please specify)too small Q7: How important is it to address abandoned and dilapidated housing in Sharpsburg?

PAGE 1: Community Survey Q1: How important are bike trails/walking paths in Sharpsburg?

- Very important
- Other (please specify)Pedestrian and bike pathways are important for interaction will others as well as alternative transportation.

Q2: How important is economic development in Sharpsburg?

- Very important
- Other (please specify)Economic development with long term goals for preserving the unique character of Sharpsburg without compromising quality.
 - Q3: How important is Main Street Beautification?
- Moderately important
- Other (please specify)Senoia sets a good example for preserving old trees and semi-hard surface paving in their parking lot.
 - Q4: How important is the Sharpsburg public library?
- Very important
- Other (please specify)High levels of literacy contribute to higher economic standards by fostering a well-informed work force.

Q5: How important is adding new commercial businesses (i.e. Taco Bell, Ingles) in Sharpsburg?

Not at all important

• Other (please specify)Do we really want to look like an interchange along the interstate? Locally owned businesses are going to put local people to work and keep the revenue in the local economy. Let's aim for quality growth, not popular.

Q6: How important is promoting tourism in Sharpsburg?

- Moderately important
- Other (please specify)Tourism is only one facet of economic development. Local events, festivals, lecture series, entertainment, and historical sites are all good draws for the local economy.
 Q7: How important is it to address abandoned and dilapidated housing in Sharpsburg?
- Very important
- Other (please specify)Unused buildings can be renovated is worth preserving. If not, tear them down and replace them. Require new construction meets high standards for quality materials and architectural design.
 Q8: How important is improving water and obtaining sewer in Sharpsburg?
- Moderately important
- Other (please specify)Traditional retention ponds are usually unsightly and surrounded by a chain link fence. They could be assets if planted with native species (grasses, irises, etc.) and built to attract water fowl. Perhaps a walking paths around a retention pond are an option. For the long term, sewers should be a priority and put in place NOW while land is cheap, ROW's are fairly open, etc.

Q9: How important is expanding recreational opportunities (i.e. new playgrounds, ball fields, pocket parks) in Sharpsburg?

- Very important
- Other (please specify)Parks accessible by walking and biking, and that are part of the commercial development would be ideal. Mixed use development (retail ground floor, housing above), residential mixed with commercial. How nice it would be to grab a cup of coffee while walking to the park. A park that requires a parking lot does not foster personal interactions the way a pedestrian park does that is bordered with small shops and cafes.
 Q10: How important is providing services to Senior Citizens in Sharpsburg?
- Extremely important
- Other (please specify)Addressing the needs of our older citizens and including those needs in the planning processes will allow them to be active participants in community life. We will be their ages soon enough and want to preserve quality of life for all ages.

 Q5: How important is adding new commercial businesses (i.e. Taco Bell, Ingles) in Sharpsburg?
- Not at all important
- Other (please specify)Again, people and tourists will come and spend money in a quanit little "destination" town like Sharpsburg. I believe the time is ripe for the little buildings to be rented out again for antique and gift shops..photography, cafes, etc.
 Q6: How important is promoting tourism in Sharpsburg?
- Moderately important
 Q7: How important is it to address abandoned and dilapidated housing in Sharpsburg?
- Moderately important
 Q8: How important is improving water and obtaining sewer in Sharpsburg?
- Moderately important
 Q9: How important is expanding recreational opportunities (i.e. new playgrounds, ball fields, pocket parks) in Sharpsburg?
- Slightly important Q10: How important is providing services to Senior Citizens in Sharpsburg?
- Slightly important

PAGE 1: Community Survey

Q1: How important are bike trails/walking paths in Sharpsburg?

- Extremely important
 Q2: How important is economic development in Sharpsburg?
- Extremely important
- Other (please specify)It is very important to me to see LOCALLY owned small businesses that support the community and Sharpsburg's unique character. Jobs are important, but the last thing I want to see are more dollar generals and walmarts that make Sharpsburg like any other developed place in the country.
 Q3: How important is Main Street Beautification?
- Extremely important
 Q4: How important is the Sharpsburg public library?
- Extremely important
 Q5: How important is adding new commercial businesses (i.e. Taco Bell, Ingles) in Sharpsburg?
- Not at all important
- Other (please specify)We need locally owned businesses. We are surrounded by towns with chain amenities such as Taco Bell.

Q6: How important is promoting tourism in Sharpsburg?

- Extremely important
- Other (please specify)Just look at Senoia. Right now because there is not much to offer us is sharpsburg, we treat Senoia as our hometown.

Q7: How important is it to address abandoned and dilapidated housing in Sharpsburg?

- Extremely important
- Other (please specify)There must be a way to beautify and fix up old houses, but also accommodate those who do
 not have the funds to fix up their house.
 Q8: How important is improving water and obtaining sewer in Sharpsburg?
- Extremely important is expanding recreational opportunities (i.e. new playgrounds, ball fields,
- Q9: How important is expanding recreational opportunities (i.e. new playgrounds, ball field pocket parks) in Sharpsburg?
- Very important
 - Q10: How important is providing services to Senior Citizens in Sharpsburg?
- Very important
- Other (please specify)It is very important for a community to support its elders, but there must be a balance of services for all ages to encourage a community with a diversity of ages. I do not want Sharpsburg to become a retirement community. We need young families that want to contribute to the longevity of a community.

PAGE 1: Community Survey Q1: How important are bike trails/walking paths in Sharpsburg?

- Extremely important
 - Q2: How important is economic development in Sharpsburg?
- Moderately important
- Other (please specify)Development should focus on local small businesses and encourage entrepreneurs. I would NOT like to see more strip malls with chain stores or fast food.
 Q3: How important is Main Street Beautification?
- Extremely important
 Q4: How important is the Sharpsburg public library?
- Slightly important
 Q5: How important is adding new commercial businesses (i.e. Taco Bell, Ingles) in Sharpsburg?
- Slightly important
- Other (please specify)Not fast food or chain stores. Create spaces for people to open up their own businesses. Q6: How important is promoting tourism in Sharpsburg?
- Very important
- Q7: How important is it to address abandoned and dilapidated housing in Sharpsburg? • Very important
- Q8: How important is improving water and obtaining sewer in Sharpsburg?
 Extremely important
- Q9: How important is expanding recreational opportunities (i.e. new playgrounds, ball fields, pocket parks) in Sharpsburg?
- Extremely important
- Other (please specify)Green space would be nice. Playgrounds are a great community focal point. Also preserving some natural areas with trails would be great.
 Q10: How important is providing services to Senior Citizens in Sharpsburg?
- Moderately important
- Other (please specify)I would like to attract young families with kids so the economic security of our town is insured for the long term.

The ultimate goal of the CTP Update is to develop a plan for a comprehensive transportation system that improves mobility, connectivity, and safety for the efficient movement of people and goods within and outside of Coweta County.

Introduction

PLANNING PROCESS AND PURPOSE

In 2005, the Atlanta Regional Commission (ARC) initiated a program to encourage counties and their municipalities to develop joint long-range transportation plans. Coweta County and the municipalities of Grantville, Haralson, Moreland, Newnan, Senoia, Sharpsburg and Turin completed a *Joint Comprehensive Transportation Plan* (CTP) in 2006. The jurisdictions came together again to complete the Joint CTP Update, which was initiated in October 2012 and completed in December 2013.

Building on the 2006 CTP, the Update assesses changes in demographics and transportation conditions over the intervening seven years in order to identify transportation needs and prioritize a suite of multimodal projects and strategies to meet those needs through year 2040. During the update process, Coweta County coordinated with other planning partners, including adjacent counties, the Georgia Department of Transportation (GDOT), Georgia Regional Transportation Authority, (GRTA), Three Rivers Regional Commission (TRRC), and ARC. A CTP serves several important purposes. First, it provides a means of tying growth to infrastructure, pacing transportation improvements to when the growth actually occurs. It is a guide for ensuring the transportation system that needs to be in place to support existing and future growth is known and used when preparing project programs and funding. It also relates proposed improvements to "real world" funding availability. The CTP furthers the relationship between planning and programming at the local, regional and state level. The CTP Update process included a review of transportation and related plans and programs completed and/or adopted by the County and its jurisdictions over recent years. This provides for continuity in planning efforts, community goals, and desired results.

STUDY AREA

The CTP study area, shown on the next page, includes all of Coweta County and its seven municipalities. The City of Palmetto, located in both Fulton and Coweta counties, conducts its planning primarily with Fulton County and as such was included in the recent *South Fulton CTP*. A "buffer" area stretching several miles into adjacent counties ensured consideration of transportation conditions in areas that directly impact one another.

Coweta County Joint CTP Study Area

Vision & Goals

OVERALL CTP VISION

The vision can best be defined as how the community sees itself in the future and the role of the transportation system in achieving its ideal. At the start of the transportation planning process, it is necessary to develop an overreaching "community vision" that guides goals and objectives, and eventually, transportation project needs. Together, the vision and goals create a means of identifying and monitoring county transportation system performance and needs.

The CTP update effort began by relooking the vision and goals established during the 2006 CTP. Through coordination with staff representing Coweta County and its jurisdictions, as well as input from stakeholders, the 2006 CTP's vision and goals were revised slightly so as to be more reflective of current conditions. The overall vision of the Coweta County Joint CTP Update is highlighted at right.

Coweta County will strive to develop a comprehensive transportation system that improves mobility, connectivity, and safety for the efficient movement of people and goods within, into, and out of Coweta County.

It will support economic development through enhanced access to job centers and other destinations, and will improve the operational efficiency of the existing transportation system through investments that are coordinated with local land use plans and policies.

The transportation system will provide multiple modes including public transit, multi-use trails, sidewalks, and bicycle lanes as viable alternatives to the automobile, and will focus on commute alternatives such as additional public transit, carpools, and vanpools for the citizens of the County and its municipalities.
CTP UPDATE GOALS

The goals, objectives and strategies are:

1. Promote coordination of land use and transportation

- Integrate transportation and land use planning
- Limit/control access and development that will negatively impact transportation corridors

2. Support economic and community development

- Develop a transportation system that supports the highest quality sustainable growth and new development opportunities
- Adopt appropriate policies, standards, and guidelines related to transportation system safety, access, efficiency, and sustainability
- Leverage transportation improvements to opportunities to attract businesses to the community

3. Improve accessibility, connectivity, and safety, for the movement of people and goods

- Assure the preservation, maintenance, and operations of existing multimodal transportation system
- Ensure adequate mobility and access to job centers and new development
- Promote improved freight movement to industrial parks and the interstate
- Prioritize and improve transportation corridors
- Improve east/west connectivity
- Create a distributed network that improves interconnectivity of major travel corridors
- Promote alternative modes of transportation to improve quality of life, air and water quality, the visual character, and foster more livable communities
- Provide mobility options for older adults, persons with special needs, persons with disabilities and zero car households

Goals are the long-term general outcomes of the CTP, consistent with the established vision. They are supported by *objectives* (specific and measurable statements relating to the attainment of goals) and *implementation strategies* (actions undertaken to achieve the goals and objectives).

- 4. Develop a multimodal transportation system that maximizes community and regional support
 - Identify realistic funding opportunities
 - Include a sound financial plan and approach to phasing of projects
 - Preserve and enhance the multimodal transportation system that includes public transportation
 - Provide mobility options for older adults, persons with special needs, persons with disabilities and zero car households
 - Integrate the CTP into the regional and state transportation planning efforts
 - Improve interagency collaboration and communication between Coweta County and jurisdictions within and adjacent to the County
 - Collaborate with federal, state, regional, local, and non-governmental partners
 - Accurately classify roads and address potential infrastructure and land use changes associated with new interchanges on I-85 and other major improvements

5. Preserve and enhance the natural and social environment

- Promote alternative modes of transportation to improve quality of life, air and water quality, the visual character, and foster more livable communities
- Identify and preserve local, rural, scenic routes and state corridors

Community Outreach & Input

ADVISORY COMMITTEES

The Coweta County Joint CTP Update incorporated guidance from three committees: the Stakeholder Advisory Committee (SAC), Technical Advisory Committee (TAC), and Transit Technical Advisory Committee (TTAC). Each committee met three times, at key milestones, over the course of the study. The committees served as a check and balance on plan development in terms of political consensus and meeting the diverse needs of a broad-based constituency.

The SAC represented the larger community, helping to build partnerships and share information with major stakeholders. The SAC provided a continuing forum for direct input into the planning process, focusing on education, exchange, understanding, questioning and clarification.

The TAC included representatives from key transportation planning agencies, including Coweta County, its municipalities, regional planning partners (GDOT, ARC, GRTA and TRRC), and neighboring jurisdictions. It was formed to provide input and guidance on technical aspects.

The TTAC was assembled specifically to support the supplemental *Transit Needs and Feasibility Study.* Conducted simultaneous with the CTP Update, the study's focus was to identify and quantify transit needs and define investment strategies. Committee members represented public transit and human services transportation related agencies in Coweta, including the current operator of Coweta's demand response service, GRTA, ARC, TRRC, Southern Crescent Area Agency on Aging, and the Department of Human Services.

LOCAL JURISDICTIONS

Coordination with local jurisdictions occurred throughout the CTP Update process. Local staffs and officials were an important source of information on current and future land use and transportation system conditions, deficiencies and needs. Local jurisdiction representatives participated in TAC/SAC meetings, one-on-one meetings, small group meetings for local jurisdictions only, and the public open house meetings. Their staffs played a key role in clarifying transportation conditions, needs and improvement opportunities, as well as in responding to comments and questions from the general public. They also provided insight into ongoing and recent studies, including the Newnan Livable Centers *Initiative (LCI) Study* within downtown and nearby neighborhoods and the Town of Moreland's *Blueprints* plan with the Georgia Conservancy.

The Coweta Joint CTP Update incorporated guidance from three committees (the SAC, TAC, and TTAC), local jurisdiction representatives, and the general public.

GENERAL PUBLIC

Public participation is the foundation for any planning effort, and efforts must be made to encourage active and widespread participation. This is especially true with transportation planning, which must take into account different types of users, travel modes, geographic areas, and development patterns.

Public information meetings were conducted at two critical points in the CTP Update process. The County also maintained a web page devoted to the CTP Update on its website, where study materials were posted for review and an email address provided for comments.

An initial round of public meetings was conducted between July 25 and August 1, 2013. Hosted by the County Commissioner for each district, the five meetings were held over three evenings at the East Coweta Senior Center, Central Library, Madras Middle School, Newnan Centre, and Grantville Library. The public was informed of the study process and key findings to date, and asked to comment on the potential projects developed to respond to identified needs. A variety of handouts and maps, a formal presentation with Q&A period, and a comment form were provided. A total of 63 general citizens attended, with 12 comment forms received.

Immediately following the meetings, a "Virtual Public Information Meeting (PIM)" was posted to the County's website. An eight-minute video summarized the key points presented during the actual meetings, including the maps and project lists. People were encouraged to submit comments through an online survey tool during the two-week comment period immediately following the public meetings. A total of 46 people submitted comments online. A final public open house was held on November 7, 2013, at the Coweta County Fairgrounds Conference Center to present draft project recommendations. A brief presentation summarized the study process and recommendations, while project recommendations were identified by project type and geography on handouts and maps. The comment form included a place for attendees to list their top three priorities. A total of 23 individuals attended the meeting, including members of the public, city and county staff, and elected officials.

A summary of all comments received through the public meeting Q&A and comment forms and Virtual PIM online survey are included as appendices to the CTP's technical reports.

Land Use & Growth

A primary goal of the CTP process is to coordinate and integrate land use and transportation. Transportation needs must be considered within the larger context of community dynamics with regards to population and employment trends, land use and development characteristics, and associated factors. Essentially, the needs of the people who comprise the community translate into travel patterns, travel demand, and transportation facility needs. Furthermore, the broader plan for future development described in the local Comprehensive Plans provides a strong basis for projecting future needs.

One of the greatest determinants of transportation need is total population and population density. Transportation needs in sparsely populated rural areas are generally less than those of highly populated areas due to less demand. Coweta County has historically had a rural, agriculturally based economy and community structure, but this has changed dramatically in recent decades. ARC forecasts for 2040 show Coweta at nearly 250,000 in population, which equates to a 95 percent increase above the 2010 population of 127,317. According to projections, population and employment densities will likely continue to grow in the central and northeastern portion of Coweta while the southern and western portion remains less populous.

Coweta's population is concentrated in an area from Newnan northward and eastward to the county lines. In 2010, Coweta's population density was 511 people per square mile in this area, while the rural areas to the west and south had a density of 90 people per square mile.

Coweta County has also experienced growth in employment. However, employment growth since 2000 has been significantly reduced in comparison to 1990-2000 growth and has not kept pace with the rate of population growth. Discussions with local staff indicate the expectation for more aggressive employment growth in coming years, reflecting the community's ongoing efforts to promote additional economic development, particularly in the medical and education sectors.

Although Coweta's established land use patterns generally favor a vehicle-oriented transportation system, the Coweta County Future Development Map recommends that new development concentrate in compact, mixed use and crossroads service centers. These centers, which include the cities and towns, are intended to accommodate a mix of residential, commercial and institutional uses that reduce the need for automobiles and encourage walking and biking. Internal job growth can also positively impact transportation needs since shorter trips have a greater likelihood to be made by alternate modes.

Existing Conditions & Identified Needs

ROADWAYS & BRIDGES

A number of improvements to the roadway network have occurred since the previous CTP, including new/upgraded traffic signals, intersection geometric improvements, and additional capacity through new roadways and widening. While there are some areas where traffic volumes exceed capacity, overall the roadway network continues to operate at acceptable levels of service under existing and projected 2040 conditions. Locations where notable volumes or deficient levels of service exist are within the City of Newnan limits and on major state routes throughout the county, including SR 154, SR 34, and SR 16.

Intersections and roadway segments experiencing operational or safety deficiencies remain a top priority. In coordination with Georgia DOT, bridges are also closely monitored to identify and prioritize any requiring rehabilitation or replacement.

FREIGHT

Freight is a critical element of the transportation system that increasingly imposes significant mobility, safety, economic, and quality of life impacts on the county. Primary truck corridors in Coweta include I-85, US 27 Alt/ SR16, US 29, SR 16, SR 34, and SR 74/85. Several freight issues to be addressed include: funding for maintenance, rehabilitation, and replacement of transportation facilities that carry a majority of the freight in the county; conflict of truck traffic with local commercial and residential traffic; degradation of roads and bridges due to truck traffic; and continued coordination/outreach on ways to improve the existing freight system and allow for positive freight growth in the future.

PUBLIC TRANSPORTATION

Transportation mobility has improved in and around Coweta County since inception of two transit services available to all within the county. GRTA operates the Xpress commuter bus service weekdays between Newnan and Midtown/ Downtown Atlanta. Countywide demand response service is offered by Coweta Transit Dial-A-Ride. The utilization of current transit hints at opportunities to expand the fleet and services.

Coweta County continues to experience growth in employment, medical facilities, shopping centers, educational institutions, public and private services, and recreational amenities. Connecting citizens geographically with economic opportunity centers will be challenging under current conditions, particularly for those seeking alternatives to private vehicles and/or those without access to personal transportation.

The primary transit enhancement needs include:

- Increasing the Coweta Transit Dial-A-Ride fleet to accommodate growing travel demands
- Expanding and connecting local transit service to local and regional activity centers
- Connecting the GRTA Park & Ride Lot via expanded local circulator services

BICYCLE NETWORK & PEDESTRIAN FACILITIES

Bicycle facilities in Coweta have essentially not changed since the previous CTP, although significant work has occurred in planning for expanded bicycling infrastructure. Together, the *Coweta County Bicycle Plan* and *Coweta County Greenway Master Plan* serve as the foundation for future bicycle improvements. Securing capital funds for implementation remains the challenge.

Newer and recently upgraded sidewalks are in good condition, although some older sidewalks have deteriorated. Except in subdivisions and commercial developments, sidewalks are minimal, particularly outside the cities. As a result, the biggest need regarding pedestrian facilities is the need to add them. Additionally, most existing sidewalks in the cities do not meet Americans with Disabilities Act (ADA) requirements. If Coweta County wants to encourage walking, emphasis is needed for more aggressive development regulations and a larger local match to capture additional external funds for construction.

Overall, stakeholders identified safety as the first priority when discussing the needs of bicycle and pedestrian facilities in Coweta County. It was also recognized that the needs of bicyclists are different from those of pedestrians. Finally, the jurisdictions expressed the need for additional sidewalks to connect the gaps in the existing network and link to activity centers, particularly within the downtowns.

LAND USE & TRANSPORTATION

In recent years, Coweta County, Newnan and Senoia have adopted ordinances and development guidelines that promote important aspects of land use and transportation coordination. During this time, development activity has been significantly less than in prior years. As development begins to ramp up again, it will be important to implement adopted regulations, track their effectiveness, and refine regulations based on practical outcomes.

Coweta's *Comprehensive Land Use Plan* encourages growth to develop in a compact fashion and in population centers to maximize efficient expansion of infrastructure.

To realize the *Coweta County Comprehensive Plan*'s goal of concentrating new development in mixed use centers and infill neighborhoods, mobility enhancements will be important. Priority should be given to roadway enhancements complementary to the Future Development Map, particularly within and connecting mixed use and infill areas. Expanded transit service where feasible, as well as bicycle and pedestrian facilities connecting between and within activity centers, will be needed. Coordination of land use, transportation and future expansion of sewer infrastructure, in concert with a sewer service area strategy, can further encourage the desired development outcome.

Recommendations

PROJECT IDENTIFICATION

A comprehensive list of potential projects to address the identified needs was developed and then refined to form a list of recommended projects. The project lists included in the currently adopted 2006 Coweta County Joint CTP, Coweta County SPLOST, and ARC short-term Transportation Improvement Program (TIP) and long-term Regional Transportation Plan (RTP) were the primary sources for existing project recommendations. Due to the long horizon period of many planning studies (often as much as 30 years), only a small fraction of recommended projects are typically completed within the relatively short update interval (every 5-8 years) of a CTP. As such, many recommended but as yet incomplete projects remain viable improvements and are carried forward into subsequent plans. Recommendations included within other planning efforts at the regional, local, and subarea levels are also important resources for project identification.

Stakeholder coordination and public involvement are important resources for project identification.

Combined with background socioeconomic and land use data, the travel demand model utilizes data on current and projected future traffic volumes and roadway characteristics and capacities to forecast current and future conditions across Coweta's entire roadway network. Through this process, locations with deficient operations can be readily identified for further analysis. Crash statistics also indicate locations for which increased safety may be achieved through targeted improvements. However, quantitative data alone cannot provide a sufficiently complete picture of existing and future conditions and needs, so qualitative assessments are also used.

Importantly, the stakeholders' and public's daily experiences using the transportation network can confirm what the data indicates. They ensure that problem areas do not get overlooked and that the community's vision and goals remain at the forefront during the prioritization process.

COMPARATIVE EVALUATION OF PROJECTS

Five key "factors" were used to comparatively evaluate individual roadway and bridge projects. Each factor consists of several "considerations," which helped to highlight relative differences between similar projects.

The evaluation factors tie back to the overall CTP vision and goals, thereby ensuring a continued connection between goals and recommendations.

The factors and their considerations are:

1. Mobility

- Delay/constriction
- Congestion
- Access management

2. Safety

- Crashes
- Bridge condition
- Bicycle/pedestrian interactions

3. Connectivity

- Cross-county/inter-county connectivity
- Subarea connectivity (activity centers)
- "Fill the gaps"
- Transit access

4. Economic Development

- Freight routes
- Improved access to commercial/industrial/ job sites

5. Community & Environment

- Consistent with land use
- In another approved plan
- Access to alternate modes and community facilities

Individual projects were scored for each factor on a low-to-high scale of 1 to 5. As a way for some factors to provide relatively more impact on the total score than others, the factors were weighted from 3 (maximum) to 1 (minimum), as follows: 3=mobility and safety; 2=connectivity and economic development; 1=community and environment. When complete, a project's total score ranged from 11 to 55, with higher scores indicating relatively greater need for the project.

This scored approach to project evaluation was a primary input to the prioritization process for roadway and bridge recommendations. However, additional knowledge gained from local staff and professional experience, stakeholder coordination and public outreach also played an important role in project prioritization.

This type of scored evaluation was not conducted for freight, bicycle/pedestrian, or transit recommendations. There are a number of reasons for this, several of which are: (1) prioritization and implementation may primarily be done locally by the county and the towns/ cities; (2) funding limitations and schedule requirements necessitate extreme flexibility in project selection and initiation, and (3) other regional considerations and partners are involved.

ROADWAYS & BRIDGES

The list of proposed roadway recommendations includes projects to improve the safety and operational efficiency of the roadway network while decreasing congestion. Projects are categorized as follows:

- Capacity Additions = 18
 - New Interchange (I) = 2
 - New Location Roadway (N)= 11
 - Road Widening/Capacity (C) = 5
- Operations Improvements = 65
 - Operational Upgrade* (OP) = 25
 - Intersection Modification (M) = 40
- Corridor Improvements** (COR) = 7
- Bridge Upgrades (B) = 30
- Railroad Crossings (R) = 7

N11

- * Examples include safety/shoulder/intersection radii improvements and addition of sidewalks/bike lanes
- **Further detailed analysis required; could include a combination of widening, operational upgrades, intersection modifications and new location roadways

ROADWAY & BRIDGE PROJECT LIST

Note: N/A is shown in the Phase column for bridge and rail crossing projects because those projects are prioritized and selected for funding based on safety and rail crossing programs administered by GDOT.

FREIGHT, RAIL & AVIATION

Freight movement in Coweta predominantly involves trucking and railroads. The CTP's freight recommendations are designed to respond to several specific needs:

- Optimize economic growth by ensuring a balanced and efficient goods transport system
- Provide roadway and intersection facilities that maintain safe and efficient freight access and mobility
- Improve the roadway network to accommodate growing freight transport, delivery and transfer needs
- Minimize the impact of freight movement in environmentally sensitive and populated areas

The CTP freight recommendations are:

- Develop a Local Freight Route Network to include designated State/Regional Freight Routes and other critical freight corridors
- Designate Local Freight Routes as appropriate
 - Hwy 154 from I-85 westward to US 29
 - Collinsworth Road/Weldon Road from I-85 westward to US 29
 - When Amlajack Boulevard Interchange is constructed, add Amlajack Boulevard, Coweta Industrial Parkway, and Hollz Parkway
- When Newnan Bypass Extension is constructed, revise Regional Truck Route Network to add Newnan Bypass Extension from Turkey Creek Road to SR 16 and SR 16 from I-85 to US 29, and remove Turkey Creek Road
- Periodically evaluate Regional Truck Route Network in Coweta with ARC and GDOT
- Continue to monitor at-grade rail crossings to evaluate whether changing conditions in roadway traffic volumes or rail traffic volumes result in greater potential for conflicts
- Upgrade at-grade railroad crossings at key vehicular traffic locations to improve safety and mobility for roadways and rail (refer to Railroad Crossings in the roadway recommendations list for specific locations)

Coweta County Joint Comprehensive Transportation Plan Update Interchange, New Location, Operational Upgrade, and Widening/Capacity Projects (Coweta County)

Coweta County Joint Comprehensive Transportation Plan Update Interchange, New Location, Operational Upgrade, and Widening/Capacity Projects (City of Newnan)

Coweia County Joint Comprehensive Transportation Plan Update Bridge, Railroad Crossing, and Intersection Modification Projects (Coweia County) Strategically located along US 29 and adjacent to I-85, the Newnan-Coweta Airport is a transportation facility that supports economic growth in Coweta County.

The Newnan-Coweta Airport maintains a Capital Improvement Plan (CIP), updated yearly, detailing needed airport improvements. Need and support for the CIP improvements exists, but a lack of available funding has caused delays. The Airport Authority, supported by the County, will continue to apply for funding for their CIP projects in an effort to continuously expand and improve facilities. In addition, the operational upgrades to US 29/US 27Alt from I-85 to Airport Road, included in the CTP's roadway recommendations, supports improved access to the airport.

TRANSIT STRATEGIES

The focus of transit activities was on developing broad "strategies" covering many different service types to increase access to public transportation opportunities. Strategies fall into one of three categories—expanded service, new service, and service coordination and optimization—and include fixed-route transit circulators/shuttles, vanpool/ rideshare programs, and subscription services.

Expanded Services

- Increase demand response service to high demand areas
- GRTA service to Hartsfield-Jackson Atlanta International Airport
- Add park and ride lot at Exit 51 (serviced as part of existing Newnan Xpress bus service)

New Services

- Fixed route/route deviation service— Downtown Newnan to/from intown neighborhoods and Piedmont Newnan Hospital/West Georgia Technical College
- Newnan Trolley shuttle service—Downtown Newnan/Newnan Centre/Ashley Park
- Express connector service—Downtown Newnan/Bullsboro Corridor/Newnan Crossing/Ashley Park, with morning/ afternoon connection to GRTA Xpress park and ride lot
- Circulator service—Ashley Park/Newnan Crossing/Piedmont Newnan Hospital/West Georgia Technical College
- Express shuttle service—Senoia/Sharpsburg/ Bullsboro Corridor/Downtown Newnan
- Shuttle service—University of West Georgia's Newnan and Carrollton (main) campuses

Service Coordination and Optimization

- Mobility Manager
- Private sector partnerships
- Marketing and service referral program

Full implementation of recommended strategies is likely to be accomplished in a phased fashion over the next 15-25 years, with continued assessment of the type and geographical distribution of needs.

The success of current Coweta County Transit and GRTA Xpress services, combined with continuing requests for additional services, indicates the need to expand existing public transit services as warranted by demand.

Coweta County Joint Comprehensive Transportation Plan Update Potential Transit Routes

BICYCLE NETWORK & PEDESTRIAN FACILITIES

Coweta County has undertaken efforts in recent years to expand its bicycle and pedestrian network, most notably through the approved Greenway Master Plan. Bicycle and pedestrian facility recommendations aim to tie together existing and proposed facilities by connecting points of interest and upgrading/rehabilitating the existing network. The focus of the CTP Update's bicycle/pedestrian recommendations is to:

- "Fill the gaps" in the sidewalk network in cities/towns and activity centers
- Prioritize Greenway Master Plan multi-use path segments for construction
- Where feasible and appropriate, evaluate applicable roadway widening and repaving projects using "Complete Streets" criteria to consider adding bicycle lanes/sidewalks
- Install "Share the Road" signage along designated bicycle routes
- Provide for bicycle racks at commercial and industrial developments

Together with these general strategies, the CTP Update recommends 14 specific bicycle and pedestrian projects to improve connections on existing and proposed facilities.

An important consideration for all bicycle and pedestrian facilities remains the safety of the network for all users, whether bicyclist, pedestrian or motorist.

BICYCLE & PEDESTRIAN PROJECT LIST

BICY	CLE & PEDESTRIAN PROJECT LIST
P1	Bike route connection to Chattahoochee
	Bend State Park
P2	Extend existing bike route along Franklin
	Road to Newnan city limits
P3	Rehabilitate non-vehicular use bridge
	over railroad on Bridge Street at Senoia
	city limits (bicycle/pedestrian/golf cart
	use only)
P4	Sidewalks in Moreland between existing
	sidewalks on Railroad and Church Streets
P5	Chattahoochee Hill Country Regional
	Greenway Trail System Pilot Project
	(exact project location yet to be finalized)
P6	Sidewalks along SR 34 Bypass and
	Newnan Crossing Bypass to connect key
	destinations
P7	Sidewalks along Shenandoah Boulevard
P8	Sidewalks or bike paths along Lower
	Fayetteville Road
P9	Multi-use path along SR 34 from Newnan
	to Peachtree City
P10	Sidewalks along Lora Smith Road to
	connect two schools to subdivisions
	along roadway
P11	Sidewalk connection between existing
	sidewalks in downtown Sharpsburg and
	East Coweta High School
P12	Bike route on Gordon Road between
	Johnson Road and Elders Mill Road to
	connect two existing bike routes
P13	Sidewalk connection on Main Street in
	Senoia from Couch Street to Johnson
	Street to connect two existing sidewalks
P14	Sidewalks from Main Street in downtown
	Senoia to SR 16 (Broad Street)

It should also be noted that, although bicycle and pedestrian facility project recommendations from approved local jurisdiction plans are not listed individually in the CTP project recommendations, the CTP supports local jurisdictions' continued development of such plans and implementation of the projects recommended therein as funding becomes available.

Coweia County Joint Comprehensive Transportation Plan Update Bicycle and Pedestrian Facility Projects (Coweia County)

Coweia County Joint Comprehensive Transportation Plan Update Bicycle and Pedestrian Facility Projects (City of Newnan)

Coweta County Joint Comprehensive Transportation Plan Update Bicycle and Pedestrian Facility Projects (Moreland, Senoia and Sharpsburg)

COSTS & PHASING

Costs for all the roadway and bridge project recommendations total an estimated \$673.4 million, broken down by project type as follows:

- New Interchanges = \$70.8 million
- New Location Roadways = \$156.1 million
- Road Widenings/Capacity = \$98.3 million
- Operational Upgrades = \$105.0 million
- Intersection Modifications = \$55.9 million
- Corridor Improvements = \$159.5 million
- Bridge Upgrades = \$26.4 million
- Railroad Crossings = \$1.4 million

Prioritization of projects took into consideration several primary factors, including: nature, degree and estimated timing of need, continuity with adjacent improvements, and anticipated funding levels and sources. Projects were prioritized into three implementation time periods:

- Short-term = 2014-2020
- Mid-term = 2021-2030
- Long-term = 2031-2040

Roadway and bridge projects programmed in the ARC 2012-2017 TIP and Coweta County 2013-2018 SPLOST compose the majority of short-term projects. They include 9 ARC TIP projects (\$104.3 million) and 13 remaining Coweta County SPLOST projects (\$7.3 million), with another 5 projects planned in the SPLOST should sufficient funding become available (\$12.7 million).

An additional 17 projects were prioritized into the "gap" years (2018-2020) remaining in the shortterm period, assuming inclusion in the next ARC TIP or Coweta County SPLOST (if voter approved). These include several key mobility and economic development projects, such as those connected to the new Amlajack interchange, as well as a number of intersection improvements on locally maintained roads throughout Coweta. These 17 projects total an estimated \$90.8 million. The 15 projects prioritized into the mid-term period consist mostly of new/widened roadways and corridor operational improvements on both the Federal/State and locally maintained roadway network. They have a total estimated cost of \$183.7 million.

The long-term projects predominantly include corridor operational improvements across the network, as well as intersection modifications on the Federal/State system. These 36 projects have a total estimated cost of \$94.9 million.

Several types of roadway improvements were not included within this prioritization due to the nature of the project and how they are traditionally funded. This includes the "corridor improvements," bridges (non-programmed only), and railroad crossing upgrades.

As mentioned previously, the 7 projects identified as corridor improvements will require further detailed analysis by the Georgia DOT and/or the ARC to determine the exact nature of the improvement, which could include a combination of widening, operational upgrades, intersection modifications and new location roadways. These projects are all located along SR 16 as it crosses Coweta from Carroll to Spalding counties and including the proposed Southwest Bypass to the west and south of Newnan.

With the exception of any bridge and railroad crossings currently programmed in the ARC TIP or Coweta County SPLOST, it was assumed that all future improvements would be funded under State or regional programs dedicated to bridge upgrades and railroad crossing safety. Georgia DOT maintains a strict monitoring system of all bridges and railroad crossings statewide, and programs improvements as necessary based on need and available funding.

FUNDING

Project funding is categorized into federal, state, and local sources. Locally, SPLOSTs and impact fees are common ways to fund transportation improvements beyond what is available through general funds. Local sources may also include quasi-governmental agencies (school boards/ development authorities) and the private sector (business/community improvement organizations and developers/property owners). Federal, state and regionally maintained programs fund specific types of improvements, ranging from bridges and transit to those focused on air quality and safety.

The only CTP projects with committed funding are those in the short-term ARC 2012-2017 TIP and Coweta County 2013-2018 SPLOST. Funding availability through 2040 remains uncertain at all levels. Because of this uncertainty, assumptions were made based on current funding levels to derive the fiscally constrained plan of projects.

Total estimated funding by prioritization period is:

- Short-term (2013-2020) = \$160.7 million
 - ARC 2012-2017 TIP = \$104.3 million
 - Coweta 2013-2018 SPLOST = \$7.3 million
 - "Gap" ARC (2018-2020) = \$26.8 million
 - "Gap" SPLOST (2019-2020) = \$22.3 million
- Mid-term (2021-2030) = \$131.6 million
 - ARC RTP = \$34.4 million
 - Coweta SPLOST = \$97.2 million
- Long-term (2031-2040) = \$123.6 million
 - ARC RTP = \$34.4 million
 - Coweta SPLOST = \$89.2 million

These amounts assume current sources and levels continue mostly unchanged through 2040. As such, SPLOST funding of \$11.15 million per year was assumed for all but four years through 2040. Although Coweta voters have been supportive of the SPLOST in recent years, those four years allow for occasional breaks between SPLOST periods. Similarly, the ARC funding amount in the shortterm "gap" years equals the 2012-2017 TIP value for federal and state sources only, annualized, for three years. In the mid-term period, ARC funding equals the amount already allocated to the one project currently in the RTP. The long-term period funding assumes the same value as currently allocated in the RTP in those years.

Several additional notes should be made regarding funding assumptions. First, future estimated SPLOST amounts do not account for funding set-asides that some ongoing roadway rehabilitation, striping and maintenance programs currently receive. Additionally, several other types of CTP project recommendations, such as bicycle/pedestrian and transit, are not included in this costing, phasing or funding analysis. Finally, federal/state funding typically requires a local match of no less than 20 percent, which Coweta has funded in recent years with SPLOST revenues.

Achieving funding at estimated levels will require significant efforts on the part of Coweta County staff and officials. Local funding, primarily through the SPLOST, necessitates a continued commitment to ensuring that public funds are spent as efficiently and effectively as possible, and that the citizens are aware and supportive of those efforts and projects. Additionally, lean economic times mean that state and regional funding is limited and highly competitive. Coweta County officials and staff must continue to be proactive in efforts to inform regional and state planning partners of the County's transportation needs and priorities, as well as in stridently promoting the County's interests in the competition for any available funding.

Municipality Snapshots

CITY OF GRANTVILLE

Located on Coweta's southern border adjacent to Troup and Meriwether counties, the City of Grantville has a population of over 3,000 and area of 5.2 square miles. Grantville area projects are:

- Operational improvements on US 29 between LaGrange Street and Griffin Street
- Intersection modifications on US 29 at Lowery Road and Griffin Street at Charlie Patterson Road
- 7 bridge upgrades over the Messiers and Yellow Jacket creeks
- Railroad crossing upgrade on Main Street
- Sidewalks connecting key destinations

CITY OF HARALSON

The small community of Haralson, on the southeast border with Meriwether and Spalding counties, has a population of 166 and area of 0.7 square miles. CTP projects in/near Haralson are:

- Intersection modifications to SR 74/85 at Gordon Road and Line Creek Road at Shaddix Road and Main Street
- Additional sidewalk to connect downtown destinations and residential areas

TOWN OF MORELAND

South of Newnan in central Coweta County, the Town of Moreland has a population of almost 400 and area of 0.9 square miles. CTP projects located in and around Moreland include:

- Operational improvements on US 29 between SR 41 and Church Street, and on Railroad Street from Main Street to Harris Street
- Intersection modification at SR 14 and SR 41
- New two-lane roadway connecting from US 29 north of Moreland near the airport to Bethlehem Church Road to the west of town
- Sidewalk to connect the gaps in existing facilities along Railroad and Church streets and link other downtown destinations

CITY OF NEWNAN

The City of Newnan is Coweta's county seat and largest city in both population and size, with more than 33,000 residents and a land area of over 18 square miles. Not surprisingly, a number of CTP projects are located in Newnan and adjacent unincorporated areas of the county. Several key CTP projects around Newnan include:

- New I-85 interchanges at Poplar Road and Amlajack Boulevard
- Additional capacity on Lower Fayetteville Road and Newnan Crossing Boulevard East
- New roadway extensions to McIntosh Parkway and Andrews Street
- Various intersection modifications, including realignment of the Five Points intersection
- Sidewalks and multi-use paths connecting key destinations

CITY OF SENOIA

Located in southeastern Coweta adjacent to Fayette County, Senoia has a population of 3,300 and area of 4.7 square miles. The CTP includes a wide variety of projects in and around Senoia:

- New two-lane roadway connecting the end of Ivy Lane to SR 74/85
- Operational improvements along Stallings Road from Couch Street to McIntosh Trail
- Intersection modifications on SR 16 at Pylant Street, Rockaway Road at Heritage Point Parkway, and SR 74/85 at Seavy Street
- Upgrade the bridge over the rail line on SR 74/85 between SR 16 and Seavy Street
- Rehabilitate the bridge over the railroad on Bridge Street for non-vehicular use
- Railroad crossing improvements along Seavy Street and Johnson Street
- Sidewalks along Main Street and in downtown to SR 16 and other key destinations

TOWN OF SHARPSBURG

The Town of Sharpsburg is located in easterncentral Coweta County, along SR 16 between Newnan and Senoia. It has a population of approximately 341 residents and a land area of 0.6 square miles. A number of improvements are recommended in the vicinity of Sharpsburg:

- Intersection modifications on SR 154 at Old Hwy 16 and at Terrentine Street
- Operational improvements along SR 54, SR 154, and McIntosh Trail to the north and east
- Sidewalks to connect downtown with East Coweta High School and other residential destinations

TOWN OF TURIN

Immediately southeast of Sharpsburg along SR 16, the Town of Turin has 274 residents within its 1.3 square miles. The CTP recommends around Turin:

- Intersection improvements on SR 16 at SR 54
- Further detailed analysis along the SR 16 corridor to determine the best combination of specific improvements
- Sidewalk connections to destinations in downtown and residential areas

CTP Documentation

The Coweta County Joint CTP Update was a 15month study, over the course of which a number of interim and final deliverables were produced. These supplemental study products, listed below, provide more detailed descriptions of study activities, technical analyses and findings. Copies can be requested from the Coweta County Transportation & Engineering Department.

- Project Management Plan
- Public Involvement Plan
- Inventory of Existing Conditions
- Needs Assessment Report
- Recommendations Report
- Final Joint Comprehensive Transportation
 Plan Technical Report
- Transit Needs and Feasibility Study

RESOLUTION OF THE MAYOR AND TOWN COUNCIL OF THE TOWN OF SHARPSBURG

PREAMBLE AND FINDINGS

WHEREAS, the Town of Sharpsburg has developed and completed its updated twenty-year Comprehensive Plan for the period 2016 to 2036; and

WHEREAS, the Comprehensive Plan was prepared in accordance with the Department of Community Affairs Minimum Planning of Standards and Procedures of the Georgia Planning Act of 1989; and

WHEREAS, the Department of Community Affairs and the Three Rivers Regional Commission has reviewed and approved the Comprehensive Plan; and

WHEREAS, a Public Hearing for the Comprehensive Plan was held on Monday, August 1, 2016, at 7:00pm at the Sharpsburg Recreation Center on Main Street in the Town of Sharpsburg; and

NOW BE IT THEREFORE RESOLVED, unanimously by the Mayor and Town Council for the Town of Sharpsburg at a regularly scheduled, open and public meeting of the Town Council held on September 12, 2016, that the Mayor and the Town Council adopt the Updated Comprehensive Plan as per the requirements of the Georgia Planning Act of 1989.

SO, RESOLVED the \downarrow of September, 2016, at the Town of Sharpsburg, Coweta County, Georgia.

APPROVED BY:

TEST: lerk/Finance Officer Donna M. Camp, Town

Wendell L. Staley, Mayor

olg Council Member

Polly A. Garlington, Council Member

Standly D. Parten/Council Member

D. Keith Rhodes, Council Member
